THE WHITE CAP ELECTRIC WASHER

Dealers! Herein lies one of your biggest sales opportunities for Xmas 1922 and for the coming year. Handle the White Cap Agency. It pays.

B&T STANDS FOR BEST

B&T STANDS FOR BEST

The White Cap Washer makes one of the most suitable Xmas gifts. Hundreds of these washers are sold at this time of the year. It possesses certain advantages not to be found on any other washer of its type. The White Cap is the best seller because it is moderately priced and is a strictly high class machine. Its three outstanding features are not to be lost sight of.

The White Cap is Easier to Operate

The White Cap is the easiest to operate because of its mechanism which is the simplest. Only three lever controls! These are conveniently placed on the right hand side of the washer. There is no fly wheel to endanger the safety of the operator. The fly wheel on the White Cap is placed on the left hand side, out of the operator's way.

The White Cap Washes Faster

Women do not lose time washing with the White Cap because it is a labor saver and a time saver. The revolving mechanism inside of tub, swirls gallons of hot water through the clothes 106 times every minute. The 12-inch wringer rolls make 53 revolutions per minute as compared with the average speed of 40 on other washers.

The White Cap Lasts Longer

The construction of the White Cap is unique. All the mechanism is built on a solid one-piece cast iron bed plate which is galvanized. This bed plate rigidly holds the mechanism in perfect alignment. The heart of the machine, which is the motor, is the Canadian General Electric—which is of 1-6 horse power, develops 1-4 horse power in starting. This motor is the best on the market to-day.

Write us for full particulars regarding our White Cap Agency.

Unpeeled Willow ROOT Baskets

Reinforced Bottoms

These heavily made, strongly built Root Baskets have reinforced bottoms that stand up under all manner of rough usage and abuse.

With utmost confidence you can promise your customers long, faithful service from these superior baskets.

Ready to Ship

At our Toronto, London and Hamilton Warehouses we have adequate stocks of these sturdy Root Baskets ready to ship. In November and December the sales of Root Baskets are at their height. Check over your stock to-day, then phone, write or wire for immediate shipment. Sizes—1 bushel, 1½ bushel, 2 bushel and three bushel.

Apple Pickers' Baskets

Real Hickory

No baskets are so suited in their design, strength and long life to the work of apple sorting than these Real Hickory Baskets of ours.

At London Only

Good Hickory Baskets are scarce this year. We have a stock of ½-bushel sizes only at our London warehouse. Write at once for your supply.

Other Meakins Lines

Send in your order for Willow Clothes Baskets—made in 5 sizes. And for our Cocoa Door Mats. These mats are made in our own factory in South India. They are very tightly woven and are to be had in Medium, Heavy, Extra Heavy and Empire Qualities.

GLASS

The Vancouver Block, Vancouver
Glass supplied and glazed by Pilkington

While large orders involving quanties of glass of varied classes emphasize most strongly the significance of our service to contractors the smallest order is of equal significance to us and we give you quick deliveries.

British standards of quality—everything in glass.

THE ONTARIO RETAIL HARDWARE ASSOCIATION

Organized 1906 Incorporated 1922

EIGHTEENTH ANNUAL CONVENTION and EXHIBITION

THE ARMOURIES UNIVERSITY AVE. TORONTO

February 13, 14, 15, 16, 1923

The Exhibition Managers are offering special inducements to make this a BUYING CONVENTION.

Increase in membership during past year, points to BANNER Convention in our history.

PROSPECTUS NOW READY

MANUFACTURERS desiring information regarding Exhibits, will receive copy of floor plan with full particulars, on application to Secretary.

Allotments of booths made in order received. Apply early, as a large number of intending Exhibitors were disappointed at last Convention.

W. F. MACPHERSON, Secretary,
Ontario Retail Hardware Association,
Prescott, Ont.

Manufactured by

The Gray Ball Bearing Co.
Limited

686-692 St. Clarens Ave. - Toronto

OIL CUPS FOR EVERY PURPOSE

No. 53

The No. 53 oil cup is designed for use in a vertical, horizontal or oblique position. Absolutely dust-proof, the cap is fitted with a spring which prevents it from jarring open. Easily operated and cleaned. Made from brass in six sizes. It is also made in a self-closing style, No. 70.

The Empress line of lubricators consists of more than twenty different styles of oilers and thirty types of standard grease cups beside many special styles. We also make spring shackle bolts and dowel pins.

Write for complete catalog and prices.

The No. 77 Oil Cup is an exceptionally strong and well-made cup of the hinge lid style. The cap is easily operated with the oil can spout, closes automatically and cannot jar open or loose; dust-proof; made from steel in three sizes. Also made with a plain nipple for driving into an oil hole, No. 78.

No. 77

Are You Selling Scales?
Then Read This—

We manufacture a complete line of high quality scales.

Our selling policy is to sell through merchants.

Our prices give dealers exceptionally good profits.

Our scales are guaranteed.

Manufactured by

Geo. Brousseau Limited

Quebec **Que.**

Hardware and Metal is the only paper in Canada giving a weekly market service on hardware, metals, paints, varnishes and other lines allied with the hardware trade.

Hardware and Metal is the only hardware publication in Canada with circulation audited by the Audit Bureau of Circulations.

Hardware and Metal is the only weekly hardware paper in Canada.

Order by Name
Sell by Name

When a name means easy sales and quick turnover, that name is no less valuable to the dealer than to the manufacturer.

During fifty years the names of these five brands have come to mean Standard Quality in files.

Cash in on that, Mr. Dealer! Stock one of these standard brands and build up a big file trade.

PNEUMATIC
WATER SUPPLY
SYSTEM

Gives country residents all the advantages of a city water system without the excessive cost

The wide-awake dealer will make big profits out of this system among customers who now have difficulty with their water supply. It is so simple to operate and costs practically nothing for upkeep. The outfit consists of an air-tight steel tank which can be placed in the basement, and a "Myers" famous guaranteed pump (hand or power), suitable for pumping air or water, together with pipes and fittings. Any plumber or gas fitter can easily install it. Every outfit guaranteed to do the work for which it is designed. For small or large dwellings.

Write us for Water System Catalogue and prices.

Now is the time to interest your customers.

THE STEEL TROUGH & MACHINE CO., LTD.
TWEED, ONT., CANADA

Users of these "Quality" Reamers and Cold Chisels are loud in praise of their exceptional quality.

FORSTNER BITS

bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Black and Galvanized Stove Pipe Elbows and Canada Plates.

We have a large stock of the above on hand and can make delivery at once in all sizes, angles and grades.
250 SQUARES OF GREEN SLATE SURFACED 4 in 1 SHINGLES to clear at once special $5.50 per square.
Large stock of galvanized sheets, black sheets, zinc, copper, bolts, rivets, stove pipe wire, dampers, registers, roofing, local vent fittings, expansion tanks, etc.

Order Department, Main 784 and 785.

FLAWLESS WORKMANSHIP

RUBBERSET Shaving Brushes are the product of years of research and experience. "They are as near perfection as possible." Extremely handsome in appearance—the finest material the world's markets afford—flawless in workmanship—made by our original process of setting bristles in pure hard rubber from which the bristles **cannot** work loose. Rubberset Brushes are the standard of the world. In consequence Rubberset Brushes are the easiest and most profitable brushes for you to sell.

Bankrupt by Ounces!

Giving 17 Ounces to the Pound—BANKRUPTCY!

Too many hardware stores lose money every day by giving away goods—via the old fashioned scale route—that way lies bankruptcy.

The last ounce or half ounce of material you give away every time the scale goes down with a bang doesn't get you anything from your customer—not even gratitude!

Ensure the square deal and prosperity, by using the International Dayton Scale—

It has been developed especially for Hardware Dealers and is far and away the most popular scale ever introduced to them. It shows you at a glance the exact weight to the fraction of an ounce, and the exact price to the cent, at any amount per pound. All price calculations are worked out for you on the chart. No mistakes—of weight or price. You get paid for every fraction of every ounce you sell.

Let us send you full particulars of the Dayton Hardware Scale. Sold on easy payments, or discount for cash.

Giving 16 Ounces to the Pound—PROSPERITY!

"TRADE ELASTICA MARK Is One of My Most Profitable Sellers"

Merchants everywhere enthuse over the easy selling and profitable features of Elastica Products.

And no wonder! For Elastica Products are distinctive leaders, known to the Canadian paint-buying community—paints, varnishes, stains and enamels that are made to wear and made to satisfy.

The Elastica group includes such popular sellers as

ELASTICA FLOOR FINISH

The one perfect floor varnish. Made to withstand the hard wear and frequent washing to which floors are subjected.

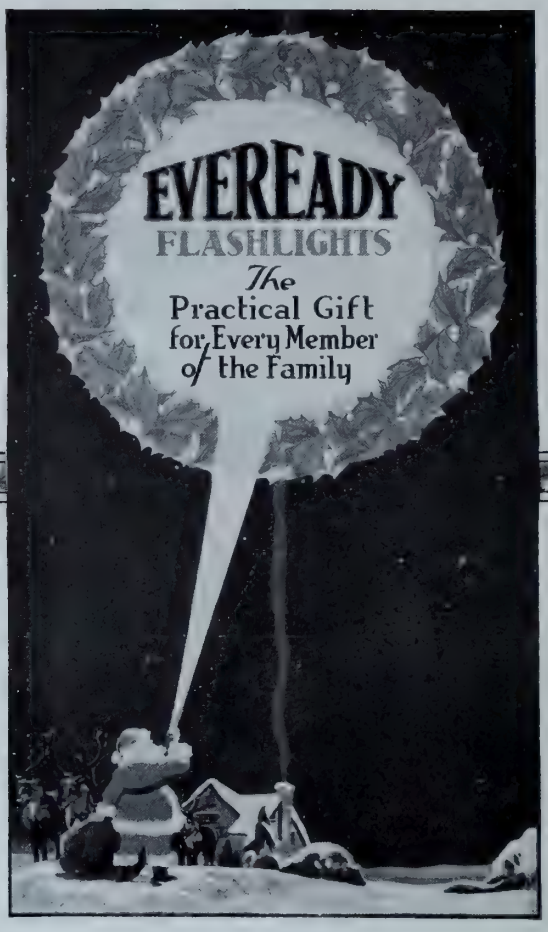
LACQUERET

The popular household Varnish Stain. Full range of shades.

SATINETTE ENAMEL

In white and colors demanded by those who know real enamel value for high-class interior and exterior finishing.

KWICK-WORK AUTO FINISHES



High-grade Auto Enamels in all popular colors.

SMP QUALITY TRADE MARK

If interested tear out this page and place with letters to be answered.

Flaws in the Diamond

YOU know how flaws affect the value of a diamond. But do you know how flaws affect the value of iron and steel? Little spots of impurities make up the flaws in iron and steel.

You can't see these little spots, even with the glass that detects the flaws in a diamond.

Nevertheless, these same spots lead to the complete decay of the metal. When it is exposed to the weather, rust eats its way into the sheet.

That's why it is important for you to use a *rust-resisting* iron.

"Armco" Ingot Iron is rust-resisting. It is commercially pure iron. The "texture" is smooth and even. When galvanized, the zinc coating and the base metal are properly alloyed, with no tendency of the coating to crack, split and peel where the stresses come.

There is no guesswork about "Armco" Ingot Iron. Every sheet is made to the same standard, and all sheets are uniform. You know that whatever you can do with one sheet you can do with another.

You cannot afford to use inferior metals in your business. Your reputation depends on satisfied customers and you can give satisfaction only when you use sheet iron that will stand up under hard service.

Use rust-resisting "Armco" Ingot Iron.

MAKE THIS A "DURO" XMAS IN YOUR TOWN

You can sell these to nearly all skaters

Nearly every skater in your locality needs a pair of these helpful C. C. M. Steel Ankle Supports. Nothing else like them. By means of a very clever hinge and sliding attachment,

C·C·M· Improved Steel Ankle Supports

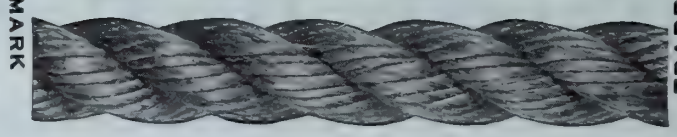
allow the ankle to bend freely forward or backward, but it cannot bend sideways.
These C. C. M. Steel Supports are a great improvement over the ordinary tightly laced supports or straps across the ankle. C. C. M. Supports do not bind the ankle or interfere with the circulation.
Nationally advertised. Sure to sell. Have you sent us your order?

Made by the makers of C. C. M. Automobile Skates and C. C. M. Bob Skates.

Canada Cycle & Motor Company, Limited
Montreal Toronto WESTON, ONT. Winnipeg Vancouver

Selling Hints

C. C. M. Steel Ankle Supports prevent the ankle from turning over.



They relieve the strain on the foot muscles.

They improve the skating.

"Blued" finish—they are inconspicuous on a dark shoe.

Basement Type Paint Oil Battery

Get More Profits from Paint Oils

Handle paint and lubricating oils in the new fashioned way—in tanks and with Bowser Pumps. That's the money-making way, because you avoid waste, check receipts and sales—and make profits a certainty.

Install a battery of Bowser tanks as illustrated—one tank for each oil. Line the Pumps up against the wall, neatly and compactly. Get your oils out where customers can see them, and they will be constantly reminded to buy more.

The Bowser piston-type measuring pumps deliver exactly the amount of oil required directly into the container, eliminating spillage. The evaporation-proof, all-metal construction eliminates leakage and gumming. Thus, Bowser equipment reduces costs, increases profits and insures against fire.

Write for illustrated booklet C-16 and find out how to make **more** money on oils.

A popular new Starrett Tool

Every mechanic will immediately see the convenience of this new Starrett Spring Depth Gage No. 48. A spring in the barrel of the tool automatically forces the rod downward until stopped by the bottom of the hole or recess to be measured. Then a quick turn of the clamp screw locks the rod in position and the gage is set with an instantaneous accurate measurement. Capacity is three inches—base is two and one half inches long (a longer and better base than on the average gage). Both the base and the contact end of the rod are hardened and ground.

Write for Catalog No. 22 M.A. and the Supplement describing the new Starrett Tools.

The Perfect Grip

An ordinary hammer will slice the head off a nail, because it gets a grip on the head and not on the nail. With the head off, it's all off.

Williams' perfectly balanced Hammers will grip the **body** of a nail, and pull it, head and all, clear through a plank. All nails are trailers to Williams' hammers.

Heads on or heads off, for drive or pull, Williams' Superior Drop-Forged Hammers are the bosses in the nail world. Good workmen want them because they fit the hand, are perfectly balanced and are good all through.

1922 Viko advertising started the Viko boom
1923 Viko advertising will send Viko sales soaring

"VIKO has just started"

Just one year of Viko national magazine advertising! 1922 started it.

Yet Viko was an old brand—popular, accepted, respected—long before 1922. Successful, too. We were well satisfied with it, and so was the trade.

Then we started advertising it to women; in magazines which millions of women read; in a striking, impressive style that made women want Viko and *ask* for it. Hundreds of dealers have told our jobbers how powerfully this advertising aided them.

Now we're dating a new Viko era from 1922. *Viko has just started.* With strong advertising support—you'll hear more from time to time about our big program for next year—and with the enthusiastic backing of the trade, we are going to make 1923 a record year of profitable sales for Viko dealers.

Whether or not you have been selling Viko, you will be interested in the future of "The Popular Aluminum." *Ask your jobber.*

No Opposition to Price Agreements if they are not a Burden to the Consumer

Powers of Attorney-General Extended by New Bill So He Can Bring Civil or Criminal Action Where Agreement Exists Which is Not in Interest of the Public—Counsel for Committee Tells Hardware and Metal There is Work for the New Machinery

SO CONVINCING were the arguments presented by manufacturers and wholesalers who opposed the efforts of the Ontario Government to enact anti-combine legislation directly affecting the question of fixed price agreements, that the special committee of the Legislature has allowed the matter to stand pretty much as it was, though a bill is being drafted which will extend the powers of the Attorney-General. A good deal of this argument has appeared in past issues of Hardware and Metal.

Interviewed by Hardware and Metal on the subject, A. W. Roebuck, K.C., who acted as committee counsel throughout the sittings, stated that the new bill now being drafted will provide the Attorney-General with power to take civil as well as criminal action for an injunction to restrain the carrying out of agreements which may not be in the public interest. The law is said to have been interpreted by Justice Orde that the Attorney-General had no such powers, therefore the new bill will cover this point. Mr. Roebuck stated that action against such agreements in the United States is taken by civil injunction.

It was stated that the procedure under the new bill would be as follows: The Attorney-General on receipt of an affidavit that an agreement being not in the public interest is known to exist, will cause the parties concerned to be examined for discovery prior to any action being taken. He will have the right to file application with the High Court ex parte to examine any parties to the agreement or any person who has knowledge of the government and to have documents, memoranda, books, etc., produced before any civil action is taken. In this way, according to Mr. Roebuck, the defendant will have an opportunity of giving all details of the case and if there are sufficient grounds, the offender will be warned of action to be taken unless the practice is stopped. In this way little if any publicity will be given the case because the examination for discovery is held privately with legal representatives the only ones in attendance other than the defendant.

Unanimous Vote for Substitution

The new bill is to be reported at the next session of the Legislature, and it is expected to provide the necessary machinery to assist the department in the measure of regulation and supervision of industrial agreements such as the Attorney-General is desirous of having. The final meeting of the committee this week saw an unanimous vote to make a substitution for the original bill.

Asked concerning the reasons for the action taken, Mr. Roebuck stated that while only those trade representatives who favored the establishment of price agreements gave evidence, the weight of their arguments was such as to prove very convincing of the value of such agreements under certain circumstances. There was a noticeable lack of any co-operative action in favor of the more drastic legislation, there being not a single resolution or favorable expression of opinion in support of anti-combine legislation made to the committee since early in the year when the body took up its duties.

Opponents of the measure gave eloquent and lengthy evidence stating their case against such legislation and their arguments were said to be very impressive, particularly those which showed that certain sales and service agreements were very much in the interests of the public and resulted in a saving of money to consumers.

The Procedure

Outlining the procedure to be followed, Attorney-General Raney states:

"In case a charge is laid against some company or individual, representatives of that company or person will be invited to appear and state their side of the case before anything is done. However, if this representative when called, refuses to produce the agreement, the Attorney-General can get an order from the courts forcing him to do so. If it is then considered illegal the case will be gone on with. It protects the Attorney-General's department."

Asked if the present bill would interfere with a manufacturer fixing the price of his goods, the answer was: "Not if that price is not excessive." Concerning the case of a manufacturer located outside the Province of Ontario doing business in the province, it was pointed out that such manufacturer could be called upon if he were a party to any agreement that became a matter of dispute.

Mr. Roebuck stated to Hardware and Metal that there was a good deal to be said on both sides of this question. There had been much misunderstanding concerning the proposed bill and its effect. The bill as it now stands under revision does not meddle with existing laws, he stated. It simply gives more machinery for the enforcement of the law in the province. He holds that proof that such machinery is needed can be seen in the fact that there has only been a single criminal action along this line for the past twelve years, while there have been three civil actions which resulted in convictions.

Mr. Roebuck stated that as a general rule the English favor

Why Automatic Revolvers Are Banned

Police Authority Tells of Need for Steps to Combat Spread of Crime—Not Desirous of Interfering With Legitimate Use of Revolver, Which Can be Accomplished With Double or Single Action Weapon, But Automatic is Too Dangerous

INTIMATION was made to Hardware and Metal last week by Customs authorities to the effect that automatic revolvers were being denied admission to this country through the regular channels because of the recommendation of the head of the Dominion police force. Discussing the subject with the representative of one of the police organizations which has much to do with maintaining law and order in Canada, the statement was made to Hardware and Metal that the action taken in regard to automatic revolvers is the first step taken to cope with the development of lawlessness and crime in various parts of the country. It has been decided that some such restrictive measures are necessary in order that the work of the police may not be impeded in enforcing the law.

It was pointed out by this official that ninety per cent. of the crime in this country is done with the assistance of a revolver. The balance is largely with the employment of knives. The automatic revolver, significantly, is in the minority as compared with the old type single action weapon and the more modern double action revolver. The two latter are to be allowed to enter the country in future, the restrictions on automatic type revolvers not being extended to them. It was pointed out by this official, that the reason for this is the fact that an automatic revolver is a very much more dangerous weapon in the hands of either a novice or an expert than is the other type. It was explained that the automatic revolver fires a nine-shot clip in six seconds by a very slight repetition of pressure on the revolver. It automatically ejects the cartridge after the bullet is fired. Much of the recoil is taken up in the ejecting of the cartridge and this enables fairly good aim to be maintained while the whole clip of bullets is fired. The double-action revolver works with the cylinder, the principle being that the trigger automatically cocks itself and the cylinder is turned bringing the new cartridge into place. This constitutes the double action. The old single type of revolver is where the trigger has to be cocked after each firing.

Automatic Uses Soft Nose Bullet

One reason the automatic revolver has not been as widely used among those of criminal intent as the other type is that it is more costly on account of its complicated mechanism. The police, equipped as they are with a high calibre double-action revolver with a range of 700 yards, would be at some disadvantage at close range with an antagonist firing an automatic, but as a rule the latter type have not as long a range with accuracy. Another reason why the automatic revolver should be banned, in the opinion of this official, is that 90 per cent. of the ammunition used is that with a soft nose bullet very similar to the dum-dum variety of which much was heard during the war. Such a bullet of small calibre has been known to enter a man's arm and on passing through, to flatten out to the size of a silver dollar, thereby inflicting a very painful wound. This being the case, and it being a fact that foreigners who value life very cheaply are the chief users of revolvers, it is quite apparent that the broader use of automatic revolvers would be a distinct menace to those responsible for preserving law and order as well as to many law abiding individuals.

Legitimate Use Taken Care of

This official was of the opinion that the legitimate ownership of revolvers could well be taken care of with double-action weapons. It was his opinion that there was little necessity for anyone but those in dangerous occupations such as the police, military, night watchmen, bank managers or other business men entrusted with considerable moneys, to have a revolver. In his many years of experience in various parts of Canada it had been vividly demonstrated to him that many murders have been the direct result of someone pulling a revolver in a moment of anger and shooting before second thought. Many such people were carrying revolvers just because they thought they needed them when the only reason they needed them was because there were so many other lawless ones who were carrying them for the same reason. Therefore the police are laying plans for keeping weapons beyond the reach of such individuals as far as possible.

The Automatic Revolver a Dangerous Weapon in Hands of Novice or Expert

It is not expected that this new regulation will have a very widespread immediate effect. There are stocks of automatic revolvers in the country waiting to be disposed of and the possibility of criminals smuggling revolvers in from border cities of the United States was also admitted. It was further pointed out to Hardware and Metal that while a close check can be kept on sales of new revolvers through the permit system and knowledge of shipments moving through customs and from wholesalers to retailers, that there is some business in secondhand revolvers going on which is very difficult to check. Thus an individual may take a revolver to a secondhand store and sell it. That same revolver may be sold the next day to someone else and no permit secured for it because the police have no record.

To Whom Permits Are Given

Permits are granted by the police to those groups aforementioned, and in any other cases where they think the request is a legitimate one. For instance a man of good standing in the community recently asked for a permit to carry a revolver for protection while on a hunting trip for big game in the north country. The police official knew the man was a safe person to carry a revolver and he granted a permit to purchase one, and a permit to carry it for a limited time upon his person. When that time expires the weapon must be kept in the home. No endeavor is made to interfere with the purchase of revolvers to be kept in the home for protection. In fact separate permits are required to purchase and to carry a revolver so that at all other times the revolver must be kept in the home. On this basis the police can make a raid any time in suspected quarters and lay a charge against anyone carrying a revolver without a permit to carry it, irrespective of where they bought it. Sometimes in such raids some defence is made by the suspects. If the automatic revolver is effectively barred the police will therefore not be at the same disadvantage in such cases as would otherwise be the case.

No action is to be taken against stocks of automatic revolvers now held in this

"Receipt Tax Will Handicap Trade"

Says Secretary Dominion Board R.M.A.—Penalty for Person Who Divides Amount Paid With Intent to Evade Tax—What Constitutes a Receipt—Exemptions—Will Hamper Trade

"THIS ACT will give the retail trade of Canada, as well as other interests, a staggering blow when it comes into operation. It will disrupt every cash and credit sales slip and cash register system that is now in existence throughout Canada, and it will add more expense in a great many cases, to the office staff of retail merchants than the amount that will be paid to the government by them in stamps."

The foregoing observations, together with others of like nature, are made in a memorandum on the question of the operation of the tax on receipts which comes into effect the first of January, 1923, which has just been issued by E. M. Trowern, secretary of the Dominion Board, Retail Merchants' Association if Canada.

Special mention is made of the fact that a penalty is provided for the person who separates or divides the amount paid, with intent to evade the tax.

Retailers Should be United

Every retail merchant in Canada is urged to take a deep personal interest in this matter. The Dominion Board feels that the measure should be defeated if possible, and therefore calls upon all merchants to work together and act together under one common direction.

The memorandum follows:

What the Act Requires

According to the Special War Revenue Act which was passed at the last session of the Dominion Parliament, and which will come into operation on January 1st, 1923, upon all receipts of ten dollars ($10.00) and upwards there must be affixed thereto an adhesive stamp of two cents (2c), or, unless there is impressed thereon by means of a die, a stamp of the value of two cents (2c), which is to be cancelled by the person by whom the receipt is given before he delivers it out of his hands. Cancellation shall be effected by the person who cancels the stamp, **writing or impressing his name or initials on or across the stamp, together with the true date of such writing or impressing.**

What a Receipt Means

A receipt means any note, memorandum or writing whereby any money amounting to ten dollars or upwards, or any bill of exchange or promissory note for money amounting to ten dollars or upwards, is acknowledged or expressed to have been received or repaid, or whereby any debt or demand, or any part of a debt or demand, of the amount of ten dollars or upwards is acknowledged to have been settled, satisfied or discharged, or which signifies or imports any such acknowledgement, **and whether the same is, or is not, signed with the name of any person.**

Exemptions

The receipts which are exempted under the Act are as follows:

(a) A receipt for any money deposited in any bank to be accounted for to the person to whose credit the money is deposited.

(b) A receipt or document in the nature of a receipt which is taxable under any other section of this Act.

(c) An acknowledgement by a bank of the receipt of a bill of exchange or promissory note for the purpose of being presented for acceptance or payment.

(d) A receipt for or upon the payment of money paid for any purpose to or by His Majesty for or out of the Consolidated Revenue Fund of Canada or for or out of the Consolidated or General Revenue Fund of any Province of Canada.

(e) A receipt endorsed or otherwise written upon or contained in any instrument liable to stamp duty, and duly stamped, acknowledging the receipt of the consideration money therein expressed.

All Legislation Should be Made Clear

"Sub-section (b) of the exemption clauses is not clear," says Mr. Trowern. "We took it up with the Department but found that no rulings have been made yet. We suppose they mean that when a cheque is received in payment for an article or in payment of an account, that when stamps have been put on the cheque it is not necessary to put them on the receipt. This is another evidence of poor legislative drafting, and we contend that all legislation should be drafted in plain, simple language."

Penalty for Violation

Any person who violates any of the provisions of the above sections of the Act, or who refuses to give a receipt, duly stamped, or who, upon the receipt of a payment to the amount of ten dollars or upward, gives a receipt for a sum not amounting to ten dollars (when the

What Do You Think of the Proposed Receipt Tax?

A detailed memorandum setting forth exactly what constitutes the Receipt Tax which is to come into effect on January 1, 1923, is given herewith. The details indicate that this is likely to be a handicap to the retailer. Some steps should be taken immediately for a single voice to express the feeling of the hardware merchants of Canada on this important topic. Constructive suggestions should be forthcoming.

Read the regulations as they are likely to apply, and then communicate with The Editor, Hardware and Metal, 143 University Ave., Toronto, giving your views, which in turn will be made use of in presenting the retail hardwaremen's side of the case to the proper authorities. Your co-operation is needed in this highly important matter, so write a letter NOW.

actual amount received is over ten dollars) **or who separates or divides the amount paid with intent to evade the tax, shall be liable to a penalty of not exceeding one hundred dollars.**

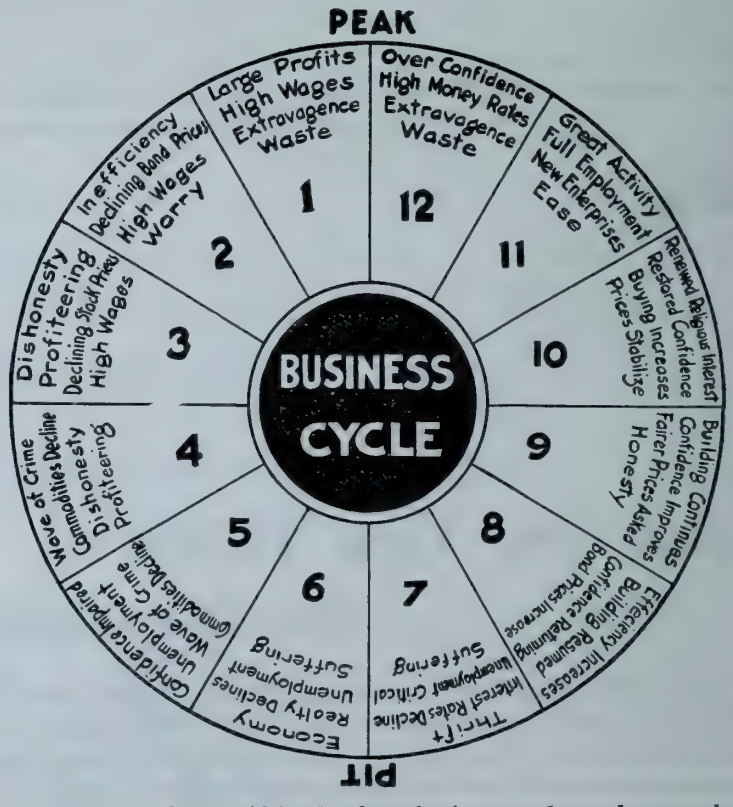
It Will Disrupt Every Cash and Credit Sales Slip

"This Act was passed by the Government on June 27th, 1922, and it will come into operation on January 1st, 1923, if the Government, in the meantime, does not see fit to have its operations suspended, which we hope they will," says Mr. Trowern.

"This Act will give the retail trade of Canada, as well as other interests, a staggering blow when it goes into operation. Only those engaged in the retail trade have any idea of what it means to carry out the provisions of this Act. It will disrupt every cash and credit sales slip, and cash register system that is now in existence throughout Canada, and it will add more expense, in a great many cases, to the office staff of retail merchants than the amount that will be paid to the Government by them in stamps.

"Its operations will cut both ways. In the case of fruit and produce dealers, when retail merchants purchase fruit, vegetables, produce, poultry or eggs, etc., from farmers and market gardeners, it will be necessary for the farmers and market gardeners to carry at all times postage or revenue stamps with them, so that they can place them on the receipts they give to the retail merchants for the goods they sell to retail merchants when they want a receipt for the same. If the farmers and market gardeners refuse to place stamps on their receipts and to cancel the same they will be subject to a fine not exceeding one hundred dollars. Or take the case of a retail merchant who takes a receipt from his employees for salaries received, the employees must also carry a supply of stamps so as to place stamps on the receipts they give for their salaries, and cancel the same, or they will be subject to a fine.

Trade Must Not Be Hampered By Governments



"There are a large number of other illustrations that could be given but the above are sufficient to show that this is another piece of annoying and badly considered legislation, that will not only annoy retail merchants but it will add to the cost of doing business without giving the Government the amount they could secure by a less expensive system, as far as retail merchants are concerned. No effort, as far as we know, was made by the Government to ascertain what effect this complicated system would have on the retail trade; it has evidently been merely recommended by someone unfamiliar with retail trade conditions, and it was then thrust upon us when the budget was brought down, in the most autocratic manner, to take effect on January 1st, 1923. In our opinion, it should be suspended, and as we are an active part of the electorate of the Dominion, every retail merchant should do all within his power to let the legislators of our Dominion Parliament understand that, as loyal citizens, we want to help to pay every cent of our war debt, but we must not be hampered and annoyed in our daily business t ansactions, and be subjected to paying heavy fines. In other words, Governments must be told to keep their hands off business, and allow it to flow as f eely and as rapidly as possible through the natural channels of trade.

All Unnecessary Expenses Should be Avoided

"Before we are asked to pay we should be consulted as to what effect any proposed system would have on our business, as the more unnecessary expenses that are put upon us the more the public will be called upon to pay in the end. Every retail merchant knows that when postage stamps are placed on receipts or cheques, or any other documents, for the purpose of paying our war debts, that it is an unbusinesslike system, as we have been led to believe that postage stamps and Inland Revenue war stamps are for entirely different purposes, and if they cannot be kept separate—and it appears that they cannot—this fact alone should be sufficient to condemn that method of the collection of revenue. The present system of placing stamps on cheques, drafts, notes and bills of exchange is bad enough, and, in our opinion, should be abolished without adding the further annoyance by adopting the same system on receipts.

"This legislation, if it goes into effect on January 1st next, will affect all classes alike—farmers, manufacturers, wholesalers, retailers, bankers, the laboring classes and all municipalities and corporations. We are well aware that the Government wants money to pay our war debts but we want it raised in the least annoying manner, and we consider that when we are made partners with the Government in order to collect it, we should be consulted as to how we think the money should be raised, without disturbing our commercial operations."

Where Are We Now in the Business Cycle?

A great deal has been said lately about business cycles and some advice handed out as to how hardwaremen and others can anticipate them and be guided accordingly. The chart shown herewith has been prepared by a number of business men for guidance as to the development of business. The sequence of the cycles as indicated are arrived at from a close study of all the best authorities on the subject. The author of the chart states that the consensus of opinion among business men is that we are now in either the eighth or ninth stage of the cycle. He himself is of the opinion that we are just passing from the eighth to the ninth period.

Twelve Month Aluminumware Display

Always a Seasonable Call for Aluminum Kitchen Utensils, Says Proprietor of Wyandotte Hardware, Windsor, Ont.—Use a "Special" Each Week and Let Well Planned Display Tables Sell Them Some More Merchandise—Tables for Smallwares

Splendid use is constantly made of the display windows in the Wyandotte Hardware, Windsor, Ont. Paint specialties are being pushed at this time of year and aluminum ware is being extensively featured for the replenishment of housewives' kitchen utensils at this time of year and as Christmas gift suggestions. The effect of the aluminum ware display, built up to the top of the window, is very arresting.

THE Wyandotte Hardware, Windsor, Ont., are great believers in the advertising of their goods and more especially so now that business requires more development than for some time. More attention is given to display in this store than ever before and care is taken that each window display is properly equipped with price cards. The management when interviewed by Hardware and Metal stated that the price cards in the windows were the best means they had of pulling the people inside once that they got them to stop and look.

It has always been a policy of this store to see that aluminum ware was given a prominent place in the store and in the windows. Of the three windows in the store one is given over to the display of aluminum ware the entire year through. A good plan and one that has worked out well in this store is to take one line each week and use it as a "special." This brings the people to the store and gets them in the habit of coming and in many cases when they come in for the "special" it is not hard to sell them some other article as well. A short while ago a coupon was given with every purchase of goods in the store and at the end of a given time the numbers corresponding to the coupons given out, were put in a large jar and a draw made and to the holder of the lucky number a set of utensils valued at twenty dollars was given free. This proved to be a good stimulant to the business and was a success.

While the aluminum ware is being given a great deal of attention it is by no means getting it all, as household hardware is running a close second. Two large tables have been placed immediately inside the front door of the store and on these are arrayed numerous kinds of the small wares that are used in the home. This table has proved itself to be a good arrangement and is to remain a regular section of the store. Smallwares are arranged in groups according to their usefulness in the home so that one rather suggests the other. Prices are clearly shown on all lines. These articles almost sell themselves.

Except during the early spring season when it is necessary to give a great deal of space to the displaying of paint one of the windows are given over to the displaying of mechanics' tools. This is a line that must always be played up if it is to be a success. The city is almost entirely a manufacturing centre and the users of tools are always kept in mind. At the present time the trade in this particular line is steadily increasing as the factories in the Border Cities are constantly extending and continuing to take on more men. These men, of course, need tools, so it is the business of the Wyandotte hardware to sell as many of them as possible.

The Wyandotte Hardware is now being operated by Messrs. C. T. Laird and M. W. Laird, the former being from Regina, Sask. The business was recently taken over from Messrs. Wall & Lefevre.

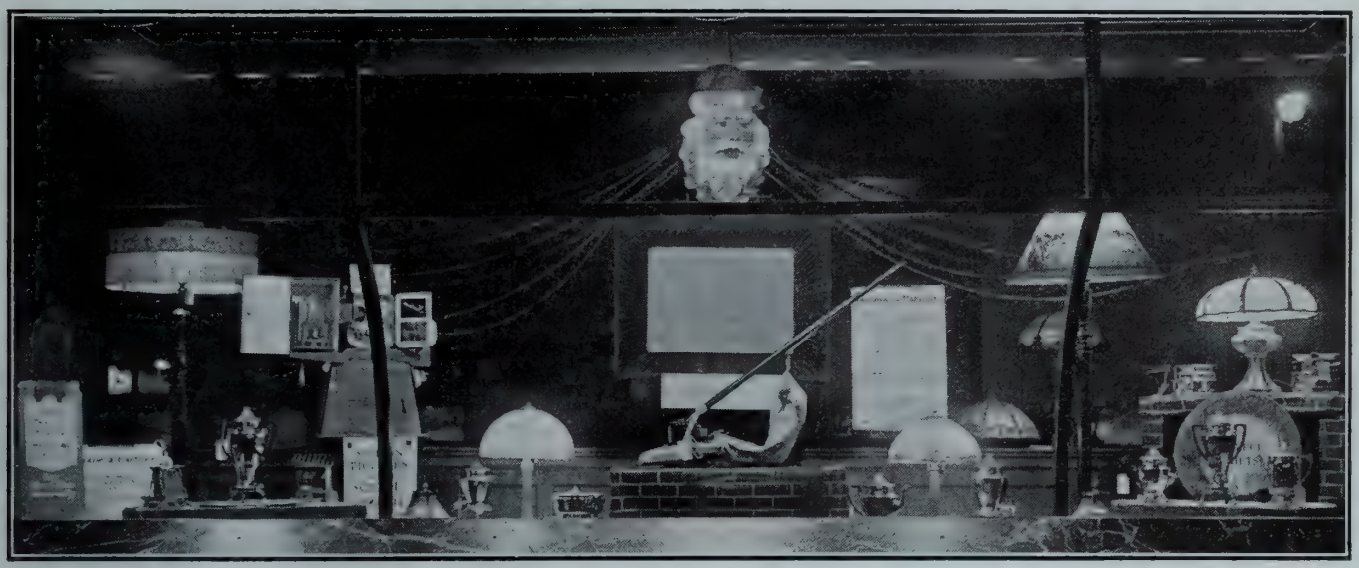
Displays Give First Impetus to Xmas Trade

Retailers' Display Windows Instrumental in Stimulating Early Interest in Xmas Buying and Thereby Increasing Total Volume of Business Done

"DISPLAY windows usually are instrumental in bringing people to the first realization that Christmas is approaching, at least insofar as the purchasing of gifts is concerned. Conversations among friends along such lines as, 'it is only four weeks until Christmas,' or 'just think, Christmas will soon be here again,' may take place long before December first, but no serious thought in connection with the list of presents which must be bought is really given until the merchant takes the initiative by placing a selection on display," said a Montreal hardware dealer to Hardware and Metal.

In Montreal during the last week of November some merchants had already dressed a seasonal window with gifts shown while others had not yet realized themselves that Christmas was only five weeks away. In the former stores the holiday spirit was already in evidence. Sporting goods, cutlery and plated ware, electrical goods and accessories were on prominent display and salesmen were either busily engaged in selling or awaiting customers in these departments, while in many other stores the same sight greeted the eyes of the visitor as would in September or October. Not that good business was not being enjoyed by all stores, for fall trade had been good generally, but as one merchant stated, "we are never so busy that we are not looking for more. If we can add an early Christmas trade to our usual fall business so much the better."

Up until a week or ten days previous to this time the weather had been mild, but it was not until the last week in November that one realized that early winter has really come. It was during this week that certain retailers rushed seasonal goods to the front, and dressed their windows. Sleighs, skis, skates, snow shoes, hockey sticks, etc., replaced football and rugby goods. Although there was neither trace of snow nor ice, a store manager stated that the above goods were commencing to move and their sale became more extensive each day.



Two Months of Winter Sport

A program of winter sports covering a period of two months, from January 6th to March 1st, has been planned for Montreal. During this time it is the hope of the various committees appointed to have the people of the city indulge in sport much more extensively than in recent years, and place Montreal as a real sport city. The program calls for skiing, snow shoeing, toboggan slides, skating, hockey, etc., and the slopes of Mount Royal will again be utilized as in winters before the war.

Many hardware merchants realize what this means to them and are taking advantage by advising people to buy sporting goods for Christmas gifts to friends and relatives so that they may join in the sports a little later. If the public in the city are going in for more sport this winter it undoubtedly means that more sporting goods will be sold, and the question arises, who is going to reap the benefit? It is quite obvious that certain stores will get their share, for they have already put forth an effort, and this will be followed by continued advertising and prominent display.

A strong believer in the effectiveness of plain price tickets on all articles in E. H. Braden who dressed this window for the Otton Hardware Co., Ltd., Barrie, Ont., and won third prize in places over 5,000 population in the 1921 Hardware and Metal Christmas Window Contest. As one side of a double display front, this arrangement was very effective in pulling business. It contains a wide range of suggested gifts, lines which look well in display and prices which will interest nearly every passer-by in some article. Fire irons, coal hods, thermos kits, construction toys, skates, carpet sweepers, vacuum cleaners, electric appliances, kitchen utensils, cutlery, etc., are among the lines shown.

Much of the looking around for Christmas gift suggestions is now being done at night. The hardwareman's windows should therefore be kept working overtime with attractive displays. Some idea of the attractiveness of an electrical goods display both during the day and after dark can be secured from this simple but effective arrangement. Vacuum cleaners, toasters, percolators, portable lamps, chafing dishes, grills, floor lamps, etc., are featured, the lamps casting a soft glow over the whole display.

Some Difficulties With the Cash Business

Alberta Hardwareman Endeavoring to Put Business on Cash Basis Asks How to Deal With Customers Who Insistently Buy Goods and Haven't the Money With Them to Pay—Competitive Merchant Extends Credit Privileges

Editor's Note:—In these days when the cash basis of doing business is receiving much attention at the hands of retail hardware merchants, the experiences of an Alberta hardwareman in attempting to adopt the cash plan, and the answer of a successful "cash basis" hardwareman to the troubles he encountered, are very interesting.

IN answer to a communication from Hardware and Metal enquiring concerning the success of his cash basis plan, this Alberta hardware merchant stated:—

"At the present time we are open for suggestions rather than offering any. On October 1 we started business on the cash basis. We advertised the fact in our local paper and also by certain direct advertising. Up to the present we have had real good success with country trade but we must admit that we have had some very trying experiences. We have not lost one single customer under this plan.

Town Trade Disappointing

"As stated, the town trade has been somewhat disappointing. General merchants, lumber merchants, hotel proprietors and others who have been advocating the cash basis of doing business themselves have in many cases made a complete failure of it, and the belief in it is indicated by the manner in which they send around to our store for goods without the cash. In some cases we have given them the goods and asked them to be good enough to bring in the cash, but this they do not do. In two cases the merchant himself has called and bought small items saying, 'I have not the cash with me but I will bring it next time.' Of course when the next time comes he is in the same boat.

"We have practically come to the conclusion that it will be necessary for us to absolutely refuse everyone any goods without the cash. We know we will lose much of the town trade by doing so but we believe that we will gain more of the farmers' trade by treating them all alike.

"We might also mention that our competitor is not the best to work in harmony with along this line. While he advocates the cash plan yet he has spoken to some of our real good customers saying that we have gone on a cash basis and advising them to come and deal with him. 'I will take care of you and give you all the time you want to pay' he says.

"The local printer who did all our advertising has just been in and bought a 15c article. He says 'you will have to charge as I have not a cent with me.' You can readily see what a merchant is up against when such people insist on you doing a credit business."

Successful Merchant Gives Answer

Discussing the problems of this Alberta merchant with an Ontario hardwareman who has made a good success of the cash business, Hardware and Metal secured some points of interest.

"It would appear from the difficulties outlined that this merchant is trying to do without books entirely," says this Ontario hardwareman. "In our case we advertised that we would maintain accounts for factories, etc. As for individuals, if a man has been a customer for years and we are absolutely sure of his honesty, we do not hesitate to let him have the goods, but we impress on him the fact that our terms are really cash and also ask him the day he will be in to pay. This has overcome any difficulties we might otherwise experience.

Sends Boy With Bill

"As for the ten and fifteen cent local customers, we send our boy with a bill, if they do not show up promptly with the money. Everyone is quite familiar with our terms and we find they do not take any offense at this.

What Retail Hardwaremen Say In Their Advertisements

Excerpts from retail hardwaremen's ads. throughout Canada. Keep this page with your advertising matter. There are some ideas to help you prepare your ad. copy.

"WHAT is Home without a ——— range, furnace, or heater? To say the least the home is incomplete—for this reason it is not a happy one. Why buy an experiment when you can buy this line with a high record? We invite inspection of the largest and finest stock shown anywhere. Prices the lowest, quality considered."—Turnbull & Cutliffe Ltd., Brantford Ont.

* * * *

"Every girl wants a good range on which to do her cooking.—Whether it be coal, gas, electric or oil cooker she naturally wants the best."—Proudfoot's Hardware, Saskatoon, Sask.

* * * *

"The value of a fire-proof roof was demonstrated at the Briscoe Garage fire when the building next, although stored with oils, etc., was not even marred. It will pay you to investigate our fireproof shingles."—Penfold Hardware and Carriage Co., Guelph, Ont.

"Five dollar prize to the hunter who shoots the deer this season that has the largest number of head points. The prize is conditional on your purchasing from us your gun or ammunition. If you have already purchased these from us you are eligible to the prize. Reports must be in by ———."

* * * *

"When you go into the woods take the right rifle with you. Take a rifle that will be sure to get the moose or other big game you are after. A he-man's rifle is a 303 British sporting model. As good a rifle as money will buy. And best of all it costs only $15. We have handsome, handy hunting knives and serviceable axes such as every hunter hankers to own. Ammunition in a splendid assortment and enough to supply every hunter. If you shoot—let's supply you."—James S. Fraser, New Glasgow, N. S.

* * * *

"Entertainment from the air"—is now the popular way to entertain in your home. Wonderful concerts are now being broadcasted daily from numerous stations throughout Canada and United States and with ideal air conditions thousands are enjoying these concerts. Are you among the radio fans who are getting in on these concerts? We have complete outfits from $10 to $200, also a complete line of parts, with blue prints, enabling you to assemble your own set and get excellent results. Expert advice free."—Cowan Hardware, Ltd., London, Ont.

* * * *

"The light to follow twilight in the home. The soft bright glow of the electric table lamp—at once an ornament to the home—with the delicate subdued tints of the art glass shade, lends an air of cosiness and homelike comfort to the living-room during the long fall and winter nights. It is just such a lamp as your home should have. You'll find in our select showing of electric table lamps a comprehensive range of prevailing styles in mahogany, bronze and brass effects, with lovely shades of art glass and of dainty ornamented silk. Then there are tall, stately lamps, dainty banquet and boudoir lamps and bridge table lamps which await your inspection."—W. H. Thorne & Co., Ltd., St. John, N.B.

Save the forests by conserving your fuel. Every extra stick of wood you burn means so much of our forest wealth wasted. There's an easy way to assist the national slogan of Save the Forests and at the same time save money for yourself. By attaching one of our super-heaters to your stove or furnace pipe, gives you double the amount of heat with half the amount of fuel you formerly used."—Lawlor & Cain, Ltd., Fredericton, N. B.

* * * *

"Radio. Many people are availing themselves of the pleasurable pastime of listening in over the radiophone. The church service, the lectures, the vocalists, the orchestras, the dramatists, are of the highest order. For aged people or those shut in we would be pleased to demonstrate in your home the practicability of this wonderful invention. If wanting to build your own receiver our engineer will design a set for you ready to wire for $58, supplying wiring, diagram and complete instructions."—McMurtry's Hardware, St. Thomas, Ont.

* * * *

"It will be worth your while to come in and see our big stock of stoves and ranges if you are planning to get rid of your old cooking or heating stove. No matter what kind of a stove you want you'll find a model here that will suit you perfectly. Every one of our stoves is handsomely made and finished, correctly constructed to heat properly, regulate easily and to be economical on fuel. Get your new stove or range here and you'll get utmost heating and cooking satisfaction."—Adams & VanDusen, Picton, Ont.

* * * *

"Beautiful $200 range given away free. With every cash purchase of merchandise for $5 or over we will give you a ticket which entitles you to a chance on this range. This is the most up-to-date range on the market. You will get full value for your $5.00 and you may get this $200 steel range. Some one will get it. Drawing will take place on Xmas eve. Will you be the lucky one?"—Nelson Hardware Co., Nelson, B. C.

* * * *

"Automobile owners know the value of correct lubrication. We have the proper grade of oil for your car. Call and consult our chart and you can't go wrong. In all grades for car or tractor use. Using cheap oil is poor economy. You use more of it and it does not properly lubricate your engine. Buying oil a quart or so at a time is the most expensive way and you are never sure of what you get. Let us supply you with a four-gallon can, or we will send for your cans and return them filled with the proper oil. It means a big saving to you."—Manville Hardware Co., Prince Albert, Sask.

An Englishman Gives His Views on The Canadian Retail Hardware Business

Comments on Conspicuous Absence of Brass and Copper Goods —Enamel Utensils Are Said to be Splendid—Says Bedsteads and Cutlery Much Below Standard—Central Heating and Fireplaces

EDITOR'S NOTE:—Canadian hardwaremen will be interested in the views expressed in the following article from The Ironmonger. These are the views of James S. Mountford who for many years has held prominent positions in large retail stores in the Old Country, latterly as London manager of Henry Loveridge & Co., from which post he retired in 1920. Mr. Mountford has been on an extended visit in Canada and has just returned to England. He gives some interesting facts relative to what he found in the hardware trade of this country and the U. S. in the following:—

MY experience of goods manufactured in England extends to nearly every branch of the hardware trade, perhaps more especially the furnishing part, and, therefore, I claim to have more than a superficial knowledge of my subject. I may say at once I do not think we have anything to learn from either Canada or U. S. A. in the design or finish of goods, either in copper, brass or tin. On the contrary, they have much to learn from the Old Country.

Unfortunately, I do not remember the names of all the stores that I visited, but among them were the principal ones in Halifax and Montreal, Eaton's and the Hudson Bay Co. in Winnipeg; Ashdown's, the Hudson Bay Co. and all other stores and ironmongers in Calgary. I lived in the last-named city for five months, and had many talks with both proprietors and buyers. I also visited the stores at Banff (in the Rocky Mountains), at Vancouver, and Victoria (on Vancouver Island). In U.S.A. I visited the stores at Seattle, Portland, Salt Lake City, Chicago, Niagara, Buffalo and New York. At Chicago I spent some hours at Marshall Field's, and also a long time at Wanamaker's, Macey's, Gimbel's, and other stores in New York. There were no brass or copper goods, either hammered, repoussé, or engraved, to be seen in either country. There were, however, a few embossed kettles. The largest fancy tea trays were 16 in. long, neither in brass nor copper, but the usual German rubbish, electro-coppered. The only brass or copper goods that interested me were some very pretty cake plates and stands, pierced. Their chafing dishes, almost solely an American production, were also very good, yet they have never found favour in England. Their jardinières were simply plain stampings of very thin metal, and were of the crudest designs. One, 8 in. in diameter, could be held in the palm and blown to nearly the other side of the showroom. The enamel utensils were splendid, and the quantity on show at many of the stores was colossal.

Bedsteads and Cutlery Below Standard

In all cases bedsteads were in black and brass, and all brass; and here I consider the British manufacturer has more than a sporting chance of doing a very large trade. I do not say this solely from what I saw in various showrooms, because similar ones were to be seen in all the palatial hotels in both Canada and U. S. A. These bedsteads were quite crude in design; there was not the slightest attempt made to please the eye, not even in the most expensive brass ones.

The knives invariably used are atrocities. Steel knives are seldom seen, and everywhere knives are supplied with handles and blades either nickelled or silver plated, fit only for cutting butter. If one happened to have a chop or steak in a restaurant and asked for a steel knife, it was forthcoming, but even then it had to be examined carefully to make sure which was the business edge. There was little risk of personal injury either way.

In my judgment the only British manufacturers who are at present making a serious effort to export their goods to Canada are the china and glass manufacturers. Their goods are seen in all the principal stores throughout Canada, and frequently they are given a prominent position in the windows, showing the importance attached to them. I never saw a complete set of either tea or dinner services.

Central Heating and Fireplaces

Central heating is universal throughout Canada, but for quite a time all houses have been fitted also with either one or two fireplaces, usually in the dining and drawing rooms. This practice, I am assured, will continue, and probably be increased in all houses built in the future containing six or more rooms. This provides an opening for British manufacturers of fenders, curbs, brasses, irons and coal-boxes. At present these articles are unprocurable in Canada. While in Calgary—a city of 100,000 inhabitants—I personally tried to purchase a brass curb or fender set of brasses, and a brass coal-box. I tried every store and ironmonger, also all the second-hand dealers in the "Whitechapel" part of Calgary, and, although such dealers are supposed to provide anything required, either in good or bad condition, I could not buy one sample of these articles. The Canadians make shift by turning their carpets under about a foot where the tiled hearths end; for the rest, they "trust in Providence." Often the carpet is scorched by falling embers; sometimes it escapes punishment.

The Departmental Stores

At every store I visited I was given the fullest information and treated with the greatest courtesy, my only passports being the kindly notice given me by The Ironmonger before sailing and my own personality—whatever that may have been worth. I could not have received more attention had I been wishing to purchase the businesses. This attitude was most noticeable at Marshall Field's, of Chicago, and Wanamaker's, of New York. At both of these world-famous houses I spent several hours, and I shall never forget the kindness of the managers. I told both these gentlemen that I was very disappointed, because I hoped to learn a great deal, instead of which I considered that they were 50 years behind the Old Country in variety, design and finish of nearly all the fancy brass, copper and tin goods that I had seen throughout the U. S. A.—electrical fittings and chafing dishes alone excepted.

In both countries their stations and hotels repre-

Is Not Opposed to Price Fixing

ANOTHER case where the evidence of business men has resulted in entirely changing the attitude of governmental authorities is that of the Anti-Combine legislation which the Attorney-General of the Province of Ontario was endeavoring to have sanctioned giving him broad power in connection with prosecution of parties to all sorts of trade agreements. Justice Orde has insisted that the Attorney-General had no such powers and after hearings in connection with the prosecution of certain wholesalers in Ontario a short time ago, a special committee of the Ontario Legislature was appointed to investigate the subject. The evidence of many industrial representatives was taken, all in support of the establishment of trade agreements and the principle of fixing resale prices. The evidence was so convincing that the bill as suggested by the Attorney-General has been considerably re-drafted. The law as it stood remains practically unchanged and the new bill now merely gives the Attorney-General power to conduct either civil or criminal proceedings against offenders, on receipt on an affidavit that price agreements to the detriment of the public are in existence. This gives the Attorney-General power to use the civil injunction against a business firm, similar to the procedure followed in the United States.

It is interesting to note that the government's attitude, as result of the investigation, is not against the principle of price fixing except where such works an undue hardship on the consumer. It has discovered that a fixed resale price can be made the basis of very great service and protection to the consumer, and as such the policy is to be allowed providing the privilege is not abused and this is unlikely to happen in this age of competition.

Circumventing The Pitfalls

IT IS QUITE apparent from a study of the details of the new Receipt Tax, to be enforced on January 1, 1923, that many of its provisions will carry almost the same onerous burden to the retailer as did the luxury tax. Complete details of the new tax on receipts are given elsewhere in this issue. The exemptions are few, the penalties are high and it is provided that any paper in the form of a receipt whether signed or not is to be taxable. This would therefore include counter checks, cash register slips, etc., and the necessity of stamping such receipts would undoubtedly prove a distinct handicap to the retailers' selling effort.

It is evident that various forms of direct taxation are being much favored by the government for the collection of revenue, but it is not in the interests of the country that the regular channels of distribution of merchandise should be cluttered up with detail such as this taxation will provide. Nor would there seem to be any need for drastic action to produce new revenue at the present time. Figures for the first seven months of this year indicate a big increase in government revenue particularly from sales and stamp taxes. The retail merchants figure very largely in producing this portion of the revenue, and should be given some consideration in proposing new impositions.

Authorities on taxation agreed that the weak part of the luxury tax plan was that its collection over the counter interfered with selling and provided an undue handicap to the transaction. If the stamp tax is to be applied to all forms of counter receipts whether signed or not, as is outlined herewith, it will be in the same category. No official regulations have been issued yet in connection with the Receipt Tax, but the information given herewith is based on data secured from government officials who are working on it. It is understood that the English law, which is being followed to some extent in framing the Canadian Receipt Tax, does not require a stamp to be affixed to an ordinary cash transaction over the counter even where a slip from a cash register, or its equivalent, is given. It applies to what are commonly known as receipts where such are the only protection given to the debtor by the creditor. This would therefore not include counter checks which may be given more for purposes of identification in case of exchange or desire for refund, than as a receipt.

There are many such pitfalls as these which the new regulations should seek to circumvent in the interests of the retail trade.

Undermining Business Progress

FIGURES which Hardware and Metal has secured in connection with governmental revenue for the seven months of the fiscal year compared with figures for the fiscal year ending March of this year reveal some very interesting facts. On the basis of revenue for the seven months, the total revenue for this year is estimated at four hundred million dollars, being an increase of eighteen million dollars over last fiscal year.

Of that total sixty-eight millions are from customs, fourteen million from post office, fifty-seven million from sales and stamp tax (an increase of sixteen million), eight and three-quarter million from business profits (a decrease of two million); fifty-one million from income tax (a decrease of thirteen million) and a decrease of five million in other sources of revenue.

It is quite evident from the foregoing that profits from business enterprise have been smaller in volume than last year. This is confirmation of the common opinion as to the trend of business at that time. It is also borne out to some extent by the decrease of thirteen million dollars revenue from income tax.

It must be kept in mind that the sales and stamp taxes, which show big increase, have only been operative since the budget was delivered in May. Most recent monthly returns show that these taxes are showing even greater proportional returns and bid fair to be productive of a very much larger revenue in future.

When the sales tax and stamp tax as now operative are showing such splendid returns and will continue to increase in volume as business expands, would it not be much better to let them carry the load, even if some small increase is necessary, than to apply an entirely new form of taxation which will involve much misunderstanding, handicap to business at a most vital point, and probably require a great deal of expensive administration in the form of checking and inspection?

Events in the Trade

NEW RETAIL STORE

W. S. Bentley is opening a retail hardware store at 5060 Sherbrooke St., W., Montreal.

FIRE LOSS

Dent Bros., Bothwell, Ont., suffered fire loss.

Fire which is supposed to have started from spontaneous combustion in a barrel of sulphur, caused a loss of $250 in the hardware store of Ken Rae at Kingsville, Ont.

INCORPORATIONS

American Chemical Paint Co. has been authorized to carry on the manufacture and sale of paints, oils, pigments, etc., in Ontario with capital of $40,000.

Industrial Lock Nut Co. of Canada, Ltd., head office Windsor, capital $100,000, to manufacture articles of brass, copper, zinc, iron, etc., and deal in hardware specialties.

NOW A CHAIN OF THREE HARDWARE STORES

Ingersoll, Ont.—J. W. Peart of St. Marys, with his business associates, has taken over the building occupied by Mr. Flanders as a stove and furnishings business and about the first of the year extensive alterations will be made to the premises, new fixtures installed and a complete new stock of hardware, stoves, paint, etc., added. This is the third of a chain of retail hardware stores to be opened at St. Marys and Woodstock. It is said that others are to follow.

PERSONAL

C. Craig, of the D. H. Howden Hardware Co., London, Ont., was a visitor at the Toronto office of Hardware and Metal.

At the election of directors of the Chamber of Commerce in St. Thomas this week, George W. Davey was re-elected.

H. Lendon of Leamington, Ont., is one of a committee which is working on a plan to establish a $25,000 community athletic club house.

Col. T. S. Hobbs of the Hobbs Hardware Co., London, Ont., continues to improve after his long illness, but he is not yet back at business.

At the annual meeting of the Tillsonburg Lawn Bowling Club, C. W. Conn was elected treasurer.

L. D. Campbell, vice-president, B. & S. H. Thompson Co., Montreal, is moving to Toronto on December 1 to take charge of the branch office in that city.

W. A. Miller of Revillon Wholesale Ltd., Edmonton, visited the hardware and paint trade in Montreal this week.

George Henderson, president of Brandram-Henderson, Ltd., returned on Friday of last week from England.

J. Cadham, Dominion Cartridge Co., is on an extended trip throughout the Western provinces and will be away from his Montreal office until Christmas.

Two pals of by-gone days in Walkerton, Ont., are Messrs. Sandy McCarter, the hardwareman, and David Heffernan, of Detroit, who revisits the old town now and again. When these two cronies get together many a good yarn passes back and forth and time slips quickly by. A visit from Dave usually means a trip out to Johnny Coyle's in Culross when the three boys, with pipes agoing, forget their worries and snuggle down by the old cook-stove happy as larks.

ORGANIZE NEW COMPANY

The Canadian Postel Lock Nut Company has been organized at Collingwood with F. A. Bassett as president and J. F. Zimmerman secretary-treasurer. The firm plans to manufacture bolts, nuts, screws and rivets.

TO REPRESENT JOBBERS AT TAXATION CONFERENCE

At the joint conference on taxation measures scheduled to be held at the Prince George Hotel, Toronto, on December 5, 6 and 7, between manufacturers', wholesalers' and retailers' interests, the hardware jobbers will be represented by Harold J. Badden, of the firm of Hardy & Badden, secretaries to the Canadian Wholesale Hardware Association.

HEAVY LOSS OF PROPERTY BY BLIZZARD

North Sydney, N. S.—Thousands of dollars' worth of property is represented in the wreck of poles, wires and other appliances used in telegraphs, telephones, wireless and electric lighting, which are spread in ruin at many points throughout Cape Breton. The damage was done by a blizzard carrying heavy, wet snow, which swept over the Island.

The wrecking force of the storm was heavier than has been experienced here for at least 50 years.

WESTERN ONTARIO NOTES

Work is proceeding rapidly at London, Ont., on a new gasoline and oil station for the Imperial Oil Company at the corner of King and Talbot Sts.

An unusually fine window display of Christmas toys and gifts suitable for boys and girls is being shown by the Mills Hardware Co. of Hamilton, in the King St. store this week, and the large volume of business done is an evidence that great numbers of parents are not only interested in window displays but are doing their Christmas shopping early.

HARDWARE FIRM ENCOURAGES SPORT

St. John, N. B.—Each year the sport of Badminton grows more popular in St. John, and more teams or clubs are formed. This is a very popular sport with members of the different churches, and it can be said that W. H. Thorne & Co., Ltd., have done more to develop it than any other party. On their staff they have an expert who has formed many clubs, and as a matter of course, the business has been handled by this firm. Messrs. Thorne's salemen report that the business in this line grows larger each year.

BETHLEHEM CO., BUYS MIDVALE STEEL PLANTS

Eugene G. Grace, president of the Bethlehem Steel Corporation, announced that the Bethlehem board of directors had authorized contracts for the purchase of the plants and other assets of the Midvale Steel & Ordnance Company and of the Cambria Company.

Through the acquisition of the Midvale and Cambria properties, Mr. Grace said, Bethlehem wil acquire plants at Coatesville and Johnstown, Pa., and Wilmington, Del., as well as developed iron ore properties in Michigan and Minnesota and developed coal properties in Pennsylvania.

The ability to distribute and mix the Midvale coal and ores with Bethlehem's present coal and ore supplies, Mr. Grace pointed out, will be of much advantage to both sets of properties, in that operating costs will be reduced. This will give to Bethlehem important lines of steel products which it does not now manufacture, such as wire rods, wire and wire products, steel freight and mine cars, steel wheels, boiler tubes, agricultural implement parts and so forth.

Steady Improvement in Stove Industry

British Columbia Trade Considered to be in Healthy State—Comparatively Few Failures—Not Good Policy for Tradesmen to Buy Beyond Ability to Pay

VANCOUVER, B. C.—Prior to sailing for New Zealand and Australia on the steamer Niagara, Col. W. M. Gartshore, president and managing-director of the McClary Manufacturing Co., London, Ont., spent a few days in Vancouver. He was accompanied by Mrs. Gartshore and their grand-daughter, Miss Cleghorn. The party will visit the southern Commonwealth and will also visit the Orient, planning to return to Vancouver in April next. One of this company's oldest factory branches and warehouses is located in Vancouver.

Interviewed by Hardware and Metal representative on trade and financial subjects while in Vancouver, Col. Gartshore spoke encouragingly of the trade expansion Canada was beginning to realize in trade with the Orient and with the Antipodes. He considered it was results which could be attributed to favorable advertising and the closer knit bonds between the various British overseas Dominions following the war. Foreign trade competition was keen everywhere, but Canadian goods stood in high esteem in the sister dominions. The trans-Pacific countries were much interested in hydro-electric development in Canada, which stood well ahead in all electrical progress. By way of illustration he mentioned the case of a New Zealand representative sent to study electrical development in Canada, and who had placed an order for electric stoves. This very order was going forward on the S.S. Niagara. Ordinarily such export shipments went via Montreal, but as time was essential, the shipment was routed west and a month was saved, the importers receiving their goods in five weeks from the time they left the factory.

Steady improvement in the stove industry had been marked for some months, especially since last summer when it was made practically sure that the wheat crop of Western Canada was a success. At Winnipeg, on his way west, Col. Gartshore said he had been told by a representative grain dealer that the prairie wheat yield would finally total 400,000,000 bushels, of which 300,000,000 would be for export. If the price averaged $1 per bushel, that indicated a very large amount of cash in circulation as a direct result of the 1922 harvest.

Half of his company's trade was west of the Great Lakes, Col. Gartshore estimated, and that was true of many other eastern manufacturers. His observation of the present season was that dealers were not buying beyond immediate needs, which was sound business. It was not good policy for tradesmen to buy beyond their ability to pay. Collections are slower east than west, he thought. British Columbia trade was considered by eastern houses to be in a very healthy state, there being comparatively few failures. Col. Gartshore first visited Vancouver in 1888, when he opened the firm's branch.

COL. H. M. GARTSHORE

HARDWAREMAN HAD BIG INFLUENCE

Petrolia, Ont.—The coming of J. H. Fairbank to Petrolia in 1860 has meant much for the great oil town. Mr. Fairbank, bent on the discovery of oil, came to Petrolia with no money, but as a result of concentrated effort became wealthy. Fifty-two years ago Vaughan and Fairbank opened a private bank in connection with the oil business. The bank had its ups and downs as the oil wells fluctuated. Following the bank's opening Mr. Fairbank, who was really the daddy of Petrolia, went into partnership with Mr. Vantuyl and opened a hardware store. Both the bank and the hardware store are continuing in business at Petrolia. For more than 34 years T. J. Rainsberry has been manager of the store. The estate of J. H. Fairbank is carrying on the business. Dr. C. O. Fairbank, a son of J. H., is still a resident of Petrolia.

News Notes of Western Canada

Empire Paint & Hardware has commenced business in Winnipeg.

S. C. Bright & Son, hardware, Woodrow, Sask., suffered fire loss.

A. MacFarlane, manufacturers' agent, Montreal, spent a few days in Winnipeg on a business trip.

Joseph J. Rapple, of the Tidewater Oil Co., Toronto, was a business visitor to Winnipeg during the past week.

W. L. Potter, sales manager of the Edward E. Johnson, Inc., St. Paul, Minn., is in Winnipeg on a business trip in the interest of his firm.

Winnipeg, Man.—The Third Annual Automotive Equipment Show with radio exhibits in connection, under the auspices of the Western Canada Automotive Equipment Association, W. L. Williams, secretary, Box 3164, Winnipeg, will be held Feb. 5-13.

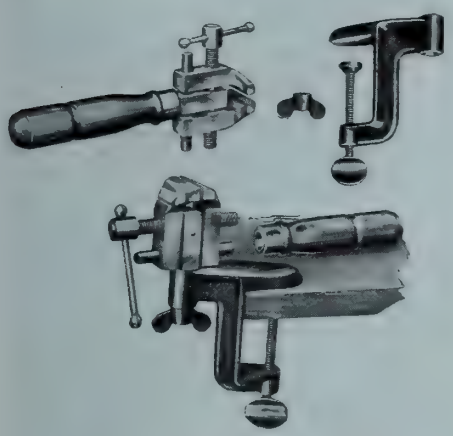
Vancouver.—Electrical and hardwaremen were out in force on the occasion of the second annual dinner and meeting in the Hotel Vancouver, of the Electrical Service League of British Columbia. E. E. Walker, president of the organization, was in the chair.

The trade will regret to hear of the sudden death of Ernest Dykes, senior member of the retail hardware firm of Dykes and Rutley, of Kindersley, Sask. Mr. Dykes has been in the hardware business at Kindersley for practically 15 years and was well known in the trade. A. E. Dykes, general manager of the J. H. Ashdown Hardware Co., Ltd., Winnipeg, is a brother of the deceased.

Attending as the personal representative of Geo. Kidd, general manager of the B. C. Electric, Capt. F. R. Glover, general executive assistant of the railway, said that Vancouver was facing a period of prosperity such as was never known here before. It would not be similar to the booms of other years, he declared, but solid and healthy, out-rivalling other Pacific Coast ports.

Jas. Lightbody, secretary of the League, said that "Electrify" would be the slogan for the coming year. He intimated that a second model electric home, such as was shown here so successfully recently, would be built next year. A satisfactory financial statement was read by the treasurer, H. Pim of the Canadian General Electric. Other short addresses were given by J. R. Read of the Canadian Westinghouse, R. E. Chatfield, W. W. Fraser and W. Saville.

New Hardware Goods



Offered to Canadian Hardwaremen

COMBINATION HAND VISE

The L. S. Starrett Co., Athol, Mass., are introducing a new combination hand vise, No. 86.

The use of a ball end handle for tightening the jaws, instead of a wing nut, is pointed out by the makers. By this means it is claimed more leverage is possible.

This hand vise is furnished with a clamp permitting its use as a small bench vise on benches or shelves having an approximate thickness of ½ inch to 2⅛ inches. Such a change is effected by removing the handle and substituting the clamp. When used with the clamp

Combination Hand Vise

the vise can be adjusted to any point in a complete circle to meet the convenience of the user. The jaws of this vise are tempered and polished drop forgings, 1½ inches in width. The capacity of the vise is about 1½ inches.

An aluminum line level is also being introduced on the market by the L. S. Starrett Co.

"HANDY" ASSORTMENTS

The Anchor brand of "Handy" hardware assortments are being placed on the market by North & Judd Manufacturing Co., of New Britain, Conn. These assortments are put up in two different sizes, the boxes containing divisions with small parts for harness and general repairs. The contents include snaps, dees, buckles, chain repair links, upholstery nails, and automobile curtain fasteners. The cases are intended for counter display service. There are twelve separate compartments in each assortment.

"NEVER-FAIL" INCUBATOR

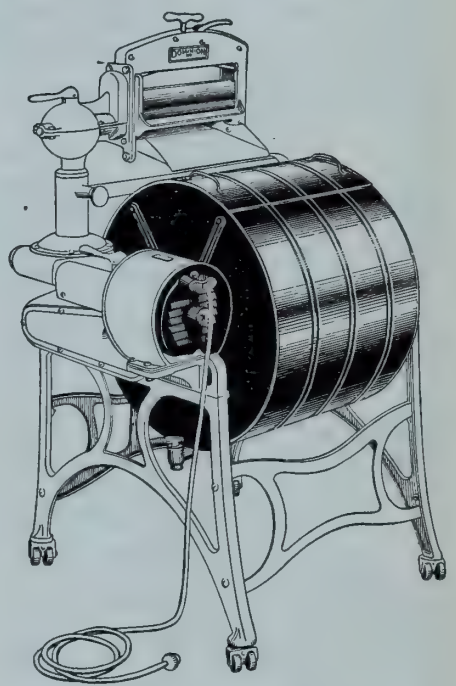
A new electric incubator and brooder is being made by the Collins Never-Fail Products, Ltd., Hamilton. The manufacturers point out that these machines embody a number of improvements.

"Never-Fail" Incubator

Among other features outlined is the even heat always under control, and the absence of smoke or fumes.

DOUBLE-GRIP TIRE CHAIN

The Goddard Double-Grip tire chain is now being distributed by the Motor Truck Accessories Co., Toronto. For installing these chains, the wedges at rim on car or truck are removed and replaced with special wedges which have the extension attached. It is pointed out that



Double-Grip Tire Chain

it is then a comparatively simple matter to equip the wheels with double-grip chains. The road chain, which is the wearing part, can be replaced through opening the split links. The makers also claim that all permanent parts are rust-proof.

DOMINION ELECTRIC WASHER

An oscillating cylinder washing machine is being distributed by the Smith-Stewart Co., of London, Ont., called the "Dominion" electric clothes washer. It is manufactured by the Dominion Motor Castings Ltd., of Windsor. This washer is described as a combination of the cylinder, oscillating and vacuum types. It is pointed out that there are only seven moving parts. They are;—the motor, which is ¼ h.p., the copper tub,

Dominion Electric Washer

the aluminum drip boards, the tub control, the wringer control, the swinging ringer and the safety release. The Dominion electric washer is designed to meet the additional requirements of rural communities in that the copper cylinder can be lifted out and replaced by a churn, which can also be run electrically.

MICROMETER CALIPER CASES

The Brown & Sharpe Manufacturing Co., of Providence, R. I., have prepared a new micrometer pocket case. This is for the purpose of holding and protecting the micrometer caliper from dirt or injury. The case is made of metal, leather covered and plush lined. It is furnished in two styles, No. 202, for the regular one-inch micrometers and No. 203, for the Rex, 1-inch sizes.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

BIRDSELL CLOVER MILL

S. E. Eakins, Millbrook, Ont.—Where can I get the Birdsell thresher clover mill?

Answer.—The Birdsell Mfg. Co., South Bend, Ind. The Canadian branch of this company is at George St., Toronto.

REO COOK STOVE, No. 285

The Bell-Fleming Hardware, Ltd., Grande Prairie, Alta.—Please furnish us with the manufacturer's name and address of the Reo cook stove, No. 285.

Answer.—The Charter Oak Stove & Range Co., Antelope and Condute Sts., St. Louis, Mo.

CLARK'S JEWEL OIL STOVE

A. H. Melvill, Cereal, Alta.—Kindly let me know where I can get Clark's Jewel oil stove.

Answer.—This is manufactured by the G. M. Clark & Co., Chicago, Ill.

The Happy Thought Foundry Co., Brantford, Ont., can supply your requirements.

OAKUM

Lagasse et Manthe, 365 St. Patrick St., Ottawa, Ont.—Kindly advise us manufacturers of oakum.

Answer.—The Factory Waste & Metal Co., Montreal, Que.; John Leckie & Sons, Ltd., Wellington St., Toronto; Scythes & Co., 9 Church St., Toronto; Acme Waste Mfg. Co., Ltd. 486 Wellington St. West, Toronto.

BATHROOM FITTINGS

Saskatoon Hardware Co., Ltd., Saskatoon.—Kindly advise us the name of a manufacturer of bathroom fittings, such as soap holders, towel bars, etc.

Answer.—The Gendron Mfg. Co., Toronto; The Newell Mfg. Co., Prescott, Ont.

ALEMITE GREASE CUP

W. Walker & Sons, Toronto.—Who are the Toronto agents for Alemite grease cup?

Answer.—The Alemite Sales & Service Co., 205 Church St., Toronto.—The factory is at Belleville, Ont.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

C. C. M. ANKLE SUPPORTS

Special advertising matter in the shape of folders and descriptive literature is being distributed by the Canada Cycle & Motor Co., Ltd., of Weston, Ontario, with reference to their ankle supports, bob skates and automobile skates. This seasonal descriptive matter points out the special features of these respective products and are prepared as selling helps to merchants. Copies of same can be secured on application to the above company.

WIRE GOODS CATALOG.

Catalog "B" is now being distributed by the Macdonald Wire Goods Co., Drummondville, Que. This booklet gives complete and detailed information, with illustrations, of lines of their manufacture, which include wire rat traps, root crop and fish baskets, delivery and display baskets, refuse baskets, spout strainers, hen's nests, corn poppers, refrigerator shelves, window guards, desk trays, waste baskets, hook files, horse protective guards, etc. It is also announced that later in the year a new line of fire-place screens and fenders will be marketed in coppered, dead black, and dead black with brass trimmings.

Letters to the Editor

The Editor welcomes letters on any subject of interest to the hardware trade.

Editor, Hardware and Metal:

I feel greatly interested in the remarks signed by "FAIR PLAY" contained in your issue of Hardware and Metal of November 18. The remarks allude to the displaying of hardware to off-set the efforts of pedlars to sell the same class of goods direct to the consumer by house to house canvassing, a nuisance that lately has greatly expanded much to the annoyance of the public and disadvantage of the tradesman, although the latter is to be blamed to a certain extent on account of insufficient interest to stock and display certain lines.

I have pleasure in enclosing herewith a sample of a letter my firm sent in advance of our representative's call, which you will find deals on practically the same points as those put forward by "FAIR PLAY." However, I much regret our efforts in this direction did not meet with expected results, although you will agree the letter is based entirely on the advantages gained by the tradesman in assisting Canadian manufactures financially upheld by Canadian capital.

All I ask to have infinite success, is the combined efforts of the tradesmen to display these goods before the public in order to eliminate this incredible peddling business.

I am quite willing to allow you to use this letter and the copy of circular letter attached for publication purposes if you consider necessary.

Canadian Manufacturer

Copy of Circular.

"Manufacturers in the trade who have always marketed their goods through the stores are finding keen competition from selling agents who are soliciting business from the consumer by house to house canvassing. We are not at all in favor of doing business in this way and prefer, as in the past five years, to give the tradesman the benefit, they being the people who are called upon to pay the larger part of the rates and taxes of the neighborhood.

"On account of the enormous commission required by the canvasser, his prices are consequently very high and we are able to supply the trade at such a figure that the consumer can buy from stores at about half the price required by the canvasser, at the same time a legitimate profit is made by both parties concerned. In forming our opinion of trading by this method, we are studying the connection every tradesman has and the preference his customers would have of doing business with him rather than a stranger at the door.

"In the last five years we have made an enjoyable connection with the trade throughout the Dominion and we shall appreciate the continued confidence and assistance of our clients while this house to house campaign is at its height."

Twenty Years Ago

Following items are reproduced from Hardware and Metal of November 15, 1902:

"P. & F. Corbin, of New Britain, Conn., are making extensive changes in their plant to increase their output."

"A branch hardware store has been opened by A. C. Thompson & Co. at Sydney Mines. A. W. Smith is in charge."

"John S. Durand, of the James Walker Hardware Co., Montreal, was married to Miss Henrietta Morrison, of Napierville."

"Geo. Boomer, of Galt, has accepted a position with the Sherwin-Williams Paint Co. and will travel in the eastern provinces."

"The works of the Canada Horse Nail Co., Toronto, had a very narrow escape from fire when the adjoining building owned by the Department of Canals took fire."

"Wm. S. Gurison, well-known commercial traveller of Charlottetown, who represents Logan Hardware Co., New Glasgow, N.S., has taken up his abode in Lunenburg, N.S."

"F. W. Unitt, of Toronto, who has just died, conducted a hardware business for some years at the corner of Spadina Ave. and Queen St. He was at one time an alderman."

"At a recent meeting at the Windsor Hotel, Montreal, of the Canadian Railway Club a paper was read by Mr. Cowan upon 'Car-Cleaning.' Mr. W. H. Evans, of the Canada Paint Co., followed with a paper concerning the painting of cars."

"Mr. Learmont, of Caverhill, Learmont & Co., Montreal, is making his first visit to Western Canada. He is surprised at the development of Winnipeg and states the company is entirely satisfied with its venture in the West and may extend operations in the near future."

"Mackenzie, Mann & Co. have just closed a contract with Gerald Lomer, Montreal, acting on behalf of German makers, for about 40,000 tons of steel rails and fastenings for the Canadian Northern and their Nova Scotia roads. This is the largest order ever placed at one time in Canada."

"The fourth annual convention of the Canadian Wholesale Hardware Association was held in Montreal for its first meeting in that city since its formation four years ago. The president, W. Starke, of Howden, Starke & Co., Montreal, presided. Following officers were elected for the ensuing year: President, Thos. B. Lee, of Rice Lewis & Son; vice-president, Fred O. Lewis, of Lewis Bros. & Co.; executive committee, Thos. Birkett, M.P.; John Bowman; A. Jeannotte, of L. H. Hebert; C. A. Whitwam, of the Hobbs Hardware Co.; Wm. Shaw, of the Chinic Hardware Co.; secretary-treasurer, Jenkins & Hardy. At the banquet Mr. Newman, of Caverhill, Learmont & Co., replied to the toast to 'Our Country.' Peleg Howland replied to the toast to 'Our Association'."

Join The 1922 Hardware and Metal Christmas Window Contest

Bigger and Better Than Ever Before

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting sales ideas into the display is what counts.

The contest closes on Monday, January 1, 1923. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one.

ENGLISHMAN'S VIEW

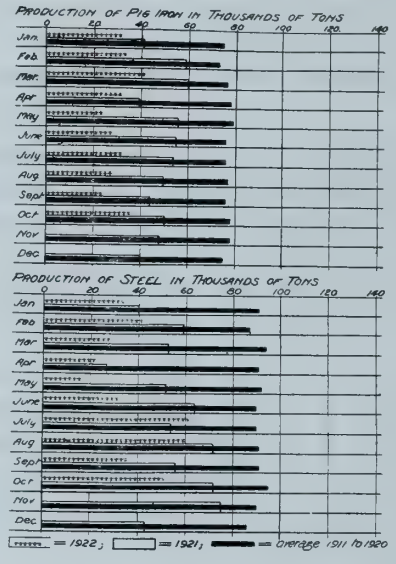
(Continued from page 27)

sent the last word in luxury. The same thing cannot be said of their stores, of which the walls are bare in appearance, the fixtures poor, and the goods too crowded and not shown to the best advantage. I suggested to several of the principal buyers that if they went to London they should pay a visit to Harrods, where they would find out what "shopping in luxury" meant.

Soon after my arrival in Calgary (Western Canada), where I resided for six months, I was elected an honorary member of the Board of Trade Club. All the principal businesses and a good many professional men are members of this somewhat exclusive club, consequently one meets everybody worth knowing. To an Englishman who is familiar with the daily life of many habitués of our London and provincial clubs this and other similar clubs in Canada are a revelation. Luncheon is served from 12 o'clock to 1.30, and, although the usual billiard-room exists, not a business man is to be found in any part of the club between 2 p.m. and the time for closing business in the evening.

Hard Workers

The Canadians are splendid workers; everything, including pleasure, plays second fiddle to the accumulation of dollars, which are worshipped by the majority. The office hours are from 8 a.m. to 7 p.m. One hour is taken for lunch. Tea is handed round to the members of the staff at their own desks. The men are well paid, and there is no grousing about long hours. Many principals are "hail-fellow-well-met" with their staff and I have heard them call each other by their Christian names.



It is my carefully considered opinion, after a long study of the subject, and after many conversations with those "who know," that it is not much good sending representatives nor appointing agents in Canada in the old way. There is, to my mind, only one paying road to success. I had numerous opportunities of gaining business information both in Canada and U.S.A., and I am absolutely positive that there is a large fortune awaiting the manufacturers of certain goods; and I am equally sure that I can tell them the one sure way to make a good profit in the first year, and one that will substantially increase year by year. Whether my plan will be adopted soon is, of course, uncertain; but it is bound to be tried sooner or later. I feel sure, speaking of Canada, that at the present time fully 60 per cent. of the hardware goods come from the land of "Stars and Stripes." The following goods are much needed in every city and prairie town in Canada: All fancy brass, copper and tin goods, coal-boxes, fenders, curbs, and accessories, bedsteads (all kinds), china goods, and cutlery (with spoons and forks). If one manufacturer of each of these four branches will fall into line with my plan, manufacturers of other goods might be added from time to time.

In conclusion, I may say that so far I have tried my best to refer only to the business side of my long journey, but, at the risk of losing my halo, I must say how thankful I am that I was able to complete this wonderful journey. Before I left England I was, perhaps, more than an average traveler for a man who has led a busy life. I had no idea what the great masterpieces of the Creator's works were like until I traveled from the east to the west of Canada, especially the 500 miles through British Columbia. Where Canada is not beautiful and interesting it is supremely grand and magnificent. I traveled across U. S. A. from west to east, and by comparison with Canada, except, perhaps, Columbia Highway, it is almost a desert, and for one thousand miles is an actual desert, although as one approaches Salt Lake City, Chicago, and Niagara there are some beautiful stretches of Country. Finally, I unhesitatingly vote for Canada, not only for grandeur of scenery, but because I believe it to be supremely the El Dorado of those British manufacturers who do not talk of their limitations, but are wise enough to take a fair business risk, with a certainty of speedy reward.

IRON AND STEEL OUTPUT

The production of pig iron in Canada during October showed an increase of 12,000 gross tons or 47.7 per cent. over the record for September, and amounted to 37,000 tons as compared with 25,000 tons in the previous month.

Steel production showed an increase of 16,000 tons totalling 52,000 tons compared with 36,000 tons for September.

RETAIL MERCHANTS' CHAMBER OF COMMERCE MAY ESTABLISH CREDIT BUREAU

Hamilton, Ont.—The personnel of the new retail merchants' executive committee of the chamber of commerce was approved by the directorate and the body authorized to function in the interests of the retail trade generally. Members of the executive committee are James R. Watson, J. W. Gillies, A. M. Cunningham, Thos. Lees, jr., D. A. Souter, Fred Cloke, A. G. Bain, W. J. Hobson, Morley Howell, Arthur Day, Scott Murray, Wm. A. Smith, P. J. Dunnigan, A. E. Drewery, Arthur Wilson, F. D. Morden, Arthur Patrick and D. A. Clarke, who were re-elected by ballot submitted recently to the entire retail membership of the chamber.

At a meeting prior to the directors' gathering, the executive elected unanimously James R. Watson as its permanent chairman and decided to meet at 9.30 in the morning of the first Tuesday of every month. Among the suggestions submitted for consideration was the establishment in Hamilton of a credit bureau similar to those in operation in many cities across the border where they have proven very successful and advantageous to the trade. It is probable that in the near future the executive will secure a speaker well versed in the operation of credit bureaus to outline their usefulness to the retailers of this city.

NO OPPOSITION TO PRICE AGREEMENTS

(Continued from page 20)

country. The steps taken are for the purpose of providing a greater safeguard against outbreaks of crime and to assist the police in their work. It is part of a plan which is to be worked out having in mind the big increases in immigration and population in general which are expected in the future. The police official stated that he has no doubt the hardware merchants of this country will realize the importance and necessity of such action and support the action taken rather than oppose it because of the small loss of revenue represented by profits on automatic revolvers.

WHY AUTOMATIC REVOLVERS ARE BANNED

(Continued from page 19)

freedom of contract, but they have free trade whereas in Canada and the United States there are more restrictions and hence there is less freedom of contract throughout.

Mr. Roebuck's personal opinion is that price fixing agreements are in restraint of trade and as such are absolutely illegal. Some other authorities differ with him on this subject. He advises Hardware and Metal that the question will come in for some consideration in the very near future and a definite stand taken on it.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

BOTH increases and declines are again evident in the hardware market reports. Higher levels appear this week on whiffletrees and neckyokes, pruning shears, range boilers, cotton wastes and hack saw blades. On the other hand, prices affecting fuel oil, turpentine, linseed oil and pig iron are headed in the downward direction.

The development in whiffletree quotations follows on the higher levels announced on handles in last week's issue of Hardware and Metal. The advanced prices on cotton wastes have also been foreshadowed in recent market reports, this tendency reflecting to some extent the condition of raw cotton.

As an indication of the current trend in basic costs of steel production, the further decline in pig iron is of interest. This condition was outlined in a former issue, however, and is of minor extent. An interesting period is indicated in the steel industry at present, the balance between the ratio of production and that of consumption being apparently threatened through the approach of the customary quiet season.

The call for such products as eavestrough, conductor pipe and similar goods used in construction and repair work is now subsiding, but materials for interior finishing are still moving in satisfactory volume. Stoves and ranges, furnaces, radiators and heating equipment generally continue to attract special attention.

The arrival of colder weather, together with an initial snowfall, has stimulated the movement of many winter lines, which, up to this time, have been more or less backward. These include sleds, skates, snow shovels, auto tire chains, weatherstrip, ash sifters and sidewalk scrapers.

Orders for paint for spring delivery are showing an improvement over last year's records. Active current sales are generally evident for silver-plated ware, table and pocket cutlery, carving sets, cut glass, glass ovenware, electrical products and various other Christmas lines.

Montreal, Que.

MONTREAL, November 30.—Various price revisions in an upward direction again feature the current market. Advanced quotations are given on range boilers, revised discounts being quoted off standard list, with a corresponding increase in net prices. Wood handle prices are adjusted by some manufacturers with higher figures on practically all oak, ash and maple lines. Increased quotations appear on hack saw blades, while revised prices are effective from December 4 on cotton wastes, showing higher levels as foreshadowed in recent issues. Local sheet markets show little if any change, and interest is centred on the fact that prices on galvanized, black and blue annealed sheets and tin plate will probably remain unchanged for the first quarter of next year. Tin and spelter on primary metal markets are not displaying their former strong tendency, an easier tone being noted.

REVISED QUOTATIONS ON WOOD HANDLES

Montreal.

Certain manufacturers announce a general revision in wood handles, including all hickory, ash, oak and maple handles. Prices in general are higher, the greater advance appearing on the three last kinds. New discounts will be found on current market pages.

HIGHER PRICES QUOTED ON RANGE BOILERS

Montreal.

Through a revision in discounts quotations on both standard and extra heavy range boilers are now quoted at higher figures. The various sizes of standard boilers have a new discount of 40 per cent., and extra heavy 30 per cent. Former discounts were 45 and 35 per cent. respectively. Jobbing houses who quote on a net price basis announce a corresponding advance in prices. Manufacturers state that the new higher levels reached on spelter, which metal figures quite extensively in raw materials for galvanizing purposes, and the fact that heavier gauges of galvanized sheets are scarce and sold on a premium basis, have firmed the market tone considerably during past weeks. New quotations are as follows, and these are still considered firm.

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 40 per cent. Extra heavy, 30 per cent.

LITTLE FIRMER TONE IN CORRUGATED SHEETS

Montreal.

Although trade in corrugated sheets is now quieter with the first appearance of winter weather, there is a slightly improved market tone owing to the stronger tendency in sheets through higher spelter prices. This tendency is looked upon as a factor which will steady the market at least when quieter trade has a tendency to weaken the situation. Stocks are in fair shape, although there is said to be some difficulty in securing heavier gauges of flat sheets. List prices and unchanged discounts are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

ADVANCED QUOTATIONS ON HACK SAW BLADES

Montreal.

An increase of from five to ten per cent. is made in quotations on all lengths of hack saw blades.

SLIGHT EASING IN SOIL PIPE MARKET

Montreal.

Manufacturers in describing the undertone of soil pipe and fittings refer to a slight easing in the market due to the weakening in pig iron prices, and a slackening in demand for the finished product. Trade has continued fairly ac-

tive up until the past week or so, but the colder weather has brought about a slower movement. The future price trend of these products will largely depend on further developments in the market for raw materials, and a local producer stated that any further decline in pig iron would in all probability mean a recession in soil pipe and fittings.

SOIL PIPE—

2 and 3 inch	35%
4 inch	35%
5 and 6 inch	35%
8 inch	net
Fittings—	
2 and 6 inch	45%
8 inch	net

FUTURE TREND OF IRON SOMEWHAT UNCERTAIN

Montreal.

With general business in iron and steel easing up as the season advances there appears to be more likelihood of a weaker tone in the market. Certain distributors have pointed to existing levels as being very representative of replacement costs, and a steady tone was anticipated. However, pig iron displaying a weaker tendency would seem to indicate a softening tone in finished products. On the other hand distributors of products from mills to the south state that what little construction work is under way is demanding supplies sufficiently to tax present stocks, and shipments are slow. This would naturally tend to strengthen the market, but whether or not this call for supplies will continue for any length of time is considered problematic. No change is made in local prices and following are present quotations:

IRON AND STEEL—

Common bar iron, 100 lbs.		3 15
Refined iron		4 65
Irish finish machinery steel		3 20
Mild steel		3 15
Single reeled machinery steel		5 25
Band steel	3 50	3 65
Spring steel	4 75	8 50
Sleighshoe steel		3 15
Tire steel		3 35
Harrow tooth steel		3 30
Toe caulk steel		4 05
Mining tool steel, per lb.		0 20½
Black Diamond tool and cast steel, per lb.		0 20½

NOTE.—Refined iron is approximately $1.50 per cwt. over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

WEAKENING IN METALS AFFECTS LEAD PRODUCTS

Montreal.

Tin and spelter on primary metal markets are somewhat easier with a sharp decline in prices recorded during the past week. Although there is little trace of continued weakness in either market, the fact that both metals are not on their former high levels has caused a little softer tone in lead and zinc products, especially zinc sheets and solders. These lines have been very firm in recent weeks, but a steady market tone is now presented. Unchanged price levels are the following:

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs., up to 2"	14 00
Do., 2" to 8"	15 00
Do., 8" and over	16 00
Lead waste, per 100 lbs.	15 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs., sq. ft. lb.	0 11
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs., sq. ft. lb.	0 10
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 22½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 36
Zinc sheets, casks	0 11
Do., broken lots	0 11½

ENTERING QUIETER PERIOD FOR TROUGH AND PIPE

Montreal.

The brisk movement of eavestrough and conductor pipe noted in previous weeks is apparently drawing to a close with the approach of winter weather. Manufacturers however state that trade this fall has been well up to expectations and the season has extended over a longer period than usual. Current quotations are unchanged at the following list prices and discounts:

EAVESTROUGH:

O. G. round and half round, per 100 ft. 8 in., $16.90; 10 in., $18.70; 12 in., $22.20; 15 in., $29.80; 18 in., $37.80.

O.G. Square bead, per 100 ft.: 8 in., $15.90; 10 in., $17.70; 12 in., $21.20; 15 in., $28.80; 18 in., $36.80.

Discount 70 per cent.

CONDUCTOR PIPE—Round, Plain and Corrugated. per 100 ft.; 2 in., $18.40; 3 in., $22.30; 4 in., $29.60; 5 in, $40.00; 6 in, $49.00; 6 in., $49.00.

Discount 70 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated, price per doz.
2 in., $5.25; 3 in., $6.00; 4 in., $10.50; 5 in., $24.00; 6 in., $29.00.

Discount 60 per cent.

SHEET MILLS ANNOUNCE UNCHANGED PRICE LEVELS

Montreal.

Interest in the local sheet markets is now centered around the announcement made by the Steel Corporation that prices for the first quarter on galvanized, black and blue annealed sheets and tin plate will remain unchanged. Present price levels on tin plate are said to be firm but the decision covers all lines. Advices from England have also been received to the effect that quotations for spring on galvanized sheets will be slightly higher. These developments change the local situation but little, if any, although they tend to steady the market, according to local distributors. There is however a likelihood of slightly lower prices, especially on black sheets because of comparatively heavy stocks and a quieter period ahead.

With the last cargo of English sheets on the wharf few further shipments are expected from this source for some time owing to it being necessary to ship by rail. Importers, however, are of the opinion that the trade will be well looked after in view of the usual slackening in demand. The higher levels of spelter on metal markets continues to be a prominent factor in the market for galvanized, and to some it appears that a firm undertone will be maintained. Average prices locally are unchanged as follows:

BLACK SHEETS—

10 gauge, base	4 00	4 25
12 gauge	4 10	4 35
14 gauge	4 20	4 45
16 gauge	4 30	4 55
18—20 gauge	4 55	4 80
22—24 gauge	4 60	4 85
26 gauge	4 65	4 90
28 gauge	4 75	5 10

GALVANIZED SHEETS—

Queens Head—		
28 gauge	6 75	7 25
26 gauge	6 50	7 00
24 gauge	6 20	6 70
22 gauge	6 15	6 65
18—20 gauge	5 90	6 40
Other Brands—		
10¾ oz.	6 50	7 00
28 U. S. gauge	6 00	6 50
26 U. S. gauge	5 75	6 25
24 gauge	5 60	6 10
22 gauge	5 60	6 10
18—20 gauge	5 40	5 90
16 gauge	5 25	5 75

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 25
20 x 28 IC, 112s	12 75
20 x 28 IC, 112s	15 00
20 x 28 IXX, 56s	8 50
20 x 28 IXXX, 56s	10 00
TERNE PLATE—	
20 x 28 IC, 112s	12 50
CANADA PLATE—	
Half bright 52s	4 85
Half bright 60s	4 90
Blued, 52s	5 10
Blued, 60s	5 15
Welsh, polished, 52s	6 50
Welsh, polished, 60s	6 75
Galvanized, 52s	7 25
Galvanized, 60s	7 75

STILL GOOD TRADE IN RADIATORS AND BOILERS

Montreal.

Hot water and steam heating systems continue to attract interest, the later fall building activities contributing towards an active demand for these products. Although outside work is now checked owing to colder weather many buildings are advanced to the stage when progress can be made on the inside. Although pig iron is displaying an easier tone prices on boilers and radiators are described as steady with little change thought likely for the balance of the year at least. The good demand this season has greatly assisted towards maintaining a steady market tone. List prices and discount are the following:

RADIATORS AND BOILERS—

Radiator list prices are for 1, 2, 3, 4 and 5 column radiators, per sq. ft.

45 in., to 38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in., $1.40; 16 in., $1.50; 4 in, $1.55; 13 in., 1.60. Discount 55 per cent. for hot water, and 56 per cent. for steam.

Wall radiators—5 ft., $1.15; 6 ft., $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05; Discount 52 per cent.

Boilers—Round hot water boilers, sizes from 0 to 10, 60 per cent. off list.

Square or sectional hot water or steam boilers, 15 in., 15 per cent.

Square or sectional water boilers, 19 in., to 36 in., 20 per cent.

Square or sectional steam boilers, 19 in., to 36 in., 17 per cent.

Ontario Government trimmings, 15 per cent.

Round steam boilers, standard trimmings, 28 per cent . Ontario Government trimmings, 25 per cent.

F.o.b. Montreal, Toronto, Guelph.

NEW HIGHER PRICES ON COTTON WASTES

Montreal.

Announcement is now made that effective from December 4 new higher quotations will rule on cotton wastes. It is understood that revised prices show an increase of from one to one and one-half cents per pound on the various grades. The undertone in the market for these products has been very firm, and as previously pointed out a revision has been expected at any time.

NO FURTHER CHANGE IN WROUGHT PIPE

Montreal.

No further change has been made in quotations on wrought iron and steel pipe since the revision a few weeks ago when list No. 57 was issued. Domestic manufacturers describe the undertone of the market as steady to firm and reports from American mills indicate that producers are still very busy supplying demand which has continued in satisfactory volume during the whole of this season. This factor is stated to be greatly assisting towards maintaining a firm market tone. Locally the call for this product is also continuing in fair seasonable proportions, especially in the smaller sizes.

TIN AND SPELTER REGISTER PRICE DECLINE

Montreal.

Ingot metal markets are reported to be continuing in a quieter state and certain metals have shown a sharp decline in prices, notably tin and zinc. This is not surprising in view of advances which were previously recorded, and a period of dullness is looked for during the next few weeks.

TIN.—Following a sharp decline in this metal the market is now steadier in tone. The immediate future is looked upon as hard to discern but it is thought that the market may be irregular with narrow fluctuations. This of course will depend to some extent on whether the U. S. A. still have very much to buy over the next few months. Local quotation 41 cents.

COPPER.—This metal remains quiet with New York quoted at about 14 cents for electro. London is slightly lower but this is chiefly owing to the advance in sterling exchange. December will probably be a quiet month and little change in price is expected. Local prices are unchanged at 17¾ cts. for electro, 17½ cts. for casting.

LEAD.—Lead has continued quite steady and the undertone is firm. The trust price in the U. S. A. has been advanced another 10 points, with demand continuing satisfactory. The English market is also firm and there is no surplus of supplies reported in that market. Locally this metal is steady at 7¾ to 8 cents.

SPELTER.—East St. Louis has recovered somewhat after showing a sharp decline last week which carried prices down one-half cent from previous levels. Production is increasing both in the U. S. A. and Europe and it is thought that this will have an effect on prices. At the same time there is no great surplus anywhere and this should offset any easier tendency through increased production. Quotation is firm at from 9¾ to 10 cents.

ANTIMONY.—Antimony is very dull both in the United States and locally with the market unchanged at 7½ cts. for high grade English and 7 cents for Chinese.

ALUMINUM.—There is a slightly firmer tone in this metal in the U. S. A. but little or no change is noted locally and quotations remain at 22 cents.

ANOTHER DECLINE IN PIG IRON QUOTATIONS

Toronto.

As outlined in former issues, pig iron continues on a weaker trend and the further recession foreshadowed in former market reports has materialized this week. The extent of the decline on domestic centres is $1.00 per ton, this revision bringing present levels to $32.80. The movement of pig iron quotations is interesting from viewpoint of production costs entering into numerous other manufactured products.

REVISED PRICES ON SMALL RAILWAY SPIKES

Toronto.

New price levels are issued this week on small railway spikes. The revised quotation is $4.75 base, f.o.b. Toronto, Montreal and Hamilton.

INCREASE NECKYOKES AND WHIFFLETREE PRICES

Toronto.

Following on the upward climb in axe and hammer handles, recorded in last week's issue of Hardware and Metal, quotations on whiffletrees, doubletrees and neckyokes have also been advanced ten per cent. This change brings net levels into effect where formerly a discount of ten per cent. was quoted.

PRUNING SHEAR PRICES TEN PER CENT. HIGHER

Toronto.

Prices on all makes of pruning shears have been advanced approximately ten per cent.

QUOTATIONS ON COTTON WASTES NOW ADVANCED

Toronto.

As outlined in former market reports, prices on cotton wastes are now advanced. The average increase is between one-half and one cent per pound. The revised levels are effective from December 4. Higher quotations now prevailing on materials from which cotton waste is made are given as the principal factor in making the advance, this also reflecting the recent climb of raw cotton prices. New prices are as follows:

COTTON WASTES—

Cream, polishing	$ 0.19
White, XXX	0.19
XX	0.17
X	0.16
XC	0.14½
XXX, extra	0.17
XX, grand	0.16
XLCR	0 15
X, Empire	0 13½
X press	0.12
Colored, No. 1	0.13½
No. 17	0.12½
No. 1A	0.11½
No. 1B	0.10½
Fancy	0.14
Lion	0.12½
Standard	0.11
Popular	0.09½
Keen	0.08

Toronto, Ont.

TORONTO, November 30.—Range boilers, cotton wastes, pruning shears, whiffle-trees and neckyokes comprise the list of current price increases. Other hardware market developments include revised levels on small railway spikes, while lower prices are recorded on pig iron and fuel oil. The initial fall of snow experienced this week stimulated the movement of many seasonable lines, including auto tire chains, snow shovels and sidewalk scrapers. Many of the stores are cultivating a Christmas appearance with special window displays of winter goods and gift suggestions.

FUEL OIL REDUCED ONE CENT PER GALLON

Toronto.

Fuel oil quotations have been reduced one cent per gallon this week. The new prices are listed below. This revision indicates the recent trend of the crude oil market which has been somewhat easier in primary centres, owing to greater production and heavier stocks on hand.

Gasoline also remains in a quiet state owing to the relatively smaller demand at this season and the viewpoint is expressed in some quarters that some further downward revisions may become apparent should the crude oil market continue to sag as the winter progresses.

Following are prevailing levels on fuel oil:

FUEL OIL—

In barrels, net per gallon	$ 0.10.8
In tank wagons	0.09.8
In tank cars	0.08.8

MORE INTEREST NOTED IN SKATE SUNDRIES

Toronto.

With the arrival of seasonable weather and the initial fall of snow, more interest is now displayed in skates, and hockey equipment generally, as well as other winter lines. Current quotations on skate sundries issued by the Canada Cycle & Motor Co., are as follows:

SKATE SUNDRIES—

	Doz. pair, list.
Tan Leather Skate Straps, 5/8 x 21	$ 3.50
Tan Leather Skate Straps, 5/8 x 30	4 70
Web Skate Straps, 5/8 x 21	2.64
Web Skate Straps, 5/8 x 30	3 50
Skate Laces, Rawhide 54"	2 88
Skate Bolts and Nuts, 1" and 1½"	.36

Emery Wheels for Grinding Skates—
6" dia. 1" wide, 5/8" hole, fine or coarse; 6" dia. 1" wide, 3/4" hole, fine or coarse; 6" dia. 1" wide, 1" hole, fine or coarse; Each, list, $3.90
Copper Rivets, 12 gauge, 5/8" 3/4" and 1" long, 10 gauge, 3/4" and 1" long, per lb., list, 84c.

UPWARD REVISION IN RANGE BOILER PRICES

Toronto.

Through a revision in the discounts, higher price levels are now in effect on range boilers. The revised quotations are list less 40 per cent. on the standard weight boiler and less 30 per cent. on the extra heavy. The former discounts were 45 and 35 respectively. This change reflects the firmer tone which has pervaded the market during recent weeks, the movement of range boilers also reaching fairly brisk proportions. Manufacturers point out that raw materials have advanced to a relatively greater extent than have quotations on the finished goods. The present condition of the market is described as firm at the new levels, which follow:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 40 per cent; Extra heavy, 30 per cent.

"FAIR TO MIDDLING" TRADE IN SOIL PIPE

Toronto.

"Fair to middling" is the general expression of manufacturers and distributors of soil pipe when describing current market conditions. There is evident a seasonable demand for both soil pipe and fittings which measures up very well with previous records for this time of the year. Quotations remain unchanged. It is pointed out that prices on these products did not reflect the sudden climb of pig iron costs in the midsummer period, and thus no corresponding rise was recorded. Now that pig iron quotations are receding from the higher levels, therefore, this trend does not affect the soil pipe market at this time. Following are unchanged local discounts:

SOIL PIPE—
2 inch ..... Less 33 1-3 per cent.
3 inch ..... Less 33 1-3 per cent.
4-inch ..... Less 33 1-3 per cent.
5 and 6 inch ..... Less 33 1-3 per cent.
8 inch ..... net

FITTINGS—
2 to 6 inch fittings ..... Less 45 per cent.
8 inch fittings ..... net

NO CHANGES LOOKED FOR IN SHEET PRICES

Toronto.

Local distributors point out that the tone of the sheet markets should remain fairly firm all through the winter months, owing to the fact that shipments from producers are still somewhat delayed and bookings continue to be made a considerable period ahead. With the falling off in volume, however, trade in sheets has generally entered upon the moderate winter scale; therefore, the view is also held that some minor fluctuations may be recorded prior to spring recovery. Domestic quotations continue unchanged at the following levels:

GALVANIZED SHEETS—

	Premier and Apollo
10¾ oz.	6 65
U. S. 28 base	6 25
U. S. 26 base	5 95
22 and 24	5 80
18 and 20	5 65
16	5 50
12 and 14	5 35
	Queen's Head
28 gauge, base	7 15
26	6 75
24	6 45
22	6 30
	Fleur de Lis
28 gauge, base	6 90
26	6 50
24	6 20
22	6 05

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.
An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown in 20c. per 100 pounds.

BLUE ANNEALED SHEETS—

10 gauge, base	4 20
12 gauge	4 25
14 gauge	4 30
16 gauge	4 35

BLACK SHEETS—

18-20 gauge	4 90
22-24 gauge	4 95
26 gauge	5 00
28 gauge	5 10

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

CAUTIOUS BUYING RULES IN IRON AND STEEL

Toronto.

Although buying of iron and steel is going along cautiously, the current demand is described as steady, with conditions and prices unchanged at present Outside of the colder weather and the customary quiet winter period, there is stated to be no factor developing that might have a tendency to upset the stability of the primary markets. There is said to be a shortage in some lines, principally due to poor delivery from U. S. mills, but this phase of the situation promises to have little betterment. Statistics on the production of iron and steel indicate that there has been a slight improvement in last month's production over that of the month preceding, and though the level is at the lowest in some years, the movement is upwards.

IRON AND STEEL—

Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40
Angle iron, base	3 35	3 50
Horse shoe iron		3 90
Tire steel		3 50
Spring Steel	7 00	8 00
Sleigh shoe steel		3 40
Cold drawn steel		4 50

Norway iron		12 50
Toe caulk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

PIPE FITTINGS TRADE OF FAIR PROPORTIONS

Toronto.

There is still reported a fairly good movement of pipe fittings for this period of the year. Prices have remained unchanged at the steady basis evident during recent weeks. The tendency in wrought nipples and couplings is toward slightly higher levels in view of the recent advance in wrought piping, but no upward change is looked for in view of the fact that the relative extent of the increase was not considered sufficient to affect these lines. Prevailing discounts follow:

PIPE FITTINGS—

Cast iron fittings	27%
Plugs, case iron	27%
Do., solid	27%
Do., countersunk	27%
Bushings, mail	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%

Do., running thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—
New piece list, adopted June 1, 1922.
Discount, Classes, A B and C, less 70 per cent.

QUIET SEASON FOR CORRUGATED SHEETS

Toronto.

Now that the quiet season has arrived for trade in corrugated sheets, much interest is attached to the relative market in flat sheets and the trend of prices in this direction. The announcement that no change is contemplated in flat sheets for the first quarter of 1923, indicates that the industry is on a more or less steady basis, with the probability that efforts will be made to maintain existing domestic levels. In corrugated, however, the weakness in certain gauges has passed on owing to lighter demand. An improvement is looked for in many quarters, as it is not-

ed that other galvanized products have recently been advanced in price. The general trend in the steel industry, however, is for current levels to be maintained by producers in the face of an easier tendency to basic materials.

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

MORE ACTIVITY EVIDENT IN BOILER TUBES

Toronto

A fair amount of activity is now generally evident in boiler tubes. The recent readjustment of prices indicated a firmer tone which has been followed by seasonal interest in tubes, especially for repair work. The prevailing trend bears out the earlier indications of distributors that a recovery in the market would probably develop at this time of the year. Following are average prevailing quotations:

BOILER TUBES—	Seamless	Lapweld
¾ inch	19 00	....
1 inch	20 00	....
1¼ inch	22 00	....
1½ inch	24 00	....
1¾ inch	24 00	23 00
2 inch	22 00	19 00
2¼ inch	24 00	21 50
2½ inch	27 00	23 50
3 inch	34 00	28 50
3¼ inch	36 00	33 00
3½ inch	38 00	32 00
4 inch	50 00	42 00

RECEDING TRADE IN BRASS AND COPPER

Toronto.

In copper and brass products there is not a great deal of business being recorded at this time of the year. The volume of activity in sheets, rods and tubing, however, is described as comparing well with current expectations. Manufactured brass goods, however, are stated to be in brisk demand. Prevailing quotations on semi-finished goods follow:

BRASS—	
Sheets base, per lb.	0 23
Tubing, base, per lb.	0 30
Rods, base, per lb.	0 22
COPPER—	
Rods, base, per lb.	0 30
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 33

TRADE SUBSIDES IN TROUGH AND PIPE

Toronto.

Current trading in eavestrough and conductor pipe is described as considerably quieter with the arrival of colder weather. The call for this class of material is now subsiding, due to the fact that building in general has practically reached the stage of completion. There is, of course, inside finishing work still going on, but the quiet session for such products as trough and piping is now commencing. Quotations remain unchanged at the following levels:

TROUGH (Eave)—

O. G. Square Bead—

Per 100 ft.		Per 100 ft.
8 inch	$15 90	15 inch $28 80
10 inch	17 70	18 inch 36 80
12 inch	21 20	

O. G. Round and Half Round—

8 inch	16 90	15 inch	29 80
10 inch	18 70	18 inch	37 80
12 inch	22 20		

Less 70 per cent.

PIPE (Conductor)

Plain, round or corrugated.

5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

TRADE REMAINS QUIET IN SCRAP MATERIALS

Toronto.

Current trading remains comparatively quiet in scrap materials. There has been some interest in scrap metals, however, red and yellow metal moving in a fair way, but not very actively. More inquiry is out for scrap iron and steel grades, but prices are without change.

The following are averages of dealers' buying prices for large quantities:

SCRAP MATERIALS—	
Scrap Iron	
Heavy melting steel,	$11 00
Scrap pipe	6 00
Steel turnings	10 00
Malleable scrap	11 00
Rails, scrap	11 00

Boots and shoes	2 00 2 25
High rubber boots	1 25 1 50
Auto tires	0 25 0 50
Solid tires	0 60 1 00

TIN PLATE PRICES ON STEADY BASIS

Toronto.

The announcement by Steel Corporation interests that no changes are made in tin plate prices for the first quarter of 1923, is also one of the chief factors in the domestic tin plate market. Quotations have remained on a fairly firm basis throughout recent weeks, and with increased interest in these products, it is expected that current levels will likely hold for the balance of the period. More interest was attached to the quotations for the first quarter owing to the delay in stating these levels and also the rumors that some increases would come into effect. Bookings are made a considerable period ahead.

RAW MATERIALS STILL GOVERN PIPE MARKET

Toronto.

Conditions in the steel industry remain the controlling factor in the current pipe markets. Delivery of raw material is still a governing element which serves to maintain prices on a firm basis. Piping is also moving well for this time of the year, but chiefly on account of the close of the season, dealers are apparently not ordering for stock. Material still in demand, however, is notably several weeks behind in delivery, due to primary causes. List No. 57 remains in effect on domestic markets.

WROUGHT PIPE

Price List No. 57. November, 1922.

Standard Buttweld Pipe S/C

STEADIER TREND IN INGOT METAL PRICES

Toronto.

Prices on ingot metals have generally remained steady throughout the week, no special features being recorded. Antimony and aluminum, however, have gradually reached slightly higher levels, without any marked activity. Tin and spelter continue to fluctuate to some

extent, this movement being followed by moderate trading. A waiting attitude is again being adopted by consumers.

COPPER.—Prices on copper are without essential change this week. Domestic consumers are buying less, while southern centres record the fact that fewer orders for export are being taken. The steady increase in the production of this metal has evidently encouraged consumers to await further developments. Local quotations remain at the level of 17¼ cents.

TIN.—The fluctuations noted in this metal continue in primary markets. London has recovered somewhat from the weakness recorded last week. Domestic prices are practically unchanged, however, trading being described as moderate with stocks fairly ample. Local quotations hover around 41 cents.

LEAD.—The lead market remains strong with a fairly good demand recorded. The general tone has continued to gain strength, this upward trend being attributed to the large buying consumers. Quotations locally have remained on a steady basis, the present level being. $7.50.

SPELTER.—There is again a firmer tone in spelter, but little activity at present in evidence. The London market is slightly higher again, and the domestic trend is following outside influences. Local prices continue unchanged at $9.50.

ANTIMONY.—Demand for antimony continues slack and little trading during the balance of the year is looked for. Quotations on both primary and domestic centres have remained fairly steady. Local price is, however, slightly higher at $8.50.

ALUMINUM.—As outlined in a former report, prices for aluminum have gradually recorded an upward trend. This feature is the only new development in this metal. Local quotations have firmed up towards the level of 22 cents.

London, Ont.

LONDON, November 30.—Reports again show a good week's business in the hardware trade here. The colder weather and snow are moving many lines, including sleds, skates, snow shovels, auto chains, weather strip, ash sifters, and sidewalk scrapers. Prices this week are very firm without many changes.

LINSEED OIL HOLDS AT REVISED LEVEL

London, Ont.

Prices on linseed oil remain at the lower quotations noted last week. There is a fair seasonal sale being recorded. Existing levels follow:

LINSEED OIL—

	Raw Imperial Gal.	Boiled Gal.
1 to 2 barrels	1 10	1 13
3 to 5 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less Barrels, Add 15c. Gallon.

REVISED DISCOUNTS ON COTTER PINS

London, Ont.

Following the new list and discounts on cotter pins two weeks ago is the further announcement that discounts are again revised to 10 and 10 per cent. off list issued at that time.

STILL RECORD BRISK ACTIVITY IN NAILS

London, Ont.

Merchants report a brisk demand is still evident for nails. Prices are steady at the following levels:

NAILS—
Wire nails, base, $3.75 per keg.
Cut, do., base, $4.60 per keg.

BREAD MIXERS SHOW IMPROVED MOVEMENT

London, Ont.

Bread mixers are now selling well. Quotations on the Universal line are as follows: four-loaf, $33.85 per doz.; eight-loaf, $44.75 per dozen.

SEASONAL MOVEMENT IN LANTERNS AND GLOBES

London, Ont.

Tin lanterns and lantern globes are now selling in seasonal volume. Prices on these goods remain firm at the following levels:

TIN LANTERNS—
Short and long pattern, $9.20 doz.

LANTERN GLOBES—

	Doz.
1 dozen to case	1 25
3 dozen to case	1 15
6 dozen to case	1 05

SORTING ORDERS ARRIVE FOR ICE SKATES

London, Ont.

Fair sorting orders are now being received for ice skates. Quotations remain unchanged, the present price on the Starr line being list less 30 per cent.

IMPROVED CALL NOTED FOR WASHING MACHINES

London, Ont.

There is a slightly improved movement of washing machines noted during recent weeks. Quotations on these products are steady, the prevailing level being unchanged at list less 30 per cent.

CALL FOR BUILDERS' HARDWARE STILL PROCEEDS

London, Ont.

There is an excellent sale at present for roofings, building papers and all lines of builders' hardware. Prices on these lines are very firm.

TEN CENT REDUCTION IN TURPENTINE PRICE

London, Ont.

Local prices on turpentine have been reduced this week ten cents per gallon. This decline brings the following levels into effect:

TURPENTINE—
1 bbl. lots, $2.20 Imp. Gal.; 2 to 4 bbl. lots, $2.19 Imp. Gal.; 5 Gal. lots, $2.35 Imp. Gal.

HAND SLEIGHS ALSO IN SEASONAL CALL

London, Ont.

Hand sleighs are now moving well, since the arrival of seasonable weather. Prices on the Canadian Buffalo Sled Co.'s make remain at list less 30 per cent.

RENEWED INTEREST IN SNOW SHOVELS

London, Ont.

The initial fall of snow has renewed interest in snow shovels. Current quotations on these products follow:

SNOW SHOVELS—

	Dozen
Common Japanned	3 75
Prince or No. 20 Long Handle	5 50
Prince or No. 20 D Handle	6 75
King or No. 40 D Handle	7 50
Moose or No. 50 D Handle	9 35
Wood No. 76 D Handle	8 75
Wood, No. 77 D Handle	9 50
Galvanized No. 27 D Handle	10 25
Galvanized, No 28	12 25

GOOD SALE RECORDED FOR FURNACE SCOOPS

London, Ont.

There is a good sale reported at present for furnace scoops. Current price levels are given as follows:

FURNACE SCOOPS—

D Handle, Socket	5 75
Long Handle, Socket	5 75

SIDEWALK SCRAPERS IN SEASONAL ACTIVITY

London, Ont.

The fall of snow has resulted in brisk activity in sidewalk scrapers Prevailing quotations follow:

SIDEWALK SCRAPERS—

Fox, Light Socket	2 90 per doz.
Bull Dog, Heavy Socket	4 20 per doz.

MORE INTEREST SEEN IN WEATHER STRIP

London, Ont.

Weather strip is also attracting popular interest at this time. Quotations at present in effect are as follow:

WEATHER STRIP—
Frost King, $5.00 per doz. packages.
Wood and Felt, List Less 50/5%.

ASH SIFTERS IN SEASONAL MOVEMENT

London, Ont.

There is also a good sale at present being recorded for ash sifters. Prices on these goods remain unchanged, as follows:

ASH SIFTERS—

Common Wood Sides	Doz. 2 75
Banner, No. 2	Each 2 65
Banner, No. 3	Each 1 95

HOCKEY STICKS MOVE IN SEASONAL VOLUME

London, Ont.

Dealers this week report that hockey sticks are now moving in seasonal volume. Quotations on these products remain at the following levels:

HOCKEY STICKS—	Per Doz.
Boy's Red	2 00
Boy's White	2 85
Spalding No. 0	8 50
Munroe Professional	9 50

AUTO TIRE CHAINS IN POPULAR DEMAND

London, Ont.

With the arrival of snow and the colder weather, automobile tire chains are now numbered among the brisk selling lines. Prevailing quotations on Weed and Rid-O-Skid chains follow: 1 to 10 pair, list less 25 per cent.; 11 to 49 pair, list less 30 per cent.

LOWER PRICES QUOTED ON OIL STOVES

Winnipeg.

There has been a slight decline on Florence oil stoves with and without cabinets, also on the Famous line of oil heaters. Lines are quoted as follows:

OIL STOVES—	
Florence—Without cabinets—	
No 221	14 52
No. 321	17 74
No. 421	23 00
Cabinets for same—

No. 421	7 72
Oil Heaters (Famous)—	
No. 880 NP	5 83
No. 880 DD	6 85

Winnipeg, Man.

WINNIPEG, November 30.—There are few price changes recorded on hardware commodities this week. The new lower booking prices on poultry netting feature current reductions. Cow chains and Florence oil stoves also show a slight decline. The trade reports a satisfactory volume of business passing for all lines of toys and other Christmas lines. Skates and hockey requirements are in good evidence. The turpentine market is reported firm and linseed oil is ruling steady. Orders for Spring delivery of paints are showing an improvement over last year. Business generally speaking is only fair, and collections are showing a slight improvement.

POULTRY NETTING AT LOWER QUOTATIONS

Winnipeg.

There has been a revision in quotations on poultry netting. Following are the new prices.

POULTRY NETTING—	
Lay Flat—	
2 x 24	3 06
2 x 30	3 60
2 x 36	4 28
2 x 48	5 58

No. 1/0	3 90

LINSEED OIL PRICE DECLINES THREE CENTS

Winnipeg.

Linseed oil quotations are reduced this week three cents per gallon. This revision brings prices on raw to $1.17, and on boiled to $1.20 per gallon.

TOYS IN GOOD DEMAND FOR HOLIDAY TRADE

Winnipeg.

There is a good demand for all lines of toys for the Christmas trade, and manufacturers report that they are busy filling orders. Early indications in this direction are generally regarded as promising from a normal business viewpoint.

HEAVY BOOKING ON PAINTS FOR SPRING DELIVERY

Winnipeg.

Paint manufacturers report that orders for paint for spring delivery are showing an improvement over last year.

FIRM TONE CONTINUES IN TURPENTINE MARKET

Winnipeg.

The turpentine market is reported to be ruling firm. Locally there is a fair demand and quotations of $2.45 per gallon remain unchanged.

SKATES AND HOCKEY OUTFITS IN GOOD DEMAND

Winnipeg.

Dealers report that the demand for skates and other various hockey requirements is showing an improvement.

Hamilton, Ont.

Holiday Trade Daily Becoming Stronger With Assistance of Seasonable Weather

HAMILTON, November 30.—Holiday buying is daily becoming stronger, and the current demand for staples of all kinds is consistently active. Price changes during the week were smaller in number, when compared with the changes which have been made during the past month or more. Jobbers report exceptionally fair advance orders for spring merchandise, especially for wire goods and garden implements. Based on this factor, it is said that such indications point toward an intensely active spring hardware trade.

It is also pointed out that while the recent fine weather served to restrict sales of certain winter lines to some extent, yet it also assisted in keeping up the movement of builders' hardware, roofings, and kindred products used in construction and repair work. With a touch of winter now having been generally experienced, renewed interest is apparent in seasonable goods and holiday displays. Gift specialties are receiving marked attention.

Merchants state that a flurry of snow has helped out immediate buying, especially on such goods where more activity might have been experienced during the past week or two. It is stated that this brisker business has made a marked difference in the sorting orders received by wholesalers. Winter sporting goods are moving in good volume. Skating and hockey outfits are being given a prominent display place. Hardware stores are also making more of a feature than usual of winter motor accessories, these products being included in the group of gift hardware suggestions.

Current trade in the paint department has declined in volume, but business is described as better than usual at this time of the year. Much of this trade is in small paint sundries for interior work. In their retail advertising, merchants are also drawing attention to the various inside jobs which can be done by the householder, and paint departments generally are reflecting this style of activity.

Dealing with primary market developments on corn and household brooms, a Hamilton manufacturer remarked as follows:

"In 1921 the broom manufacturers

paid from $75 to $125 per ton for broom corn. This year the price started at $125 per ton, for the poorest grade of corn, and reaches all the way to $300 for the higher quality. Nothing is now obtainable of any quality at a lower price than $230 per ton, and as this is the greatest cost entering into this line, on raw material, it explains fully the reason for the advance in prices on the finished article.

"The only consolation in this, is that broom corn is raised by farmers located in the Western States, who are getting a very fair return for their crop for this year. We only wish the farmers in Western Canada were on a similar basis, which would mean greater prosperity for them than they are enjoying at the present time."

Outside painting is now finished, and painters state that this year there has been more painting done by householders than in any former year since 1914. Dealers report that white lead, oil and paint sales have been very good, both to the painters and the householders. There is every indication of a good volume of business in coach and carriage paint during the winter months, for the automobile painting trade.

The volume of production of steel shows constant improvement. There is, however, some tendency among consumers to look for further price concessions in view of the decline in pig iron and weakening in semi-finished steel. Heavy railroad demands, active building construction and buying of requirements for early 1923 by automobile manufacturers, are among the factors which indicate continued activity. The higher rate of production now being experienced is due to pressure of accumulated orders.

Calgary, Alta.

Holiday Goods on Prominent Display in Alberta Retail Hardware Stores

CALGARY, November 30.—Christmas goods are prominently on display in the retail hardware stores, which have taken on quite a holiday appearance. Pre-Xmas sales are being advertised, stressing the early shopping slogan. A feature of the advertising is the prominence given to prices. Merchants feel that competition for Xmas trade will be keen, and that they have a canny public to cater to, who are prepared to shop for holiday needs, and who will be keen for receiving value for money spent. Xmas displays indicate to some extent the wider range of stocks carried by the hardware merchant today as compared to a few years ago, when lines were almost confined to cutlery, silverware and a few odd sundries. Electrical goods are now an established line, while mechanical and educational toys, children's vehicles, and a rounded-out sporting goods line, evidence the growth of the hardware store as a Xmas store.

A return of exceptionally mild weather has had a slackening effect on business, both among the retailers and jobbers, and immediate buying is under that of last week. This condition is noticeable even among the coal towns where orders are not nearly sufficient to handle the average output, which is being curtailed to actual orders received. Early in the season a coal shortage looked possible, even probable, but the extremely mild weather throughout Western Canada has enabled the mines to catch up, and further production awaits cold weather.

Market changes are scanned closely by buyers to get a line on anything that may affect values for early spring business. The sharp upward trend on heavy commodities during August and September were supported by conditions that some feel have been overcome and are expecting heavy goods to ease off to something like last spring's figures. In the meantime bookings are conservative and quantity buying will not be resumed until the present condition either establishes itself, or breaks to lower figures.

Edmonton jobbers have been busy making final shipments to the northern trading posts and report a satisfactory season in trading supplies.

Prices have been issued on galvanized poultry netting for spring shipment at roughly 10 per cent. reduction under prices current through the past season. Bookings so far indicate that stocks in retailers' hands are low and that careful thought is being given to the assortment and quantities placed. Prices now current for shipment out of Calgary, Edmonton and Lethbridge on layflat and hexagon styles follow: 2 in. mesh, 24 in.—3.30; 30 in.—3.90; 36 in.—4.65; 48 in.—6.05; 60 in.— 7.15; 72 in.—8.55. 1 in. mesh, 24 in.—5.95; 30 in.—7.20; 36 in.—8.45. ¾ in. mesh, 24 in.—8.75.

Agricultural tool handles are also being booked for spring shipment at prices now prevailing. The past season was a very heavy one on this line, due no doubt to the high prices for new tools, and the inclination to make repairs where possible.

An advance of roughly three cents a pound has gone through on solder, following advances in the primary markets on the raw materials. Market indications have lead the heavy users of this commodity to expect stiffer prices, and a movement to cover up has been evident during the past month. Quotations at Calgary, Edmonton and Lethbridge are now, on strictly 30.25; on wiping 28.25; on wire solder 37.25 per 100 lbs. with one cent added for broken lots.

New net prices are issued on Climax bake pans, under prices recently issued. The change makes following current at Calgary, Edmonton and Lethbridge: No. 1—1.89; No. 2—2.01; No. 3—2.70; No. 4—3.68; No. 5—4.17.

Advice has been received of a 10 per cent. advance on galvanized range boilers. The usual fall overhauling of heating plants, and the finishing of new houses has provided a very good activity on this line over the last couple of months. Stocks are now low in expectation of the slacker winter season.

Jobbers are booking bamboo binder whips for next season's trade at a substantial reduction under last season's prices: the standard whip being reduced from 4.50 to 3.75 per dozen.

Minor changes are noted in the builders' hardware list, and covering such lines as padlocks, wrought steel butts, plated butts, light and heavy strap and tee hinges in cartons, hasps and staples, wrought staples, door pulls, barrel bolts, cellar window bolts, chest handles and shelf brackets.

Vancouver, B. C.

Good Prospects for Active Holiday Trade in Coast Hardware Circles

VANCOUVER, November 30.—Interest in the hardware trade on the coast this week is centering around preparations for the Christmas trade, which is expected to exceed all previous records. This statement is based on the fact that labor is more generally employed than in any of the last three or four years and although the buying has been of average proportions up to date, the prospects are said to be good for active holiday buying. Stores are featuring special lines for gift purposes.

The volume of sales is continuing good for November as compared with last year, dealers remarking that the month will show a comfortable margin over 1921. Orders are well distributed over the province with the usual exception of the Okanagan, where an official statement indicates that the apple crop would be ten per cent. greater than the former high record established last year.

There is a steady demand for heating

appliances, stoves and ranges and while there are the usual inducements of easy terms by the week or month, one retail merchant adopted premium on ranges. For one day only, the first five buyers of these stoves were offered credit slips to the value of $7.50 each, to be used in the purchase of any line handled in the store:—the goods to be purchased simultaneously with the stove.

There is no marked volume of activity in the paint section of the trade, due to the damp season, but the trade is concentrating on interior paints, varnishes and floor waxes.

No trade failures are evident on the coast this week with no further indications of financial difficulties in the retail end.

St. John, N. B.

Hardware Trade in St. John Indicates the Approach of Christmas Activity

ST. JOHN, N. B., November 30.—The hardware stores in this city are beginning to experience Christmas activity, and dealers report that sales are gradually increasing, although buying has not become in any way heavy, but judging by the large number of visitors to the stores, hardwaremen feel that the chances are good for a brisk Christmas business. After experiencing a few days of stormy weather, with two or three snowstorms, the weather has now become settled, with everything in favor of the shoppers. The snow had the effect of boosting the sale of framers, sleighs and sleds, but the sale of skates has not yet commenced in volume. Electrical supplies are receiving a good deal of attention, owing to the fact that the local power company has put into effect a lower scale of rates, to be adopted at the first of the year, and also owing to the fact that the city of St. John has contracted for hydro-developed current from the provincial government. Most of the houses that have been erected during the last year have been wired so that the occupants can make full use of electrical equipment in every room. The slippery streets have created a demand for toe calks, and many car and truck drivers have been purchasing chains. Some drivers have been compelled to buy chains in order to get home, after having started out, owing to the hilly nature of St. John's streets. Some of the dealers in automobile accessories took advantage of the condition of the streets, and made big displays of tire chains, pointing out the danger of being without non-skids. During the past week there has been no marked change in price. The following are some of the latest quotations to the trade:

Tire chains, Imperial, 30 x 3½—3.75; 31 x 4—4.10; 33 x 4—4.50; Dreadnought, 30 x 3½—6.00, 31 x 4—7.25, 32 x 3½—6.60, 32 x 4—7.50, 32 x 4½—8.75, 33 x4—7.75, 33 x 6½—9.00, 34 x 4—8.50, 34 x 4—8.50, 34 x 4½—9.25, 35 x 4½—9.75, 36 x 4½—10.75, 35 x 5—11.25 Discount 25% off list.

Super Dreadnought chains, 32 x 4½—13.50, 34 x 4½—14.25, 35 x 5—17.00. Discount 25% off list.

Dreadnought cross chains, 3½ in.—11.00 per 100; 4 in. — 12.00; 4½ in.—13.00; 5 in.—15.00. Super Dreadnought chains 4½—23.00; 5—26.00. All less 25%.

Flexible Flyers—1—4.15; 2—5.00; 3—5.75; 4—6.25.

Boys' Sleds 26 in.—5.20; 33 in.—6.75; 36 in. 7.25; 39 in.—9.80.

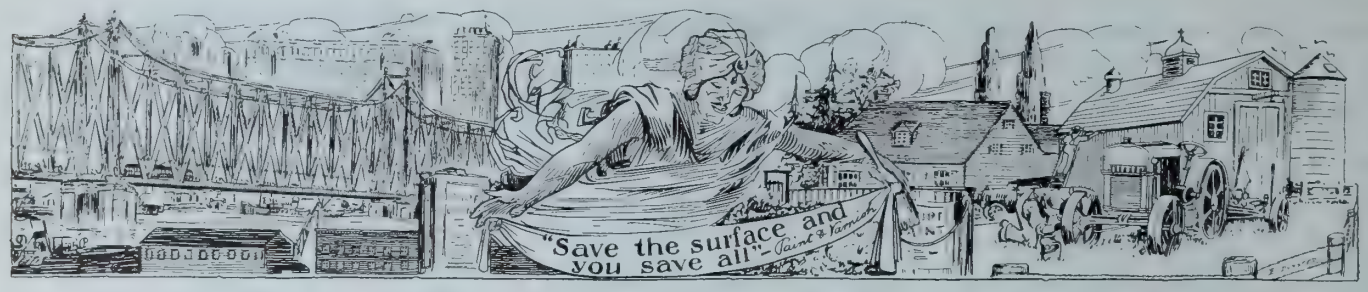
Pair Sleds 52—16.20; 54—24.30 61A—16.20; 61—24.30; 63-34.20.

Pittsburgh, U. S. A.

Crucial Period in Steel Industry Between Production and Consumption

PITTSBURGH, November 30.—Production of steel ingots is at a trifle above 40,000,000 gross tons a year, which was the rate in October. This represents an operation of the steel industry of between 75 and 80 per cent. of capacity. Production is at the highest rate since October, 1920.

In the past few weeks there have been numerous business reviews, from various sources, all suggesting that "business is going to be better." There has been such unanimity in these reports that the observer may easily be deluded. Presumably the average man does not wish to be deluded, but prefers to have the actual facts. There has been much talk in the past two years of "the business cycle," which has it that business improves for a time, stays good for a time, declines and then stays poor for a time. All these reviews say that business has been growing better, and then infer that it is going to continue growing better.



There has been a secondary inflation. At first the inflationary tendency was resisted strongly by the large and conservative banking and industrial interests, but when the United Mine Workers won their great victory last August, fastening upon the country a coal producing cost outrageously out of harmony with economic principles, this resistance was largely withdrawn, with idea that the inflation would perforce have to be allowed to run its course.

The question really is how much more of the course remains to be run? Already there are some observers who believe it is through. None can show that there are many more months. The business reviews infer that because business has been improving it is going to continue to improve, but that is no argument according to the business cycle principle or according to the fact that already there has been inflation. Steel production has been increasing since July, 1921, 18 months, which is rather a long time. Steel prices turned upward last March, eight months ago.

A very crucial fact, that should be kept prominently in mind, is that since October 1 steel production has been at a rate more than 15 per cent. above the average rate in the six months preceding, which period certainly began with no stocks, so that consumption could not have exceeded the production. Consumption now must, therefore, be more than 15 per cent. heavier in order to maintain a balance, and it is hard to expect this in view of the season of the year.

Markets are made by men as well as by materials, hence the psychology of the situation must be considered. The great coal strike was expected to interfere with production and men were disposed to buy as a safeguard. Now the coal strike is over, and the railroad congestion that was expected to follow has shown what it would amount to, the fears of buyers are removed, yielding to a feeling that one can get steel whenever he takes a notion to place an order. Sellers' market and buyers' market alternate. Capacity to produce steel increased since 1913 more than ability to buy steel, but great operating difficulties, practically unknown before the war, have intervened to prevent the full capacity being available for production, and on this account there has been more of a sellers' market than would otherwise have been the case.

November 23 the American Sheet & Tin Plate Company (Steel Corporation) made its long-awaited announcement as to prices. Contrary to expectations, very generally entertained four to six weeks ago, and to some expectations that still survived, there were no advances, former prices being continued throughout. The company's prices are: $4.75 for 100-pound coke tin plate, first quarter to jobbers, first half to manufacturing consumers; sheets for first quarter to all buyers; blue annealed, 2.50c; black, 3.35c; galvanized, 4.35c; automobile sheets, 4.70c.

Women Buy Winter Paint Specialties

Hardware Merchant Finds it Profitable to Link Up Paint Specialties for Interior Use With Housewares Sold to Women Customers —A Window Which Will Sell Plenty of Floor Finishes, Wax, Polishes, etc.—Music in the Paint Department

PAINT and varnish when featured with other household requirements have found a very ready sale with a Montreal merchant in recent years, in fact returns for the past season show that business in this department was just double that of last year. Situated in a down-town section of the city, and among a number of large departmental stores on the main thoroughfare, the custom of this store consists almost entirely of women and it is found necessary to specialize in household goods. Wares which sell best are such as a wide range of electrical goods, aluminumware and other kitchen utensils, the requirements of the laundry, household specialties, and the aforementioned paint, varnishes and sundries.

In line with other stores in the locality special sales are announced periodically, and these when well advertised bring in good results. Naturally when housewives read in the daily paper that the store is putting on a sale it immediately appeals to them because they know that the hardware store carries many lines which interest them. Although in direct competition with other larger retail establishments on practically all sides, it has been found that women will follow the advertisement when value is offered.

Paint Added Only Two Years Ago

It is only during the past two years that paint and varnish have been included in these appeals to women folk. Formerly only regular lines or household needs were offered, such as the fair sex usually purchase in a hardware store. It was not until after studying their demands that it was realized that paint and varnish, apart from sundries, were very often enquired for. A woman would enter and ask for some article advertised. When she had purchased this she would very often make enquiries about refinishing the interior of her home.

When asked if it was found necessary to reduce prices to the extent that very little profit could be realized, the reply was as follows: "We are convinced that price is more or less a secondary consideration, providing they are asked to pay only fair values. The majority of women have a good idea what a can of paint or varnish should sell for, and if the prices quoted in our advertising are around that figure the publicity will do the rest. Of course, a few cents less than regular prices is attractive, and we always announce a slight reduction, but we have never yet sacrificed to the extent that we must suffer. To establish a profitable store from a service standpoint is really the most important factor to consider."

Moving Paint Department to Front

Plans are now being considered to move the paint and varnish department nearer the front, bringing it to a position where it will command attention. At the present time it is well to the rear, and display is given certain lines on tables placed in front of the shelving. When a certain kind of paint or varnish is advertised it is brought into prominence in this way, but it is thought that a complete view of the department to all who enter the store would be much more effective.

The housewife is ready to buy paint

At this time of the year, window displays should be changed more frequently than at any other time, because the variety of products to be sold, and that should be given prominence in the windows of every dealer, are so numerous that to keep a window display in without changing it for over a week means that some mighty profitable items are going to be slighted, and that sales possibilities are going to be overlooked.

Market for Floor Finishes

Have dealers ever stopped to realize the market for floor wax, crack filler and weighted brushes that is being developed by the phonograph people? The big note of their advertising is danc-

SERVICE

CONFIDENCE

FAIR DEALING

The Paint on a Pedestal

Free During the Week Starting Today!

IT HAS been spoken of by our Competitors; by large Social bodies; Home Owners, and other Consumers of Paint, as one of the most beautiful and interesting works of commercial art ever produced.

Its name is "Home Color Harmonies" and will be sent, on receipt of his request, to any Hardware Merchant who sells Paint.

Our reason for making this offer is to place in the hands of the Trade a specimen of the kind and quality of the service we are rendering to build consumer interest and good-will in our Institution and Products.

It significantly illustrates the "High Standard" way of doing things.

Lowe Brothers PAINTS AND VARNISHES

SAVE THE SURFACE AND YOU SAVE ALL.

If interested tear out this page and place with letters to be answered.

ing, and dancing is not very enjoyable on floors that are rough and uneven.

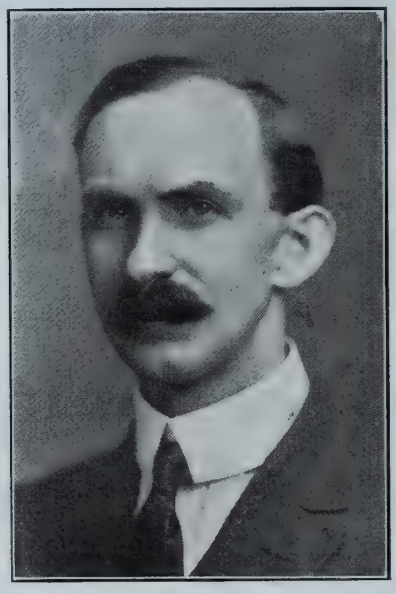
The Paint Department is about the only place in town where are sold, regularly, all the necessary implements for getting floors in shape for this indoor amusement, and the painter-dealer knows just what needs to be done to any floor to get it in good condition.

One of the most successful window displays that could be created would be for the dealer to fill up his window with floor wax, both paste and powdered, together with floor varnish to be used as an undercoating, sandpaper and steel wool to remove the rough spots of the wool, and a weighted brush to get the desired polish, liberally decorated with window cards and counter cards, and above all a sign, reading: "We can tell you how to easily fix your floors for dancing."

Add to this an electrically operated machine, borrowed from the local phonograph dealer, together with a few of the latest dance records, and by using one of the new repeating devices you could keep the instrument operating continuously. Music coming from a paint store would attract enough attention to make everyone stop, look and listen, and the Methodists notwithstanding, there would be a wave of house-party dancing that would mean profit to the dealer.

Linoleum Varnish

Linoleum varnish can be made a big seller at this time of the year. It is naturally a small can seller, a half-pint or a pint being sufficient for the average kitchen floor, but there is more profit in selling eight pint cans and eight brushes than in selling a gallon and only one brush. It is this that makes the sale of specialties profitable.



Another outlet for the specialties is your neighboring stores. Dry goods, department and general merchandise stores constantly have need of paints, varnishes, calsomines and flat wall paints, and if you have a dry goods store that has a good window trimming staff, you will find it is constantly using these materials in the preparation of its window trims. Merchants who realize the value of their windows keep the floors in perfect condition, the walls and backgrounds are constantly being repainted so as to show off the merchandise to the best advantage.

CANADIAN PAINT MAN GOES TO BUFFALO

W. G. Andrews recently assumed the duties of assistant resident manager at the Buffalo office, Pratt & Lambert Inc. Mr. Andrews' former experience as superintendent of the Bridgeburg, Ontario, plants and his work in various other executive capacities will doubtless prove valuable to him in his new position. Mr. Andrews is the son of W. H. Andrews, chairman of the board, Pratt & Lambert Inc., and is himself one of the directors of the company.

Benjamin Moore & Co. to Expand Business

AT the recent annual meeting of Benjamin Moore & Co., West Toronto, Frederick Moore was elected vice-president and general manager. W. A. A. Chown was elected secretary and treasurer. Application is to be made for an increase in the capital stock of the company from $250,000 to $500,000. Mr. Frederick Moore, the new vice-president, states that the company has had a most satisfactory year, is showing splendid growth and that there is an exceptionally bright outlook for the future.

FREDERICK MOORE
Elected vice-president and general manager of Benjamin Moore & Co., Toronto.

W. A. A. CHOWN
Elected secretary and treasurer of Benjamin Moore & Co., Toronto.

Canadian Tells of Boston Varnish Convention

Plants Manufacturing Luxuries and Semi-Luxuries Now Running on Full Time, Says Hardwareman—Compliments to Canadian Save the Surface Campaign

DISCUSSING the convention of the Boston Varnish Co., in Boston, Mass., as reported in a recent issue of Hardware and Metal, C. H. S. Bamford, sales manager of The J. H. Ashdown Hardware Co., Ltd., Winnipeg, who was in attendance, pointed out that the convention was a huge success, being well organized and well carried out.

J. B. Lord, president of the company, delivered the address of welcome and employing his happy faculty of encouraging friendship, all present were soon in complete harmony. The splendid keynote struck by Mr. Lord was carried on by H. A. Hall, treasurer, who carefully revieved prices showing that the trend was toward higher levels but that the company would not increase prices until actually forced to do so. He was followed by Walter A. Putnam, vice-president, who is in charge of the industrial dep't. of the company. He is in close touch with manufacturers of luxuries and semi-luxuries such as pianos, phonographs, furniture, automobiles, etc. Mr. Putnam pointed out that a few months ago many of these plants were either closed or running on short time while to-day they were running on full time, in many cases night and day. Mr. Putnam claimed his department was a business barometer and that it indicated a wonderful revival in business all over the country.

Mr. Putnam was followed by Charles H. Tewksbury, vice-president and manager of the Chicago branch. His remarks covered twenty-five years in the company's history and bristled with choice bits of advice to both jobbers and salesmen. His address aroused wonderful enthusiasm and put everyone in the right mood to repair to the personal application clinic where aprons were donned and the various products dissected. This clinic was held daily during the convention and every product investigated fully.

C. A. Dana Redmond, advertising manager, spoke on "Kyanize advertising—its aims and ideals," outlining the company's advertising plans for the com-

Weekly Paint Markets

Montreal

MONTREAL, November 30.—Price revisions in a downward direction are made on both turpentine and linseed oil on the local paint markets this week. The softer tone which developed in the former product last week has continued in the South, where prices record a substantial decline. This tendency however is only considered a temporary condition owing to a slackening in demand, and the undertone of turpentine is still quite firm. As pointed out in past reports the linseed oil market for future has been displaying an easier tendency, and this is further evidenced this week by a reduction in spot prices, a further reduction for December shipments, and quotations slightly lower for the opening months of next year. The reason for this, as outlined, is that heavier shipments of seed from the North-West are expected as the months pass, with a continued improvement in transportation facilities.

A very firm tone is displayed in the market for white lead in oil, and although it was decided two weeks ago to make no change in prices, and to extend the booking dates until March 31 next, there is a feeling locally that higher prices will be announced in the near future. At least future prices on this product will be again considered at an early date, and unless raw materials display a decidedly easier tendency advanced prices are not unlikely. The shellac market, while quiet, is slightly improved in primary circles, although locally little or no change is recorded.

TURPENTINE QUOTATIONS FIVE CENTS LOWER

Montreal.

Following a slump in the turpentine market in the South local quotations are reduced five cents per gallon in all quarters. There is still a slight variation among distributors and it was stated by one firm who are quoting slightly higher than others that their quotations might be further reduced in the very near future, thus bringing prices on a uniform level. In Southern primary centres demand has fallen off considerably during recent weeks, thus the present weakening. Importers, however, are quite firm in their ideas and state that the present softer tone will only be of temporary duration as the undertone of the market is firm. New receipts are limited, with little hope of any improvement as a good percentage of the past crop has already been marketed. Stocks locally are still of only moderate proportions, with demand seasonably quiet. Following are revised prices:

TURPENTINE—		
1 barrel lots	2 10	2 15
2 to 4 barrel lots, per gal.....	2 08	2 13
Broken lots	2 20	2 25

CONTINUED EASING IN LINSEED OIL MARKET

Montreal.

A softer tone continues in the linseed oil market owing to weakness being displayed in flax seed, and this week spot quotations are reduced two cents per gallon while December shipments show a further reduction of the same amount. This brings prices from December 1, to $1.04 per gallon for raw oil, and $1.06 for boiled in one barrel lots. As pointed out in the previous reports the future market has been the one showing weakness, and prices for the opening months of next year, announced two weeks ago, were considerably lower than market values for immediate delivery. From present indications it appears that a lower market may be expected during the ensuing months when this year's crop will be felt. Up to the present time usual quantities from the season's yield have not reached here owing to transportation difficulties. Revised quotations are the following:

LINSEED OIL—	Raw	Boiled
1 to 2 bbl. lots, per gal.	1 04	1 06
5 to 9 bbl. lots, per gal.	0 99	1 01

Less quantities, add ten cents per gallon.

MAY STILL BE HIGHER PRICES ON WHITE LEAD

Montreal.

Although the announcement was made two weeks ago that quotations on white lead in oil would remain unchanged, and the booking date was extended until March 31 next year, there is still likelihood of higher prices in the near future, according to local corroders. "The undertone of the lead market is in such a firm position that we feel a revision in an upward direction must be made," said one producer to Hardware and Metal. It is intimated that the question of future price levels will be thoroughly studied again at an early date unless a reverse trend in the undertone of the market is evident through a weakening in raw matrials.

UNDERTONE OF SHELLAC MARKET IS FIRMER

Montreal.

There has been no further change made in local quotations on shellac, and the wide variation in prices among distributors still exists. At primary centres there has been an improvement in the market and prices are described as firmer. Although fluctuations may occur, a firm outlook is presented in this product, more interest on the part of buyers now being apparent.

SHELLAC—	White	Orange
In barrels	4 25—5 05	3 75—4 55
5 gallon jugs	4 25—5 15	3 75—4 65
1 gallon jugs	4 55—5 25	4 05—4 75

Toronto

TORONTO, November 30.—Spring bookings for paint, varnishes and paint products are reported to be coming along nicely. Manufacturers and distributors are already exhibiting enthusiasm over the prospects for next year's business, expecting it to surpass in volume the records for the present or any other year.

Price changes this week centre around the reduction of ten cents per gallon in turpentine. This development is chiefly attributed to easier markets now evident in the southern producing fields, a factor brought about by lack of export trade. This condition is expected to show an improvement, however, with the arrival of the New Year when fresh commitments are looked for. No fundamental change has taken place in the undertone of this product.

White lead in oil continues to exhibit a firm trend, and while the booking date was recently extended at unchanged price levels, the general impression prevails that some upward revision is quite possible in the near future owing to the climb of raw materials.

TURPENTINE PRICE DROPS TEN CENTS PER GALLON

Toronto.

In conjunction with the easier tone which has crept into the turpentine market, local quotations on this product are reduced ten cents per gallon this week. The development in this direction brings average levels to $2.20 per gallon, although it is noted that this is somewhat higher than the prices prevailing on eastern markets. One result of the current change, however, is the fact that the wide range formerly noted in local quotations has now practically disappeared. The easier levels in southern primary centres are ascribed to a lack of export trade at this season, a condition which

Show the Goods—and Boost!

Advice to Maple Leaf Dealers—and others.

ONE of the standard tenets of merchandising is—"goods well displayed are half sold."

Make some one member of the Maple Leaf line a prominent feature in your salesroom. Place it where it will be an outstanding feature and you will be surprised at the business it will bring to you.

Maple Leaf stoves and ranges are pleasing in appearance. They are made on honor and they are priced right. Every time you sell a "Maple Leaf" you are making a new lifelong friend — besides which you are also making money.

If you have not the latest price list with this leading line of heat making machines—ask us for it.

Maple Leaf Thatsit The newest in Quebec style of ranges. 6-hole top with an undertop heat control that makes all six holes available and efficient. Large side oven 14 x 20 x 11½ with balanced spring type drop door, friction catch, non-heating handle and thermometer—beside many other modern appliances. Can be fitted with either hot water boiler or copper reservoir. With or without warming closet. Feature the "Thatsit."

Manufactured Exclusively by

BEACH FOUNDRY, LIMITED

Branches in Winnipeg and Vancouver

If interested tear out this page and place with letters to be answered.

TORONTO

(Continued from page 48)

is expected to improve in the New Year. It is stated that the fluctuations now evident do not indicate any improvement in the available supply of turpentine, nor any fundamental weakness at production quarters. Stocks, however, are showing a slight improvement, while the domestic call for turpentine at this time of the year remains moderate. Revised prices follow:

TURPENTINE—

1 barrel lots	2 20
2 to 4 barrel lots	2 19
5 gallon lots	2 35

Less barrels, add 15 cents per gallon.

Turpentine steel drums galvanized 5c. per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, Montreal, but freight may be equalized from any of these points.

LINSEED OIL PRICES NOW MORE UNIFORM

Toronto.

Linseed oil quotations remain generally unchanged on the local market, although it is noted that flax seed is again slightly easier. It is pointed out, however, that the current demand for cake and meal is quiet and this condition serves to maintain prevailing oil prices to some extent. The reduction announced last week has been generally followed and this change practically eliminates the wide range of quotations which has formerly been noted on the local market, especially during the past few weeks.

LINSEED OIL—

	Per gallon Raw	Per Gallon Boiled
1 to 2 barrels	1 10	1 13
3 to 4 barrels	[illegible]	[illegible]
6 to 9 barrels	1 07	1 10

Less barrels, 15 cents per gallon.

CURRENT PAINT TRADE UP TO EXPECTATIONS

Toronto.

The proportion of current business in the paint industry as a whole is being looked upon as satisfactory. This activity, while naturally falling away during the quiet period, is considered as holding up very well considering existing weather conditions. The receipt of spring bookings is conducive to a steady business in paint manufacturing and distributing circles, while retail reports indicate a fair volume of demand for indoor varnishes and paint products.

ANTI-FREEZE PRICES FOR CURRENT SEASON

Toronto.

The following are the prevailing local prices on anti-freeze:

ANTI-FREEZE—

In five gallon cans, per gallon	0 75
In one gallon lots	1 00
Cans extra.	
Anti-Freeze for diluting purposes	2 50

ACTIVE DEMAND STILL RECORDED IN PUTTY

Toronto.

Putty continues in active demand, distributors recording a seasonal movement throughout recent weeks in conjunction with window glass sales. It is stated that the present activity compares well with former records for this time of the year. Prices remain unchanged at the following levels:

PUTTY—

	Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk bbls.		$3 70	$3 95	$4 20
100-lb. drums		4 20	4 45	4 70
25-lb. irons		4 45	4 70	4 95
Bladders in bbls.		5 45	5 70	5 95
Do., less quantities		5 70	5 95	6 20
1-lb. tins		10 45	10 70	10 95

Pure Linseed Oil Putty, $1.25 per 100 lbs advance over above prices for similar quantities

WHITE LEAD IN OIL REFLECTS STRONG TONE

Toronto.

The seasonal movement of white lead in oil has been so marked this year, that it is stated in some quarters that the carry over to next year will be relatively small. Stocks on hand are described as low, and with raw materials continuing on a firm trend, quotations are undoubtedly considered on a firm basis.

WHITE LEAD IN OIL—

In five gallon lots $12.70 per cwt.
In one ton lots, $13.45 per cwt.
In less quantities, $13.80 per cwt.

May Be Higher Prices for Insecticides

OWING to the recent advance of raw materials, such as arsenic and lead, the possibility of insecticides being somewhat higher in price next season is receiving attention in certain quarters. It is pointed out that arsenic is already advanced over last year's level and arsenate of lead has been increased accordingly in outside markets. Another factor of importance, however, when dealing with insecticides, is the prevalence of absence of bugs and pests of this class. Therefore the quantity of insecticides required is usually a governing principle, although it is also admitted that quotations are likely to be somewhat higher.

A large manufacturer of insecticides sums up the current market situation and the prospects for next season as follows:

"It is difficult to be definite about the insecticide business at this time. It is true, however, that most raw materials entering into the manufacture of different insecticides are higher in price, and it is likely, therefore, that the tendency for the coming season will be towards higher values in the manufactured product.

"The question of price, however, is not the prime factor entering into the insecticide market. The insecticide business is either a feast or a famine due to the fact that if potato bugs, apple tree pests and other eating worms and insects are plentiful there is invariably a heavy demand for insecticides, but if, through a severe winter which kills the eggs, there are few or no insect pests in the succeeding spring, it is then impossible to sell any large quantity of insecticides no matter how low the price may be fixed."

Canada's Trade With United States In Paint and Varnish

Canada's exports of linseed and flaxseed into the United States in the month of August were as follows:—Quebec and Ontario, 38,257 bushels, valued at $78,395; from prairie provinces, 1,364 bushels, valued at $2,794. Exports of linseed oil from the United States to Canada in that month were as follows:—Quebec and Ontario, 11,328 lbs., valued at $1,281; to prairie provinces, 3,938 lbs.; to British Columbia and Yukon, 970 lbs. Imports into the United States of paint, varnish, etc., from Canada in that month were valued at $7,331.

EXPORT TRADE IN PAINT

The Brandram-Henderson Co., Ltd., are receiving encouraging business from South America and the West Indies, which countries they have been working for some time past. During the past summer months they have sent special representatives to South Africa, Cuba, China and the Argentine. In South Africa and China their special representatives have just arrived and it is a little early to show results, but from the former country they have already received cabled orders for considerable tonnage of white lead since their representative arrived. George Henderson, the president, is at present in England and is said to have secured some nice business from this country.

CANADIAN TELLS OF BOSTON VARNISH CONVENTION

(Continued from page 46)

ing year. He was followed by F. Bray, who spoke on the newspaper and its function for the paint manufacturer. E. E. Tobey, factory superintendent, visualized the manufacture of the goods from raw material to finished product. Arthur M. East, business manager of the Save the Surface campaign in the United States, gave the salient features of the campaign. Mr. East paid many compliments to the Canadian Save the Surface campaign which he said, had originated numerous fine ideas. H. B. Winne, sales manager, and many of the salesmen also gave talks on salesmanship and kindred subjects.

The entertainment side of the convention was splendid, according to Mr. Bamford, including a theatre night, dinner and vaudeville show at the Boston City Club, and a concluding dinner at a country club just out of Boston at which Mr. Bamford proposed a toast to Mr. Lord and his fellow workers.

Self Lubricating Aero Clothes-line Pulleys

The deep V-shape friction groove accommodates various diameters of clothes lines. The space between the groove and guard allows knots to pass.

The weather-proofing treatment repels moisture—hence no freezing. Being of treated wood it lubricates itself—is noiseless and smooth working—there is never any rust. Made in two sizes, 2¾" and 6".

The price encourages sales.

Durability-Service-Economy

These three features make Davidson's "Frost River" Refrigerators easily saleable. These are the features that the woman who buys for the home inquires about.

"How long will it last?"

"Will it keep the food in proper condition?"

"Does it take much ice to keep it thoroughly chilled?"

The construction of the "Frost River" is galvanized sheet steel with galvanized steel ice container and white enameled food chamber and drip cup. This and its insulation ensure a perfectly sanitary constructed refrigerator.

Actual tests have proved that ice lasts longer and the food chamber keeps cooler in a

Frost River

and this is what your customers want.

The best finish and decoration, together with the most approved minor accessories make the "Frost River" the one refrigerator you can place on your floor and sell with the full knowledge that your customers will be satisfied.

Write for illustrated booklet to-day.

Cary's "Self Tightening" Round Wire Box Strapping

This strapping is put up in reels of 5,000 feet each, or in bundles cut to special lengths. Made from a special soft coppered round wire in number 14, 15 and 17 gauges. Nails are to be driven between twisting points; the further in nail is driven, the tighter the strap is on the case. *Samples and dealers' discounts upon request.*

The Everlasting Veneer Toilet Seats

This is the strongest and cleanest toilet seat made. There are no cracks—made of 7 and 9-ply, air-seasoned wood veneer, held together by our special wood cement.

These seats are proof against heat, cold or dampness—will never crack, warp or split. They cost no more than the so-called "cheaper" toilet seats, and always bring repeat business.

Have you written for our prices?

"Never-Fail" Electric Incubator.

"Handy" Whitewash Sprayer.

Start the Year With Two Good Sellers

Poultry raisers start buying incubators and brooders with the new year. After careful study of Canadian requirements we are offering a new incubator and brooder (both thoroughly tested) that will enable you to make a strong appeal for this business.

"Never-Fail" Electric Brooders and Incubators

These machines are made in Canada to suit our climate. They carry no burden of duty. There are no fumes, smoke nor impure air. They give certain satisfaction. Approved by the Hydro Power Commission.

Handy Whitewash Sprayer

Appeals to poultry raisers because it keeps coops clean and sanitary. Good for barns, stable or outhouses, too. Stands by the side of the pail. Reaches all the cracks and corners.

Write for our illustrated folder of sure-selling, complete line of poultry and spraying equipment.

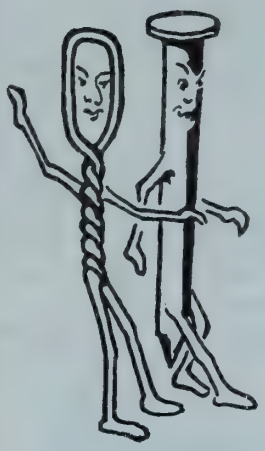
Here's a Line That Sells

TORONTO Gendron CANADA

No. 24 or 28 Rowing Waggon

Fine sturdy vehicles that will take a lot of hard knocks and bumps.



The turnover on these lines is limited only by the number of children in your district. Let us have your order on No. 24 or 28.

The Gendron Mfg. Co. Limited
14 Duchess Street .·. Toronto

Laidlaw Products

BT

"A Strong Personality"

"We possess an individuality, W. N., and we have no superiors in our line."

"That has always been my one constant desire, B. T., and we must keep our good reputation."

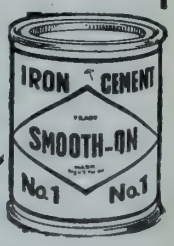
Do it with SMOOTH-ON

A Nationally Known and Nationally Advertised Product



National publicity has built up a steady demand for Smooth-On. The housewife, home owner and motorist know of its diversified uses and repairing qualities.

Repairs leaks in kitchen utensils; also leaks, cracks and breaks in furnaces, pipe lines, boilers, automobile radiators, water jackets, etc. Makes lasting repairs—not temporary makeshifts.

Little sales talk is necessary to sell Smooth-On. Put in a stock of six-ounce cans—display the carton on your counter and watch sales grow.

Not a shelf warmer—a quick seller, known to thousands of satisfied users and backed by national advertising. You make a generous profit on every can sold.

Comes in 6-oz. cans, packed twelve to a carton ready to display on your counter. Also in 1 lb., 5 lb. and larger size tins.

THE CANADIAN ASBESTOS CO.

Dept. 53 L., 36-48 Youville Sq., Montreal, Que.

"Why Paint Peels" *by G. B. Heckel*

"Paint that will not peel when it ought to peel, is not fit to paint with."

"Perhaps the chief cause for the peeling of paint is moisture. If there is moisture under the paint, it will eventually try to escape. If it escapes outward, it must either pass through the paint or push the paint off. If moisture will pass through the paint, from the wood into the air, it will also pass through the paint from the air into the wood. Since the principal purpose of painting wood is to keep the moisture out, paint that allows moisture to pass through, in either direction, is not fit to paint with."

G. B. Heckel talks straight and tells a lot of truth in "WHY PAINT PEELS." This book, and "A CATECHISM FOR VARNISH MEN" are amongst our dealer helps. Write us for them to-day.

"Save the surface and you save all" Paint & Varnish

The right kind of co-operation is one good reason for dealing with the Ottawa Paint Works—
a right margin of profit on your sales is another—
THE RIGHT PRODUCT is the most important of all.

Write us to-day. We will tell you all about it.

Ottawa Paint Works Limited

Branches: Montreal and Toronto.

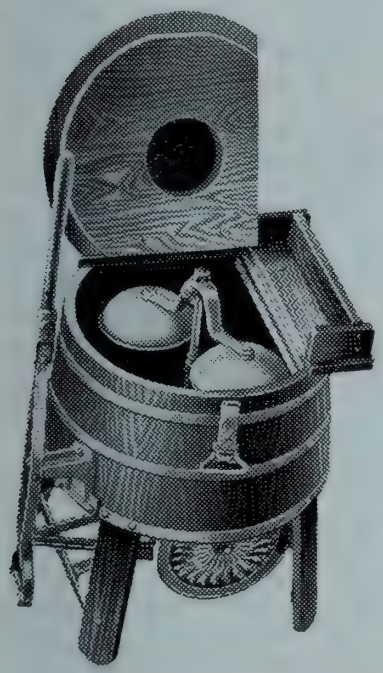
Mono-Vac.

A Profitable Group



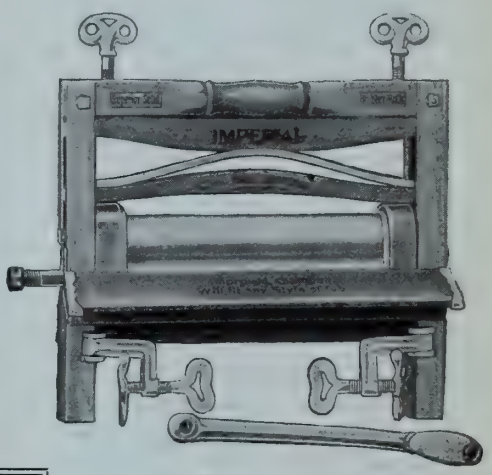
For Your Christmas Trade

Your customer will appreciate these household utensils as appropriate Christmas gifts. The trend of the times is to give gifts that are useful and enduring. These gifts will win a lasting appreciation. Demonstrate and display.

Maxwell Products

Their mere Suggestion will bring you Sales

Maxwell Products include Washing Machines, Wringers, Food Choppers, Lawn Mowers, Churns, Wheelbarrows, Pumps and other Farm and Home Utensils. Write for prices.



Maxwell Vacuum

Mono-Vac

Electric Washer and Wringer operates on the ONE CUP Vacuum principle—its big feature. An Electric Washing Machine brings contentment, solves the servant problem so far as the knuckle down drudgery of wash-day is concerned, and offers a splendid opportunity for Xmas Sales.

Maxwell Vacuum

Washes by pressure and suction. A High Speed Machine with cut gears, operates noiselessly. Mechanism under the tub, finished in natural wood and aluminum bronze.

Maxwell Home Washer

A hand Washer of the dolly type (not illustrated) with High speed balance wheel, ball bearings and spiral cut gears ensure smooth, gentle running. Cypress tub finished in natural wood, metal parts gold bronze. You cannot go wrong in most strongly recommending this machine to your customers. The Maxwell Home Washer is giving all-year-round satisfaction is thousands of Canadian homes. There is no more acceptable Christmas gift, or more useful article of household equipment.

Maxwells Double Diamond Brand Clothes Wringers

Warranted superior rolls and first-class workmanship. Several types, covered or open gears. Ball or plain Bearings, fit any tub.

Home, Model and Jewel Food Choppers

Are invaluable assets to kitchen equipment Made in several sizes for Family, Hotel and Restaurant use.

Rats!

Gets them and Holds them

This new Macdonald rat trap positively lures them in—then holds them; and not just one rat, but numbers of them in a single night.

Ribs of cold rolled steel give this trap a strength beyond ordinary; it will give 100% service for years.

You can with confidence recommend these traps to customers.

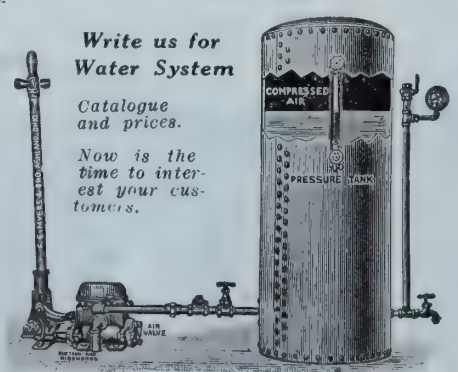
The Cleveland Stone Company
814 Union Bldg. Cleveland, Ohio

Grinding Wheels, Abrasive Articles and Grinding Machinery.

PNEUMATIC
WATER SUPPLY
SYSTEM



Gives country residents all the advantages of a city water system without the excessive cost

The wide-awake dealer will make big profits out of this system among customers who now have difficulty with their water supply. It is so simple to operate and costs practically nothing for upkeep. The outfit consists of an air-tight steel tank which can be placed in the basement, and a "Myers" famous guaranteed pump (hand or power), suitable for pumping air or water, together with pipes and fittings. Any plumber or gas fitter can easily install it. Every outfit guaranteed to do the work for which it is designed. For small or large dwellings.

Write us for Water System

Catalogue and prices.

Now is the time to interest your customers.

THE STEEL TROUGH & MACHINE CO., LTD
TWEED, ONT., CANADA

Every Hardware Dealer

could at this time of the year sell a number of "Monitor" spirit blow lamps, small and efficient around the house or store, for that small soldering job, for that frozen water pipe, for those odd painting jobs that father has saved up for the winter, to burn the old paint off makes the new job look better. All you dealers have to do is to put one of these lamps on your counter, it will attract attention. Tell your customer that it is "British Made Throughout" by Parkinson, and the rest is easy. Write your jobber or our nearest agent and get full description and prices.

BRANDRAM'S *Genuine* B.B. WHITE LEAD

In the organic world an evolutionary process is said to be at work, ever developing the good and eliminating the unfit. Time is the great arbiter, the acid test, that infallibly detects the false, leaving the genuine untouched.

Nearly two hundred years ago a White Lead corrosion process was discovered by one of the founders of the House of BRANDRAM. This has been used continuously ever since for the manufacture of a product of superb value, and to-day BRANDRAM'S GENUINE B. B. WHITE LEAD is being made on the original formula, the washing, pressing and grinding processes among others being facilitated, however, by the aid of modern mechanical methods.

In a very few generations the unworthy goes to the wall, but during ten generations BRANDRAM'S GENUINE B. B. WHITE LEAD has earned and still maintains a world wide reputation for its possession of the essential properties of White Lead in oil—excelling as it does in spreading and covering qualities and in durability.

Tested by Science's latest method, the Pfund Cryptometer, an instrument of mathematical precision — BRANDRAM'S GENUINE B. B. WHITE LEAD is proved to have greater hiding power than any other brand on the market.

Arctic Snow Shovel

Arctic General Purpose Shovel

Announcing

A Complete Line of Shovels

To meet the heavy demand for SMP shovels we have been working for some time on a complete line of shovels which we now announce to the hardware trade. We are already selling very big quantities of shovels at very fair prices. There are no weak numbers in the line. You can order freely with the knowledge that you will receive only A1 goods.

Arctic Jumbo Snow Shovel

There are Arctic Furnace Scoops with "D" handles, Arctic general purpose shovels, with long and "D" handles, Arctic Jumbo Snow Shovels with "D" handles, and Arctic snow shovels with long handles, either Japanned or Hot Galvanized. The Blades of all Arctic shovels and scoops are drawn in one piece from best quality shovel steel.

Note especially our Arctic Jumbo Snow Shovel. This new line is proving most popular and a big seller, particularly in towns and cities. It is a most effective snow shovel and appeals strongly to men. The blade is hot galvanized, heavily reinforced to prevent buckling, and the handle is securely rivetted. It is a good proposition and deserves your consideration.

Be sure to see our traveller about these shovels on his next trip regarding prices, etc.

C. S. G. Hinges are Better Hinges And Here's Why —

Accurately Spun Pins—that's one big "why"

Hammered or rivetted pins will always bind and catch when a hinge is opened; but C.S.G. pins are carefully spun, and this extra care ensures free, smooth working of the hinge on the pin. The spinning of the pin is a most important operation in good hinge making.

Again in C. S. G. hinges the screw holes are uniform and clean

The hardware man may with confidence display these hinges to his customers knowing that he will seldom be embarrassed by attempting to open a hinge that "sticks."

C.S.G. hinges may be had in bundles—or packed one pair in a box complete with necessary screws. They are made in sizes from 4-in. to 14-in.

Westinghouse

The Perfect Electric Range

The Westinghouse types "M.H." and "H-1." Ranges are the culmination of fifteen years' experience in designing and building Electric Ranges and are built to last a lifetime.

The **Westinghouse** is the only range that has its fuses so located that they are easily accessible and each directly beneath the switch controlling the circuit it protects, so that renewing a fuse is but the work of a few seconds.

The **Westinghouse** is the only range in which all the heating elements are of the open type and are removable without disconnecting any wires. They plug in just like your electric iron or toaster in your lighting socket. Anybody can do it—no need of an electrician.

The **Westinghouse** is the only range having solid bus bar construction of the heater-box, which means that every wire is absolutely protected from the effects of heat.

The **Westinghouse** is the only range that has top heating elements with two distinct heating areas, 6″ and 8″, which permits the use of smaller cooking utensils without waste or loss of heat.

The **Westinghouse** was the first range to use a crumb tray and heat reflector under the top heaters, thus ensuring faster heating.

The **Westinghouse** is the only electric range that can be secured equipped with a thermostat and alarm bell, which rings automatically when the oven reaches the heat desired.

The **Westinghouse** is the only range having a seamless porcelain enamel-lined oven with all the oven parts and heaters removable, permitting the oven to be cleaned thoroughly and with ease.

The **Westinghouse** is the only range which has a 2,000 watt heater for broiling—the only efficient broiler on the market

The **Westinghouse** is the only range employing heat baffling in the oven, ensuring even heat distribution.

The **Westinghouse** was the first range to use the reciprocating double pole switch permitting turning from any one position to any other position and in either direction.

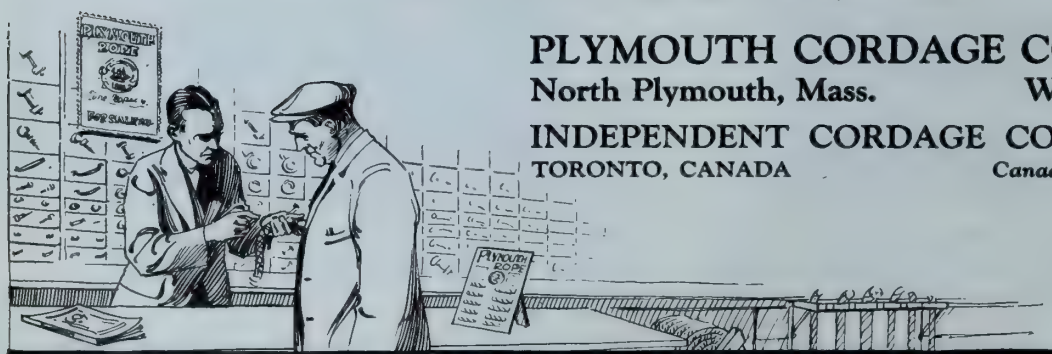
The General Manager said:—

"and Plymouth Rope made that success possible"

RECENTLY the general manager of a very successful company building heavy machinery told a friend some of the problems which they had been obliged to overcome.

He described the bringing out of the machine upon which their reputation had been built and said:



"For a long time we were afraid that it would be a failure. You see, it depended for its operation on a rope drive, and we could not find a rope that would stand up under this service more than three months.

"We tried nearly every rope on the market. Customers who were forced to shut down every ninety days while a new rope was installed began to complain and threatened to take the machine out.

"It was then we tried Plymouth Manila Rope. It lasted eighteen months. We equipped all of our machines with this rope and found that Plymouth Rope gave consistently six times the service of any other rope we could buy. For years now hundreds of those machines have been in successful operation, and Plymouth Rope made that success possible."

To dealers who are anxious to build up a reputation for high-quality merchandise, Plymouth Rope offers that opportunity, and in addition, the Rope-by-the-Foot method enables them to increase their rope profits.

Full information about this money-making method of rope selling sent on request.

—making money—

"The Calorics we have installed are giving every satisfaction. It is a great pleasure to call on a customer with the temperature at zero and be met with a pleasant smile."
F. H. Trainor, Caloric Dealer, Charlottetown, P.E.I.
Ask for testimonials from dealers in any section of the Dominion you are interested in.

Caloric dealers are making money. That's the big reason why you should sell Calorics.

Selling Calorics is different from selling old-fashioned complicated heating plants, which require the services of expert sheet metal men, plumbers or steam fitters.

The Caloric is simplicity itself — so is the Caloric installation. Two ordinary men — yourself or your regular help—can install a Caloric, ready for the fire, in a day. No pipes, no plumbing, no alterations.

Caloric Engineers make blue prints, showing correct location and giving installation specifications for each job. Anybody can follow these simple instructions.

Caloric advertising and sales co-operation cover every angle of successful merchandising. Our Sales Department advises you and places at your disposal the most successful methods of other dealers.

More than 135,000 Calorics in use in Canada, United States, England, and other countries. Write TO-DAY for details of the Caloric opportunity in your territory.

The Bridgeport Line Satisfies

When a mechanic gets hold of a Bridgeport tool he is satisfied—and the better the mechanic the more surely and completely will he be satisfied.

He recognizes in the Bridgeport tool those qualities of superior craftsmanship that he strives for in his own work and he looks upon it with confidence as a tool worthy of his skill.

In selling the Bridgeport line the hardwareman gets a generous profit on every transaction and a satisfied customer who will come back again.

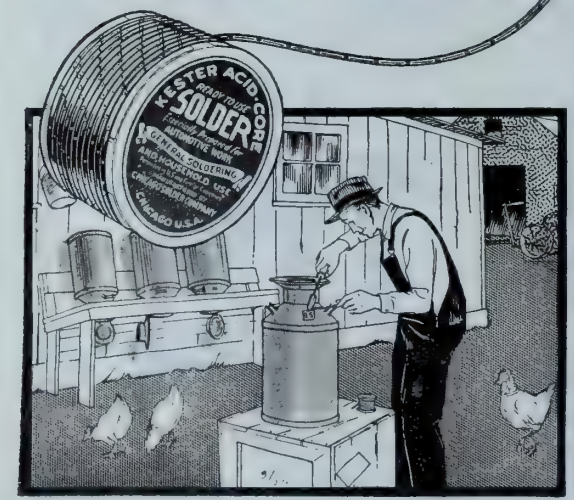
KESTER
Acid Core WIRE SOLDER

THE daily need for solder is apparent the year 'round on the average farm, but its neglected use is due to the messy method of using ordinary solder and flux, which has little appeal for the busy farmer.



Your next call for either solder or flux is your chance to make a satisfied and permanent customer. Take a spool or carton of Kester Acid Core Wire Solder and say to him, "this solder requires only heat to do *neat, rapid* and *permanent work.*"

Explain also, how the extensive use of solder prolongs the utility of various equipment.

Then *show him* how this solder contains tiny pockets, which supply the flux at the proper time.

Tell him, "Kester comes coiled in one-pound cartons or on one-pound spools, but it is more economical to buy it on the five or ten pound spools."

When he has indicated his choice, then you've made a "Kester Sale"—*clean, quick and profitable.*

No. 1319--Actual Size

A Secure Steel Padlock

The use of Padlocks made of steel has been objected to where high security is desired, because the metal is usually of light weight and the lock in consequence may be easily damaged.

Our Nos. 1319 and 1519 series was designed to overcome this objection, the case being made of heavy wrought steel, the interior parts of brass, and the shackles of malleable iron.

Cases, shackles and chains are **Rust-Proofed**, by a process much superior to ordinary galvanizing in its resistance to weather.

The locks are made with either flat steel or malleable iron barrel keys in a large number of key changes.

No. 1319—With Flat Steel Keys.
No. 1419—With Flat Steel Keys and 9 inches of Chain

Conference Favors Higher Sales Tax

Committee of Manufacturers, Wholesalers and Retailers in Toronto Make Recommendations for Eliminating Receipt Tax, Modifying Present Stamp Tax and Upholding the Sales Tax as the Right Principle to Follow

AT A ROUND table conference of manufacturers, wholesalers and retailers held at the Prince George Hotel, Toronto, for two days of this week, the various existing and contemplated forms of Federal taxation were discussed very fully and some progress made toward harmonizing the views of these various branches of trade. Those gathered composed a Drafting Committee, under the chairmanship of John R. Shaw, President of the Canadian Manufacturers Association. The discussion waxed very warm at times as was to be expected at a meeting where there were gathered the representatives of trades having opinion diametrically opposed in connection with taxation. At first there was much discussion and very little progress but at the conclusion of the conference it was evident that some progress had been made. The recommendations of this body take the form of resolutions to be put before meetings of the various trade bodies represented. There will follow a joint conference in Ottawa, probably in January, when the resultant recommendations of the various bodies will be co-ordinated and presented to the Government.

Uphold Sales Tax

The trend of the discussion and recommendations in general follow out the principle of the Sales Tax, with some suggestions designed to eliminate friction where it now exists. It may be found necessary to slightly increase the Sales Tax so as to provide for the loss of revenue which would follow if certain other forms of taxation are eliminated. The recommendations of the conference along these lines is understood to be for the total elimination of the Receipt Tax destined to become effective on January 1, 1923. It was felt that such forms of taxation were very undesirable insofar as they required a great deal of inspection and checking up, and the resulting revenue was not in proportion to the expense involved in securing it. Then, too, it was the opinion that such a tax would interfere to some extent with sales over the counter and this was the chief objection to the tax on luxuries, now abolished. It was also felt that there would be much difficulty over interpreting just what constituted a receipt, for taxation purposes.

Much discussion also took place over the question of retailers who are now classed as manufacturers for taxation purposes such as confectioners, tinsmiths, etc., and who are required to collect Sales Tax on articles made to special order. It is understood some recommendation for relief in this direction was made.

The present Stamp Tax on cheques, etc., also came in for some discussion. It was felt that this tax should follow out the English law to a greater extent. A recommendation was made that a tax of two cents be applied on all cheques (or their equivalent) to the value of $100 and over that be confined to four cents. This would eliminate the graduation of the tax according to the amount of the cheque such as is now followed, and which manufacturers complained of as a deterrent to big business interests.

Income Taxation did not receive a great deal of attention because it was felt this was largely an individual matter, though insofar as it affected business firms it was discussed. Business profits taxation was not dealt with.

A common opinion was that in favor of an extension of the present sales tax from 4½ per cent to five per cent., to provide for the loss of anticipated receipt tax revenue which is due to come into force on the first of January, also that the sales tax be collected at the source. As pointed out at this meeting, investigation had shown that the receipt tax would not be sufficiently productive of revenue to offset the heavy costs of its collection. Revenue from sales tax this year it is estimated will be fifty-seven millions. With an increase of half of one per cent., the revenue expected from the receipt tax can be taken care of.

Collect Tax at Source

The Retail Merchants' Association have for some time past advocated a sales tax at the source of manufacture or import. The contention was made by officials of the Association at the gathering that the sales tax should be collected at the source of supply, viz., from the manufacturer and the importer, and from as few channels as possible, so as to save annoyance and expense in the collection of the same. When the sales tax was placed on the Statute Books by the late government in 1921, it was surrounded with a great many annoying difficulties, as far as the retail trade was concerned. The Act itself was poorly drafted and full of confusion and contradictions. In order to ascertain the retailers' position, it was necessary to undertake a number of lawsuits, as will be remembered by a large number of retail merchants, in order to have the courts determine the meaning of the Act. It never was the intention to endeavor to escape the payment of a fair share of taxation. The endeavor was to keep the payment of the sales tax down to the source of supply, as always advocated, so as to save the expense of the employment of a host of tax collectors.

"We have always frankly admitted that although manufacturers and importers were asked to collect the tax, in reality

all the taxes they pay they pass on to the retail merchants and they in turn have to do the best they can to collect them from their customers," another official stated.

A Distinct Sales Tax

"What we have always contended for was a clear, distinct Sales Tax Act, one that could be easily understood and easily followed, and one that would not be applied to every small retail merchant in the country who makes a stove pipe, sells soft drinks or makes a few home-made candies or currant bread or pastry, or other like small articles fo sale, and which forced them to take out a manufacturers' license and be called manufacturers, but who were not to be allowed to be taxed in the same manner as manufacturers. Our contention is that when legislators make laws, they should be consistent and clear, and, as far as our association is concerned, we intend to see that all legislation that is passed which affects the retail trade is made as intelligible as possible, and if it is not, we intend to call the attention of our members and the public to it, and hold it up to the public view."

4½ Per Cent. From Wholesaler

Representations made by some manufacturers present and from some wholesalers suggest that the Sales Tax may not be absorbed by any section of the trade, that the Sales Tax from the manufacturer to wholesaler on goods bought for resale be eliminated, that the Sales Tax from wholesaler to retailer be 4½ per cent., and that the Sales Tax from manufacturer to retailer be 4½ per cent.

Those Present

Among those composing the Drafting Committee were the following:

Retailers:—E. D. Low, Ottawa; H. Watters, Ottawa; Ed. Mack, Toronto; W. H. Clubb, Toronto.

Representatives of the Retail Merchants' Association:—E. M. Trowern, Ottawa; W. C. Miller, Toronto; W. Hodgins.

Wholesalers:—A. C. Pyke, Secretary, Canadian Wholesale Grocers' Association; W. P. Eby, Toronto; Harold J. Badden, Canadian Wholesale Hardware Association.

Manufacturers:—J. R. Shaw, Woodstock; F. W. Stwart, Montreal; J. M. Taylor, Taylor-Forbes Co., Ltd., Guelph; C. J. Bodley, Toronto; C. B. Lownes, Toronto; J. G. Hossack, Toronto; Thos. Roden, Toronto.

In addition there were present J. T. Stirrett, secretary and other officials of the Canadian Manufacturers' Association.

SAYS NO LAW TO STOP DISHONEST SELLING OF GASOLINE

Calgary, Alta.—No provision can be made to hinder dishonest vendors of gasoline from failing to run the pump down to the lowest notch or from stopping before reaching the top notch in operating the gasoline pump, except to keep a close watch. Should the pump fail to work properly for any reason and the purchaser fails to get all he pays for, the only remedy is to report the case to the inspector, who will see that the pump is put into good repair, but cannot prosecute the vendor provided that the government stamp has not been tampered with. This was the information given the legislative committee of the council by Government Inspector Steele.

The government allows an error of four fluid ounces to the gallon either way in excess or less the amount. If the pump makes no greater error than this, it is not interfered with by the inspector. Even should a gallon of gas be taken away for testing purposes the expansion or contraction accruing during the removal might make sufficient difference to warrant any judge from rendering a verdict against the vendor.

Inspector Steele said that there had been but one case of prosecution in Calgary and that was a case in which the government seal had been broken.

FEAR GAS SUPPLY WILL FAIL

Moncton, N.B., is at the present time paying a good deal of attention to its natural gas supply, and there are grave fears that the supply will not last the winter.

The New Anti-Combines Bill

BILL No. 207, An Act for the Better Prevention of Certain Commercial Agreements, which was given its first reading in the Ontario Legislature on April 6 last and which was to have come into force on the first day of July, 1922, has been completely altered. As a matter of fact, according to information received, nine of its eleven sections have fallen by the wayside, all that remains of the original bill being:

"No. 207 1922

BILL

"An Act for The Better Prevention of Certain Commercial Agreements.

"1. This Act may be cited as The Commercial Agreements Act, 1922.

"2. In this Act:

"'Agreement' shall include contract, arrangement, understanding, combination and conspiracy whether written, verbal or tacit."

Now, the alternative sections making up the balance of the new bill are as follows:

"3. Upon the Attorney General filing an affidavit of any person setting forth,

(a) that an agreement such as is described in section 4 is in existence;

(b) that the deponent verily believes that such agreement is unlawful;

(c) that certain persons, naming them, are parties to, or have knowledge of such agreement or circumstances connected therewith.

"The Supreme Court either before or after action brought as hereinafter provided may make order on the ex parte application of the Attorney General, entitling him to examine under oath the persons so named and to have production of all books, documents, records, memoranda, letters or other writings relating thereto in accordance with the consolidated Rules of Practice of the Supreme Court governing discovery.

"4. An action may be brought by the Attorney General of Ontario in the Supreme Court for a declaration that an agreement.—

(a) constitutes a conspiracy in restraint of trade as being an agreement between two or more persons to do or procure to be done an unlawful act in restraint of trade; or

(b) is an agreement to unduly limit the facilities for transporting, producing, manufacturing, supplying, storing or dealing in any article or commodity which may be a subject of trade or commerce; or

(c) is an agreement to restrain or injure trade or commerce in relation to any such article or commodity; or

(d) is an agreement to unduly limit or restrain the manufacture or production of any such article or commodity or to unreasonably enhance the price thereof; or

(e) is an agreement to unduly prevent or lessen competition in the production, manufacture, purchase, barter, sale, transportation or supply of any article or commodity, and that such agreement is unlawful and void and for an injunction, mandatory order or other relief.

"5. If the Court finds that such agreement comes within any of the clauses from (a) to (e) of section 4 it shall declare such agreement illegal and void to all intents and purposes and the Court may make such order with respect to past and future dealings, rights or obligations of the parties to such agreement as may be deemed just and expedient having in view the course of business between the parties, the degree of good faith manifested by them in entering into, acting under, or carrying out such agreement and the protection of the public interest, and may make such further order as the circumstances require to prevent the carrying out of such agreement or any similar agreement.

6. This act shall come into force and take effect on the first day of June, 1923.

Raise Weight Limit of Parcels in Reciprocal Post Plans With U. S.

Maximum Weight of Packages Sent at Parcel Post Rates Raised to 11 Lbs. in International Arrangement—Canadian Business Men Said to Have Desired This Change Including Manufacturers of Explosives—No Extension of C.O.D.

By special Hardware and Metal representative at conference

WITH the object of facilitating co-operation in postal matters of common interest to both nations, and offering a greater measure of service to citizens on either side of the border, the first international postal conference between Canada and the United States was held this week in the Parliament Buildings at Ottawa.

The gatherings were graced by the presence of Hon. Hubert Work, Postmaster General of the United States, and Hon. Charles Murphy, Postmaster General of Canada. The proceedings took the form of a round table conference, and were conducted throughout in a spirit of friendly co-operation. The sum total of the deliberations is that a new convention to supercede the one of 1888 will be prepared by the Canadian postal officials, and forwarded to Washington for approval. The new convention will embody the decisions of the conference and, according to present understanding, will come into effect on Jan. 1 next.

Opening the conference, Hon. Mackenzie King, Prime Minister, observed that there was no citizen of the country however humble or however great, whose interests were not vitally associated with the post office department. For that reason, the present conference had a significance perhaps greater than that of any other activities of government. The post office touched the life of the people at every point.

Reciprocal Parcel Post

While many decisions of vital importance to the proper functioning of the postal services of both countries were arrived at, possibly the most important was that affecting reciprocal parcel post arrangements. This involved the raising of the maximum weight for packages sent at parcel post rates from 4 pounds 6 ounces, to 11 pounds. The present rate of 12 cents a pound will be continued. In view of the fact that a heavier percentage of parcel post enters Canada from the United States than is sent from this country to the republic, it was agreed that Canada should share in the postage on the difference, on a fifty-fifty basis. The difference in the value of the postage between what the United States sends Canada, and what Canada sends the United States will be figured out and this amount will then be shared up. Heretofore, it has been necessary to "split" parcels in order to comply with the 4-lb. 6 oz. regulations, but this inconvenience will be largely done away with in the future. The statement was made by one Canadian postal official that much pressure had been brought to bear by the business world of Canada to have the maximum weight increased. Strong representations had been made by manufacturers of explosives.

Won't Extend C.O.D. System

While provision was made on the agenda for discussion of the subject, no action was taken with regard to a suggestion on the part of the American authorities that the C.O.D. postal service recently inaugurated in Canada be extended to both countries on a reciprocal basis. It was felt by the Canadian officials that this feature should be submitted to a longer test within the Dominion before being placed upon an international basis.

Discussing the subject with Hardware and Metal, outside the conference, W. Irving Glover, assistant postmaster general of the United States, said the system had been in operation in his country for eleven years and had been placed on a sound basis. "It is a service which has been a great feature in our country," he said, "and one which is steadily growing in popularity. It is used largely by retail merchants and manufacturers, and has been of great assistance to them in developing trade with the people in the rural districts. We have not the slightest thought of cutting off any of the features of this service. On the contrary, we are trying to improve it and that is the object we have in view in endeavoring to link it up with the Canadian system."

The conference decided to dispense with the "advice" on all money orders between the two countries. When the regulation governing this decision is brought into effect, recipients of Canadian postal money in the United States will be able to secure their currency without the necessity of waiting until the United States post office is advised of the issue. In this connection, a new money order form will probably be prepared.

Reciprocal Arrangement with U. S. Raises Maximum Weight of Parcel Post to 11 pounds

The maximum indemnity for loss of registered parcels originating in either country and addressed to the other, was fixed at $25.

Insurance of parcels passing by post between the two countries will be carried out under the following terms and conditions:

(1) Insurance fee to be in accordance with the domestic laws and regulations of the country of origin.

(2) Each country to retain to its own use the whole of the insurance fees it collects on parcels exchanged with the other country.

(3) In case of loss, rifling, or damage of insured parcels originating in either country and addressed to the other, the country of origin to be responsible for and undertake the payment of indemnity in accordance with its domestic laws and regulations.

Special delivery service will be speeded up by the decision to permit the use of the stamps of the country in which the letter originates for this purpose. In this connection it was decided to establish a standard fee of twenty cents for special delivery letters in both countries.

Name of Sender on Parcels

There was considerable discussion on the advisability of making it compulsory to place the name of the sender on all parcels passing between the two countries. It developed that while the matter was entirely optional in Canada it was compulsory in the United States. P. T. Coolican, acting general superintendent of postal service in Canada, pointed out that while it was highly desirable, he thought the Canadian officials preferred to educate the people to it rather than to force them to do it. It was finally decided to leave the matter in abeyance for the time being.

Sells 60 Kitchen Ranges This Fall At $13 More Than Competitor's Price

Doing a Cash Business in Stoves Montreal Firm Develops Big Business in Few Years—The Second Hand Stove Problem—Catering to Women's Trade

CHARACTERISING the selling of stoves as a "peculiar" business, M. Robert of M. Robert & Co., Mount Royal Ave., Montreal, further stated to Hardware and Metal that if properly conducted, trade in them could be very successful. Neither heaters nor ranges were carried in stock by many merchants simply because selling them meant a large amount of heavy handling, with very little profit showing at the end of the year for the work and trouble required.

"When we started in business ten years ago many of my friends and acquaintances told me that retailing stoves could not be made a paying venture. Some of my trade friends even laughed at me when I told them I was going to start a retail establishment selling stoves only. It was to them a foolish idea, that I as a young man had much to learn in the conducting of a retail store. They said that I would get about ten dollars profit on every stove that was sold, and this would not cover my overhead, when I found that it was necessary to deliver, and in many instances set up, the range or heater."

"However, I went through with it and the business we enjoy to-day speaks for itself. During the first year or so we encountered many difficulties, and we found that there was a lot to learn. By continuing to study the needs of the people and introducing new methods in selling we gradually found our footing in the years that followed and through constant effort we have been able to watch our business grow year after year," said Mr. Robert.

Forming a Reputation

Continuing, Mr. Robert said that a stove was a fixture in the home used every day by the housewife, and through results obtained the merchant could either be looked upon with favor or be in the bad graces of the family for a good long time. The stove was an article upon which the dealer could build a reputation, and it has been to this end that this store has been working since its commencement. This could only be obtained through selling quality, stoves on which an absolute guarantee could be given. On the market to-day there were low and high priced stoves offered to the trade. Those in which the best of raw materials were used in the making, and on which superior workmanship was given first consideration while on the other hand heaters and ranges were sold at a price almost regardless of quality. On the former the merchant could stake his reputation, and it was this class of merchandise that allowed the business to show continued growth.

All stoves sold by the firm are fully guaranteed under a "satisfaction or money-back" method. This plan has been followed since the store opened, and while in recent years there has been very little difficulty through having stoves returned there was a time just after commencing in business when it proved to be an obstacle of considerable importance. Stoves were returned, and money refunded, in too great numbers to be a paying proposition. The trouble, however, was in not selling the best that could be bought, and in the past year or so the fault has been greatly remedied.

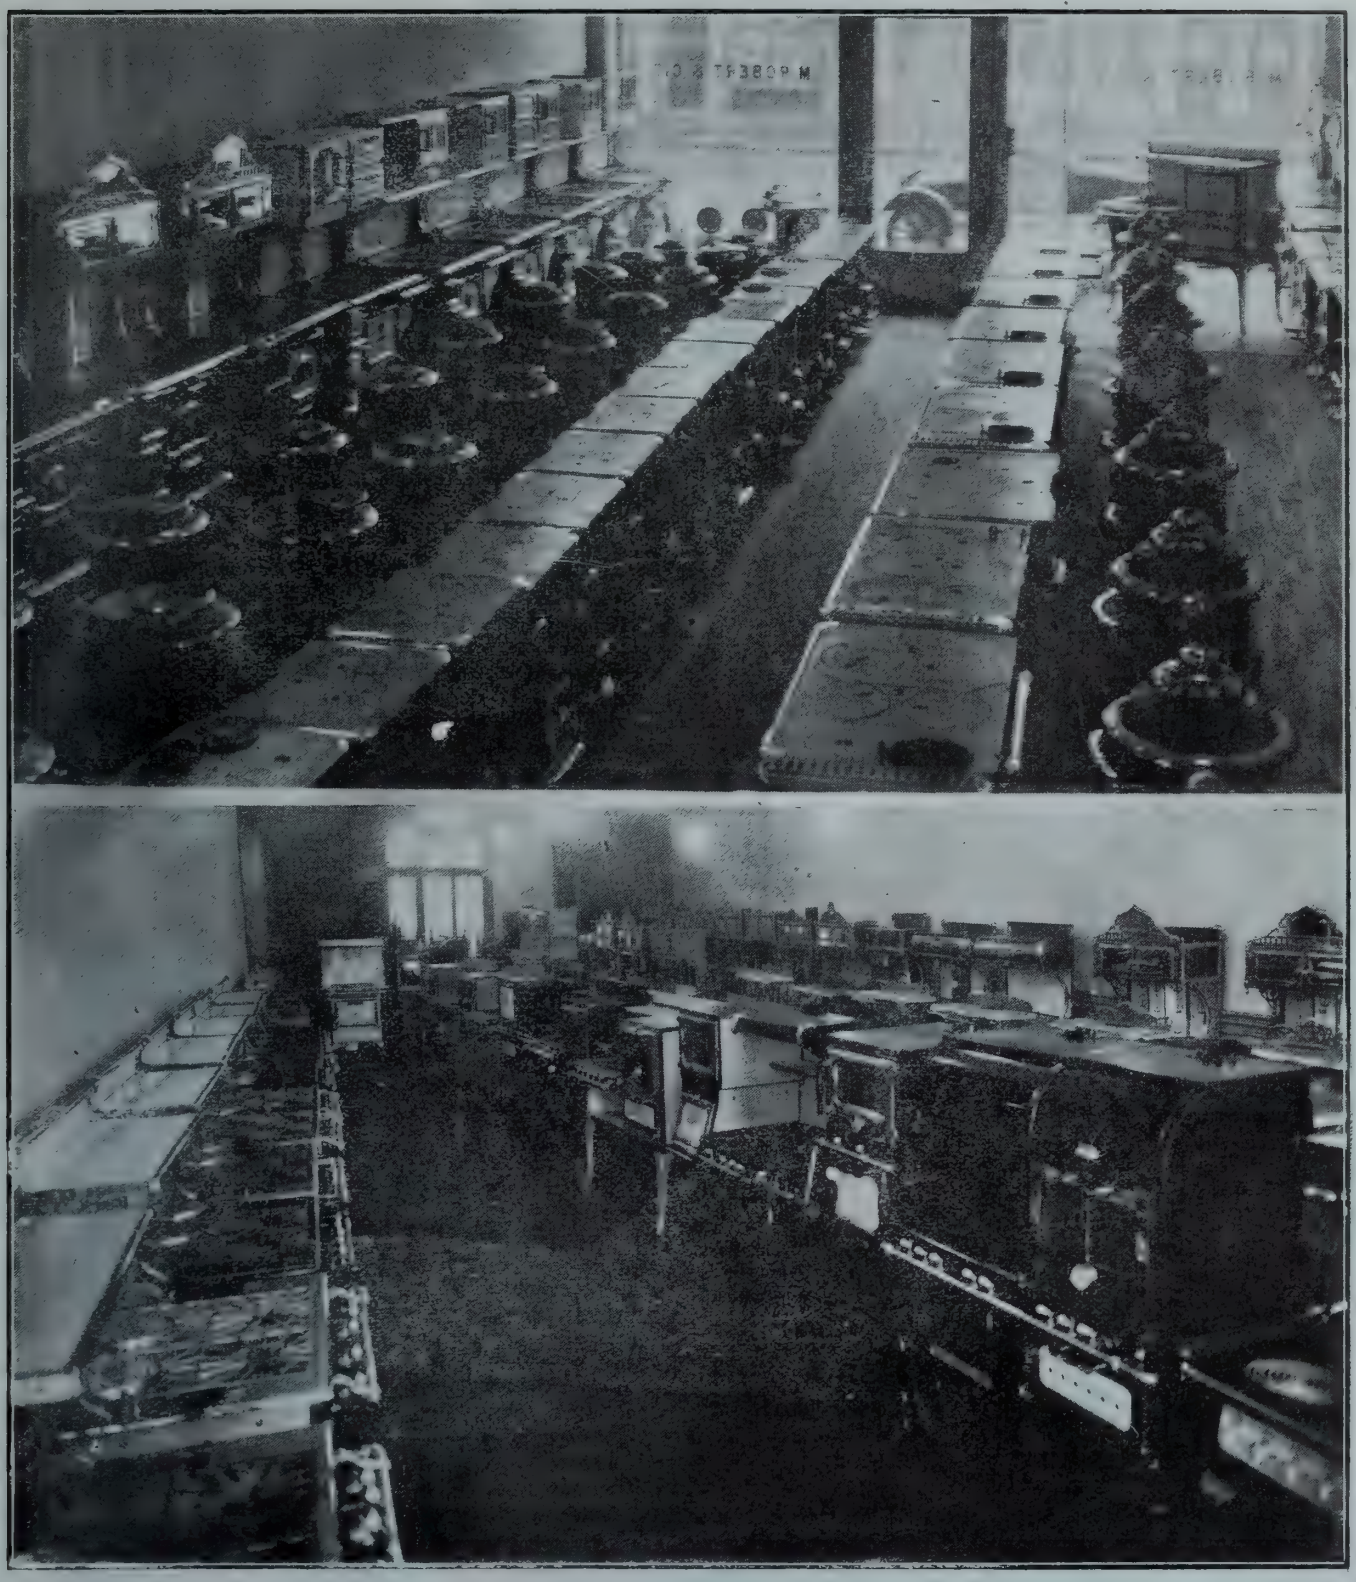
To gain a reputation it has also been found necessary to give utmost service. For instance, when a customer comes in to purchase a range or heater he or she is quoted the marked price, which means that it will be set up ready for lighting at that price; the only extra charge being on stove pipes and other material used by the men in doing so. Also when the purchase has been made it is very rarely that the stove is not set up the same day, if desired. The service does not end here, for very often when a stove is first put into operation there is a minor fault some place which can be remedied by a slight adjustment, usually in the draft. This is not forgotten and when the buyer is next seen he is asked how the stove is working, showing that the dealer has not lost all interest as soon as he has the money.

Getting A Legitimate Profit

Service such as this can not be rendered without a fair amount of profit when the stove is sold. If cooking ranges could be sold as many other lines of merchandise it would be a wonderful business. If they could go out of the store without any more thought, and did not require such a large overhead to handle, they would be one of the best paying lines for any merchant to sell. However there is a big expense attached and the merchant must secure a large enough profit on the sale to insure against any later trouble. The statement of some merchants, viz., that sufficient margin could not be obtained, was here strongly ridiculed by Mr. Robert. "We have customers tell us quite often that we ask too much money for our stoves. But we get it. Not long ago a certain make of kitchen range was offered in a down-town store for $62.50 on a special sale. We were selling the same range for $75.00, and the fact that a greatly reduced price was offered by a competitor apparently did not hurt us at all."

"Our prices, too, are cash prices. The only credit we extend is in cases where a liberal spot payment is made and the balance in thirty days, not later than sixty days. Never have we offered price concessions, or easy payments to meet competitors because we long ago realized that we could not make our business show a profit if we were lax on these arrangements," he stated.

"Being able to get trade in this way the store must certainly be backed by something substantial. Something which will attract customers to enter and then to buy. There is only one answer, and that is to become established as a service store, built on reputation. Sometimes a person who has bought a stove a year or even two years previous comes in and says that they have never been able to get entire satisfaction, they have always had trouble with the grates or the draft. No matter if the stove has been in use for a long time we send a man to investigate, and put in a new grate or make some other adjustment if necessary. We realize this is unfair to us because if the stove was not in perfect working order it would have long ago been found out, but we must overlook this and go to some little expense to get a satisfied customer."



Handling Second-Hand Stoves

No small amount of trouble is experienced by many merchants in disposing of second-hand stoves, and this store found it necessary to devise some means whereby they could be handled without loss. It is felt that the situation is now dealt with in a most satisfactory way, in fact Mr. Robert stated that they made it a point to re-sell these at a good profit. Through the guarantee

Some Ideas for Stove Selling That are Worth Many Dollars. Read Them!

Upper: General view of the stove, range and heater display in the store of M. Robert & Cie, Montreal, showing the extensive stock carried. Such a display of stock, kept well polished, impresses the customer entering the store. Mr. Robert believes it is unwise to clutter up the stoves on display with kitchen utensils and such like.

Lower: The showroom in the M. Robert & Cie store, Montreal, which is devoted to gas and coal ranges. Here various types of ranges may be seen, all easily accessible and attractive in appearance. Such displays helped materially in developing the sale of sixty ranges this fall as noted in this article. Read about the manner in which second hand stoves are dealt with.

Why Those Profits Don't Materialize

Wrong Figuring of Percentages Responsible for Many Costly Mistakes by Retail Merchants—Rates for Figuring Percentage on Selling and Cost Price—How to Find Percentages

Written for Hardware and Metal by G. W. HAFNER

TRADITION says figures don't lie. Yet, the wrong interpretation of figures may throw the head of the business completely off the track. Mercantile agencies report that a large number of commercial failures are directly due to the proprietor's or manager's belief that the business is making a profit, when, as a matter of fact, it is running at a loss. And the reason for this is that, in at least the majority of cases, the business man has been deceived by the use of percentages in allowing for profits.

What is Percentage?

In using percentages as a tool to work with, we should have a clear understanding of what percentage is. Percentage is a standard of comparison for amounts, just as a thermometer is a standard of comparison for temperature, or an inch, foot or yard is a standard of comparison for lengths. The word "percentum" means 100 parts, or 100ths. Therefore, amounts are compared by per cent. or hundredths, as lengths are compared by inches and feet, and temperature by degrees.

Accordingly, one amount compares with another amount as each contains a less or a greater number of 100ths, in the same manner that one temperature compares with another temperature according as it contains a greater or less number of degrees, or that one length compares with another length as it contains a greater or less number of inches. It is seen from this that percentage is simply a means for measuring figures.

How to Find Percentages

In finding percentages, we always have a clearer view of the matter, if we put the figures in the shape of a fraction. Percentage, from the viewpoint of mathematics, is fundamentally nothing else but decimal fractions. You say that 50 is one-half of 100. That means that 50 is fifty one-hundredths or 50 per cent. of 100. Likewise, 20 is twenty one-hundredths or 20 per cent. of 100; and ten is 10 per cent.; and 5 is 5 per cent. The principle here is the same as that governing the change of common fractions into decimals, which is: "Divide the numerator by the denominator," or "divide the upper figure of a fraction by the lower."

To illustrate, let us assume that the annual sales of a certain business amount to $100,000.00, and that the annual expenses aggregate $25,000.00. What we want to determine, first, is what percentage of $100,000.00 is $25,000.00. To do this we put the figures in the shape of a fraction, and divide the upper figure by the lower, thus:

$$\frac{25{,}000}{100{,}000} = 25{,}000.00 \div 100{,}000 = .25$$

20000.00

500000
500000

We find, then, that the total yearly expenses of $25,000 represents 25 per cent. of the total yearly sales of $100,000. And we know from this that, in making up our selling prices, we must add 25 per cent. for expenses, plus whatever margin of profit we desire to make.

Why Anticipated Profits are Not Realized

This is all apparently simple enough. And yet it does not always work out just right, it seems. Let us see, then, what it is that tangles up so many of us in attempting to handle percentages.

For purposes of illustration let us take, first, the method of the business man who knows nothing about what his expenses are. He has perhaps heard some other man in the same trade or industry say that he figures to make 10 per cent. total profit, and because that is what he thinks others are asking, he will figure something like this on a sale, which costs him, say, $20.00.

Cost of goods	$20.00
Add 10% of $20.00 for profit	2.00
Total	$22.00

He will probably mark the goods to sell for $25.00, thinking that the extra $3.00 will cover his overhead expense, and that he will make his 10% profit and perhaps a little over.

Wrong Figuring of Percentages Eats up Profits Almost as Much as Excess Overhead

Let us see, now, what has really happened:

Cost of goods	$20.00
Expense, 25% (not of $20.00, but of $25.00, which will be explained later)	6.25
Total cost	$26.25
Sale price	25.00
Net loss	$ 1.25

or 5 per cent. of the selling price.

Next let us illustrate the method of the business man who knows from last year's figures, that his expenses amount to 25 per cent. of his sales, but does not know how to apply that knowledge correctly.

Probably his estimate will show up like this:

Cost of goods	$20.00
Expenses, 25% of $20.00	5.00
Profit, 10% of $20.00	2.00
Total	$27.00

Let us see what has happened in his case:

Cost of goods	$20.00
Expenses 25% of $27.00 (instead of $20.00)	6.75
Total	$26.75
Sale price	27.00
Net profit	$ 0.25

which is .926 per cent. (less than one per cent.) of the sale, and not ten per cent.

The difference between actual and anticipated profit, developed in the above illustrations, is due entirely to the fact that two different bases have been used in arriving at the results. In the first instance, the percentage of expense of 25 per cent. was arrived at by using the sales at selling prices. In the second instance, this percentage was applied to the sales at cost prices. This is the error too often made by business men.

Suppose the cost of a given article or commodity is $10.00, and a merchant wishes to add a margin of 33-1/3 per cent. to the selling price, how would he figure it? Adding 33-1/3 per cent. to the cost will not give the desired result, because:

33-1/3% of $1.00 equals 33-1/3 cents.

$1.00 plus 33-1/3 cents equals $1.33-1/3, or the selling price.

33-1/3 cents divided by $1.33-1/3 equals 25%.

Hence, instead of earning 33-1/3 per cent. on the selling price, as he had planned, the business man would actually earn 25 per cent. only, because different bases were used in the calculation.

The following table gives the equivalent percentage to be applied to cost prices in order to secure a given margin of profit on selling prices.

Rate for Figuring Percentages

Per Cent. on Selling Prices.	Per Cent. on Cost Prices	Per Cent. on Selling Prices	Per Cent. on Cost Prices.
25	.333	38	.613
26	.351	39	.639
27	.370	40	.666
28	.390	41	.695
29	.410	42	.724
30	.430	43	.754
31	.450	44	.784
32	.471	45	.818
33	.493	46	.852
34	.515	47	.887
35	.538	48	.923
36	.563	49	.961
37	.587	50	1.00

In this matter of figuring percentages, the very first thing we must get a firm hold on is this:

To figure by per cent. intelligently we must have, somewhere, something that represents 100 per cent., which in this case is the SALE PRICE. When we attempt to figure any part of the whole as 100 per cent., we immediately get into difficulty. All component parts are measured as 100ths of this 100 per cent. Hence:

If expenses represent 25%
And profit represents 10%

We have accounted for 35%
And the cost of the goods must, therefore, represent 65%

Making the sale price 100%

In other words, the $20.00 cost of goods is 65 per cent. of the sale price, which sale price is represented by the total of 100 per cent.

In figuring percentages of this kind, the following rule must always be observed:

Divide the amount of the cost by the percentage it represents.

The answer will be the sale price.

$20.00 divided by 65% equals $30.77, which should be the selling price of the merchandise, provided the price paid for the goods is $20.00, expenses are 25% of the sales, and the dealer wishes to make a profit of 10 per cent. net.

How do we know this is correct? A method to be of any value must be susceptible to mathematical proof. Let us therefore prove the proposition thus:

Cost of goods	65% of	$30.77 equals	$20.00
Expenses ..	25% of	30.77 equals	7.69
Profit	10% of	30.77 equals	3.08
Total....	100% of	$30.77 equals	$30.77

This method is absolutely correct, whether it is applied to a 50c. sale or to a $500.00 sale.

The selling price is 100 per cent., or the whole. All component parts are represented by 100ths, or percentages of the whole. There is nothing in the entire equation that represents 100 per cent. except the selling price. Hence, all percentage computations should be based on the selling price.

The broad lines of a commercial treaty between France and Canada have been arranged by the Canadian Ministers, W. S. Fielding and Ernest Lapointe, in conference with officials of the French Ministry of Commerce.

Gifts Of Utility Dominate Displays

For the past two or three years gifts of a more useful nature have been given at Christmas. Cashing in on this idea R. T. Holman, Ltd., Summerside, P.E.I., arrange forceful window displays at the Christmas season. A wide range of very useful lines can be seen in this window, including motor car mirrors, heaters and other winter auto accessories, along with various tools. The motor car owner and the mechanic or handy man around the house are interested in such lines. A neat card appears on the imitation mantel stating "it is practical Xmas gifts that are appreciated." The decorated trees, and the general Christmas atmosphere, caused many persons to stop. Many sales were made of the various lines shown, indicating that the suggestion of gifts of utility is all that is needed to bring buyers.

The Art of Showcard Lettering

Suggestions as to How to Hold the Pen and Obtain Greater Facility—Some Alphabets Adapted for Use in Pen Lettering—Satisfactory Color for Pen Work—The Practical Importance of Pen Lettering

By JALEXO

THE pen has a definite and prominent place in the hands of the experienced cardwriter. It is through the medium of the pen that the desired "gray" effect is obtained on showcards, which are lettered in paragraph fashion. It may here be explained that in showcards where caption, reading matter and price are lettered on a card, it becomes necessary to distinguish these elements by correct display and contrast. A showcard of this sort lettered in black, permits of three contrasting effects—black, gray and white. We may also observe here that the caption and price provide the black contrast, the reading matter provides the gray contrast and the spacing around and between the various elements of display provide the white contrast. Hence we have the black, gray and white, which must be kept continually in mind during the layout and lettering of the card.

Obviously it is to the pen that the cardwriter looks for the means of acquiring the desired gray contrast which is so appropriate when rightly used.

How To Hold The Pen

The pen, it will be noticed, is held in much the same manner as the brush. In the accompanying sketch we have two methods of holding the pen. Both ways are recommended, since each brings a distinctly different result. Position 1, illustrates the upright effect in lettering obtained by holding the pen squarely to the line, and keeping it in this position for the execution of both straight and curved strokes. Similarly in position 2 we have a distinct change of lettering which comes from holding the pen at the angle shown, and (as in the case of position 1) keeping it in this position during the execution of both straight and curved strokes.

Pen Easier To Master Than Brush

It is popularly recognized, however, that penwork is more easily mastered than brushwork, due to the fact that in using a pen, the hand obtains a firmer hold on the card as a result of the pressure required in making the characters. A first attempt at penwork, of course, is likely to prove disappointing. Penwork is not so simple that it can be mastered in a day. As with the brush, so with the pen, careful, attentive perusal is imperative at every stroke. It is only through constant practice that one reaches any marked degree of proficiency. Devote but thirty minutes a day to the pen and the numberless little difficulties will practically vanish within a week or so. Any cardwriter who questions his ability to bring the pen under complete control, will, upon giving the matter sufficient study and practice, discover that his "troubles" were more imaginary than real.

Color for Penwork

Black is the most satisfactory color for use with the pen. The ordinary brush color, diluted with water to the right consistency is in universal usage. If, however, you wish to mix some color of your own, there is an excellent formula: First, obtain some lamp black; second, dissolve water-soluble nigrosine dye in water; third, mix these to the desired consistency; and fourth, add glycerine and mucilage for a binder. This color will be found suitable alike for pen or brush.

The Soennecker Pen

The beginner is advised to experiment with the Soennecker pen. It is simple in construction and comparatively easy to handle. These pens come in a variety of sizes, from narrow to wide. Any supply school (or dealer in cardwriters' needs) will be able to meet your requirements in this respect. When new, pens are not sufficiently pliable for immediate service. Preparation is essential. Each pen ought to be held in the flame of a match for about five seconds. When taken from the flame, the pen should be dipped in cold water. This process softens the pen and makes possible that smooth fluent lettering so much admired.

Nobody ever mastered the pen without patient submission to a discipline far from attractive and entertaining. Penwork bristles all over with technical difficulties, and I will hazard the assertion, without much fear of contradiction from those acquainted with the subject, that it offers drudgery enough and disappointment enough to be a training both in patience and drudgery.

Practice Strokes For Penwork

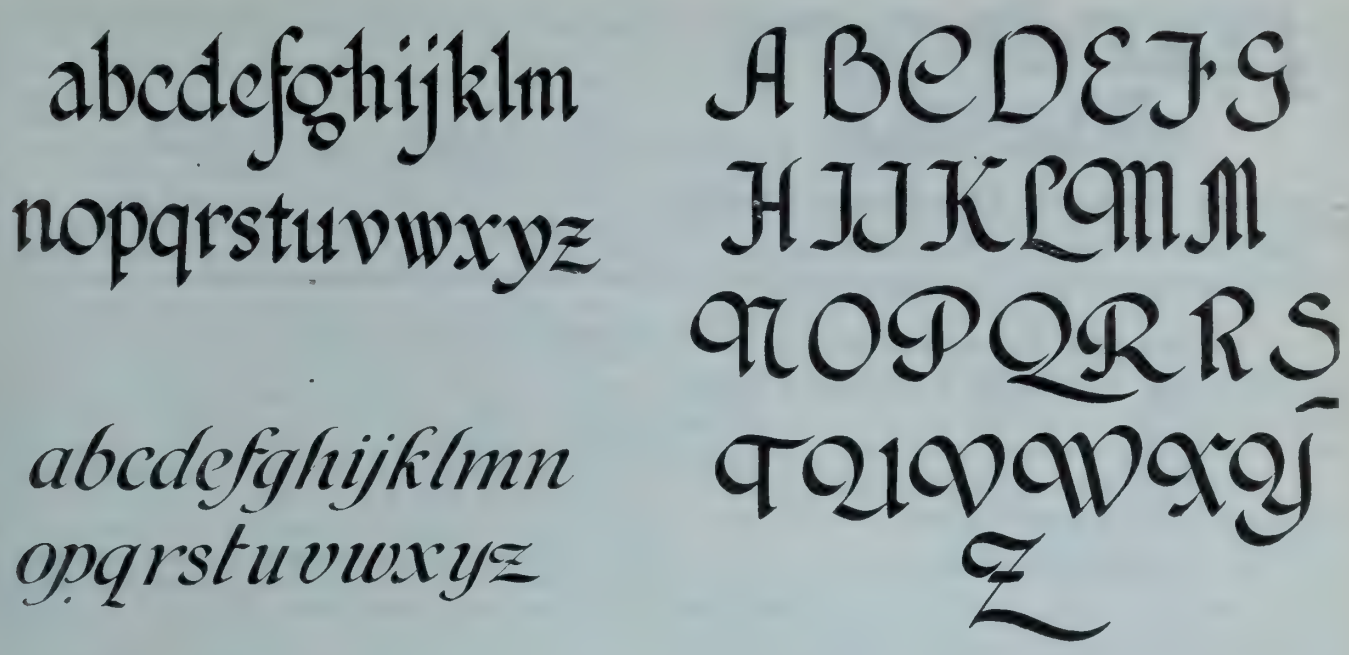
From the illustrations herewith the student will observe that the practice strokes which comprise the pen alphabets are executed in the same series of movements required for brush work. The same principles hold good throughout the alphabets.

When charging the pen with color, it is a good plan to shake off the surplus so as to avoid "blotting" on the card when strokes overlap. This is a frequent cause of disaster and demands constant care and supervision.

Penwork on Large Showcards

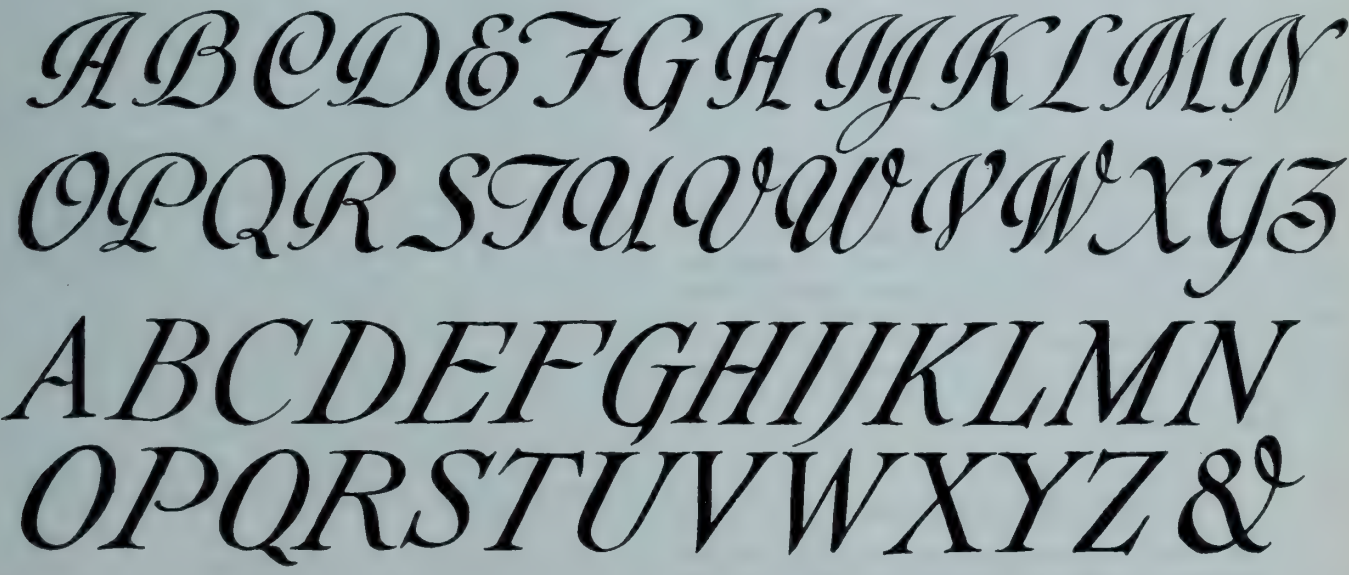
Although pretty generally used on small cards, penwork is also adapted for the lettering of showcards in the larger sizes, namely, half and quarter sheets. The writer recalls a series of interesting half-sheet (14 x 22-inch) cards used in the windows of an extensive retail hardware store in one of our Canadian cities. These showcards featured merchandising messages referring to the goods in the window, and were lettered exclusively with the pen. An initial letter on each card at the beginning of the first paragraph was the only display element observable. Wide borders, margins and thin line borders produced an effect that forcibly impressed the onlooker. The penwork on

Vertical



POSITION I

Slant or Italic



POSITION II

those showcards was invariably done in black color on white cardboard.

The smaller store, however, might easily secure this refined, inviting style for its particular use, by specifying a smaller card, say the quarter-sheet (11 x 14-inch) size. This would be found obviously more appropriate. Lettered solely with the pen, the showcard, whether half or quartersheet, may be made to deliver the message in a quiet, unmistakable manner. Details to keep in mind, while doing cards of this description, are, wide margins, thin line borders and if desired, an initial letter or other dainty ornament. Above all, penwork must be clean-cut. It has to be, in order to gain clear, readable results. There's no reason why this kind of lettering should be stiff and labored. Upon overcoming the first beginnings, as it were, during which every practice sheet will be an advance on its predecessor in style, construction and technique, the student will quite naturally acquire the ability to do penwork that reflects the neatness and freedom of the expert.

Display Men's Club is Organized

Toronto Display Men Form Association —Entertained by Claude Forsyth of Kitchener

A Display Men's Club has been organized in the city of Toronto, similar to those that have been operating successfully in many cities of the United States for some years. It is to be known as the Toronto Display Men's Club and it will be conducted under the rules and regulations of the International Association, with such modifications that are deemed necessary. A good deal of the credit for the organization of the Toronto club is due to F. G. R. Lacey, the Canadian representative of the International Executive Committee.

It is the intention of the club to hold their meetings on the second Monday of each month and competent speakers will be secured for the occasions.

The officers of the new club are: Hon. President, E. P. Burns; President, F. G. R. Lacey; Vice-president, C. L. Brown; Secretary, G. E. Duffy; Treasurer, C. L. Mordon; trustees, C. H. Bray, W. H. Mould, A. S. Hardy, N. L. Birrell.

On a recent evening Claude Forsythe of Kitchener entertained the members of the club to a dinner at the King Edward. Over forty members have poined the club already.

A Common Oversight

DISCUSSING advertising matters with retail hardware merchants recently, numerous cases have come to the attention of Hardware and Metal where various irrelevant charges are being entered against advertising account. Some such items include advertising in picnic, bazaar and such programes designed solely as revenue producers, and in which an advertisement is merely a charitable gift. They also include free goods, donations to religious, charitable and fraternal organizations, entertainment expenditures, rebates, bonuses, price lists, calling cards, printing used outside of advertising work, demonstrations, attending conventions, personal expenses of various sorts, cartons, labels, fancy containers, sampling, etc. These are just some of the charges which it is found are being charged against advertising account by some hardwaremen.

In such cases it is little wonder that hardwaremen question if their expenditures do not exceed the return from such advertising expenditure. While this policy may be the easiest way of taking care of certain minor charges, it is evident that it is grossly unfair to advertising. The inevitable result of working a willing horse to death will surely follow such a policy. Examination shows that many such expenses should be charged against selling costs and personal expenses. They are all probably legitimate expenses, but they are being accounted for incorrectly due to an inefficient system of bookkeeping. Each division of advertising, of selling, of finance, of administration should have its separate account. It is only by following this policy that a true record of the business can be kept, and rectifying measures taken at the right place when trouble develops.

Crystallize Tax Ideas

THE FIRST effort at crystallizing the ideas of all branches of the trade in respect to taxation has been taken this week at a conference in Toronto of representatives of manufacturers, wholesalers and retailers. Each of these branches of trade have had their own ideas in regard to the raising of revenue by taxation and unfortunately many of such ideas have been guided more by an endeavor to pass the load to someone else than to distribute the load in proper relation to the functions of that particular branch.

There were many difficulties in the way of reaching an amicable settlement but there is unanimous agreement that all taxes should be collected in such a way as to remove as much friction as possible, and to be collected with the least possible expense. The Sales Tax has been upheld in principle and as it has been a big producer of revenue in the last year, some extension of it should enable the elimination of certain other picayune forms of taxation such as Receipt Taxes. There may also be some modification of the present Stamp Tax on cheques, drafts, etc., as outlined elsewhere in this issue. This and the Receipt Tax are more or less based on the English law, but the latter does not carry an extensively graduated Stamp Tax, and it is doubtful if it is in the interests of business to place taxation on the necessary channels of distribution or exchange. Likewise the English Receipt Tax does not apply on every cash register slip or counter check, but on signed receipts, issued very often at the purchaser's request.

The upholding of the Sales Tax principle eliminates much possibility of any serious alteration. The Turnover Tax while having some advantages also has some disadvantages in its tendency to pyramid. Little complaint can be found with the principle of the Sales Tax, but undoubtedly some modifications can be made so that it will not have to be absorbed either by wholesalers or retailers, and providing some relief for those retailers such as tinsmiths who are classed as manufacturers for the purpose of taxation. It is along these lines that revision is being suggested and it is hoped that some action will be taken to have the tax regulations of next year's budget on a more equitable basis.

Direct By Mail to Basket

SOME DAY an uncanny genius will rise up and announce the tonnage of wasted paper represented in direct-by-mail advertising which goes direct through the waste paper basket to oblivion.

The story is told of a manufacturer who tried to keep a month's record of this kind of material coming to his desk. He gave up in despair at the end of two weeks, and on looking over the list he had compiled, found that he had been invited to concentrate on the merits of the following: Phonographs, oriental rugs, lubricating oils, electric beaters, electric heat-treating furnaces, shop equipment and furniture, monthly calendars linking up works of art with small tools, roofing materials, fertilizers and furnaces and a host of literature advising him about opportunities in gold mines and industrial ventures.

Much of the material, he said, should never have been distributed to business offices, but was really intended to reach members of the staff; much of it, he admits, came in attractive and expensive form. None of it had an appeal because when it came to buying an article, he preferred to see what the other fellow had to say. This he could only find through his business papers. There he had his market, with the merits of the different wares intelligently discussed, and there he found his most practical buying guide. He eliminated direct-by-mail from his advertising appropriation. So far as he could see, it was diverting but had no merit in what he described as the competitive buying information so essentially available in business papers.

* * * *

HARDWARE merchants have claimed many advantages for the merchandise they handle but a new angle is now apparent in connection with paint business. It was shown at the recent convention of the National Paint, Oil and Varnish Association that paint had been used considerably in helping shell shocked soldiers regain their health. In one case a young soldier, a mental wreck, regained his health in a room finished in primrose yellow. Dark colors produce melancholia, red has a temporary stimulating effect followed by nervous reaction, blue caused apparent calm, green happiness and vitality and yellow amiability. Hardwaremen with altruistic ideas can thus employ them and give them a commercial twist which should help business in the paint department.

For the Man Behind the Counter

Makes Use of Salesmen's Record Sheet

Figures of Sales Made Each Day in Average Week by Five Salesmen in Carter Bros. Hardware Store at Picton, Ont., Shows 1,209 Customers Waited on Under Cash System

SOME idea of the number of customers waited upon by the men "behind the counter" in the hardware store of Carter Bros., Picton, Ont., is shown in figures given in this article. This store since being placed on the cash basis has made rapid strides from the standpoint of volume of business and for a town the size of Picton, Ont., the figures are significant. The figures show the average number of sales on the days of a recent week.

	Mon.	Tues.	Wed.	Thurs.	Frid.	Sat.	Totl.
W. J. Carter	29	22	33	23	20	45	172
T. Mounce (bookkeeper	3	23	31	16	20	27	120
G. McGibbon	61	46	30	9	42	121	309
C. Carter	43	47	37	14	64	93	298
J. Cole	49	39	43	41	46	92	310
	185	177	174	103	192	378	1209

These figures representing an average week in the Carter store show many more customers waited on and sales made than during the similar period before the introduction of the cash system. They indicate gradually declining volume of business from Monday until Thursday, followed by a big increase on Friday and Saturday giving a total of 1,209 sales made for the week by five salesmen or an average of 242 sales per week each. Apart from the store proprietor, part of whose time must be devoted to other matters than selling, and also apart from the bookkeeper who spends part time only on selling, it will be noted that the records of the other three salesmen are about equal. Those three also made two-thirds of the actual sales.

Such a record as this provides some interesting figures for retail salesmen to watch. The idea can of course be developed by making comparisons with previous months and years.

Discussing new ideas for selling, Mr. Carter states that he is thinking of trying out an advertising plan in connection with children. He has noticed that any little attention shown children when parents are with them is greatly appreciated by the latter. A plan is being worked out with the object of making every child that is sent to the store, wish to come again. It is also planned so that other children will get to know what is being done and they in turn will probably influence their parents to the store.

Carter Bros. have just finished placing two hundred sign boards on the different roads leading into Picton. It is felt that this is good advertising to tourists and to townspeople using these highways regularly.

Says Clerk in Story Knew His Business

COMMENTING on the article by A. G. Keeney which appeared in this department in the September 2 issue of Hardware and Metal, Floyd A. Wonnacott, of Charlottetown, P.E.I., writes as follows:—

"I find some good reading in Hardware and Metal and I thought I should write and give my opinion of A. G. Keeney's story for 'The Man Behind the Counter' in your September 2 issue.

"It is quite correct to say that the average customer takes notice of the clerk and likes to pick out a certain one to have wait on him, but just because he happened to be in a hurry when in that store he thinks the clerk was wasting his employer's time. That same clerk knew his business and he would not let that old gentleman go away with the impression that he was trying to get rid of him. That same customer might be going to paint his house some day and if rushed he would not likely go back there to buy his paint, etc.

"I have had a few years' experience 'Behind the Counter' and my advice is to never try to get rid of those fussy old customers until they go away satisfied. Then they might come back for something bigger than the ten cent article."

(Signed) FLOYD A. WONNACOTT.

Hardware Hits

A stout lady of foreign birth waddled into the local store on a warm day and asked for a box of talcum powder.

"Mennens?" asked the clerk.

"No, vimmins."

"Will you have it scented, madam?"

"No, thank you," replied she sweetly, "I'll take it with me."

* * * *

Pat was helping the gardener on a gentleman's place, and, observing a shallow stone basin containing water, he inquired what it was for.

"That," said the gardener," is a bird bath."

"Don't ye be foolin' me," grinned Pat. "What is it?"

"A bird bath. Why do you doubt it?"

"Because I don't belave there's a birrd alive that can tell Saturday night from anny other."

* * * *

Slight Error—The deputy sheriff was trying to break the bad news gently.

"Are you the Widow Jones, ma'am?" he asked the woman who came to the door.

"Widow Jones?" she retorted with asperity. "Not so you could notice it. My old man is workin' back there in his plumbing shop this minute."

"Sorry to have disturbed you then, ma'am," replied the deputy politely. "Guess the boys must have gone and lynched the wrong feller."

* * * *

"Sam," said Mr. Hardwareman, to his office boy, "you told me you had an engagement with your dentist yesterday afternoon."

"I—er—did, sir."

"I saw you at the ball game."

"Yes, sir. The tall, thin gentleman sitting next to me was my dentist."

ist."

* * * *

Sheriff—Have you seen any suspicious characters hanging around here?

Ku Klux Klansman—Well, suh. I did see one feller hanging on a tree down the road, but he wa'n't suspicious, he was daid.

Join The 1922 Hardware and Metal Christmas Window Contest

Bigger and Better Than Ever Before

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting sales ideas into the display is what counts.

The contest closes on Monday, January 1, 1923. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one.

Events in the Trade

OPENS NEW STORE

J. E. Fauteaux has commenced business in a new store at 259 Bleury St., Montreal, under the name of The Bleury Hardware Store.

NEW FIRMS

Haileybury, Ont.—Reilly-Allard Hardware Co. is starting business again after the fire which swept Northern Ontario in October. This firm desire catalogs and prices on general hardware lines.

FIRE LOSS

J. B. Gauthier, hardware merchant, Terrebonne, Quebec, suffered fire loss.

Montreal.—J. E. Leduc, hardware merchant suffered fire loss.

OBITUARY

Arthur M. Spear, vice-president of the Asbestos Mfg. Co., Lachine, Que., died in Montreal on Sunday. Mr. Spear was in ill health for some time past and was a patient in the Royal Victoria Hospital where he underwent an operation.

PERSONAL

Adcock & Co., Montreal, have been appointed Canadian representatives for the Lyman Gun Sight Corp., Middlefield, Conn.

Ald. Percy B. Chown, of the firm of A. Chown & Co., Kingston, Ont., who is completing four years as chairman of the civic fire and light committee, had the honor of being re-elected as an alderman, representing Victoria ward, at the municipal elections.

PLANT TO MAKE GASOLINE

London, Ont.—An important industrial development of interest to the hardware trade to take place at Petrolea, Ont., was outlined to Hardware and Metal by Bloss P. Corey. Work is to proceed on the erection of an extensive plant for the manufacture of gasoline, illuminating oil, lubricants and soaps.

"Work will proceed immediately," said Mr. Corey, "on the erection of the various buildings required and also on the construction of various large storage tanks. We expect to be in a position to commence distribution by spring."

Mr. Corey stated that his son will be associated with him in the development of the Petrolea enterprise and that, while the company will continue its plant in Buffalo, the head office will be in Petrolea.

EMERY WHEEL COMPANY CHANGES HANDS

Hamilton, Ont.—The Canadian Emery Wheel Co., of 46 Ferguson St., S., Hamilton, has been sold to the Lyon Emery Wheel Co. of Brockville, Ontario.

WESTERN ONTARIO NOTES

J. H. Pickering of Talbotville, Ont., is adding a new service station to his equipment, expecting a large trade with the opening of the fine new highway.

TRAVELLERS' ANNUAL DINNER

Following the annual meeting of the Dominion Commercial Travellers' Association in Montreal on December 16, the annual dinner will be held on the evening of December 18.

MAY REFINE GASOLINE NEAR ST. JOHN

St. John, N.B.—According to information now in the hands of the secretary of the St. John Board of Trade, a plant may soon be erected in the vicinity of St. John in connection with the commercial development of the oil shales of the province. This plant would not only extract the oil from the shale, but refine gasoline from the oil, and it is understood that the intention is to have the plant of sufficient size to turn out gasoline for sale upon the local market.

DAVID FINDLAY

President Findlay Bros. Co., Ltd., Carleton Place, Ont., stove manufacturers, who contested the Federal by-election in Lanark County as Liberal candidate.

INCORPORATION

Omer de Serres, hardware merchant, Montreal, has incorporated his company.

WILL EXTEND GLASS FACTORY

Hamilton, Ont.—An extension to the plant of the Dominion Glass Company, Chapple street, will be constructed at a cost of $8,000, it was announced from the building inspector's office. The building will be used as a warehouse and will be constructed of brick and steel.

TORONTO HARDWARE CLUB MEET NEXT TUESDAY

The Toronto Retail Hardware and Paint Club will hold the regular monthly meeting on Tuesday, December 12, at the Hotel Florence, 30 King Street W. The gathering will be in the upstairs dining room, at 7 o'clock. After the dinner, an address on "Salesmanship" will be delivered by A. G. Pinard, promotion manager, Lowe Bros. Ltd.

MANUFACTURERS' AGENTS OPEN TORONTO BRANCH

The Manufacturers' Canadian Service Ltd., who have operated as manufacturers' agents in Montreal, are now opening a branch office in Toronto at 1209 King street, W., in charge of R. W. Sommerville. The Montreal branch continues under the supervision of A. J. Hopkins. They plan to handle a number of lines of interest to the hardware trade, including drills, the Locktite auto patch, etc. Mr. Sommerville will assume the position of vice-president. He was formerly sales manager with the Russell Gear and Machine Co., Toronto.

SCHWAB PRACTICALLY RETIRED FROM STEEL BUSINESS

Testifying before the Federal Trade Commission, Charles M. Schwab, chairman of the Board of the Bethlehem Steel Corporation, said that he had practically retired from the steel business. Mr Schwab told friends that having reached the age of 60 years he had thought of retiring but after an exhaustive physical examination his physician had pronounced him to be in perfect health.

Mr. Schwab said that he had given up smoking some time ago and did not drink. He was careful to indulge in no excess, did not tax his strength by remaining up until very late hours, and by these means and indulging in a moderate amount of exercise was able to keep in perfect trim. His physician had told him, he said, that he was due to live many years.

F. W. BUDD HEADS MARITIME TRAVELLERS

F. W. Budd, representative of the Ogilvie Flour Mills, is the new president of the Maritime Commercial Travellers' Association. The Nova Scotia vice-president is G. E. Faulkener, and the New Brunswick vice-president is R. B. Richardson. Prince Edward Island vice-president will be elected at the annual meeting to be held on December 14. The Nova Scotia directors are, G. W. Graham, F. W. Herman, G. S. Lee, F. H. Keating, E. Y. Rowland, C. W. Smith. The New Brunswick directors are, L. M. Owens, R. G. Schofield, W. H. Spear, C. E. Patterson, and two are to be elected at annual meeting.

AUCTIONEER BROUGHT IN LARGE QUANTITIES OF OTHER MERCHANDISE

St. John, N. B.—The Retail Merchants' Association of St. John, N. B., is very much interested in a complaint lodged by a section of their members. It seems that a merchant in financial difficulties turned his affairs over into the hands of auctioneers, to raise a sufficient amount to satisfy his creditors. Certain members of the association allege that the auctioneer brought down large quantities of merchandise from other towns, and at the same time led the public to believe that such goods were the regular stock of the merchant in question, but in reality were goods of inferior quality than were ever stocked. Some of the purchasers claim that they are well satisfied with goods bought, while others claim that articles purchased by them were far below the value they believed themselves to be receiving. So far the association has not taken any action as an organization, but the matter has been brought to the attention of the city council, and the council has requested that proofs be furnished showing that goods were specially imported. Should they be able to show the required proofs, the auctioneer will have to pay a licence of $500, otherwise he will get off with the regular fee of $150.

D. H. Howden & Co. to Enlarge Toronto Branch

Plans are now under way, it is understood, for a large warehouse for D. H. Howden & Co., Toronto. It is also said that one of the chief officials of the company will in future make his home in the city of Toronto. It is stated that the growth of the business has made the present premises entirely too small. The company is planning not only a larger warehouse but contemplates extension of the travelling staff and of the territory to be covered.

ELECTRICAL EQUIPMENT STIMULATED IN MARITIMES

St. John, N. B.—That hydro-developments are stimulating sales of electrical appliances in the Province of New Brunswick, and that the electrical business is expanding at a great rate, is the opinion of William Harrison, of Moncton, who represents a large electrical apparatus manufacturing company in New Brunswick. Mr. Harrison was in St. John recently, and stated that more electrical apparatus was being sold in this province now than at any other time in its history. Everywhere the trade in electric irons, toasters and other household appliances had increased, and the call for construction materials had been greater than ever. So far as St. John is concerned, the local hardware merchants say that they have not yet noticed any great increase in the sales of electrical goods, although the visitors to the stores are showing an increased interest in electrical supplies. The local power company has made arrangements with a group of electrical contractors, and a scale of prices has been drawn up, and arrangements made whereby householders can have their homes wired and pay for the wiring by instalments each month at the same time as they pay their light bill. This will no doubt have the effect of increasing the sale of supplies. Skates and sleds are now beginning to sell, and the hardware merchants state that the prospects look good for the coming season. The addition of a new hockey arena to the city has had the effect of stimulating the sale of skates and hockey supplies.

CANADA BUYS MOST STEEL FROM UNITED STATES

During September Canada bought more iron and steel from the United States than did any other country. The Iron and Steel Division of the United States Department of Commerce announces that Canadian interests bought 41,417 tons. Japan occupied second place with purchases of 22,328 tons.

CO-OPERATIVE PLAN TO LOWER COST OF BUILDING HARDWARE ETC.

Windsor, Ont.—Concerted action to bring down the prevailing prices of building supplies, which it is claimed are exorbitant, is to be started by the Builders' and Contractors' Association of Essex County. Already thousands of dollars are said to have been pledged verbally by the members to smash the combines operating building supply concerns. This announcement was made by H. E. Turner, secretary of the association.

Negotiations are now practically completed for the operation of a co-operative supply yard to be located in Windsor near a point where transportation facilities are favorable, and will be the first drastic step taken by the association to lower the prices of building materials.

"This is not being done to antagonize dealers' supplies, but simply to cut down the cost of materials, which at present are exorbitant," said Mr. Turner.

The co-operative supply yard will include every piece of material used in construction work. "If necessary we will buy even nails," said one member of the association. Sand, gravel, cement, lumber and all other supplies will be carried.

What Plans Are You Making For Taking Inventory This Year?

Some unique conditions face the retail hardware trade in view of the variation in prices during the year.

A splendid article entitled "How to take and price the annual physical inventory" has been prepared for Hardware and Metal by G. W. Hafner, Manager G. W. Hafner, Inc., Auditors and Industrial Engineers, and will appear in next week's issue.

A good article to study and keep for reference during inventory.

News of Western Canada

For Comment on Winnipeg Hardware Market Tendencies see "WEEKLY HARDWARE MARKET REPORTS."
For Current Prices see Winnipeg Section of "CURRENT HARDWARE QUOTATIONS" in this Issue.

J. W. Hill is withdrawing from the hardware firm of Hill & Wagner Bros., Viscount, Sask.

R. M. Walker, hardware merchant, Waskatenau, Alta., has been succeeded by Bunyan & Boyd.

J. W. Hill, formerly of Hill & Wagner Bros., Viscount, Sask., has bought the firm of Peck & Meen.

Archie MacFarlane, of Montreal, visited Calgary and Edmonton on his way to West Coast points.

Olberg Hardware, Broderick, Sask., was broken into. Tools and $20 cash constituted the plunder.

A. W. Givin, Vancouver representative of the Taylor Forbes Co., visited Calgary and Edmonton during the week.

Mr. Twaits, sales manager, and Mr. Conway, western representative of H. Mueller Mfg. Co. Ltd., Sarnia, visited the hardware and plumbing goods trade of Edmonton and Calgary during this week.

Geo. M. Christie of G. F. Stephens & Co., Ltd., Roy Pendray of the British America Paint Co. and H. Hutchcroft of the Winnipeg Paint and Glass Co., visited Edmonton during the week and attended a meeting.

Ernest Bureau of the firm of Richardson & Bureau, Montreal, called at the Winnipeg office of Hardware and Metal, on a return trip from the West. Mr. Bureau, in discussing conditions in Western Canada, stated that he found them showing an improvement.

R. R. Sutherland of Sutherland Bros., Winnipeg, has returned from a business trip from Eastern Canada and United States and reports that many factories in Eastern Canada as well as in the States are working night and day in order to keep up with their orders. This applies particularly to builders' hardware lines.

Regina, Sask.—Negotiations for the purchase of the Capital Hardware store, Eleventh avenue, by C. A. Darke, are practically completed. A price has been agreed upon and Mr. Darke will take possession shortly it is said.

The owners prior to the deal were T. Bolser and C. M. Carruthers. The store will in future be operated under the trade name of C. A. Darke, Limited. It is understood the price agreed upon was in the neighborhood of $16 000.

RETAILERS FAVOR FUNDING OF FARMERS' DEBTS

Edmonton, Alta.—Funding of farmers' debts, through some arrangement with the banks and the provincial government, is a scheme which is finding general favor in the southern section of Alberta. Several farmers' organizations have offered recommendations along this line, and at a meeting, the Macleod branch of the Retail Merchants' Association expressed itself in support of the movement also. The meeting is said to have been one of the largest and most representative ever held in Macleod.

ELECT NEW OFFICERS FOR VANCOUVER RETAIL MERCHANTS' ASSOCIATION

Vancouver.—At the annual meeting of Greater Vancouver branch of the Retail Merchants' Association, E. R. McTaggart was elected president in succession to Harry C. Wilson. Other officers are: First vice-president, H. B. Nielsen, auto accessories; second vice-president, Leslie G. Henderson; treasurer, Geo. Hunter, of Hunter-Henderson Paint Co.; honorary secretary, Geo. H. Jarman. The meeting gave its endorsement of the committee's action in choosing five aldermen and a candidate for mayor, whom the R. M. A. will support on December 13. The present council, with the exception of one man, Ald. W. R. Owen, of Owen & McCallum, retail hardware dealers in Mount Pleasant, will be opposed.

ENLARGE WINDOW SPACE

Vancouver.—Share Brothers, retail hardwaremen, who, during the summer, secured the premises near the corner of Granville and Hastings Streets, have changed the entire front, giving more than double the window space on a slant inwards, and are now displaying a full line of sporting goods.

SIX-DAY WEEK FOR EDMONTON STORES

Edmonton, Alta.—Retail merchants of this city have definitely decided to keep their stores open for business six days a week, pending the anticipated enactment, early in the new year, of provincial legislation governing this matter.

It was also decided that when the new provincial bill is brought up for discussion, presumably early in December, a committee of retail merchants shall be appointed to look into its clauses, and, if necessary, offer suggestions that would make the bill acceptable to all.

Death of Pioneer Western Hardwareman

Impressive Funeral Ceremony for Late Ernest A. Dykes of Dykes & Rutley, Kindersley, Sask.

THE death of Ernest Augustus Dykes of Kindersley, Sask., as briefly referred to in last week's issue of Hardware and Metal, removes a figure prominent in the hardware trade for some years. Mr. Dykes was one of Kindersley's early pioneers and died at the age of 50 years from an attack of appendicitis.

Mr. Dykes was a member of the hardware firm of Dykes & Rutley, of Kindersley, going there in the summer of 1909, doing business in tent town until the townsite of Kindersley was surveyed and the town lots sold. He was a highly respected citizen and had served several terms on the town council, being councillor at the time of his death.

He was always working in the interest of the community. A man of excellent habits, fine moral character, he continued to be active in business and church affairs until his death. The sad news of his death casts a shadow over the whole community. Mr. Dykes was a member of the Kindersley St. Paul's Presbyterian church and belonged to the Kindersley A. F. & A. M. Lodge.

The large number of people that attended his funeral was a testimony of the esteem in which he was held by all who knew him.

Brother of A. E. Dykes

Besides a devoted wife and little daughter, he leaves to mourn his loss an aged father, who resides at McGregor, Man., two brothers, A. E. Dykes, manager of the J. H. Ashdown Hardware Co., Winnipeg, who was with his brother when death came, and Albert Dykes, also of Winnipeg; two sisters, Mrs. Edward Zuel, Mankato, Minnesota, and Mrs. Marsh of McGregor.

The funeral service was held in the Presbyterian church. At the close of the service an unusually large procession followed the hearse to the cemetery, where the Masonic Order held a very impressive funeral service, there being over 60 members present.

New Hardware Goods

Offered to Canadian Hardwaremen

"UNIVERSAL" LOUD SPEAKERS

Another addition to their line of radio is being made by the Roller-Smith Co., of New York City, in the "Universal" loud speaker. A number of descriptive points are claimed by the makers, as follows;—The volume of sound

more than ample for home service, and no battery is needed. It is also said to give faithful reproduction without "rattling" or metallic effects, due to the large bell which allows the sounds to leave the horn without resonance. Its sensitiveness is attributed to the two built-in receiver units. Acoustic effects are also featured which it is said will practically eliminate light static and weak code signals. The horn is 21 inches high, with 10½ inch bell and 7½ inch base. Both bell and horn are made of cast aluminum.

ALUMINUM LINE LEVEL

An Aluminum Line Level, No. 108, has just been placed on the market by The L. S. Starrett Co., Athol, Mass.

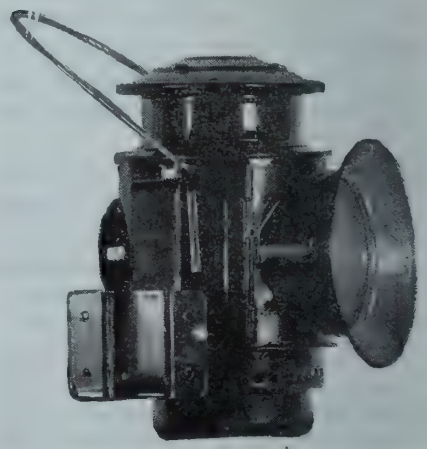
The makers point out that the lightness of this little level should eliminate any sag in the line. It weighs half an ounce and is 3 inches in length. It is

pointed out that the level may be conveniently carried in the pocket.

A luminous level glass with a yellowish fluid is used for the vial. The slots on the protruding pieces are constructed so that the part of the slot which comes in contact with the line is true in relation to the level. These slots are designed to prevent the level from dropping off the line when in use.

LUFKIN DISPLAY BOARD

A new steel tape display board, carrying a small, but assorted stock, is made by the Lufkin Rule Co. of Canada, Ltd., Windsor, Ont. This board No. 6 contains four tapes, one 50 foot "Challenge," one 50 foot "Rival," and one each 25 and 50 foot "Banner." The "Challenge" is a steel tape in leather case; the "Rival" has a metal case, is especially suitable for rough service; the "Banner," is a high grade steel tape in auto leather case.



These tapes are displayed on metal tray, or panel, having dull black back-

ground, with lettering, in white, red, and gold. Below each tape is its name and number and place for inserting price. Schedule on back of tray enables the dealer to quote on other lengths than those displayed. The tray can be laid flat, also has metal easel, the size being 10¼ x 12½ inches.

NEW DRIVING LAMP

To meet the requirements of the new traffic regulations, E. T. Wright Co., Ltd., Hamilton, have placed on the market a new carriage and driving lamp, equipped with a bracket and side clip for either right or left side. A 3 in. glass bull's-eye with reflecting rim throws the light forward, and a 1½ in. red signal is exposed at rear. The ¾ in. wick is operated from the outside, and the front and bottom are removable in one piece. The makers point out that coal oil will give the most satisfactory results, although sperm oil may be used.

The oil capacity is sufficient to burn a long time without replenishing.

"LITTLE GIANT" PIPE WRENCH

The "Little Giant" pipe wrench is a new product of the Greenfield Tap & Die Corporation, Galt, Ont. The makers claim that this wrench can handle pipes in corners, close to walls, and similar confined places. It can be set straight on the pipe, instead of having to fit the jaws on from the side.

It is also pointed out that the "Little Giant" wrench has three parts; a handle and jaw in one piece, a movable jaw, and a hardened steel nut. There are no springs, rivets, frame or pins.

Another feature is the double set of teeth on the main jaw. The movable jaw can be engaged at option, with either of these sets of teeth with consequent lengthened life. On the larger sizes, 14 in. and greater, two additional sets of teeth are provided, making four in

all, and the movable jaw can be reversed to engage these additional sets of teeth, which are below the adjusting nut. It is being manufactured in 8, 10, 14, 18 and 24 in. sizes, of which the three smaller sizes are being introduced to the market.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

ALTHOUGH price revisions on the current hardware markets are not so numerous as during recent weeks, yet a number of important developments are recorded. Higher quotations appear on spades, shovels and scoops through revised discounts, and other advances include roller skates, ordinary carpenters' and razor blade draw knives, together with a fifteen per cent. increase on socket firmer, framing, paring and corner chisels. The higher price levels are now general on cotton wastes, while a further revision in this direction is considered likely in the new year.

Reductions are moderate in number, the principal change being on lighter weights of both dry and tarred fibre building papers, and also heavy straw sheathing. Prices on mineral surface roofings are now lower. A similar development is recorded in the Jonathan Crookes line of pocket cutlery, jack knives showing a substantial reduction, with a decline of minor proportions on pen and pocket knives. New quotations on window rubbers or cleaners are approximately ten per cent. lower. Turpentine markets are easier this week, a recession of five cents being recorded in certain quarters.

As foreshadowed in former issues of Hardware and Metal, a statement is now made that the manufacture of Sovereign and Regal paper shot shells will be discontinued at the close of the present year. The Iver Johnson prices are guaranteed against decline until December, 1923, but those now quoted, however, are considered subject to advances. Some rumors are prevalent of price readjustments on certain lines of galvanized and enameled wares. No action in this direction has been recorded. A firmer market is evident in galvanized wire, but there is a diversity of opinion as to whether any upward price movement will result. An average trade is recorded in the sheet markets, with a conservative tone in bar iron and steel. There has been a seasonal falling off in radiator trade, together with a quieter session in scrap materials. Little variation is recorded in the non-ferrous metal group, tin and spelter exhibiting an inclination to recover from the recent reaction.

Electrical products are numbered among the numerous seasonable hardware lines at present enjoying a brisk volume of holiday trade. Active sales are recorded for toasters, grills, irons, percolators, heaters, hair curlers, flashlights and batteries. Glass ovenware and silver plated flatware, alarm clocks, skates, hockey outfits, and other sporting goods, as well as auto accessories and toys, are included in the list of products receiving prominence as gift suggestions at this period. Christmas trade is now generally reported on an active scale.

Montreal, Que.

MONTREAL, December 7.—Price reductions are announced this week on the lighter weights of building papers, certain lines of sheathings, and the Jonathan Crookes line of pocket cutlery. Both dry and tarred papers are affected, also the same lines of straw sheathings. Increased price levels may shortly be announced on plain galvanized wire, plain twist, coil spring and barbed wire. It is understood that new quotations will likely be ten cents higher than formerly. Socket firmer, paring, framing and corner chisels are higher in price, also ordinary carpenters' and razor blade drawing knives. Tin and spelter are again firmer on primary metal markets after a temporary set-back. The further decline in domestic pig iron prices is of interest and while opinions differ as to the direct affect this is liable to have on finished iron and steel products, it is considered sufficient to cause a weaker market tone in some lines. Revised quotations are now general on cotton wastes, and a firm undertone is evident with a further advance around the first of the year thought likely.

MANUFACTURE OF SOVEREIGN AND REGAL SHELLS DISCONTINUED

Montreal.

As outlined some months ago in Hardware and Metal, manufacturers of the Sovereign and Regal paper shot shells contemplate discontinuing these two lines after the close of the present year. Announcement is now definitely made to this effect. Crown shells will still be offered to the trade in all gauges, also the Canuck shell, it being the intention that the latter replace the Sovereign and Regal brands. The Imperial high base shell will also be sold in 12 gauge standard loads. Prices for next season will be issued in the New Year.

FUTURE STEEL DEMAND IMPORTANT QUESTION

Montreal.

"There is a weaker undertone in iron and steel owing to the downward trend of domestic pig iron prices, but the inability of American mills to forward shipments because of the shortage of cars is still maintaining a steady attitude. Demand, which will play an important part in the market from now on, is at the present time quiet, outside of general smaller warehouse business, and whether or not domestic railways will commence a construction program next year is a question of interest among us," said a local distributor of iron and steel products. The fact that domestic producers in this locality are well supplied with overseas pig was also again pointed out, it being stated that most mills have sufficient to last for the greater part of the winter months. Local quotations are unchanged as follows:

IRON AND STEEL—

Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50 3 65
Spring steel	4 75 8 50
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per cwt. over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

PRICE REDUCTION IN POCKET CUTLERY

Montreal.

A revision is made in the price list of Jonathan Crookes pocket cutlery, jack knives showing a substantial reduction, and pen and pocket knives a price recession of a minor nature.

REVISED QUOTATIONS ON COTTON WASTES

Montreal.

As outlined in last week's issue of Hardware and Metal, new higher prices on cotton wastes were issued on December 4. Dealers describe the undertone of the market for these products as remaining very firm, and a further increase is expected in some quarters around the first of the new year. Following are price levels now given:

COTTON WASTES—	Per lb.
Cream polishing	0 19
White, XXX extra	0 17
White, XX grand	0 16
White, XLCR	0 15
X Empire	0 13½
X Press	0 12
Colored—	
Fancy	0 14
Lion	0 12½
Standard	0 11
Popular	0 09½
Keen	0 08
Wool Packing—	
Arrow	0 24
Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

IVER JOHNSON FIREARMS ON FIRM PRICE BASIS

Montreal.

The Iver Johnson Arms & Cycle Works guarantee present prices against decline until December 31, 1923. Prices, however, now quoted are subject to advances without notice, with a firm tendency in the market for these products.

INCREASED CHISEL PRICES NOW BEING QUOTED

Montreal.

New higher prices are now issued on socket firmer, framing, paring and corner chisels and sleeks. The advance is approximately 15 per cent.

QUIETER TONE IN SHEET MARKETS

Montreal.

With the exception of galvanized sheets, there is a quieter tone in the local sheet markets with the approach of the holiday season. Fair trade is still evident in the former, although here also, a slackening has been noticeable within the past week or so. Black sheets, tin and Canada plate are on a very dull market with little further activity looked for until after the turn of the year at least. Regarding the possibility of an easing in prices in face of the winter period, one local dealer stated that he would not be surprised if lower values were offered during the ensuing months, as very often this was the case when dealers were well stocked and anxious to unload, especially around the inventory period. However, lower price levels would not represent replacement costs and with a firm market tone in production circles it was quite probable that considerable tonnage would be set aside in some quarters for earlier spring requirements.

BLACK SHEETS—		
10 gauge, base	4 00	4 25
12 gauge	4 10	4 35
14 gauge	4 20	4 45
16 gauge	4 30	4 55
18—20 gauge	4 55	4 80
22—24 gauge	4 60	4 85
26 gauge	4 65	4 90
28 gauge	4 75	5 10
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	6 75	7 25
26 gauge	6 50	7 00
24 gauge	6 20	6 70
22 gauge	6 15	6 65
18—20 gauge	5 90	6 40
Other Brands—		
10¾ oz.	6 50	7 00
28 U. S. gauge	6 00	6 50
26 U. S. gauge	5 75	6 25
24 gauge	5 60	6 10
22 gauge	5 60	6 10
18—20 gauge	5 40	5 90
16 gauge	5 25	5 75

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 25
20 x 28 IC, 112s	12 75
20 x 28 IC, 112s	15 00
20 x 28 IXX, 56s	8 50
20 x 28 IXXX, 56s	10 00
TERNE PLATE—	
20 x 28 IC, 112s	12 50
CANADA PLATE—	
Half bright 52s	4 85
Half bright 60s	4 90
Blued, 52s	5 10

REDUCED PRICES ON PAPERS AND SHEATHINGS

Montreal.

A reduction of ten cents per roll is made in quotations on the lighter weights of both dry and tarred fibre building papers. Heavy straw sheathings, both dry and tarred, are also reduced twenty-five cents per 100 lbs. Present prices will be found on current market pages.

MINERAL SURFACE ROOFING SLIGHTLY LOWER IN PRICE

Montreal.

Announcement is made by certain manufacturers that quotations on mineral surface roofing in 18 inch and 36 inch widths is reduced fifteen cents per square. 36 inch width is now quoted at $2.50, 18 inch width at $2.95 per square.

ADVANCED QUOTATIONS ON DRAWING KNIVES

Montreal.

An advance of 15 per cent. is also recorded in quotations on ordinary carpenters' and razor blade drawing knives.

GALVANIZED WIRE ON FIRMER PRICE BASIS

Montreal.

Manufacturers announce firmer price levels on galvanized wires such as plain galvanized, plain twist, coil springs and barbed wire. New prices are not yet available but an increase of around ten cents per hundred pounds may be expected.

STEADY TONE IN MARKET FOR PIPE FITTINGS

Montreal.

Quotations on pipe fittings remain on a steady basis, with a fairly good movement reported for this time of year. There is a steady to firm undertone in the market, especially on galvanized fittings. Prevailing discounts are:

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, small	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%

Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%
MALLEABLE FITTINGS—	
Price list effective June 1st, 1922. Discount 70 per cent.	

TRADE IS QUIETER IN BOILER TUBES

Montreal.

Only a fair amount of activity is now recorded in boiler tubes, following a period during the past few weeks when the movement showed some improvement. It is stated that only repair work of the smaller class is demanding supplies, although it was expected that the close of navigation would greatly stimulate sales. It is probable, however, that such requirements may be felt at a little later date. Following are average prices:

BOILER TUBES—	Seamless	Lapweld
1 inch	20 00	.....
1¼ inch	22 00	.....
1½ inch	21 00	.....
1¾ inch	24 50	24 00
2 inch	21 00	19 75
2¼ inch	24 00	22 25
2½ inch	27 00	23 25
3 inch	33 00	29 50
3½ inch	38 00	34 25
4 inch	49 00	43 50

Prices per 100 ft. f.o.b. Montreal.

LESS INTEREST SHOWN IN SCRAP MATERIALS

Montreal.

Interest manifest in scrap metals has subsided with the first appearance of real winter weather. There was a fair buying movement a few weeks ago when certain consumers were apparently anxious to procure supplies before the closed period, and dealers were encouraged in the belief that trade would ex-

tend later in the season this year, but this improvement was not for long standing. Prices are nominally unchanged and following are average dealers' buying prices:

SCRAP—

Autombile Tires	0 50
Rubber Shoes	0 02½
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 04½
Lead, heavy	0 04½
Lead, tea	0 03
Heavy copper	0 11½
Wrought iron, R. Rd., No. 1 per gr. ton.	10 00
Malleable scrap (ton)	9 00 to 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 50 10 00
No. 2 busheling	3 00
Boiler plate	8 00 to 9 00
No. 1 machinery cast	20 00 22 00

FAIR TRADE CONTINUES IN COMPRESSION GOODS

Montreal.

Current trade in brass valves and bibbs is again described as fairly good, and comparing favorably with past seasons for this time of year. Although winter weather is now hindering outside construction, many buildings are being rushed to completion and inside work is being carried out quite extensively. Quotations remain at unchanged discounts, and indications now are that a steady market will remain in evidence for the balance of the year at least.

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	45%
Bath cocks, compression	41%
Jenkins iron body, gate	25%
Bath cocks, quick opening	41%

Globe, angle and check valves, standard.	25%
Gate or straightway	25%
Emco Globe valves	33%
Emco check valves	33%
Jenkins gate or straightway	16%
Jenkins iron body, globe and angle	15%
Jenkins Globe, angle, check and swing check	10%
Jenkins iron body, gate	25%

STRENGTH AGAIN SHOWN IN TIN AND SPELTER

Montreal.

The chief feature of the metal markets this week is the firmer tone in ingot tin and zinc, both of which have again registered advances in prices. In view of the strength of sterling exchange this naturally means higher delivered prices on the former metal. From all indications the gain is based on speculative activity on the London market.

TIN.—November statistics showed an increase in visible supplies of over 2,000 tons, but despite this London has advanced sharply this week. It is thought possible that another effort will be made to boost prices, but this is difficult to say at the moment. The local market is necessarily stronger at 42½ cents.

COPPER.—This metal remains quiet but steady and it would be interesting to see whether the purchase of the Chile Copper Co. by Anaconda will have any effect on the market. Export business is not very brisk, and with domestic consumption certainly no greater than it has been, something would appear to be necessary to stiffen prices. Quotations are unchanged at 17¾ and 17½ cents.

LEAD.—There is little new in this metal, but the American market is quite firm with every indication of present prices being maintained. The English market is also steady with supplies reported as being none too large. Locally this metal is quiet at 7¾ to 8 cents.

SPELTER.—A resumption of English buying in the U. S. A. has caused prices to stiffen again, East St. Louis being quoted at about the high level of $7.35 reached some weeks ago. Whether or not the market will advance beyond this level is said to depend largely on export business, but at the present time the situation is strong. Market here is firm at 10 cents.

ANTIMONY.—There is little or no change to report in antimony, the market continuing quiet at 7 cents for Chinese and 7½ cents for high grade English.

ALUMINUM.—This metal remains in a slightly improved market condition, although there is very little trading at the present time. Quotation is unchanged at 22 cents.

METAL STRENGTH REFLECTS ON LEAD PRODUCTS

Montreal.

Following an easier tone on the primary metal markets last week when both tin and spelter experienced a set-back from their former firmer trend, these metals are again displaying a strong tendency. Tin is reported as firmer within the last few days, while spelter is again higher in price. Lead continues on the higher levels reached some time ago, and altogether metals present a much stronger market tone. Prices on the finished products therefore are firmer at the following unchanged levels.

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs., up to 2"	14 00
Do., 2" to 8"	15 00
Do., 8" and over	16 00
Lead waste, per 100 lbs.	15 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs., sq. ft. lb.	0 11
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs., sq. ft. lb.	0 10

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 22½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 36
Zinc sheets, casks	0 11
Do., broken lots	0 11½

Toronto, Ont.

TORONTO, December 7.—The advance in quotations on spades, shovels and scoops, through the revision in discounts, constitutes the premier development in a market devoid of many changes this week. Several price adjustments, however, are reported pending locally, such items including mineral surface roofings, dry and tarred fibre building papers, galvanized wire, and galvanized and enameled ware. Local asbestos prices remain unchanged, although it is pointed out that owing to recent improvement in the asbestos market, any change in air cell pipe covering would undoubtedly be in an upward direction. Quotations still vary on radiator valves, no settlement having been attained. The quotation of 58 per cent. off is becoming more prevalent as this level is being met by those distributors who were formerly adhering to the lower figure.

ADVANCED PRICES ON SHOVELS, SPADES AND SCOOPS

Toronto.

Through a change in the discounts, quotations on spades, shovels and scoops are advanced. The extent of the increase is approximately six per cent., the former discount being 53 per cent. off on all grades, while the revised level is 50 per cent. This movement corresponds with the recent upward trend of many manufactured hardware prices, and is cited as a reflection of the prevailing higher level of raw material costs.

RUMOR OF PRICE REVISIONS ON SOME WARES

Toronto.

The probability of some revisions being made in galvanized ware prices is the rumor prevalent on the local market this week. That some readjustments in enameled ware quotations are also being considered have been noted, but, up to the present, no developments of this nature have been recorded. That such changes may materialize in the near future is the impression evident in certain quarters, but, on the other hand, it was stated that no definite steps in this direction were pending as yet.

FIRMER MARKET EVIDENT IN GALVANIZED WIRE

Toronto.

A firmer tone is noted on galvanized wire, but opinion appears to be somewhat divided as to whether an upward price revision is imminent. In certain quarters the trend of the market on plain galvanized, plain twist, coil spring and barbed wire has resulted in the rumor that quotations may be advanced to the extent of ten cents per cwt. in the near future. In other quarters, however, the prevailing impression is that

changes in this direction are not considered likely, the fact that wire nails were recently advanced to this extent being one of the causes assisting in such a movement.

CONTEMPLATE REVISION IN ROOFING PRICES

Toronto.

That some revision in prices on roofings is considered possible in the near future, is the opinion expressed in certain distributing circles. It is also stated that any market developments of this nature may show a tendency towards slightly easier levels on certain lines only. No changes have been made up to the present, however, the prices contained on the current quotation pages being those in effect locally.

MODERATE ACTIVITY IN BRASS AND COPPER

Toronto.

Manufacturers and distributors of brass and copper goods record a fair amount of activity for this time of the year. Current trading, however, is described as on a moderate scale, with the undertone of the market remaining fairly steady throughout recent weeks. The tone of primary metals has developed some minor fluctuations, but no changes are considered of sufficient extent to affect the finished products such as sheets, rods and tubing. That some slightly easier levels may become apparent after the turn of the year is the opinion found in local distributing circles. Current quotations remain unchanged at the following levels:

BRASS—

Sheets base, per lb.	0 23
Tubing, base, per lb.	0 30
Rods, base, per lb.	0 22

COPPER—

Rods, base, per lb.	0 30
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 33

LOCAL ASBESTOS PRICES REMAIN UNCHANGED

Toronto.

Although eastern markets are recording some higher price levels on asbestos air cell pipe covering, no change has been made in local discounts on these products. The revisions noted in a recent issue of Hardware and Metal on asbestos sheathing and magnesia pipe covering remain in effect, but other lines maintain former discount levels. An improvement, however, is generally noted in the asbestos market, and the trend is described as upward at this time. Following are local quotations:—

ASBESTOS PRODUCTS—

Pipe Covering—	
Air cell, 4 ply	60 per cent. off list.
Air cell, 3 ply	65 per cent. off list.
Air cell, 2 ply	67½% off standard list.
Boiler Covering	$1.50 per bag
Asbestos Sheathing	$6.75 per 100 lbs.
Magnesia pipe covering	less 40%

SEASONAL AVERAGE IN SOIL PIPE MARKET

Toronto.

Business in soil pipe and fittings is naturally quieter than it was formerly, owing to the lateness of the season. Current trade, however, is described as keeping up to a fair average for this time of the year. The basic materials continue on a steady trend and no change has been made in prevailing market levels. Discounts remain as follows:

SOIL PIPE—

2 inch	Less 33 1-3 per cent.
3 inch	Less 33 1-3 per cent.
4-inch	Less 33 1-3 per cent.
5 and 6 inch	Less 33 1-3 per cent.
8 inch	net

FITTINGS—

2 to 6 inch fittings	Less 45 per cent.
8 inch fittings	net

MODERATE TRADE IN LEAD AND ZINC GOODS

Toronto.

There has been some reaction in primary metals such as tin and spelter, but quotations on the finished products, such as those listed below, have shown no variation on domestic markets. Lead and zinc goods are generally maintaining the higher levels recently recorded, it being pointed out that quotations on these lines were not advanced immediately when primary metal quotations began climbing. Some fluctuations of the current nature were, therefore, more or less anticipated. The current movement of these products is described as fairly good for this time of the year, although the season's trade is moderate when compared with earlier records. Following are unchanged price levels:—

LEAD AND ZINC GOODS—

Lead pipe, list per lb.	0 14
Lead Waste, pipe, list, per lb.	0 15
Do., over 8 in., list per lb.	0 16
Lead pipe is subjected to a discount of	10%
Lead traps and bends	15%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	0 09½ 0 10
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 31
Do., wiping, lb.	0 23½
Do., guaranteed, lb.	0 26½
Do., commercial, lb,	0 23½
Zinc sheets, per lb.	0 11 0 12

AVERAGE TRADE RECORDED IN SHEET MARKETS

Toronto.

There has been no change in sheet prices this week, but the domestic market is described as slightly firmer. There is a steady demand for this season of the year, and distributors state that, on the whole, business remains fairly good. The fact that former price levels for sheets and tin plate in the U. S. market continue unchanged for first quarter shipment, has brought some disappointment in certain quarters where advances were more or less expected. It is pointed out, however, that production is being maintained at a comparatively high rate, while delivery conditions have undergone a slight improvement.

It is noted that, while current business in tin plate was more or less of a restricted character, the recent information that quotations would most likely remain unchanged for first quarter has brought about considerable new buying. Plans for greater production by various automobile manufacturers resulted in expectations for greater business in finished sheets throughout primary markets.

GALVANIZED SHEETS—

	Premier and Apollo
10¾ oz.	6 65
U. S. 28 base	6 25
U. S. 26 base	5 95
22 and 24	5 80

LITTLE CHANGE IN NON-FERROUS METALS

Toronto.

In the local ingot metal market, the current demand continues along conservative lines. It seems to be a matter of supply houses carrying, for the time being, the requirements of the trade so far as the small buyer is concerned.

London reports a firm undertone in the tin market, with some improvement in demand from other primary centres.

Copper trading continues comparatively light and prices have undergone no change up to the present.

Although zinc has shown a disposition to sag in London, the New York market is firm. Supplies are not any too heavy and some producers are behind in deliveries. Current prices follow:

INGOT METALS—

Copper	17 25
Tin	41 00
Lead	7 50
Spelter	9 50
Antimony	8 50
Aluminum	22 00

SEASONAL FALLING OFF IN RADIATOR TRADE

Toronto.

Brisk activity has characterized the market for radiators and boilers during the fall session, but the movement of these products is now falling off with the approach of the winter months. Business is still described as good for this time of the year, however, keen interest having been displayed in steam and hot water heating equipment, with the support of the activity experienced in construction work during the year. No change has been made in quotations on either radiators or boilers, the market maintaining a fairly steady tone, and, although the volume of trade is not so pronounced as formerly, it is expected that existing price levels will remain in effect until the New Year.

RADIATORS—

Revised radiator list prices are for 1, 2, 3, 4 and 5column radiators per square foot.

38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in. $1.40; 16 in. $1.50; 14 in. $1.55; 13 in. $1.60.

Discount on 2, 3, and 5-column standard sizes, 55 per cent. for water and 56 per cent. for steam.

Discount on 1-column standard size, and 2, 3, and 4-column hospital sizes 47 per cent. for water and 48 per cent. for steam.

Discounts on 1-column hospital size, water, 33 per cent.; steam, 34 per cent.

Wall radiators—5 ft., $1.15; 6 ft. $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05. Discount 52 per cent.

BOILERS—

Water:

Round, 60 per cent off list. Square, 20 per cent. off list.

Steam:

Round, 25 per cent. off list; square, 15 per cent. off list.

QUIETER TRADING IN SCRAP IRON AND STEEL

Toronto.

Local dealers report the call for scrap iron and steel quieter, and the tone softer. Hand-to-mouth buying is being done by consumers. Steel mills are taking heavy melting steel and turnings as needed. Cast scrap has gone down, foundries holding back orders.

In scrap metals there has been a fair demand for red and yellow scrap. White metals have continued moving more actively. Demand for turnings and clippings in the red and yellow division has been quieter. Following are the usual averages of dealers' current buying prices for fairly large quantities:

SCRAP MATERIALS

Scrap Iron	
Heavy melting steel	10 00
Scrap pipe	7 00
Steel turnings	10 00
Malleable scrap	10 00
Rails, scrap	11 00
Net tons—	
No. 1 cast	18 00
Stove plate	14 00
Car Wheels, (std.)	16 00
Scrap Metals	
Heavy copper wire	11 00
Light copper	9 00
No. 1 composition	9 00
Red brass turnings	7 00
Light brass	4 50
Heavy yellow brass	5 25
Heavy lead	4 50
Tea lead	3 00
Scrap zinc	3 50

Scrap Rubber		
Boots and shoes	2 00	2 25
High rubber boots	1 25	1 50
Auto tires	0 25	0 50
Solid tires	0 60	1 00

QUOTATIONS STILL VARY ON RADIATOR VALVES

Toronto.

Some unsettlement still exists on the local market with regard to the prevailing quotation on radiator valves. As previously pointed out, a variation in discounts was apparent, certain distributors maintaining the level of 54 per cent. off, while others were adhering to the former levels of 58 per cent. The quotation of 58 is gradually becoming more general, as it is stated that this figure has to be met by those distributors who desire to adhere to the other price, because of the appearance and spread of the easier level. The opinion that some uniform quotation will be decided upon in the near future is also evident. Following are current discounts:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in	50%
Do., 2½ in to 3 in.	43%
standard	25%
J. M. T.	10/10
J. M. T. C.	16/10
J. M. T. Gate Valves	16/10
Jenkins gate or straightway	16/10
Jenkins Globe	10/10
Radiator valves, standard	54 to 58%
do., do., removable disc	54 to 58%
Emco check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%
BASIN COCKS:—	
No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

CONSERVATIVE TONE IN BAR IRON MARKET

Toronto.

There is little variation in current prices for bar iron and steel, but conditions are evidently such as to render consumers somewhat cautious until the market is more fully developed. According to local dealers, there appears to be no outstanding reason for price changing at the present time, in view of the somewhat conservative attitude of the market. Buyers still seem to be in control to a very definite extent, however, although difficult conditions surrounding production and delivery tend to loosen this attitude. Dealers report a good demand for interior building materials, such as metal lath. With the usual restricted volume of trade during the winter months, it is pointed out, however, that slight recessions would not be surprising.

IRON AND STEEL—

Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40
Angle iron, base	3 35	3 50
Horse shoe iron		3 90
Tire steel		3 50
Spring Steel	7 00	8 00
Sleigh shoe steel		3 40
Cold drawn steel		4 50
Hoop steel		4 75
Norway iron		12 50
Toe caulk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

London, Ont.

LONDON, December 7.—Trade in the hardware stores of this district has been very active during the past week. Seasonable winter lines are moving well and holiday trade is increasing rapidly. Prices show very little change this week. Reports indicate that collections are fairly good.

NAILS STILL RECORD FAIR SALES ACTIVITY

London, Ont.

A good volume of sales for nails is still evident. There has been no change in prices. Considerable improvement is now noted in the supply of cut nails.

NAILS—

Wire nails, base, $3.75 per keg.
Cut, do., base, $4.60 per keg.

PRICES TEN PER CENT. LOWER ON WINDOW RUBBERS

London, Ont.

New prices now in effect on window rubbers or cleaners show a decline of approximately ten per cent. Following are revised levels:

WINDOW RUBBERS—

XLCR Metal Frame, 12" $3.00 doz.; 14" $3.50 doz.; 16" $4.00 doz.

SLIGHTLY HIGHER PRICES ON ROLLER SKATES

London, Ont.

New prices issued on roller skates are slightly higher, as foreshadowed in a former issue of Hardware and Metal. No. 3, plain, are now quoted at $1.00 per pair, and No. 5, ball bearing, at $2.20 per pair.

SLEIGH BELLS IN SEASONAL ACTIVITY

London, Ont.

Sleigh bells are now selling in seasonal volume. Prices are a little lower this season. The prevailing quotations are as follows:

SLEIGH BELLS—

Bronzed Steel Team Bells, No. 7	doz. 1 30
Rough Team Bells No. 2	3 25
Do., No. 3	4 35
Do., No. 4	6 00
Collar Bells on Strap, No. 2	1 35
Do., No. 3	1 45
Swedish Chimes, No. 1400	per set 2 50
Swedish Chimes, No. 1500	2 75
Swedish Chimes, No. 1700	3 75

JUST FAIR ACTIVITY IN LINSEED OIL

London, Ont.

There is merely a fair sale recorded at present for linseed oil, with local prices remaining unchanged at the following levels:

LINSEED OIL—

	Raw Imperial Gal.	Boiled Imperial Gal.
1 to 2 barrels	1 10	1 13
3 to 5 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less Barrels, Add 15c. Gallon.

TURPENTINE SALES REACH LIGHTER VOLUME

London, Ont.

The current sale of turpentine is becoming seasonably lighter, which is usual at this time of the year. Prices have also been reduced five cents per gallon this week, which follow:

TURPENTINE—

1 bbl. lots, $2.15; Imp. Gal.; 2 to 4 bbl. lots, $2.14 Imp. Gal.; 5 Gal lots. $2.30 Imp. Gal.

HORSE SHOE CALKS NOW IN POPULAR CALL

London, Ont.

There is a good sale generally reported at present for horse shoe calks. The current quotation on Neverslip make remains at list less 15 per cent.

SEASONAL ACTIVITY NOTED IN ALARM CLOCKS

London, Ont.

Dealers generally record a good sale of alarm clocks for the Christmas trade. Prevailing prices on these products are as follows:

ALARM CLOCKS—

America, $1.37 each; Lookout. $1.88 each.; Early Bird, $1.17; Sleepmeter, $2.06; Jack-o-Lantern, $2.75; Big Ben Plain Dial, $3.12; Big Ben Luminous Dial, $4.09; Baby Ben, Plain Dial $3.12; Baby Ben, Luminous Dial, $4.09.

CHRISTMAS ACTIVITY IN SILVER-PLATED FLATWARE

London, Ont.

An excellent sale of silver-plated flatware is evident during the present season. Quotations on the 1847 Rodgers line remain at net list, with the Community line prices also at net list.

HOLIDAY ACTIVITY IN GLASS OVENWARE

London, Ont.

A moderately large holiday trade call for glass ovenware is generally evident. Quotations on the Pyrex line continue at list less 33 1/3 per cent.

PUTTY MAINTAINS ACTIVE MOVEMENT

London, Ont.

The active movement of putty keeps up in good volume. Sales for this time of the year are well maintained, although the movement is reaching a natural reaction. Prices are unchanged as follows:

PUTTY—

Standard, 100 lb. drums	4 80
Do., 25 lb. drums	5 05
Pure, 100 lb. drums.	6 05
Do., 25 lb. drums	6 30

IMPROVED ACTIVITY IN THERMOS PRODUCTS

London, Ont.

There is also recorded a good holiday trade for Thermos bottles and lunch kits. Quotations at present in effect are list less 25 and 10 per cent.

ELECTRICAL PRODUCTS AMONG HOLIDAY GOODS

London, Ont.

Electrical products generally are numbered among the seasonal lines enjoying a brisk volume of holiday trade. Active sales are recorded for toasters, irons, grills, percolators, heaters, hair curlers, flashlights and batteries.

Winnipeg, Man.

WINNIPEG, Dec. 7.—Christmas trade becomes more active from day to day, and while many lines are now quieter owing to the approach of the holiday season, a good volume of business has been reported for lines such as cutlery, cut glass, skates, toys, carvers, curling stones and brooms. Collections are showing a slight improvement, but are not as good as expected. There are practically no price changes reported this week. Markets on all lines are ruling steady. Bookings for paints for Spring are satisfactory and are slightly in advance of last year.

LIGHT TRADING RECORDED IN TURPENTINE

Winnipeg.

There is no change in quotations on turpentine. Quotations of $2.45 per gallon are being maintained under a light demand.

SLIGHT DECLINE IN LINSEED OIL QUOTATIONS

Winnipeg.

Current quotations on linseed oil show a decline of two cents per gallon bringing present prices down to $1.15 per gallon on raw and $1.18 on boiled in barrel lots. Spot stocks on hand, while not heavy, are sufficient to meet the necessary requirements.

SPRING PAINT BOOKINGS ATTAIN BETTER VOLUME

Winnipeg.

Spring bookings continue to provide interest in paint and varnish circles with current prospects indicating many opportunities for increased business for paint and allied products during the Spring season. Quotations on all lines are unchanged and manufacturers state that little price developments are looked for. Reports are that Spring bookings have attained a satisfactory volume and are in advance of similar business recorded this time last year.

SEASONAL FREEDOM IN SALE OF CUTLERY LINES

Winnipeg.

A good seasonable sale is now reported for such lines as table cutlery, pocket knives, carving sets and scissors. Quotations remain unchanged on these lines.

SKATES AND HOCKEY OUTFITS NOW IN DEMAND

Winnipeg.

With the skating season at hand, skates and hockey requirements are enjoying good seasonable activity. Prices remain steady at former levels.

ACTIVE DEMAND RECORDED FOR SNOW SHOVELS

Winnipeg.

Wholesalers report an active demand for snow shovels, as the first fall of snow extending practically all over the country has provided a spurt in sales. A seasonal movement in this line is expected from now on

POPULAR CALL FOR CURLING STONES AND BROOMS

Winnipeg.

Dealers report that there is a good demand for all lines of curling stones and brooms. Quotations show practically no change.

Calgary, Alta.

Sorting Business on Holiday Lines Provides Improved Turnover in Alberta Trade

CALGARY, December 7.—Jobbers report that both travellers' orders and mail order business has been better this week than for some time, and that sorting business on seasonal lines is providing a turnover considerably in excess of previous weeks. Christmas orders are shipped and total a good volume. Individual orders cover a better range of lines than in previous years, but with quantities on the conservative side, good sorting on holiday lines is expected as soon as the regular swing of Christmas buying starts. In the city stores this trade has already commenced and gift hardware is being sold for delivery at distant points, but the main interest so far is in the displays which are a distinct improvement over other years. Heating stoves and gas appliances are moving out well, and other seasonable lines ordinarily figuring in November sales will, on account of weather conditions, appear in December sales. This,

with the usual Christmas trade, seems to promise a good month for the hardware store.

Collections show a satisfactory aggregate for November, the volume increasing to good proportions towards the end of the month. Final outstandings for the year are expected to show up a much more healthy condition than at the end of 1921, due, largely, to careful buying and careful credits that have been in evidence during the year, and to a real effort to show up a clean statement.

Coal output is at present under capacity awaiting real winter weather and wider markets, although the merchants of the coal towns are doing a good business, and jobbers are enjoying a good turnover in mine supplies.

Price changes for the week are quite numerous, but mostly of a minor character, showing both advances and declines, and affording little guidance to important movements of the near future. While flat sheets have shown up some weakness in Eastern markets, it is believed most jobbers have covered for first quarter at firm prices.

A slight advance is effective this week on track spikes, amounting to roughly under five per cent. With the close of navigation, the all-rail rate is now operative and is responsible for the higher figures. Jobbers report an active business in the mine rail sizes with the railroad sizes slow. Current quotations at Calgary, Edmonton and Lethbridge are now as follows: 5/16—7.30; ⅜—6.65; 7/16—6.45; ½—6.35; 9/16—6.00; ⅝—6.00 per 100 lbs.

Wrought well casing is also slightly advanced. Drilling has continued under most favorable conditions and in moderate volume, and immediate orders for quick shipment are up to an average season, while merchants are inclined to depend on local stocks rather than to stock in quantities. The change makes following prices current at Calgary, Edmonton and Lethbridge: Inserted joint 4¼—62.25, 5—80.50, 5⅝—99.25, 6¼—110.50; screw and socket 4¼—61.25, 5—79.50, 5⅝—98.00; 6¼—109.25 per 100 feet.

Lead traps and bends are on higher levels in sympathy with the advances on the heavier lead goods recorded two weeks ago. The advance is from four per cent. off to net list, and is effective at Calgary, Edmonton and Lethbridge.

Linseed oil is reduced three cents a gallon. Prices now current are 1.23 for raw and 1.26 for boiled at Calgary, Edmonton and Lethbridge, with ten cents added for less than barrels. The movement on this commodity shows a seasonable slackness with a disinclination to contract for future shipments.

Another advance is effective on turpentine; this time of five cents per gallon; which makes following current at Calgary, Edmonton and Lethbridge: Barrel lots, 2.60; less than barrels, 2.70 per gallon.

A reduction of about 10 per cent. is effective on sandpaper. This makes two declines in the last six weeks, which net a substantial figure. The following prices are now current at Calgary, Edmonton and Lethbridge by the ream and quire: 00—6.55—.35; 0—6.55—.35; ½—7.05—.38; 1—7.95—.42; 1½—9.05—.48; 2—10.10—.53; 2½—11.65—.61; 3—13.20—.70.

Following prices have been issued on bantam poultry fence for spring shipment: 1324—4.95; 1430—5.50; 1536—5.95; 1848—6.75; 2060—7.55; 2272—9.80 per 10-rod roll.

New prices are in effect on several lines of wagon hardware, among which the following main items are noticed: Wagon box rods, 3103A—2.45; 3103H—3.10; wagon box side braces, 3155E—1.90; 3155F—2.25; wagon box strap bolts, 3150P—1.25; 3150S—1.42; malleable and wrought carriage and wagon wrenches, 17½ cents per pound.

The following change on crucible cast steel wire rope is among the week's records: ⅜—8.25; ½—10.50; ⅝—13.30; ¾—18.00; ⅞—22.85; 1—29.40 per 100 feet.

The following new prices are in effect on standard lines of tap soles: 122—3.50; 123—3.15; 125—2.35; 30½—2.50; 37¾—2.30; top lifts, 51—1.30 per dozen.

Vancouver, B. C.

Complexity of Reports Regarding Present Condition of Coast Hardware Trade

VANCOUVER, December 7. — A complexity of reports is evident in hardware circles on the Coast as to the condition of trade. Retailers are almost unanimous in their opinion that trade declined during the latter part of November. The only reason given for this is the fact that mild weather has kept back sales of seasonable lines. This applies not only to this city but the entire Coast district and the interior. There has been much less rain this season than for several years, and it is natural to expect that lines in which weather is a factor would be slow in moving. On the other hand, one of the larger distributors here stated that sales for November showed a comfortable margin over last year. He said that, while he heard all sorts of "hard-time" reports from certain phases of the retail trade, this firm was keeping well ahead of its 1921 record.

One representative retailer said that his sales for the month were about twenty per cent. less than last year and, further, that unless some record business was done this month the year would fall quite a lot short of 1921.

High rentals are also receiving attention on the part of merchants in general. During the last couple of years, rents have been sharply advanced on all of the good locations on the principal business streets. One man in the trade, who pays around $750 a month for a floor and part of another, stated that he considered rents on some of these thoroughfares were at least a third out of line.

Deliveries from Eastern and United States points are coming through well, as far as the railways are concerned, but wholesalers point out they are unable to obtain quick service from many of the manufacturers owing to their inability to catch up to standing orders.

There have been no price changes of account this week. General lines are firm and inclined towards a slightly higher range. The demand for building materials is now quiet, construction having eased off within the last thirty days.

The retail trade is starting actively to boost holiday business, and gift suggestions of hardware lines are attractively displayed in the majority of hardware stores. Cutlery is reported moving on a moderate scale. Many inducements are being offered by merchants to stimulate trade in the way of special sales.

Hamilton, Ont.

Hardware Stores Now Take on Holiday Appearance Through Display of Seasonal Goods

HAMILTON, December 7.—The arrival of colder weather, together with an initial snowfall has stimulated the movement of many winter lines, which up to this time have been more or less backward. These include sleds, skates, snow shovels, car chains, weather strips, ash sifters and sidewalk scrapers.

Orders for paint for spring delivery are showing an improvement over last year's records. Active current sales are generally evident for silver plated ware, table and pocket cutlery, carving sets, cut glass, glass ovenware, electrical products and various other Christmas lines.

The call for such products as eavestrough, conductor pipe, corrugated sheets and similar goods used in construction and repair work is now subsiding but materials for interior finishing are still moving in satisfactory volume. Stoves and ranges, furnaces, radiators and heating equipment generally continue to attract seasonal attention.

As an indication of the current trend

in basic costs of steel production, the further decline in pig iron is of interest. This condition, however, is of minor extent. An interesting period is indicated in the steel industry at present, the balance between the ratio of production and that of construction being apparently threatened through the approach of the customary quiet season.

Many of the local stores have successfully cultivated a Christmas appearance, with window displays or winter goods and gift suggestions. Holiday displays indicate to some extent the wider range of stocks carried by the hardware merchants at the present time, as compared to a few years ago, when lines were almost confined to cutlery, silver ware and a few odd sundries. Electrical goods are now an established line, while mechanical and educational tools, children's vehicles, and a well rounded out sporting goods department, all serve to establish the growth of the hardware store as a Christmas shopping centre.

The new business in iron and steel products invariably declines toward the year end. Manufacturing consumers are desirous of taking light stocks through their inventory period. This penalty is being felt by the steel trade. The matter of deliveries is still a big feature of the steel industry. Car shortage tends to hamper shipment in certain fields. There is a growing tendency towards equalization of prices, between basic materials and the finished goods. A great deal of fourth quarter shipments are likely to be carried over into next year.

Pittsburgh, U. S. A.

Ratio of Steel Production Maintained in Excess of Consumption Requirements

PITTSBURGH, December 7.— From the safe and sane viewpoint, the outstanding feature of the steel situation is the way in which production holds up. The rate of production has been about 40,000,000 tons a year, or more, since October 1, and, in advance of the regular monthly report, the appearance is that the rate was somewhat higher in November than in October. The 40,000,000-ton rate would be more than 15 per cent. above the average rate in the six-months' period prior to October 1.

In the six months referred to, consumption did not exceed production, as the period did not start with any stocks to draw from. It would not be natural for consumption to increase at this time of the year, nor is there evidence that it has increased in many quarters, while in some directions there are no doubt decreases. Necessarily, when production increases at one time it must decrease at another, although over periods of years there are permanent increases as the world advances. Prices, likewise, must come down after advances, and vice versa. Thus the average price of pig iron was $29.25 in 1803, $53.75 in 1815, $20.87 in 1850, $36.87 in 1854, $20.25 in 1861, $48.87 in 1872, $17.62 in 1878, $28.50 in 1880, $9.50 in 1897, $55.56 in July, 1917; $27.95, April to October, 1921; $48.50 in September, 1920; $19.39 in March, 1922, and $33.50 in September, 1922. The figures through 1880 refer to foundry iron at Philadelphia, the later figures referring to Bessemer iron at valley furnaces. The market now is close to that of 1803, while more than 30 years ago it frequently sold at $20 or less and twice in the past ten years it has sold at about $50. Nevertheless, the typical market report, curiously enough, refers to price advances as being natural and normal and passes over declines as if they were unnatural and unusual.

As to fluctuations in production, there was a record rate of pig iron production in October, 1907, while two months later, in December, the rate was only 44 per cent. as great. In steel ingot production, there was a high rate of production in October, 1920, while in the following July the rate was approximately one-fourth as great, having decreased nearly 75 per cent.

The steel industry has been likened to a kaleidoscope, and judgment as to the future is very likely to be wrong if this fact is not borne in mind. If the trade is stagnant, one must not assume it will continue so and vice versa. The fact that from April 1 to October 1 steel mills were unable, from physical reasons, to make as much steel as their order books provided for does not prove that they will be under similar pressure to produce in the next six months. They may be or they may not be.

Coal and Coke

Coal markets continue soft, on the whole, as they have been for two or three weeks past. In the last few days steam coal has been a shade easier in price. Domestic lump has stiffened, with some mines obtaining advanced prices, up to $5.25 or $5.50. Gas and by-product show a considerable range according to quality and it is not easy to say whether or not they have declined. Pittsburgh district steam coal is $2.50 to $2.75, with gas at $3.00 to $3.75, chiefly at $3.25. Connellsville steam coal is $2.25 to $2.50, with good-grade by-product at $3.25 to $3.75.

Connellsville furnace coke is a trifle easier, say 25 cents, at $7.00 to $7.25. Production increases continuously while consumption grows in jerks, as one idle furnace or another comes in. As most of the furnaces are contracted to the end of the year, spot coke does not sell very readily. For regular shipment over December $8.00 or higher is quoted. On tentative inquiries for first quarter some operators have quoted $8.00 and none seem disposed to go below this figure at present, while furnaces are not at all interested, feeling that pig iron conditions are and will remain such that much cheaper coke is necessary.

Pig Iron Is Easier

Valley pig iron is down $3 on Bessemer to $28, $1.50 on basic to $25.50 and $1 on foundry to $26.50, though in foundry it must be noted that single carloads of particularly desired brands have been going chiefly at $27.50. Prices are f.o.b. valley furnaces, freight to Pittsburgh being $1.77. In the case of Bessemer and basic the quotations given are practically asking prices, there having been no late transactions to test the market properly.

Predictions As To 1923

Sheet bars show no regular market. Contracts for the current quarter were chiefly at $38 Pittsburgh or Youngstown. It is plain that prompt lots could be bought at $37, and they might possibly be secured at less. Some of the fourth-quarter tonnage will probably have to hold over, mills not being able to specify as fully as expected. A fair guess is that the ordinary price for first-quarter will be not under $33 or over $35. Billets show no activity and are usually considered quotable at the same level as sheet bars.

Finished Steel

Bars, shapes and plates continue to be regarded as being at a general market level of 2.00c, but right along there have been concessions on particularly desirable orders, and such concessions are increasing. It is commonly expected that prices will be lower, the chief question being whether there will be much readjustment in the next few weeks. As no very large tonnage has been sold at 2.00c or the higher prices ruling between one and three months ago, for early deliveries, while some deliveries are still being made on old orders at around 1.50c, a decline in the open market to 1.75c or 1.80c would not really be especially important.

Claim No Profit

Some of the independent tin plate mills have not yet recovered from their disappointment that the Steel Corporation, in making its price for first half on November 23, did not advance from $4.75. Independents claim there is no profit at this figure. The sheet mills had been expecting an advance but as the market had weakened by the time the 3.35c price was reaffirmed they were not surprised. Sheet buyers are very conservative, making commitments only for material needed very shortly, and the market is hardly more than steady, at 2.50c for blue annealed, 3.35c for common black and 4.35c for galvanized. In automobile sheets there is some uncertainty.

Warns Against Inferior Stainless Cutlery

Sheffield Steel Producer Advises Cutlery Manufacturers That Air-Craft Steel Unsuitable for Cutlery Articles—Claimed to be Now Used in Lower Priced Lines

In outlining prevailing conditions in the cutlery industry in Sheffield where it is claimed that cutlery, especially stainless, of inferior quality is being manufactured and offered for sale at prices which are lower than can be quoted on genuine goods, a large producer of steel used in the manufacture of cutlery warns against the use of such raw materials in articles on which a reputation is hoped to be maintained. Cutlery manufacturers in turn advise the trade both at home and abroad to guard against false representation sought through attractive prices.

In Sheffield since the war the manufacturer of cutlery has been resumed on an extensive basis, and plants have sprung up over night to reap the benefit from the condition of shortage in the world. Assisting these smaller producers large war stocks of steel have from time to time been disposed of by the government. Included in these offers have been quantities of high chromium air-craft steel, which it is understood have been offered to cutlery manufacturers. It is against this grade of steel that the warning is given, it being claimed that the composition is widely different from what must be used in cutlery, and it would be unwise to use this material, however cheap.

In Canada stainless cutlery is said to be receiving a more and more extensive sale. Merchants should be assured of the quality of the goods they are selling if a continued trade is to be enjoyed and it is felt that warning should not only be given to manufacturers in England but to the trade here and in other countries as well.

Superior Court Decision Involves Resale of Adulterated Goods

A JUDGMENT recently handed down in the Superior Court resulted in upholding the plaintiff making option for damages rather than seeking to quash the sale. This interesting decision is of importance where goods are purchased for re-sale purposes.

The issue before the Court was whether the defendants were liable under warranty against latent defects in the things sold, or whether plaintiff's legal recourse was by way of demanding cancellation of the sale and the return of the purchase price.

The Justice maintained that plaintiff, in the circumstances, had a right to keep the goods and sue for the damages which plaintiff had suffered through their defects. A further point raised turned on prescription. It was held that plaintiff was not limited in any instance of this kind to the short delay provided for in Article No. 1530 of the Civil Code, namely, that the action must be brought within "reasonable diligence," but that such claim was governed by the ordinary rules of prescription.

The plaintiff proved having purchased the product and having afterwards had to pay damages to the customer to whom it was re-sold, because same was useless for the purpose applied, owing to the fact that a quantity of inferior product was contained therein.

The judgment, in part, stated that: "Defendant sold to plaintiff a product which is generally understood in the trade to be a certain grade. Represented as such, it was therefore guaranteed as such. Plaintiff was entitled to act upon such guarantee, and make use of the goods accordingly. Defendant, having purchased the product in the ordinary course of their business with a view to re-selling, they are legally presumed to have known the defects and adulterations thereof, and are responsible to plaintiff to the extent of the damages this company had to pay its customer, who later found the product impracticable for the purpose to which it was applied.

"Plaintiff was not obliged to tender back the goods, and then sue for cancellation of the sale and the return of the purchase price; but was entitled to keep the thing purchased and limit the claim to the damages suffered, as provided for in Articles 1526 and 1527 of the Civil Code."

CONFERENCE FAVORS HIGHER SALES TAX

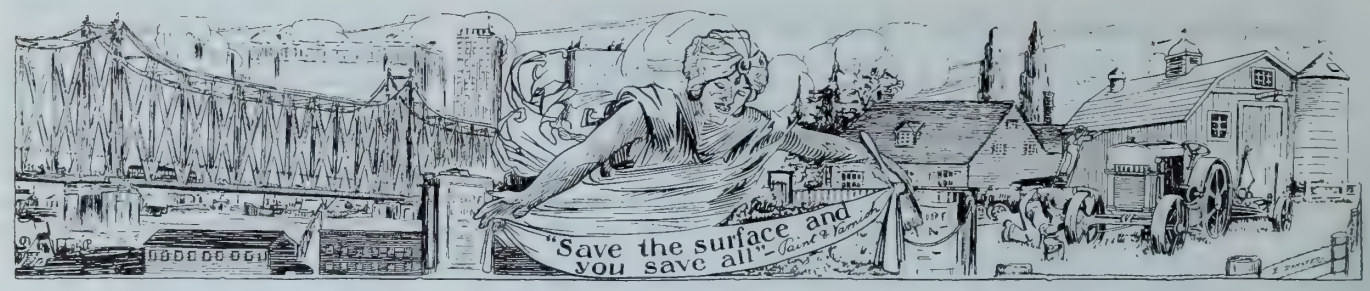
(Continued from page 29)

mean an increased revenue for the Canadian Post Office Department.

While the new arrangement is not likely to result in increased American business for Canadian houses, owing to the prevailing duties, it will be welcomed by various branches of the trade because of the convenience it will offer.

In his address to the conference, Hon. Charles Murphy, postmaster general of Canada, said in part:

"A period of unrest and business instability is gradually giving way to more settled conditions, and the improvement in general business is reflected in the business of the post office. In proof of that, I may mention that while the operations of the Canadian Post Office Department showed a deficit at the end of the last fiscal year of $1,552,000, the operations of the present fiscal year will show not only that that deficit has been wiped out, but that there will be a surplus of approximately $1,000,000.



"There is another subject not included in the programme to which brief allusion may be made. I refer to the suggestion that the domestic rate of postage on letters in Canada might be reduced from 3 cents to 2 cents. The fact that such a reduction was made in the United States a few years ago is often cited as a reason for similar action being taken in this country. As there seems to be an impression that the suggested reduction is a matter within the jurisdiction of the post office department, it is desirable to point out that such is not the case.

'The increase from 2 cents to 3 cents in the Canadian domestic rate on letters was due to the Special War Revenue Act of 1915, which provided that in addition to the postage payable in the form of a postage stamp, there should be a tax of one cent imposed on every letter and postcard mailed within Canada. The Post Office Department is both willing and eager to assist in removing the one cent war tax and restoring the two cent postage rate."

MERCHANTS DEVISE PLAN TO GAIN HOLIDAY TRADE

THE MERCHANTS of Grimsby, Ont., all combined last year to prevent most of the Christmas gift business going to the nearest large city, by a series of seasonable attractions, the chief of which was a community Christmas tree. This beautifully-decorated tree stood in the heart of the town, and all sorts of publicity was resorted to in order to bring the greatest crowds to Grimsby on the Saturday before Christmas. The preliminary event was a Christmas parade, with Santa Claus, who beamed on the crowd that lined the streets, riding in a gorgeously decorated motor car. A boy scout band preceded Santa's car, with more boy scouts marching alongside the automobile. The parade concluded before the Community Christmas Tree, before which a large and enthusiastic crowd gathered.

Bags of candy were handed out to the kiddies, with inexpensive gifts for the grown-ups. More excitement was provided by the releasing of fifteen balloons from a tall building. Attached to each balloon was an order good for a free chicken, goose or turkey. A scramble ensued for the balloons, which flew all over the town. This co-operation served to keep the people in the town on the busiest day of the year, and all the Grimsby merchants experienced heavy sales.

When is the Paint Sale Completed?

Change From "Salesmanship" to "Merchandising" Prescribes That Paint Sale is Not Completed Until Satisfactory Results Are Secured by the Customer—Keeping File of Details of Paint Jobs Done

"IS A sale of paint made when you hand the can over the counter and put the money in the cash register?"

This question was recently asked of a retail hardware "salesman" and he answered "Yes." Fortunately this type of "salesmanship" is fast giving way to merchandising, because the appreciation of selling as represented in that answer falls far short of the requirements of today. In reality the sale has only commenced when the paint can is handed over the counter, and it is not concluded until the customer takes home the can of paint, applies it properly and is perfectly satistied with the result. This is modern merchandising, the way to encourage bigger turnover and more repeat business by selling satisfaction rather than merely merchandise.

There is too much advertising to be done by the housewife to take any chances of giving her unsatisfactory service. This has many ramifications. Some hardwaremen complain that they are too busy waiting on three or four customers at a time in the paint department to stop to give all such information. To these it may be said that they need not let such service interfere with the busy times in the paint department. Some printed instructions for preparing and using various paints might be kept handy for distribution, or details may be secured of the job to be done and instructions given over the telephone after the rush is over. In some cases printed forms are handy on which the customer enters the details regarding the job to be done and states the condition of the surface to be treated. The merchant can then fill in the necessary instructions to go along with the required paint or varnish. A copy can be kept of these instructions to be checked up later in case of unsatisfactory result, or in case some further change of color or finish is required in the future. The customer will appreciate this interest and it will serve to more closely harmonize interests of customer and merchant.

Some brief but effective selling ideas as applied to Fall selling of paint and varnish are contained in the following paragraphs:

Don't Forget Small Business May Grow

SOME paint dealers make a mistake in not going after the small business, just because it is small. But it should be remembered if you can get a man to come to your store for his automobile paint and his wife to come for varnish for the baby's crib, they are very apt to come back when they want to spend $50 to paint the house. The dealer who wants his paint business to grow will see that every package leaving the store contains a piece of dealers' helps.

High Grade Paints More Economical

AN IMPORTANT argument for overcoming the tendency to use cheap grade paint has been to point out that it is more economical to buy a good quality brand and paint once a year or two than to buy low grade paint and be forced to apply it more frequently in order to keep up a good appearance. Good use can be made of color cards and other literature, this being shown prominently in the store and enclosed in parcels sent out at this time of year. Also make an endeavor to sell a brush with every can of paint.

Personal Touch in Making Paint Sales

IN THE distribution and sale of paint, it is generally admitted that the retailer is the man who can either apathetically hand over the counter a can of paint, ring up the change and go back to his cigar, or he can be exactly the opposite and hand over the counter with the customer's purchase some valuable information concerning the application of the paint, some suggestions of other lines which may be needed to make a good job, and probably the offer to personally examine the customer's property and make any recommendations necessary for renewal of paint.

New Buildings Need "Paint Protection"

A GREAT opportunity for impressing upon the builder and house-owner the value of painting and saving the surface is offered to the trade this fall in the extensive amount of new construction that has been evident during the summer months. Such new buildings need the protection from the elements which paint and varnish can give, but an equally important fact is that "Saving the Surface" now insures this property against deterioration and decay. The home-builder and house-owner needs to protect the taxable wealth which is represented by his property. This is his highly-cherished possession and he would not suffer any damage, either wilful or otherwise, to the home which he prizes so highly. Yet, to neglect the protection afforded by adequate coats of paint, is to wilfully destroy a large percentage of the value of the new possessions. Let no building, erected this year, remain unpainted in your district.

Brighten Up Home for Winter Comfort

THE "PAINT 'em up" campaign is the way another merchant expressed an opinion of the "Save the Surface" effort. In brightening up the home for the coming winter months, extensive opportunities for paint and varnish are found. The storm doors need a touch of paint before being put up for the winter, likewise the storm sash. The kitchen floor might require re-varnishing, in fact linoleum anywhere in the home can be decidedly improved in appearance and also in wearing surface by the right application of varnish. The bathroom is another frequent place of neglect.

SERVICE

CONFIDENCE

FAIR DEALING

The Paint on a Pedestal

Solving the Puzzle!

The puzzling feature about Trade Advertising is, that it leads to the conclusion that **all paint propositions are alike in merit**—that they are all "Best."

Now, we know that it is impossible for **every** proposition to be "Best," but the question still remains: "Which, of the many, **is** best?"

It cannot be determined by comparison of the Advertisements. For, while they are more or less written in good faith, they merely represent the announcement of the Manufacturer's individual belief in his product.

There is only one practical way to select from the many good propositions, **the** one outstanding one, and that is to **compare and test** the goods themselves, and to **prove** the efficacy of the Selling Service behind them.

We, therefore, invite you to judge our proposition on this basis **only.** Our representative will wait upon you for this Service.

Lowe Brothers PAINTS AND VARNISHES
MADE IN CANADA
SAVE THE SURFACE AND YOU SAVE ALL

SELLS 60 KITCHEN RANGES

(Continued from page 30)

system there are bound to be a few stoves returned. On some occasions an old stove, if in fair shape, is taken in on the new one sold. A section of the basement is set aside as a repair shop where the necessary machinery and tools are placed to repair and re-finish so that when they again appear on the floor they can demand a fair price. Often it is necessary to spend as high as ten or fifteen dollars on repairs and work, but with a new fire-box, re-polished nickel, and sometimes new oven plates the stove can be sold with almost as good a guarantee as a new one. Sale for these is found through customers wishing a cheaper stove for a summer home, or perhaps to the poorer class who cannot afford a high-priced article. Through continued dealings in this class of stoves people in the locality are also assured that they will get value, when they have the reputation of the store behind them.

Clean and Attractive Display

When complimented on the store arrangement and clean appearance of the stock, Mr. Robert stated that he was convinced this was very essential. Lady customers in particular were attracted to a clean display, and should not be confronted with a dusty display of mixed wares. "When a customer enters to buy a stove, it is a stove she wants to inspect, not an array of tinware, granite ware and other kitchen utensils piled on all sides. Neither does she want to see a dust-laden stove which gives the impression that it is a 'shop warmer.' We find it necessary to dust and wipe off the nickel parts two or three times a day to keep them spotlessly clean."

Bases Fall Heater Trade on Gas Stove Sales

There are two distinct seasons in the stove business, according to Mr. Robert. The principal gas stove season is in the spring of the year while heaters sell from October to December. Cooking ranges are naturally seasonal also in the fall and early winter, but these sell fairly well during the whole year. In purchasing for trade after the summer months the heater business is gauged by the number of gas stoves sold the preceding spring. If householders are buying a gas range for the summer in many cases they will require a heater for the kitchen in cold weather. It is stated that in past years this method of reckoning has worked out as a very true basis. Purchasing cooking stoves is quite a different matter, and care is taken at all times to not overload. It is considered a very easy matter to overstock on these, and certainly they run into a goodly sum for the merchant to bear over the quieter seasons.

The Brush Department

Don't Trust People's Memories of Brush Needs

Large Store in Good Locality Which Follows This Plan Does Less Business Than Smaller Store in Poorer Locality Which Displays Seasonable Brushes

SOME merchants who carry out the idea of displaying other hardware lines frequently overlook the opportunities for stimulating brush sales by applying the same display ideas to this stock.

This point was very vividly demonstrated to a representative of Hardware and Metal who recently called upon two retail stores. The smaller store in a less important district was doing a bigger brush business than a larger store in a better locality nearby. This difference was alone attributable to the fact that the smaller store valued the importatnce of display and suggestion of seasonable line of brushes, whereas the larger store kept the brush stock in the drawer and the sample board on which some brushes had been placed could seldom be found and was never in a very noticeable position. The larger store throws the brush stock into a drawer when it arrives and the brushes with constant turning over become scratched and shopworn.

Questioned concerning this matter, the salesman in the larger store stated that their big business was with old established customers who knew where they kept the brush stock and that the customer nearly always went to the drawer and selected what he required.

This plan is not at all in keeping with the merchandising ideas of these days which are summed up in the words "Show the goods." The foregoing method not only loses any development of new business but prevents the ordinary business with old customers which would be developed by the suggestion of the article at a seasonable time of year, when the customer may not have thought of it. If hardwaremen put all their merchandise under cover and trusted to people's memory there would not be much business done.

The experience of the smaller store in keeping the brush stock in a glass cabinet and arranging store displays and window displays of seasonable brush lines, amply reveals the advantage of applying merchandising to the brush stock.

OWEN SOUND CONCERN HAS ADDED NEW LINE OF PAINTS

Owen Sound.—The Northern Varnish Company here has recently enlarged its tank-room and installed new varnish tanks. This has permitted the company to take up the production of a number of new lines.

NEW MAYOR OF LONDON IS FORMER BRUSH MAN

George Wenige who was this week elected Mayor of London, Ont., is well known to the hardware trade of Western Ontario, having travelled for many years for the Bryan Brush Co., which for some years was a prominent brush manufacturing firm in London, but which was later taken over by The Boeckh Co., Ltd.

LEAD PRICES ON FIRM BASIS

Owing to the strength of pig lead, prices on white lead in oil continue very firm.

UNIVERSITIES TO TEACH SCIENCE OF EXPORTING

Ottawa.—Extension courses in export trade are to be given this winter in the University of Toronto and in McGill University, Montreal, according to an announcement made by Director of the Commercial Intelligence Service of the Department of Trade and Commerce. The giving of these courses is, however, contingent upon sufficient support being provided.

The purpose in organizing these courses is to enable ambitious young men to broaden their knowledge of commerce and fit themselves for the position of export managers.

The lectures will be given by members of the faculties of the respective universities, by bankers and business men, and by officers of the Commercial Intelligence Service.

It is not pretended that the science of export trade can be learned in two weeks, but in that period a great deal of useful information can be acquired, and the students stimulated to further study.

Boeckh's Brush News

Got Your Spring Order In Yet?

Spring is just around the corner, and it's not a bit too soon to be sending us your Spring order.

Orders entered now for Spring delivery are bound to be complete. Thus you avoid the danger of lost sales in the Spring while waiting for make-good shipments of the fastest sellers.

In case you have not received our revised supplementary price list No. 60, please write us at once for same. These revised prices are quite low. And as the market shows a tendency toward higher prices, you'll be fully protected in accepting these, and placing your order **now.**

Our travelers are on the road now, with a full line of samples and a number of new lines—**all** of Boeckh's standard quality—and all fast-moving goods.

If your order is not yet in—better remember the old adage about "the early bird," and get busy soon as possible.

Weekly Paint Markets

Montreal

MONTREAL, December 7.—Following the reduction in both turpentine and linseed oil markets last week, these markets are a little steadier, with linseed oil displaying a certain degree of recovery. Quotations locally are slightly higher than the figures set for December deliveries owing to the improvement in the flaxseed market during the past few days. There is quite an improvement in seed deliveries from the North-west, but locally stocks are still of only moderate proportions. It is the cash seed that is showing the present firmer tone, the future market showing little if any change. Turpentine quotations are unchanged with demand locally remaining very quiet. In the South also the buying movement is considerably quieter than a few weeks ago and the movement is practically confined to smaller lots. Dealers still express the opinion that the market will fluctuate for some weeks, but higher levels are likely for the more active period during the earlier spring months.

Window glass is still selling well, but with the approach of the Christmas season dealers anticipate a falling off in demand. Quotations are unchanged, with a fairly firm undertone in the market. Paint manufacturers report a quieter period at the present time, but state that prospects for the next season's business are good. Bookings up to the present have been light, but after the turn of the year these should prove very satisfactory.

WINDOW GLASS REMAINS IN IMPROVED POSITION

Montreal.

The month of December has opened with a good movement in window glass, the colder weather during the past week or so stimulating sales. This activity was expected, as the former open fall was not the best weather for trade in this product. With the season now advancing, however, a somewhat slower movement is generally looked for as this is usually evident as Christmas approaches. Import quotations remain at their higher levels reached a few weeks ago when the value of the franc receded to its new low point, and the market is firmer now that the franc has gained a little. With higher transportation costs, importers anticipate a firm market tone for the following weeks.

SLIGHT GAIN IN LINSEED OIL MARKETS

Montreal.

The linseed oil market this week displays a slightly firmer tone after an easing tendency during the past week or so. The flaxseed market recorded a gain during the week of from 4 to 5 points. The strength, however, is principally noted on cash flax, the future market showing little if any change. Although there is a better movement of seed from the North-west, there is little seed reported ahead locally, and stocks are low. Prevailing quotations are as follows:

LINSEED OIL—	Raw	Boiled
1 to 2 bbl. lots, per gal.	[illegible]	
5 to 9 bbl. lots, per gal.	1 00	1 02

Less quantities, [illegible] per gallon.

QUIET DEMAND CONTINUES IN TURPENTINE

Montreal.

Turpentine quotations are unchanged on the local market following the reduction last week. The recent slump in primary markets has failed to stimulate demand to any extent and buying is still practically confined to small lots, with export business also at a lower ebb than in former weeks. It is expected, however, that a heavier buying movement will be evidenced during the ensuing weeks, but locally demand will, in all probability, remain quiet until after the turn of the year. Dealers in the South are little changed in their ideas regarding the future trend of turpentine, a fluctuating market being anticipated for some time to come, but higher values are expected before the active months in early spring. As stated, the market here is quiet at the following quotations:

TURPENTINE—

1 barrel lots, $2.10; 2 to 4 barrel lots, per gal., $2.08; Broken lots, $2.20.

TRADE IN PUTTY STILL UP TO EXPECTATIONS

Montreal.

With trade in putty continuing active in the more recent weeks, the movement this fall has been quite satisfactory. There is, naturally, a falling off in this activity at the present time, but the market remains steady to firm at the following quotations:

PUTTY—	5-ton	1-ton.	Less.
Standard, per 100 lbs.	$3 25	$3 50	$3 75
Bulk, per 800 lbs.	4 00	4 25	4 50
Loose 25 lbs.			
Bulk drums, or tins.			
Tins, cased, 12½ lbs.	5 00	5 25	5 50
Do., loose 12½ lbs.	4 25	4 50	4 75
Tins, cased, 25 lbs.	4 75	5 00	5 25
Tins, cased, 12½ lbs.	5 00	5 25	5 50
Bladder barrels, 400 lbs.	5 00	5 25	5 50
Bladder cases, 100 lbs.	5 25	5 50	5 75
5 lb. tins	8 00	8 25	8 50
1 lb. tins	10 00	10 25	10 50

Pure linseed oil putty, $1.25 per 100 lbs. advance over above prices

Toronto

TORONTO, December 7.—The feature development in the current paint markets is the decline in turpentine quotations of five cents per gallon. This recession places local prices nearer to a corresponding level with figures prevailing in other centres. From the viewpoint of activity, the turpentine markets have been uninteresting, with the trend of values still in a downward direction on primary markets as a result of the dullness. Consumers are evidently holding off in order to see what will happen, and what may be induced in the way of price declines. However, the present easier movement has failed to stimulate trade to any marked extent.

The market for linseed oil is somewhat quiet on account of unsettled forward positions, but prices are unchanged at the recently revised levels with a better outlook recorded. Preparations are now under way for next season's paint business, with spring bookings described as satisfactory, and several reports indicating that these are ahead of last year's records.

LINSEED OIL IN STEADY POSITION

Toronto.

Linseed oil prices remain unchanged this week, with the tone of the market and the volume of current trading practically steady. An improvement is noted in certain phases of the flaxseed market, notably in spot figures, but no marked developments are recorded. Moderate trading is the rule, the movement, however, being described as generally up to expectations for this period of the year. Seed is reported moving more freely. Quotations in effect locally follow:—

LINSEED OIL—	Per gallon Raw	Per Gallon Boiled
1 to 2 barrels	1 10	1 13
3 to 4 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less barrels, 1c. cents per gallon.

TURPENTINE PRICES RECEDE FIVE CENTS

Toronto.

This week turpentine quotations recede five cents per gallon, this change bringing local quotations to $2.15 per gallon, which is more on a corresponding level with current figures in other centres. The buying movement is considerably quieter in the south, and trading both on domestic and primary markets is

TORONTO MARKETS

(Continued from page 56)

practically confined to minor quantities. Distributors hold the opinion that while some fluctuations may be evident, yet a recovery towards higher price levels is looked for during the early months of next year, when present stocks are nearing depletion prior to the arrival of the new crop. The recent slump in quotations has failed to stimulate demand, either locally or at southern producing points.

TURPENTINE—

1 barrel lots	2 15
2 to 4 barrel lots	2 14
5 gallon lots	2 30

Less barrels, add 15 cents per gallon.

Turpentine steel drums galvanized 5c. per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, Montreal, but freight may be equalized from any of these points.

WINDOW GLASS IN ACTIVE MOVEMENT

Toronto.

Window glass is still recording an active movement, but the usual falling off in volume is evident at this time of the year. Quotations are unchanged, with a fairly firm undertone noted throughout domestic markets. Local distributors describe business as good for the month of December, the arrival of colder weather having stimulated activity in those districts where sales were formerly somewhat backward. The natural trend is for business to be more moderate from now on. Quotations remain at the higher levels recently in effect, and coupled with the fact that the value of the Belgian franc has recovered a little from the low point formerly reached, the window glass markets in general, both for domestic and imported, are now correspondingly firmer.

PREPARING FOR NEXT YEAR'S PAINT BUSINESS

Toronto.

With the current fall seasonal activity in paint and varnishes now practically at a close, the attention of the paint industry generally is naturally drawn to the prospects for next year's business. Both manufacturers and distributors report that bookings of paint and the allied products for spring, have appeared in fairly satisfactory volume, and are already described as an indication of even better activity in these products during the coming season. As a result, dealers are preparing for a strenuous campaign, with the object of establishing new sales records in 1923.

Raw Material Costs Affect Paint Prices

Diversity of Opinion Among Canadian Paint Manufacturers as to Future Trend of Prices—Costs of Many Raw Materials on Higher Basis

AS AN indication of the future trend of paint product prices, the development in costs of certain raw materials entering into production of paint, provides relative interest. It is noted that certain basic elements, including pig lead, linseed oil, turpentine, spelter, and wood china oil, are all comparatively higher in price, than when producers were estimating costs for last season. Developments in this direction have had the effect of considerably strengthening the undertone in the paint markets, and certain domestic manufacturers point towards these increased raw material levels as constituting the basis upon which paint quotations for next year will be considered.

There appears to be a diversity of opinion, however, among Canadian manufacturers, as to whether any price revisions will result. Discussing these factors with a prominent paint producer, Hardware and Metal was informed that, "it would not be surprising if paint manufacturers find themselves obliged to put into effect corresponding advances in the prices of their particular products before long. Certainly, there is considered to be no possibility of any reductions being made for some time to come, and present indications, from the viewpoint of raw material, point towards an upward tendency."

Another distributor referred to the fact that bookings for Spring delivery this year are generally in excess of former records, and this movement is suggested as representing the attitude regarding future price levels on paints. There have also been wide general increases in the demand for paint materials, which has brought about the feeling among paint and varnish manufacturers that corresponding advances are more or less imminent. In confirmation of this market trend toward higher levels, certain producers in the United States have already announced increases of fifteen cents per gallon on house, porch, and deck, inside floor and flat wall paints, together with similar revisions on varnishes, shelf goods and specialties.

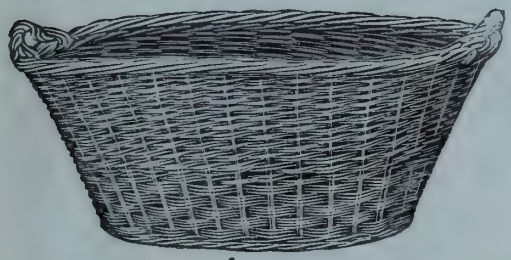
On the other hand, a prominent local paint manufacturer stated to Hardware and Metal that in spite of what the attitude of producers in the United States may be towards prices, no changes were expected as far as their line was concerned. It was stated that while linseed oil, turpentine and pig lead were relatively higher in price, and that these facts have to be considered in their production costs, yet they expected quotations on these products would again reach easier levels and therefore paint prices would not be affected.

BRIGHTER OUTLOOK FOR INDUSTRY IN QUEBEC

Montreal.—Returning from a three-weeks' visit to various centres throughout the province, R. W. Gould, secretary of the Quebec Division, Canadian Manufacturers' Association, stated that industry in general was in a quite satisfactory condition and "there were increasing signs of prosperity on all sides.

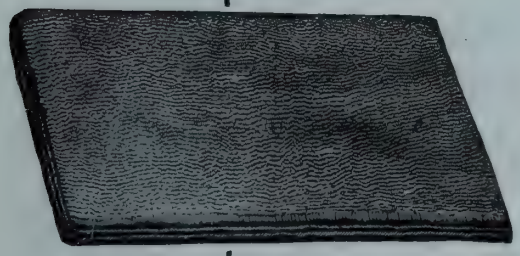
"Mills in many places are working 24 hours a day, with plenty of orders ahead, and business is generally on the upgrade. There are practically no idle industrial plants in the province to-day, while many of them are working overtime. That is in very strong contrast to the position one year ago, with plants either working short time or closed down altogether.

"Merchandise stocks throughout the country are low to-day," said Mr. Gould, "and retailers are starting to stock up well, with much more confidence than for a long time past, which means business all the way from the manufacturer to consumer. Everywhere I found a feeling of absolute confidence. It was a real pleasure to go through the province this time, because on my trips last year everybody had a long face and was drawing in on business, while to-day it is just the reverse."



MARSHALL-WELLS CO. INSTALL TESTING PROCESS

Edmonton, Alta.—"Twelve good ones in a dozen." This does not refer to eggs but to the testing process which the Marshall-Wells company has introduced into their wholesale establishment in Edmonton. It is a step to insure the quality of articles before being accepted as stock and something that carries a guarantee of quality when sales are made.



STIMULATING CANADIAN TRADE WITH COLOMBIA

E. C. Austin of Barranquilla, Colombia, who is representing a group of manufacturers belonging to the Canadian Manufacturers' Association, who are interested with trade in South America, visited St. John recently. Mr. Austin is in Canada for the purpose of placing before the manufacturers and exporters of this country the facts relating to prospects of business with the southern continent. The people of Colombia know practically nothing of the resources of Canada, stated Mr. Austen, and the Dominion has made small effort to enlighten them so far. The Colombian market is said to be good for cotton goods, iron and steel and cement. There is a big demand for wheat, flour and canned goods, paints, oil-burning apparatus, gasoline engines and also paper.

This is the Season to Sell Our

UNPEELED WILLOW ROOT BASKETS

In November and December are made the largest sales in Root Baskets. How are your stocks?

Our Unpeeled Willow Root Baskets are sturdily built; reinforced bottoms adding greatly to their strength. Your customers can be assured of their long, faithful service.

Phone, write or wire for immediate shipments from stock at your nearest warehouse. Sizes 1, 1½, 2 and 3 bushel.

Willow Clothes Baskets

Only the very best quality of willow clothes baskets are handled by us. They are made of strong, clean willow and are extra heavy. To be had in five sizes at your nearest warehouse.

Apple Pickers Baskets

These real Hickory Baskets of ours are splendidly suited in materials, size and design to their purpose. No other basket is so well liked by apple sorters. To be had in half-bushel sizes at our London warehouse only.

Cocoa Door Mats

These useful, steady selling, long-lived mats are imported from India where they are made at our own factory. They may be had in Medium, Heavy, Extra Heavy and Empire Qualities.

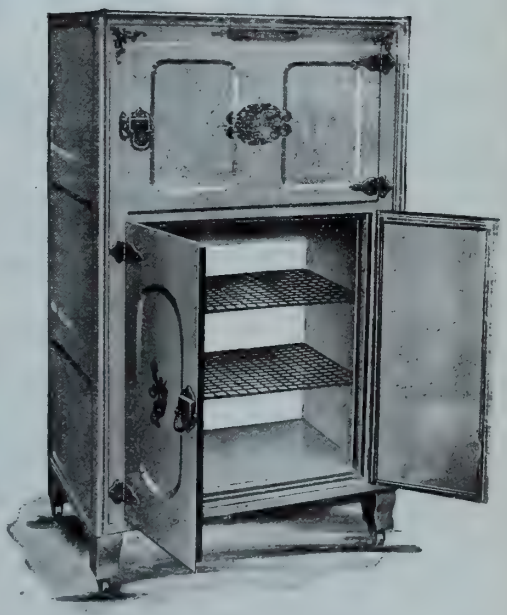
Davidson's Refrigerators

Dr. Wiley, the American Pure Food Expert, says: "Considerable sickness, both in summer and winter, is largely due to improper care of food," or, in other words, poor refrigeration. Therefore, in order to obtain absolutely sanitary refrigeration the refrigerator must be scientifically constructed, having due regard for a proper dry, ice cold air circulation, which will reach and purify every nook and corner of the food chamber.

Frost River

REFRIGERATORS

All Steel and Galvanized



Have been on the market since 1911—11 years of unqualified success.

The entire body is of Galvanized Sheet Steel with removable Tinned Wire shelves in food chamber and Galvanized Steel Ice Container. Inner walls and drip cup are white, hard-baked enamel, an occasional cleaning with hot water will preserve absolute cleanliness.

Ice economy and perfect refrigeration are obtained by a method of insulation which is our specialty. A certified test has shown that 16 lbs. of ice lasted 67 hours, obtaining a minimum food chamber temperature of 48 deg. in a room temperature of 68 deg. F.

SPECIAL FEATURE: Outside Drip pipe—solid polished brass trimmings, locks, hinges and handles—big roller bearing casters. The whole steel body is nicely decorated in grey, making a very handsome piece of furniture.

Full particulars, dimensions, prices and illustrated literature sent on application.

Bigger Profits are Possible

MAPLE LEAF "THATSIT"
With copper contact reservoir and with tile ornamental back closet.

If you handle a quick-selling article you increase your profits on the turnover.

The Maple Leaf "Thatsit" Range is a quick-selling proposition.

Here is WHY—

1—Built on the famous Quebec Heater principle, it gives great heat; economical in its use of fuel.
2—Has every possible cooking, baking, warming and water-heating improvement a housewife could wish for.
3—Has ample cooking space.
4—Can be kept clean easily because of its simple construction and fittings.
5—Every stove is guaranteed.

Mail us a request TO-DAY for our catalogue and prices. You will receive information every live dealer should have.

Manufactured Exclusively by

BEACH FOUNDRY, LIMITED

They All Know
Muresco

For many years its reputation has been established as the best wall finish. Thousands of householders testify that it neither peels, cracks nor rubs off.

It is artistic in appearance, the wide range of tints and colors testify to that; its extensive use in hospitals testifies to its sanitary properties; the ease with which it can be applied by anyone, allowing more frequent interior redecorating—are factors that have established its enviable reputation with the user.

Moore's dealers benefit by this popularity. For popularity means sales—sales mean profits.

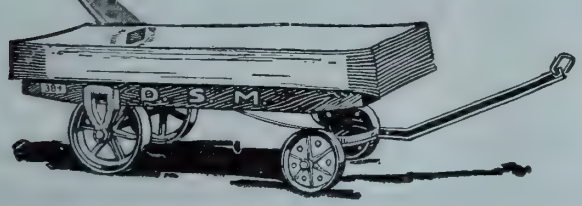
TINKER TOM'S TALKS.

No. 388

Wonderful Weather!



Some say our climate is changing and that we will continue to have milder winters.

It sounds O.K.—but for us, give us the old time winter—lots of rain and snow!

Of course more Galvanized Sheets are needed when the weather is "bad," and the worse it is the grander the record of "Premier" Galvanized Steel Sheets with their heavy pure spelter coating on a well made base.

Yours, (rather selfishly)

TINKER TOM.

DOMINION SHEET METAL CORP. LTD
MADE IN PREMIER CANADA
HAMILTON, CANADA.

"Canada" Quality in Every Brush

From the finest Varnish Brush to a common Scrub there is a full range of styles and sizes. There is also CANADA Quality and CANADA Service in each and every one, and a range of prices to suit every customer.

Most CANADA Paint and Varnish brushes are Solid, Straight Compressed and Rubber-set which guarantee the bristles from coming out, bushing or flaring.

Super-Service Ash Cans

A Money-Making Line

Super-Service Ash and Garbage Cans are in demand all the year round. The four sizes shown are a good illustration of this popular and profitable line.
Super-Service Ash and Garbage Cans are made of galvanized steel, hand rivetted and all joints are soldered. Each can is bound top and bottom by iron bands.
The Dealers' margin of profit is good.—Write for price-list today.

REED'S ROOFING CEMENTS

For full particulars and price list, write us.
Plastic, Semi-plastic and Liquid are the results of our 70 years' experience in the roofing business — put up in 5 lb., 10 lb., 100 lb. kegs, half barrels and barrels.

TRADE RUNWELL MARK

SEMI-ROTARY WING PUMPS

Are BRITISH MANUFACTURE Throughout.

The "Runwell" Semi-Rotary Wing Pumps are **British Manufacture**, and by reason of their general adaptability for a variety of circumstances, where a reliable and efficient pump is necessary, are becoming increasingly popular. The pumps are liberally designed to withstand rough usage and to give the full capacity specified. They are subjected to a rigid examination and are also tested under working conditions.

The "Runwell" Semi-Rotary is easy to manipulate and is designed to raise more water than any other type of hand-operated pump. All pumps have counter flanges fitted to branches, tapped Briggs standard thread.

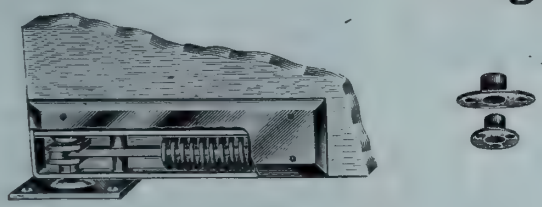
Feature the MONO-VAC

An Electric Vacuum Washer of Proven Efficiency at a Sales-making Price

A *Maxwell* Product

Made-in-Canada



Features that make the Mono-Vac exceptional:
—Single large vacuum cup, of aluminum;
—Adjustable to size of washing;
—Heavy cypress tub **holds** heat, instead of radiating it as with metal;
—Driving gears under tub promote stability; all fully protected;
—Adjustable fourth leg, for uneven floors and draining off;
—Swinging, reversible quick-release wringer.

Attractive Folders (in color), for distribution to your customers, gladly supplied on request.

MAXWELLS LIMITED
St. Mary's, Ont.

A Strong Durable Surface Floor Hinge

NO. 800 SURFACE FLOOR HINGE.

A scientifically designed hinge for doors 1⅛ to 1¾ inches thick, weighing under 55 pounds. Ball bearing at top, where weight is carried. Smooth, snappy action. Special hardening of all moving parts, reduces wear. This No. 800 hinge is easily applied. Write for complete information.

Reach

Official American League Ball

The Cork Centre Ball

REACH CATCHER'S MITTS

are without a doubt the best known brand on the market. We are the originators of the "Double Face," "Moulded Face" and hold fast features.

THE REACH DIVERTED SEAM

is used in all grades of Gloves making them the strongest on the market. Seams which join back of fingers are diverted which overcomes the necessity of overlapping seams.

Makers of the WORLD SERIES BATS

Place your order early for your Spring and Summer requirements. So great was the demand for our line last season that it was impossible to take care of all orders and present conditions point to a similar condition for the coming season.

HANDLED BY ALL THE BEST JOBBERS

105th Annual Meeting of Bank of Montreal

Sir Vincent Meredith, President, Takes View That on the Whole Trade Conditions More Satisfactory Than a Year Ago.

Sir Frederick Williams-Taylor, General Manager, Shows Necessity for Bringing Down Cost of Living in Canada—Reviews Features of Annual Statement.

At the annual meeting of the Bank of Montreal, Sir Vincent Meredith, Bart., the President, in his address, gave a comprehensive review of Canadian and foreign conditions, and said the outlook was for reasonably profitable operations in most lines of business.

Sir Frederick Williams-Taylor, the general manager, in dealing more particularly with domestic conditions, said that if Canada were to make the progress which they all hoped for it was imperative that taxation and the cost of living should be reduced to the level, at any rate, of that obtaining in the United States.

In referring to the Merchants Bank, Sir Vincent said:

"To the incidents connected with this transaction it is not necessary to refer, nor to the criticism it evoked, further than to say that, in my judgment, the prompt action of your directors, subsequently ratified by you, averted a situation that might otherwise have proved serious to the country at large, and secured the shareholders of that institution from losses greater than were suffered. It will interest you to know that the work of co-ordinating the staffs with a view to economics is proceeding with all possible celerity, and that the acquisition of the Merchants Bank is reasonably realizing the expectation of your Board. Under our own organization and with the economies that have been effected, the future gives promise of increased earnings."

FARMERS' BUSINESS

He expressed gratification at the fact that the government had embarked on an energetic immigration policy and continued:

"Statements have been made in the public press by uninformed people that debtors, especially in the West, are being subjected to undue pressure by the Banks, Loan Companies and other creditors. So far as this Bank is concerned, every consideration and great latitude have been given to debtors who, through bad harvests or other mischance, have been unable to meet their obligations. This is and at all times has been the policy of the Bank, and never has that policy been more forcibly impressed upon our managers than during recent critical years.

"Banks are business, not benevolent, institutions. They are expected to pay their shareholders a reasonable return on their investment, which includes the Rest Account—the accumulation of many years—as well as the Capital of the Bank. The rate of dividend is not disproportionate to that investment and certainly has not proved so lavish as to encourage capital to seek the banking field. As a matter of fact, the distributions to shareholders in Canadian Banks is substantially less than that made by banking institutions in Great Britain or the United States."

SIR FREDERICK WILLIAMS-TAYLOR'S ADDRESS

Sir Frederick Williams-Taylor, the General Manager, in his annual address, dealt more especially with the affairs of the Bank and conditions at home in Canada. Sir Frederick emphasized particularly the need for a readjustment of living costs in the country, when he referred to the economic position of the Dominion. In this connection, Sir Frederick said:

"Canada's economic position is not satisfactory. How could it be satisfactory, with the whole financial world out of joint? As everyone is aware, our troubles have partly been the result of this universal condition; partly the result of the war. It is well, however, to bear in mind that our problems are largely of our own creation.

"Readjustment will come in time, for this is a country of virility and untold resources; yet one thing stands out signally, in my opinion, namely, that Canada cannot go ahead again as she should while taxation and the cost of living are higher in this country than they are in the United States of America.

"Canada is one of the best countries in the world to live in, to work in, to play in—in point of stability, security and comfort it is an earthly paradise as compared with Europe—but we must not stand still, and in order to progress the cost of living and taxation must be diminished; otherwise, we will fail to attract immigration; and improved conditions are largely dependent upon increased population.

"As to ways and means, they are obvious to all who reflect, and the necessity thereof is now being brought home to the heedless by that pitiless but unerring teacher necessity."

SOUND BANKING SYSTEM

In conclusion Sir Frederick stated that the manner in which Canadian banks generally had come through the agitating times since 1914 must be taken as evidence of the fundamental soundness of the Canadian banking system. There was reason to be thankful that no great commercial breakdown had occurred.

Senator Foster, in proposing a vote of thanks to the president, general manager and directors, said he was sure that shareholders would gladly join in a vote of thanks to the president, general manager and directors of the bank. There were people, he said, who were under the impression that when they bought a share of bank stock in some mysterious way it found its way into the coffers of the bank, and proceeded without efforts on the part of anybody to earn as much, or more, than they could make the money earn themselves, but those who know anything of the business of the bank could appreciate that the statement that had been presented that day could only have been produced as a result of co-operation and splendid effort on the part of everybody in the institution.

HARDWARE & METAL'S

unique circulation as proven by the A.B.C. Audit is due to 35 years of honest effort to give the retail trade the best possible service.

GOODELL-PRATT

1500 GOOD TOOLS

GLASS CUTTERS

With wheels that cut like diamonds

In the countries of Northwestern Europe, where glass cutting is a highly developed industry, they acknowledge the outstanding superiority of Goodell-Pratt Glass Cutters.

In the largest glass factories of the United States, Goodell-Pratt Glass Cutter wheels are used, because of their lasting qualities.

The superiority of Goodell-Pratt Glass Cutter wheels is due to our methods of manufacture and individual testing.

GOODELL-PRATT COMPANY

Toolsmiths

Greenfield, Mass. U.S.A.

A popular new Starrett Tool

Every mechanic will immediately see the convenience of this new Starrett Spring Depth Gage No. 48. A spring in the barrel of the tool automatically forces the rod downward until stopped by the bottom of the hole or recess to be measured. Then a quick turn of the clamp screw locks the rod in position and the gage is set with an instantaneous accurate measurement. Capacity is three inches—base is two and one half inches long (a longer and better base than on the average gage). Both the base and the contact end of the rod are hardened and ground.

Write for Catalog No. 22 M.A. and the Supplement describing the new Starrett Tools.

A New Pipe Wrench of Universal Adaptability

FEATURES:

1. GREATER CONVENIENCE in corners and tight places.
2. QUICK and INSTANTANEOUS GRIP and RELEASE that acts independently of springs.
3. INCREASED LEVERAGE because of greater effective handle length.
4. SIMPLICITY OF CONSTRUCTION — 3 parts only, made of finest heat-treated, drop-forged steel.
5. UNUSUAL STRENGTH with LIGHTNESS OF WEIGHT.

SIZES

8 in.
10 in.
14 in.
18 in.
24 in.

HERE is a pipe wrench to meet the demand for a wrench that will work in corners and tight places with the same degree of ease as on straight open work.

The end-opening jaws, a special constructional feature of this wrench, grip parallel with the handle instead of right angles. They reach into cramped places just like a pair of pliers, grip firmly, instantly and independently of springs.

For plumbing, gas or steam fitting, millwright work, on the farm, around the house or the garage there's great need for the "LITTLE GIANT" Pipe Wrench. It will enjoy an immediate sale.

Ask your jobber to show you samples, or write direct to us for full details and prices.

GREENFIELD TAP AND DIE CORPORATION
OF CANADA, LIMITED GALT, ONTARIO

"Little Giant"

(Patented Feb. 4, 1913)

IT GETS INTO THE CORNERS

Accepted as the Standard

It pays to stock standard goods. It saves selling effort and it means quick turnover.

File users have regarded our five brands of files as the standard of file quality for fifty years.

You give your file customers what they want when you stock one of these brands:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

Standard for over Fifty Years

Made in Canada by

Nicholson File Company

DEXTER TUBULAR LOCKS, LATCHES

No mortising — No gouging — Just bore four holes

The Dexter Tubular Lock is rapidly taking its place as the most desirable and most practical inside lock set ever designed from the standpoint of user, builder and the hardware trade.

NO MORTISING—TUBULAR IN DESIGN

The outstanding feature of the Dexter Tubular Lock is tubular construction that eliminates the necessity of mortising and gouging to fit, as is the case with the ordinary lock. With the Dexter Lock and Boring Jig, the door can be prepared in a fraction of the time that it requires to apply any other make of lock. All locks have simplex knobs. Fifteen different key changes.

MENDETS
A PATENT PATCH

Pots and Pans, that once were favorites with the housewife, are accumulating in your customers' cellars. A small leak, a tiny defect, has put them out of commission.

When you explain the simplicity, economy and effectiveness of Mendets these same housewives appreciate this means of salvaging the old favorite utensils.

Your Jobber has them

Keystone Reversible Ratchet

Combination No. 200

A Proven Record for Good Sales

This handy combination is well made of first-class materials. It consists of ratchet for taper shank, twist drills, sleeve for square shank drills, and short boiler socket for square shank drills. The sockets are interchangeable. The working parts are all enclosed, preventing dust and grit from clogging the mechanism.

If your jobber cannot supply the demand, write us.

Maple Leaf Hand Saws

Made in Canada Since 1873

A No. 1914 Maple Leaf Hand Saw is an accurately built tool. Its balance is perfect. Its steel blade extends through the handle and is held there permanently. It can not loosen, pull out or break. Mechanics everywhere prefer them.

This Hand Saw is illustrated above. It is one of the most popular hand saws in the world. You can sell this saw on sight to any carpenter who knows a good tool.

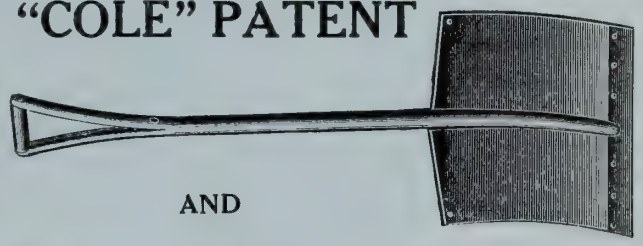
Tool Chests—

every boy who sees them wants them



The boy's tool chest illustrated above contains real tools. It is not a collection of toys—it is a set of sturdy workmanlike carpenter's tools with which a boy can build anything from a dog house to a row-boat. It makes a dandy gift, sells readily and rewards you well for handling it. Write today for prices. Tea trays, smoker's trays and stands, children's desks, kindergarten sets and blackboards are also included in our holiday lines. It will pay you to investigate.

OIL CUPS FOR EVERY PURPOSE

35 .oN

The No. 53 oil cup is designed for use in a vertical, horizontal or oblique position. Absolutely dust-proof, the cap is fitted with a spring which prevents it from jarring open. Easily operated and cleaned. Made from brass in six sizes. It is also made in a self-closing style, No. 70.

The Empress line of lubricators consists of more than twenty different styles of oilers and thirty types of standard grease cups beside many special styles. We also make spring shackle bolts and dowel pins.

Write for complete catalog and prices.

The No. 77 Oil Cup is an exceptionally strong and well-made cup of the hinge lid style. The cap is easily operated with the oil can spout, closes automatically and cannot jar open or loose; dust-proof; made from steel in three sizes. Also made with a plain nipple for driving into an oil hole, No. 78.

"And now the Ontario Government's loaning money to farmers *to install plumbing and heating*"

Can you think of better legislation than this? The government is pointing the way to better health conditions, to higher standards of living, to more enjoyment for the farmer—and to an immense increase in business for you. The first details of this scheme of the Ontario government for loaning money to farmers for the purchase of plumbing and heating equipment will be in the December 1 issue of SANITARY ENGINEER. Every plumber will read this article thoroughly so that he will know how to take advantage of the splendid opportunities it holds for him.

"Town folks have two bathrooms now where there was only one before"

And if you show them the right goods you'll find they're much more fastidious. Show the lady of the house the lovely tiled kind that looks so shiny and luxuriously clean—give her lots of time to look at them, and see what happens! Folks talk a lot about price—that's not what counts half so much these days as **value.** A prominent plumbing equipment manufacturer outlines the change coming over popular sentiment which is going to mean a much wider use of high class installations. Waterworks systems provide unique opportunities in many municipalities. Get the whole idea in the article in the December 1 issue of SANITARY ENGINEER.

Standard Furnace Installation Code Adopted

After much consideration involving many meetings of manufacturers, wholesalers, and heating engineers, a standard code governing the installation of warm air furnaces in the U. S. has just been decided upon. Full details of this interesting measure are in the Dec. 1 issue.

Rural Sewage Disposal

Another article of the series by E. Newsome deals with sewage tank system for a house of eight persons. A knotty problem in connection with an installation, as raised by a subscriber, is answered in full in this issue. Don't miss it in the Dec. 1 issue.

And Most Important of all—"Markets"!

Do you follow the market price fluctuations of your staple supplies? Do you take advantage of a favorable market to buy in? Do you know what the saving is between haphazard buying and buying at the right time?

SANITARY ENGINEER Price Quotation Section will inform you twice monthly of market conditions and will place before you quotations on all your supplies.

Read the headlines over again. Do they interest you? Do they make you want to read the articles and find out what they are pointing to? Act on that impulse! Treat yourself to an early Christmas present by subscribing to receive SANITARY ENGINEER regularly—every two weeks for all next year. It will be a pleasure—and it's a sound business investment for BETTER BUSINESS IN 1923.

Send the Coupon While You Are Thinking of It—NOW!

SANITARY ENGINEER
143 University Avenue, Toronto

Please send me Sanitary Engineer. It is understood if I subscribe now I will get the December copies as well as all of 1923 for the regular yearly subscription price.

I am enclosing) *$2.00 to pay for my subscription till December, 1923.*

113 Sumach St., Toronto, Ont.
Also 318 Homer St., Vancouver, B.C.

Here is a Carrier affording the merchants better service in return for the money it cost than does any other of its type ever produced. It is also more compact and handsome.

Note that it has no cords, pulleys, elastic springs or other frail, cumbersome and unsightly toggery, and its means of propulsion are not only the most simple, but afford more power than any other made, and therefore the Carrier is more rapid and dependable.

There are many users of these machines throughout Canada, and you are invited to inspect and make inquiry about them from any one of these.

If interested tear out this page and place with letters to be answered.

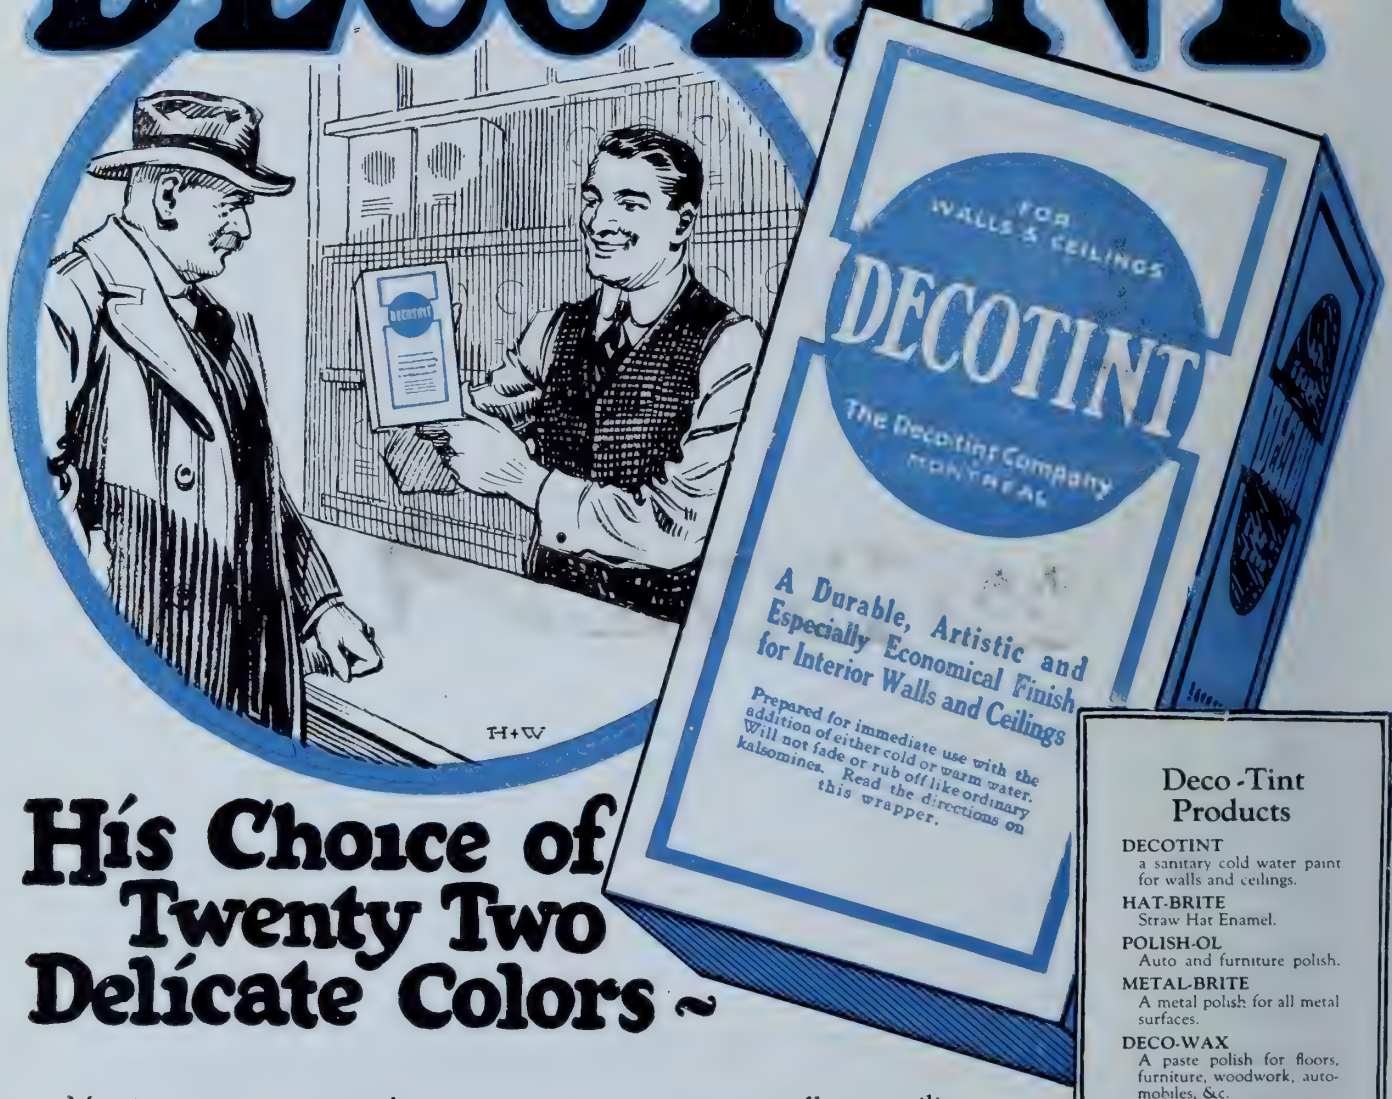
A Gift for 99 Men in 100

CHRISTMAS is the time when you can sell the best and most costly Rubberset Brushes.

It has been said that 99 Canadians in 100 shave. What is your estimate? In any event **most** of them do. A Rubberset Shaving Brush makes a splendid Christmas Gift—serviceable for years—graceful in every line—constant reminder of somebody's thoughtfulness.



Display Rubberset Brushes in their handsome silk-lined cases. Bring them to the attention of your Christmas shoppers—call their attention to the fact that Rubberset Brushes will not shed their bristles—they are guaranteed not to! Rubberset Brushes will add to your Christmas revenue.

Vol. XXXIV. No. 50 THE MACLEAN PUBLISHING COMPANY, LIMITED PUBLICATION OFFICE: TORONTO, CANADA December 16, 1922

Our Shipping Facilities Are Equal to Any Emergency

At this season of year it is difficult to keep close tab on stocks in hand. The result is that often you find yourself out of some good line. In a case like that remember our slogan "Shipments Made Promptly."

No matter what season of year, December the same as any other month, we are in a position to ship upon receipt of order. It is possible therefore for you to buy seasonable and staple lines that sell readily at this season of year from any of our six warehouses and keep sorted up without placing a large order.

If you run out of a line you can order them from SMP and get delivery in time even to make sales. Our shipping facilities are equal to any emergency, hence the slogan

SHIPMENTS MADE PROMPTLY

CHRISTMAS
---and our frienas

It is not that we think more of our friends at Christmas time than at other seasons of the year—we think more about them, that is all.

And we tell them that we so think.

This exchange of Christmas greetings is a fine old custom. It makes us more sympathetic, more tolerant, more human. It brings home to us that there are things in business and social life that cannot be measured in dollars and cents.

We wish you well in 1923

How is Trade with You?

Dutchland Aaggie Tidy Prince 2nd., by Dutchland Aaggie Tidy Prince, the Champion Holstein bull at the National Dairy Show. He is a bull of wonderful dairy type and temperament. He heads the herd of J B. Irwin, Minneapolis, Minn.

Aaggie Sylvia, the grand champion Holstein female at the National Dairy Show. She is a Canadian cow, shown by McGhee Bros., of Beechville, Ontario. It is the first time that a Holstein grand championship at this famous show has come to Canada.

Howies King of Hearts was easily the grand champion Ayrshire bull at the National Dairy Show. He had scale and beautiful lines. He was owned and shown by Seitz & Sons, Waukesha, Wis.

Ferns Wexford Noble, the grand champion Jersey bull at the National Dairy Show. He is owned by Twin Oaks Farm, Morristown, N. J. With his straight lines, his lean thighs, his sharp, wedge shoulder, his dairy temperament, he is considered the acme of perfection in the Jersey cattle world.

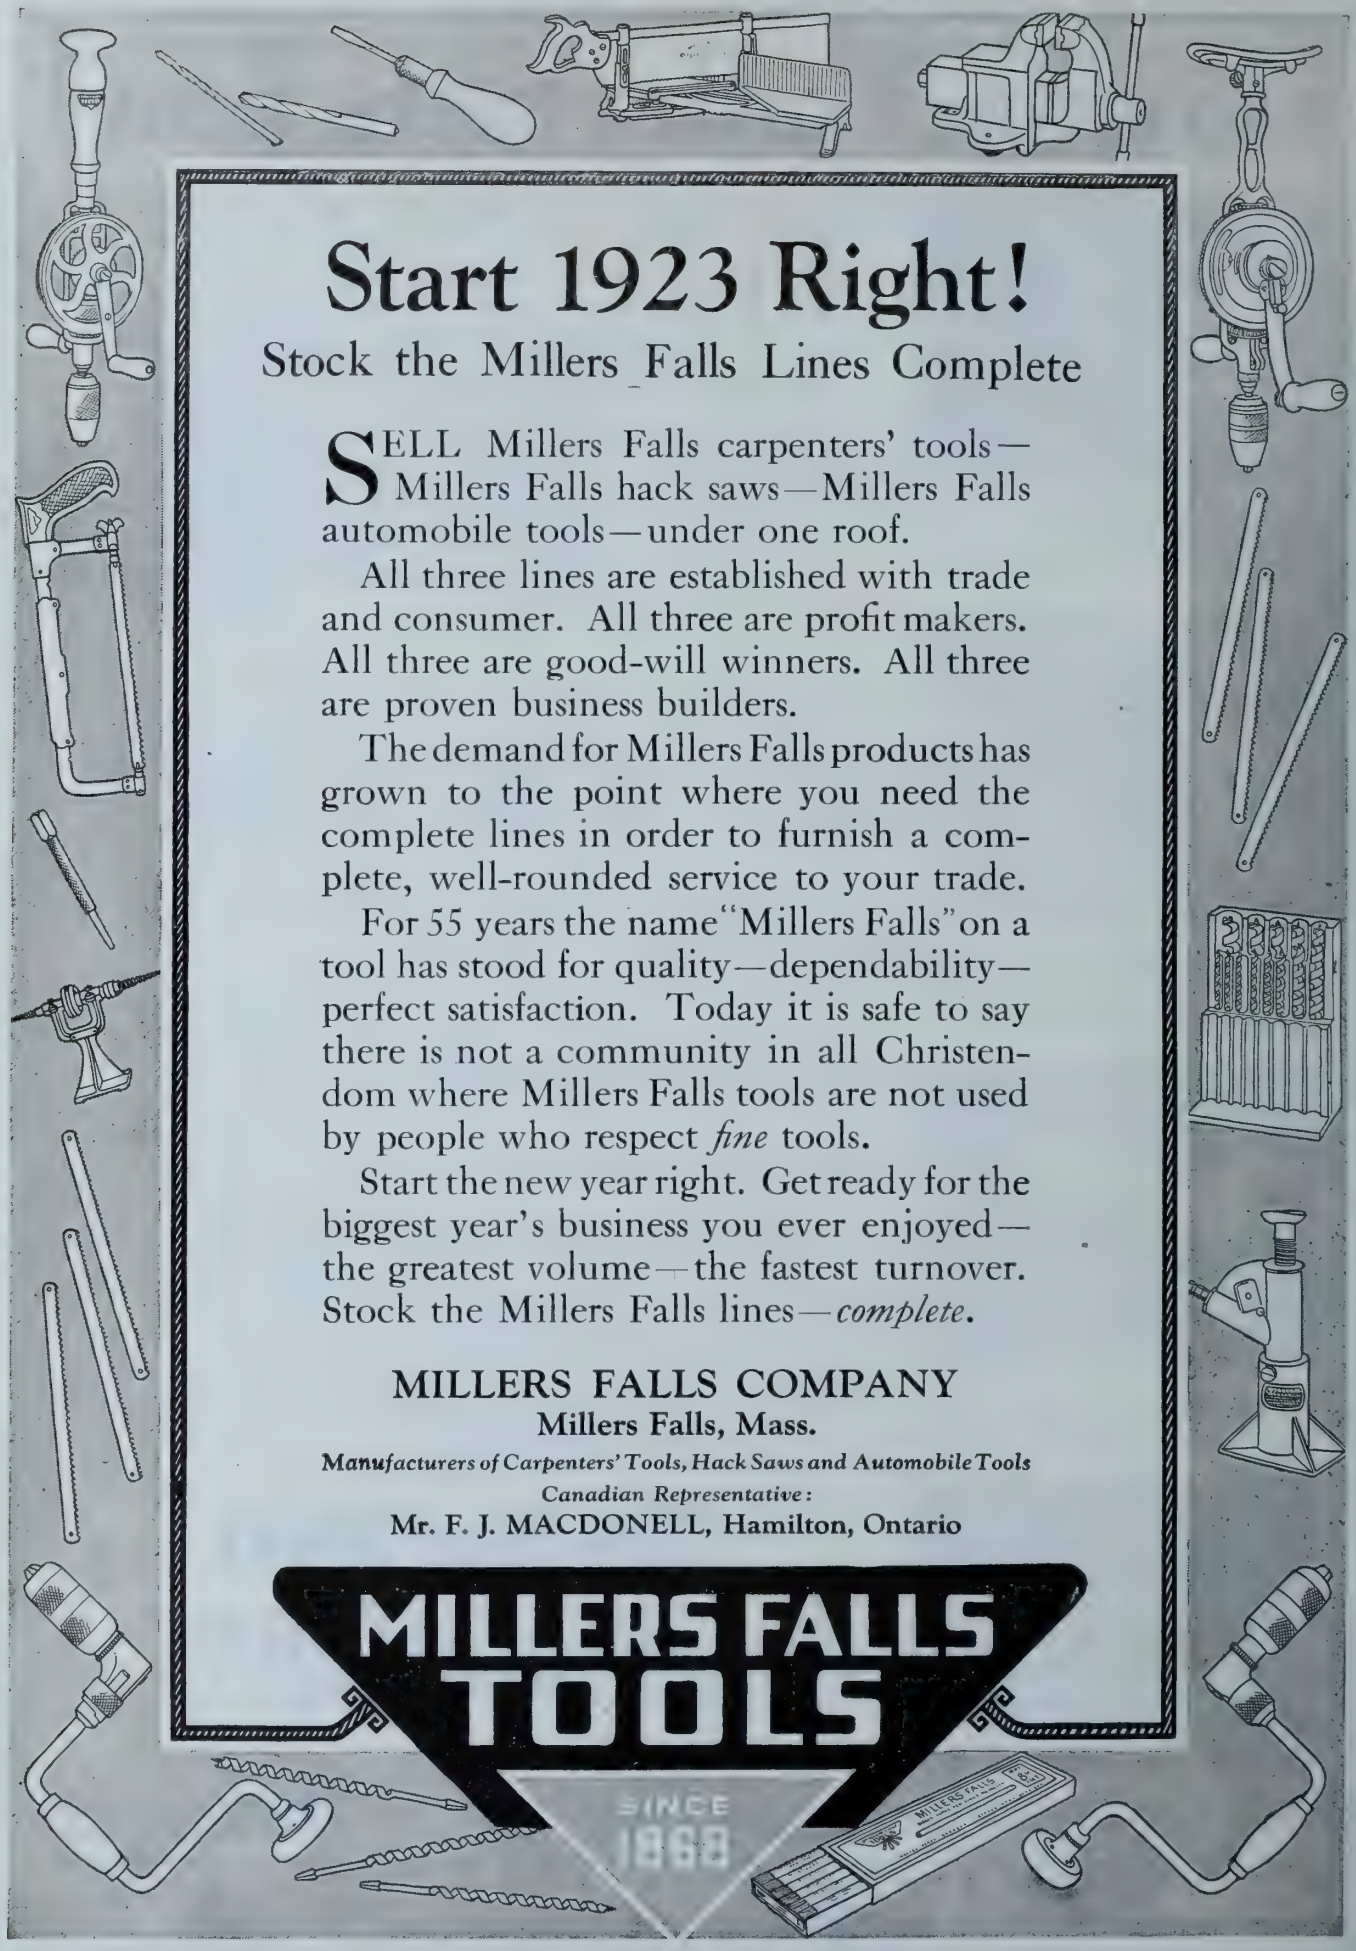
THIS question was asked of one dealer by another when they met in Winnipeg recently and the reply "The best that I know how to make it," indicated a spirit that will "never say die" and will never need to say it.

At a time when business was "just one thing after another" this man worked, planned and contrived until he had reduced his costs, increased his sales and widened his trade connection to the point where he was making a little money. Not much, it was true, but some, and in addition he was on a sound basis.

How did he do it? Just as dozens of other good dealers have done it. First, by carefully compiling a list of farmer prospects who were able to pay for their needs and those improvements that would prove immediately profitable. Second, by pushing advertised goods that these farmers knew in store displays and local advertising. Third, by going out after customers that did not come into the store and selling the larger articles, directing trade to the store for the smaller ones.

Asked if he thought that goods advertised in the Nor'-West Farmer sold more readily than others he replied: "I am afraid that I am a little prejudiced in favor of your paper. You see, our folks have lived out here since back in the eighties and we've always taken The Nor'-West Farmer and it would be natural to say 'yes.' But looking at it from my own experience I would say 'yes' again. A lot of good farmers out our way take it and there is no doubt about it, other things being equal, that it pays to give first choice to goods advertised in it."

Business with him is "the best that I can make it" and the advertisements in each issue of the Nor'-West Farmer are helping him to improve it.



The Nor'-West Farmer

The Pioneer Farm Journal of Western Canada

WINNIPEG

Dairymen and live-stock men are good farmers. They read The Nor'-West Farmer, the leading dairy and live-stock journal of the West, carrying more live-stock advertising than all its competitors combined —see the Christmas Issue. These good farmers are the dealer's best prospects.

Start 1923 Right!

Stock the Millers Falls Lines Complete

SELL Millers Falls carpenters' tools—Millers Falls hack saws—Millers Falls automobile tools—under one roof.

All three lines are established with trade and consumer. All three are profit makers. All three are good-will winners. All three are proven business builders.

The demand for Millers Falls products has grown to the point where you need the complete lines in order to furnish a complete, well-rounded service to your trade.

For 55 years the name "Millers Falls" on a tool has stood for quality—dependability—perfect satisfaction. Today it is safe to say there is not a community in all Christendom where Millers Falls tools are not used by people who respect *fine* tools.

Start the new year right. Get ready for the biggest year's business you ever enjoyed—the greatest volume—the fastest turnover. Stock the Millers Falls lines—*complete*.

The Improved ALOXITE Razor Hone

For The Man Who Hones His Own—and for the Barber Too

THERE are thousands of men who cherish a good razor hone. They regard a good hone as a treasure without price.

And there are thousands of barbers too, who are looking for a hone that cuts fast and clean, but still has the velvet-like texture of the old world natural stone.

They will find it in this Improved Aloxite Hone. ***IT GIVES A BETTER EDGE—QUICKER.***

Each hone is attractively boxed in a carton—a half dozen cartons are put up in a Sales Boosting Display Container for your window or counter.

This No. 200 Aloxite Hone is one of the best sellers in the whole Carborundum line.

When you write for prices and discounts on the hone ask us about Carborundum Razor Strops. You should be carrying them also in your cutlery department stock.

How About This?

"A Modern Sewage Disposal System for a Rural Public School"

The attendance at the Mount Dennis public school is 400 persons. A sewage disposal system—sewage pump capacity 300 gallons per minute—has recently been installed. You will want to read the article dealing with the installation—don't forget: it will be in the December 15 issue of SANITARY ENGINEER.

"Big Changes Suggested in Taxation Measures"

In conference behind closed doors, new taxation directly affecting plumbers, tinsmiths, etc., has been prepared. A special report from SANITARY ENGINEER has followed up these conferences closely and some valuable inside information on the probable trend of such changes will be given in the December 15 issue.

"Further Sidelights on Plumbing Installments"

If you haven't been following Major Anthes' witty articles on plumbing and the plumber—"the guy that makes water run upstairs"—you want to start right in with this one. The stories are funny and the illustrations are screams, but every one of them is pointed with an idea for increased business for the plumber. This particular article is on how to sell high class plumbing fixtures. Read how this plumber got a line on prospective business by following the lumber wagons. Yes! It's in the mid-December number, too.

"Problems of the Inventory this Year"

If you just naturally hate the thoughts of inventory taking, you'll find relief from your problems in this article. It's written specially for SANITARY ENGINEER by S. W. Hafner, head of an accounting firm showing the particular troubles to be met and overcome this year.

And Most Important of All—"Markets"

Do you follow the market price fluctuations of your staple supplies? Do you take advantage of a favorable market to buy in? Do you know what the saving is between haphazard buying and buying at the right time?

SANITARY ENGINEER Price Quotation Section will inform you twice monthly of market conditions and will place before you quotations on all your supplies.

Read the headlines over again. Do they interest you? Do they make you want to read the articles and find out what they are pointing to? Act on that impulse! Treat yourself to an early Christmas present by subscribing to receive SANITARY ENGINEER regularly—every two weeks for all next year. It will be a pleasure—and it's a sound business investment for BETTER BUSINESS IN 1923.

Send the Coupon While You are Thinking of It—NOW!

Receipt Tax Likely to be Deferred

Finance Department Experts Who Have Been Studying English Law Will Not be Back Until Few Days Before Beginning of New Year When New Receipt Tax is Scheduled to be Effective—Gives Trade Opportunity to Launch Big Protest

By Ottawa representative Hardware and Metal

WHEN THE federal government announced its intention several months ago of providing a new source of revenue by the introduction of a tax on receipts, there immediately went up a howl of protest from retail merchants throughout the country and the statement was made by representative retailers that no stone would be left unturned in an effort to have the measure expunged from the statutes. Since then a great many stones, big and little, have been turned and it now begins to look as though the battle had not been fought in vain.

Developments of the last few days are sufficient justification for the foregoing assertion. In the first place, Premier King and his Cabinet associates have been literally swamped by a deluge of telegrams vigorously protesting against the imposition of the tax. These have come from every part of Canada and are worded in the strongest possible terms. They have come in response to circulars which were sent out some time ago calling on various business associations and thousands of individual business men to act in concert in placing on record their opposition to the measure. It is estimated that the number of messages reaching the premier might total nearly one hundred thousand. However, more conservative estimates place the number somewhat below that mark. It was expected that fully 30,000 telegrams would be received from Toronto alone.

Sample of Protests

As an indication of the trend of the thousands of messages which poured into the Prime Minister's office, we quote the following from the William Thompson Co. Ltd., of Belleville, Ont.:

> "If the Act regarding stamps on receipts is put into force it will have a demoralizing effect on credit business."

The secretary of the Annapolis Royal, N. B., branch of the Retail Merchants' Association wired:

> "We protest strongly against the enactment of the Act providing for a tax on receipts. It brings heavy responsibilities upon individuals that carry on without, and cannot afford office help.

Likely To Be Deferred

The general impression conveyed by the messages was that the business world of Canada was decidedly opposed to the measure, and was prepared to go the limit in preventing its enforcement.

The tax is slated to become effective on January 1st. But it is now intimated that the government is considering the advisability of deferring the bringing into operation of the measure for a month, or possibly longer. Some official announcement in this regard may be expected within a few days. The reason for this possible delay is that the officials of the Department of Finance who went overseas with the Minister, Hon. W. S. Fielding, and who are understood to have made investigations of the British regulations governing the receipt tax, are not likely to arrive in Canada until a few days before the beginning of the new year. As it is expected the Canadian regulations will be somewhat along the same lines as those in operation in England, the officials at Ottawa will likely require some little time to draft them.

The effect of this delay while, of course, being farthest from the minds of the officials, will be to give the trade an opportunity to launch a still more strenuous attack against the measure while the members are assembled in Ottawa in the early stages of the forthcoming session of Parliament.

Little Prospect of Total Suspension

What effect this flood of protests will have upon the government is problematic. It was stated that these telegrams were a sort of artillery preparation for personal representations which would be made to the Prime Minister in a week or so. The merchants and manufacturers are determined to get some action.

Parliament Alone Has Authority

There is little or no prospect that the operation of this receipt tax law will be entirely suspended—at least, if parliament decides that it should be—before May 1 next. Its operation cannot be suspended by an order-in-council, as it is an act of Parliament, which can only be negatived by another act, unless the former specifically provides for governmental suspension, and in the present case it does not.

The retailers propose to lay before the Prime Minister an alternative which, it is promised, would be "just as good." In government circles it is believed that this substitute is some form of a "turnover tax"—a tax on the day's or the month's business. On the other hand, government officials point out that the receipt tax has been in operation in Great Britain for some time, and has worked smoothly and profitably.

Do You Favor Amended Sales Tax?

Two Suggestions for Revision of Sales Tax Act in Forthcoming Budget—Amendment as Suggested Would Remove Many Irregularities in Present Administration of the Act, According to Its Sponsors—Send Your Opinion to the Editor

TWO SUGGESTIONS have been offered as solutions of the present situation in regard to federal taxation. The first one is that the tax be collected at the source only, namely, from manufacturers or against imports. The second suggestion is that the present Act be continued but be altered according to the amendment which is outlined herewith. Under the prevailing practice many manufacturers in absorbing part of the tax are violating the principle of the Act. In the face of a possible higher sales tax there are some definite indications that many manufacturers will cease this practice. Should this be done it will place some wholesalers in a very embarrassing position.

There seems to be some considerable confliction regarding the first proposal and should it be found impossible for retailers, wholesalers and manufacturers to get together on that suggestion would you favor the proposed amendment? We would be glad to have your reasons either for or against this proposal.

Government Favors Wholesalers Under Present Sales Tax

Interviews with several prominent manufacturers make it clear that there is a very strong feeling that the government in all fairness to the manufacturing industry of Canada must amend the present sales tax in order to end the very unsatisfactory conditions which prevail, and due to the following facts:

If the Act is lived up to by manufacturers and wholesalers, the retailer saves 2¼% by purchasing through the wholesaler, who holds government license, instead of buying direct from the manufacturer, and as the manufacturer has to allow the wholesaler 15 to 20% to act as distributor it means that if the retailer, in order to save this 2¼%, stops buying direct from the manufacturer and buys from the wholesaler, the profit of the manufacturer being reduced to that extent is obliged to advance his selling price 15 to 20% to protect himself. The result is that the government is placed in the position of arbitrarily forcing upward the cost of living by diverting the channel of trade direct from manufacturers to retailers through the wholesalers.

However, the manufacturers, while realizing the value of the wholesaler, also realized the danger of this situation and took prompt steps to temporarily correct the flaw that exists in the sales tax as at present applied, by absorbing 2¼% of the total 4½% tax that they are supposed to collect from the retailer, thus placing themselves on an equal basis with the wholesaler. But as this was equal to a 2¼% reduction in profit, it became necessary to immediately increase selling prices. This fact accounts in part for the rising prices on many products during the past year.

Pressure From Wholesalers

But with this part of their problem temporarily taken care of they were immediately faced with strong pressure from the wholesalers holding government licenses, who, if the Sales Tax Act is applied correctly, have to pay the manufacturer 2¼% tax and which he cannot pass on to the retailer.

In other words, on products that he is allowed 10% commission to sell, he in reality only makes 7¾%, as he has to pay the manufacturer 2¼% tax which he cannot recover. The manufacturers, in many cases, have come to the rescue of the wholesaler and are making a special allowance equal to the 2¼% sales tax thus defeating the intent and purpose of the Act, but saving the business world from endless confusion and, in many cases, bankruptcy and failures.

The manufacturers hope that the Honorable Mr. Jacques Bureau and his deputy, Mr. Taylor, will favorably consider their suggestion that the present Sales Tax Act be amended as outlined.

It is claimed that this amendment will have the effect of bringing order and harmony into the business world and will enable the government Act to function properly and without the necessity of either manufacturer or wholesaler resorting to various, and in many cases, dubious means to protect themselves against the harmfulness of the Act as it at present is supposed to operate.

Business, it is said, will be conducted on a more economical and orderly basis and the government will lose nothing financially by the change.

The Editor, Hardware and Metal, 143 University Ave., Toronto, will welcome your opinion on this suggested amendment, giving your views in support of your decision.

PROPOSED AMENDMENT TO PRESENT ACT

1st—That the present Act be amended so that sales by manufacturers to wholesalers holding wholesale tax license for re-sale by the latter, also wholesalers to other wholesalers holding wholesale tax license for re-sale, be exempt from sales tax.

2nd—That wholesalers holding Government Tax License collect 4½% Government Tax from retailers or consumers.

3rd—That manufacturers continue to collect 4½% Government Tax from retailers and consumers.

4th—That the collection of 4½% Government Tax by wholesalers and manufacturers be compulsory and with no option of absorbing a part or all.

Receipt Tax Handicaps Telephone Trade

Not a Cumulative Tax—Will Only Give Receipt When Asked for it—Tend to Discourage Running of Accounts Into Sums Over $10

WHILE the Receipt Tax, coming into effect on January first next, is looked upon by most retail merchants in Montreal as an unfair Act of legislation, adding another load to the heavy burden already carried by the retailer, some are considering themselves much more fortunate than others in the retail merchandising field. Some describe it as a very annoying and vexatious law, and likely to prove very troublesome, while others are not giving it nearly as much thought as other forms of taxation previously placed upon them.

In considering themselves fortunate the latter point out that in the ordinary course of a day's business over the counter, cash sales do not exceed the ten dollar mark only in a small percentage of cases. Business in the hardware store day after day is made up of sales with much smaller totals than in other trades, such as the furniture dealer, house furnisher, jeweller, tailor and men's furnishing house, or even the grocer. This of course means insofar as cash sales are concerned, it being realized that all must suffer where credit sales are involved and monthly acounts issued.

From present appearances the Receipt Tax will be carried to a large degree by

the retailer, whether it is hardware or otherwise. The mere fact that receipts regardless of amount will only have a two-cent stamp affixed relieves the manufacturer or wholesaler considerably, whereas business in the retail store is made up of comparatively small transactions. There is also the draft system of payment and payment by cheque which are both in favor of the producer or wholesale distributor, when both are exempted under the Act. Dealing with this question a local jobbing house stated that although as one would now read the law a vouchered cheque will not require a receipt stamp, the government may have intended to convey a different meaning in one of the sub-sections of exemptions than most people understand it, and these may not be exempted.

For the reason that the tax will affect the distributor to the consumer more than others in merchandising, and that even then many transactions will not require a receipt tax, it is thought by many that revenue will be small, certainly much smaller than in other forms of taxation previously enforced.

One Thing in Its Favor

"There is one thing in its favor," said a Montreal hardware merchant to Hardware and Metal, "it is not a cumulative tax such as that which applies to cheques. I do not mean by this that it is a tax which can easily be overlooked, for apart from a money burden there will be trouble and time for the merchant to consider. These will be greater on this tax because the retail salesman in the store is affected."

Issue Receipt Only When Called Upon To Do So

"Our only decision made up to the present in the operation of the tax on receipts deals with cash sales over the counter. After the first of next year we will only give a receipt when same is demanded by the purchaser. We are now in the habit of giving a counter cheque-book slip as a receipt whether asked for or not, but in some cases the customers do not hold this. I do not know but what it would be a good idea to ask the people to pay for the tax when they demand a receipt. We could place signs throughout the store advising to this effect and I believe this could be done without any hard feelings.

"The heavier burden will rest on larger transactions, for instance on sales of building hardware and house fixtures where payment is usually made in thirty, sixty or ninety days. Very often, too, builders or house owners pay for this material in instalments, and receipts is-

(Continued on Page 72)

What Hardwaremen Think of Receipt Tax

SOME of the representative letters to Hardware and Metal from Canadian hardwaremen concerning the Receipt Tax scheduled to become effective from January 1 next, are as follows:

RETAILER THE "GOAT"

Hardware & Metal,
Toronto.

We wish to go on record as opposing the "Receipt Tax," as it will certainly be a detriment to the retail hardware trade, as well as other trades.

It will not only be inconvenient as to the extra amount of labor involved, but also the trouble that the retailer is liable to get into as regards inexperienced or careless clerks. We take it that the owner or employer will be the "goat" as is always the case where these kind of mistakes occur.

We wish to thank you for the interest you are taking in this matter, as well as the interest you always take in matters that work to the benefit or otherwise of the retail hardware trade.

The Reston Hardware & Lumber Co. Ltd.

STRIKES MOSTLY AT RETAIL TRADE

Editor, Hardware and Metal,
Toronto.

We read with much interest the article published in your issue of Hardware and Metal of 2nd instant commenting on the proposed Receipt Tax coming into force on the 1st January next, and we beg to state that this tax, to say the least, will be a very serious and far reaching piece of legislation. We may be allowed to suggest that the government may not have given the subject the study that its importance warrants. It is intended no doubt to apply to the community at large without exception of professions or callings, but all the same it strikes mostly and principally at the retail trade, for the reason that the operations of the latter are more numerous and varied than in any other line of activity. If it is allowed to stand unamended it will constitute a most serious impediment to the trade and business generally and will be an actual incitement to evade the law by suppressing all receipts which can possibly and strictly be dispensed with, thus impairing the efficiency of the business methods that obtain generally.

We venture to say that the government should take the various interests affected into its confidence before imposing on the community such vexatious and burdensome legislation.

EXTRA WORK FOR RETAILERS

Hardware & Metal,
Toronto.

We have noted what the secretary had to say in your magazine regarding this tax on receipts, and it was worded so nicely, concrete and to the point, we cannot say anything further to corroborate what appears in your magazine. The most important point in connection with it is that the time involved in placing these stamps on receipts would much more than double the expense of what the government actually gets out of the stamps used.

It seems to us that the merchants have tried to comply and co-operate with the government to raise money in every legitimate way to pay off a debt that none of us are responsible for, but it would be much better to have some other means of collecting this money from the retail merchants rather than burden them with the extra work involved with the stamp receipts.

Hewitt & Black, Limited.
Medicine Hat, Alta.

OVERHEAD EXPENSE HIGH ENOUGH NOW

Editor, Hardware and Metal:

With reference to the "Receipt Tax Act" to take effect from Jan. 1, 1923, I don't think that anything too strong can be said in condemnation of this system of taxation, for following reasons:

First, it will have a detrimental effect so far as it has to do with retail trade, because of the extra expense it will add in carrying it out, and this is not a time to be adding extra overhead, as it is quite generally recognized that average retailers' overhead is by far too high at present. No barriers should be placed to hamper trade now, as increase of same would work greater benefits to government indirectly in matter of revenue.

Second, if this act must be put into effect then stamps used should be either Inland Revenue or special stamps, as on no account should this revenue accrue to credit of Postal Department. If the postal department or any part of it is not paying its way, then let the government impose such rates as will cover its expense, and those who are reaping the benefit of such, will be at least called on to pay the cost of same. Retail merchants should not be called on to make up parcel post deficits, when they reap very little benefit from parcel post system. Stamps on checks, drafts, etc., should also be accounted for in some other manner than at present, as a good many postal stamps are used for this purpose. I recognize that sufficient revenue must be raised in some manner to balance our budget, and while I am not altogether in accord with the present "Sales Tax" feel that if increased revenue is needed, that the necessary increase can better be made through Sales Tax rather than have this Receipt Tax.

It is time that the government showed a little more consideration in obtaining the opinion of those commercially engaged, before enacting legislation of this nature. The time has come when it is necessary that they should fully co-operate with all branches of commerce before imposing further taxation.

The collection of "Sales Tax" could be simplified and expense of collection lessened, by having manufacturers pay a fixed percentage of their monthly output, and permitting them to include this in their overhead, and charging same in price of goods. Tax on imported goods to be paid at time of entry. This would do away with collection of tax from so many, and thus lessen expenses of jobbers and distributors which would tend greatly to lessen the cost to consumer and thus would increase trade quite considerably, which would work back to increasing revenue and also help toward all round prosperity.

Trusting that hardware merchants may be of some help in the solution of this problem for benefit of all, I am,

Small Display Stand Sells Fourteen Electric Irons in Fourteen Days

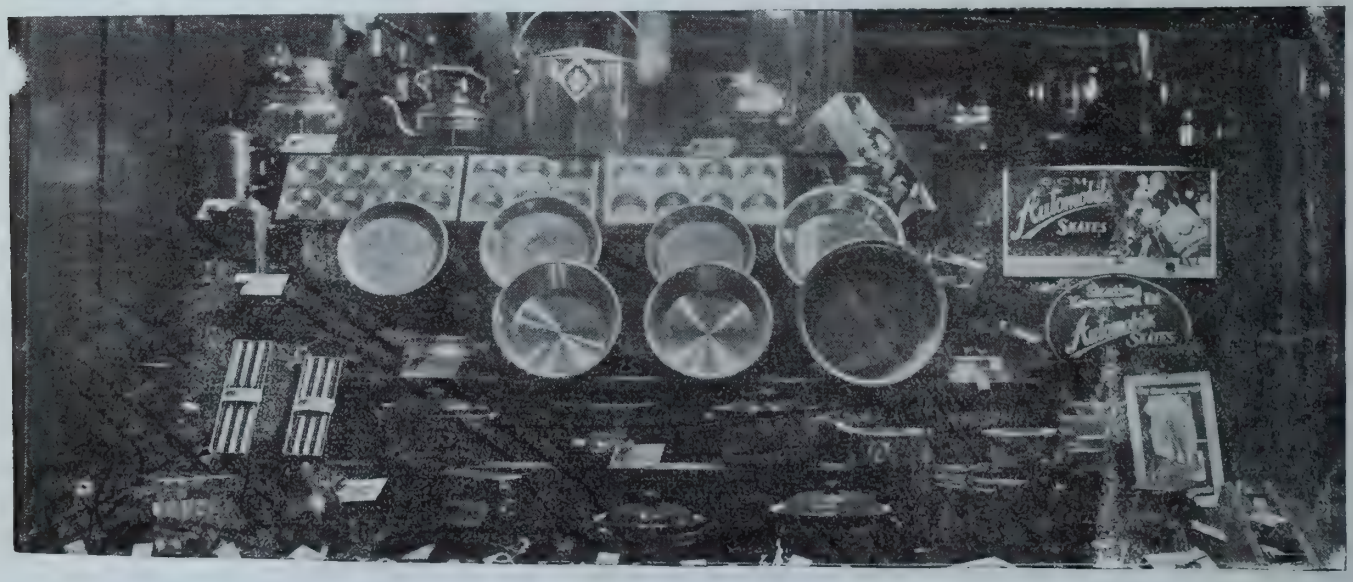
Three Inexpensive Display Stands Built for Store or Window Use Help Move Last Minute Christmas Gift Lines—Cultivating the Boy Shopper—Why Women and Young Folk Prefer Shopping at District Stores at Christmas—Pump Helps Auto Accessories

THE STORY of how three display stands, constructed at small cost, have been instrumental in selling a good volume of Christmas gift lines for F. R. Jackson, hardware merchant of Queen Street, East, Toronto, is a very interesting one. Christmas gift trade in this store commenced early: at time of writing a large stock of children's wheel goods and toys has been reduced to one-third its original size, and there has been active movement of electrical and other household requirements.

A start was made in specially displayed Christmas gift lines when about three weeks or a month ago a special stand was constructed about the height of the average table and with three or four shelves in pyramid style on the top. This was used to display a stock of electric irons, representing odds and ends of various lines which had been left over of various orders. This stand, which cost $1.50 to construct, sold fourteen electric irons and five sets of ordinary irons within a little over two weeks. So successful has this sale been that Mr. Jackson has constructed more display tables of the same type and has since cleared out many other odds and ends of stock which make good Christmas presents and which it is desirable to clear out before inventory time. The efficacy of this display stand for selling goods is shown by the fact that, while everyone said the ordinary Mrs. Potts' iron could not be stimulated by such measures, five sets of these irons were sold in the same period.

Can Be Used in Window

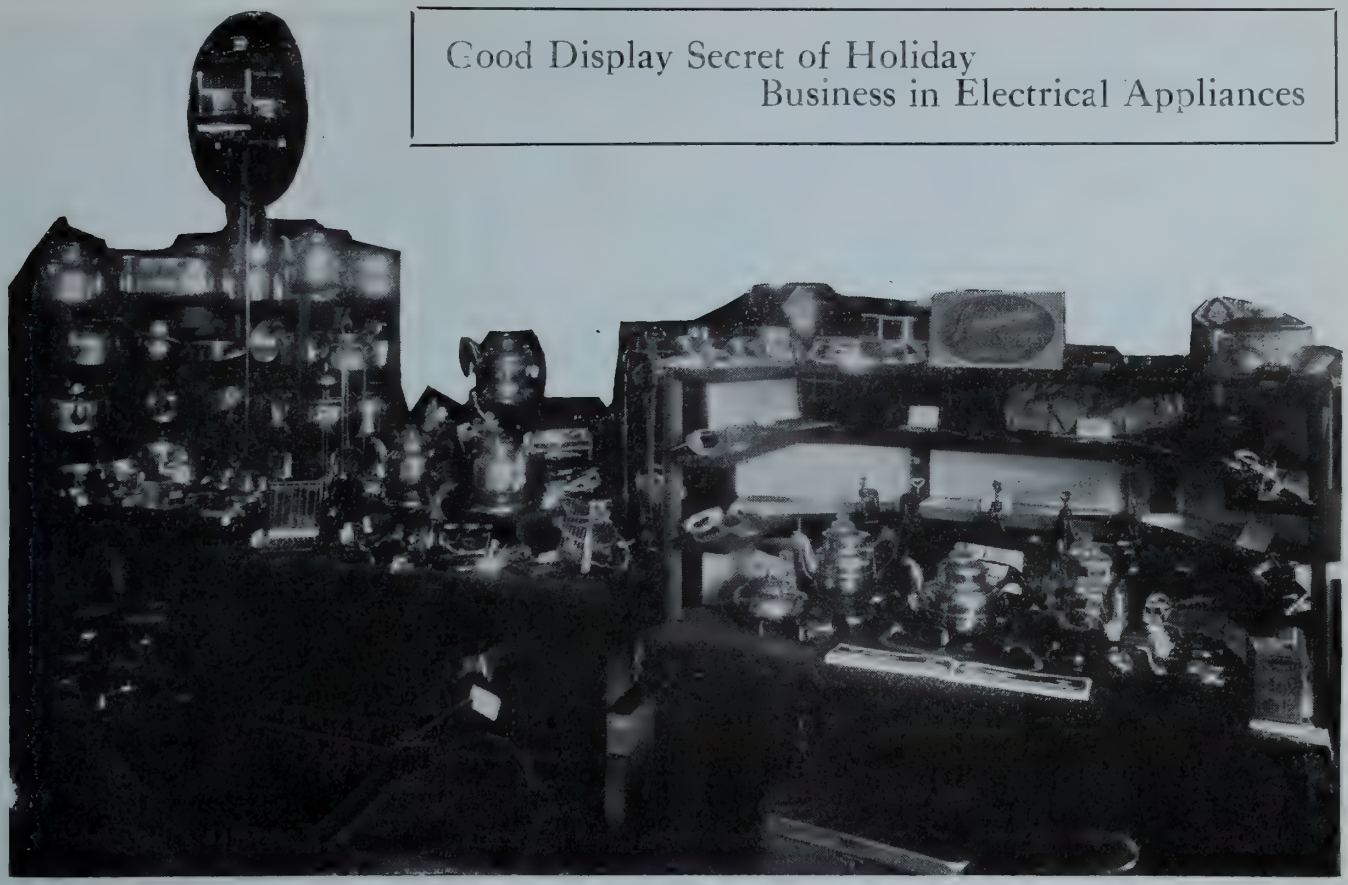
This stand, along with the other two, which are of slightly different construction, is designed so that it can be used in the windows. For the Christmas trade the stands have been placed immediately inside the front door and show the following lines: carving sets, percolators, skates, jardinieres, ankle supports, fire irons, clocks, aluminumware, food choppers, bird cages.



Price tickets appear plainly on all these lines and also on the gift lines shown in the window display as illustrated herewith. Mr. Jackson finds that many women and young folks do much of the Christmas shopping and they want to know the price before they enter a store such as this.

Asked to what he credited the ability to secure business of Christmas shoppers in competition with downtown stores, Mr. Jackson stated that many people dislike the crowds in the large stores which hinder their endeavors to find suitable gifts. If the hardwaremen can offer them good service and save them the trouble of going downtown, Mr. Jackson thinks there is little to fear from such competition. In addition, car fares are saved and this amounts to a considerable item when a large party is involved. He finds that having these considerations in mind and the fact that many women are tied with families from going very far on weekdays, offers splendid opportunities for the local merchant.

Encourage Boy Shoppers



In connection with Christmas trade, Mr. Jackson emphasizes a point which might well be kept in mind. This concerns the treatment of the boy customer. This means the boy around fourteen to fifteen years of age, the awkward time when the boy doesn't know whether he is "Charlie" or "Mr."

"If the boy at this age is treated right by the merchant he will be a good customer. He wants to be treated like a man, and it doesn't cost the merchant anything to hand out such treatment,"

Showing last minute Christmas gift suggestions in the window of F. R. Jackson Hardware, Toronto. Gifts of utility are found to be easy to sell including electrical appliances, kitchen utensils, sporting goods, etc. This window has pulled many prospective buyers into the store, where they are greeted with further displays of such lines.

Good Display Secret of Holiday Business in Electrical Appliances

The three display stands referred to in this article. The centre stand showing electric supplies is the one which sold almost one electric iron a day for two weeks. The other two stands, right inside the store door have been responsible for moving large quantities of last minute Christmas gift lines, in the F. R. Jackson Hardware, Toronto.

says Mr. Jackson, who finds that such boys are a big factor among the buyers of Christmas and other lines in his store. He finds them very susceptible to suggestions and as a result has sold them electric irons and other such household lines as gifts for relatives.

Speaking of electric appliances, Mr. Jackson stated that it is necessary for the merchant to have a fair stock providing the customer with a selection, though he thinks the lines carried should be confined to two brands. "You must have a selection to sell electric appliances; if you have only one article of that kind you will have difficulty selling it," states Mr. Jackson.

Use Lamps As Leader

Electric lamps were recently used as a leader for electrical trade. Several large cartons were placed near the door at a special price. Sixty of the advertised lamps were sold, but this is not a fair indication of the value of the idea because a large number of those who came to purchase the low-power lamps on sale were induced to buy higher-grade lamps when they had made known their wants. This also helps to increase turnover in the electrical department and lower the selling costs per unit.

While the writer was discussing business matters with Mr. Jackson, a customer entered to purchase a pair of skates for his boy for a Christmas present. He enquired for a cheap skate. After showing him the cheap variety, and when the customer had decided on what he required, Mr. Jackson asked him to witness a little demonstration, which consisted of taking a better-grade skate and striking its blade full force on an iron bar. The latter was dinted with the impact but the blade of the skate was unmarked. The customer enquired if that could not be done with the skate he had selected and was assured that it could not.

Mr. Jackson thereupon enquired if the customer's boy was rough on his skates. He was assured that he was and that he wished the skates for hockey playing. The customer here showed some indecision and Mr. Jackson timely suggested that the difference in price would soon be made up with more frequent sharpening of the cheaper skate, and would therefore be rendered useless in much less time than the other.

Needless to say the customer, after listening to such argument, purchased the higher-grade skate.

Radio in Xmas Trade

Discussing radio equipment in the Christmas trade, Mr. Jackson stated that there was some buying of tubes, head pieces, amplifiers and such expensive parts of the equipment, but that the general trade was more in the smaller parts required to construct an amateur set. This business, he stated, was getting down more to staple lines including No. 22 and No. 24 cotton-covered wire, No. 14 hard-drawn wire for aerials, binding posts and contact points, brass bolts 6/32 and 8/32 with nuts and crystal. This fall has shown an active business in these lines, with a steady run of regular customers.

Mr. Jackson makes use of a trough around the edge of the display windows for the purpose of showing small lines. This trough is divided into compartments and in them are shown coat hooks, keys, push buttons, apple corers, washers, can openers, etc. Prices are shown plainly on each.

"This display idea enables us to show lines which would not be displayed in any other way," said Mr. Jackson. Since they have been used they have been responsible for a considerable increase in business in such small articles.

Another display idea for showing cutlery, shaving outfits and other small lines is the use of a baize-covered drawer right under the glass top of each of the showcases. These articles each have a card with prices plainly marked, and for the Christmas trade small Christmas cards are attached to each. Lines displayed in these drawers are im-

(Continued on page 65)

The final week before Christmas has arrived. This week will see the opportunity for cashing in on all the effort expended to stimulate Christmas trade. Much business is ordinarily left until the last few days and therefore it is well to keep up a vigorous campaign so that interest will not wane. Such displays as this, extending the merchants' greetings and showing effectively a wide range of suitable gift suggestions will keep interest at fever heat right up until the last minute.

Keeping Up Enthusiasm for Another Week

Much of the Stimulating Measures Taken by Hardwaremen in Connection With Christmas Trade Will Bring Their Returns in the Final Week Before Christmas Eve Providing Interest is Not Allowed to Wane

EARLIER Christmas shoppers have already made some of their purchases. Hardware lines suitable for gifts commenced to move around the first of the month. Christmas Eve, however, is a week away and much shopping will yet be done. A large portion of this trade is still to be had. In most stores Christmas windows have been dressed and store displays arranged before this time, but shopping for the most part has been really in the form of "inspection tours." Now comes the opportunity for the store proprietor and the salesman.

Christmas Shopping Is Different

The former will naturally benefit from a financial standpoint, but the salesman may also reap a harvest through establishing good-will among a perplexed buying public. He will be one of the most popular fellows in the community if he can solve the problems for the customers who enter the store. Many people are perplexed, some even distracted, when they are in the midst of trying to select gifts for relatives or neighbors. They have made the rounds of the stores in the hope of finding just what will be ideal, but have not yet made a decision. If the salesman can offer a helpful suggestion, just mention certain articles carried in stock, the problem may be solved and the customer will not only appreciate the interest taken at the time, but will not forget it in future.

Shoppers are not usually perplexed or distracted. Purchases are made in the hardware store throughout the year in a more or less routine way, with some assistance from the man behind the counter. In other periods during the year they are buying for themselves and making a choice is comparatively easy, price and quality to be considered. At Christmas, however, it is different. So much so that many people look upon their buying tour with displeasure. It is pleasing to give, but this is often forgotten at the time when it is necessary to search stores for ideas with the thought uppermost in their minds that receivers will not be pleased with selections made. It is the retail salesman who has practical ideas to give out who will be looked upon with favor by the store's customers next year.

Suggestions Not Always Spoken

Not only can the salesman help by spoken suggestions at this season, but store arrangement and window displays can also speak for him. Having those goods on display tables and counters which he has found others have bought for gift purposes, will often produce the required results. Placing these articles in the windows which others have looked at admiringly may solve the problem. It may be that goods put in the windows earlier in the month will not help to make the decision because of price or some other reason, and it might be here said that it is often well to change Christmas displays much oftener than at any other time of year.

Backed up by an elaborate and suggestive array of seasonal lines, the salesman is placed at an advantage when he approaches a customer, for goods likely to sell at Christmas time are at his finger tips. If, through the conversation or sales talk, therefore, he can assist by showing keen interest and tact, he will have made a very successful sale. During the next two weeks many such opportunities will present themselves and successful sales go far toward establishing good-will at a season when such should be formed.

Have You Overlooked Any Christmas Gift Suggestions?

Much of the success of the last-minute rush shopping for Christmas gifts depends on the merchant's ability to suggest suitable lines. Here are gift suggestions found in most hardware stores. Check over the list and be sure you have not missed anything:

For Mother and Sister:—Electric appliances, including irons, toasters, grills, percolators, warming pads, washing machines, heaters, portable lamps, curling irons, vacuum cleaners. Kitchen uten-

sils, including enamelled and aluminum ware, tinware, kitchen cabinets, kitchen cutlery sets, glass baking ware, vacuum bottles, gas and electric ranges, fixtures for kitchen and bathroom, silverware, phonographs, chinaware, oil stoves, fireplace furnishings, travelling goods, clocks, manicure sets, thermometers, cut glass ware.

Gift lines more exclusively suitable for sister and not included in the foregoing are: Fountain pens, skates, sporting goods for winter or gymnasium use, cameras, alarm clocks.

For the Children:—There is a wide range of toys and games. In addition are school bags, fountain pens, radio parts or sets, cameras, flashlights, small tool sets, sporting goods.

For the Brother:—Sporting goods for football, gymnasium, camping, vacuum bottles, tools, watches, clocks, razors, shaving brushes, bicycles, radio sets, travelling goods, pocket cutlery.

For Father:—In addition to certain of the foregoing lines are: Smoking sets, driving gloves, carving sets, hair clippers, table lamps, humidors, guns, tool grinders, card tables, thermometers, leather cases, tool sets and certain sporting goods in which older men are interested, such as curling stones, golf sets.

In addition there are numerous gifts of automobile accessories and general furnishing lines for the household.

Last Minute Advertising of Christmas Gifts

Adams and Van Dusen, Picton, Ont., advertise shaving equipment, kitchen utensils, cutlery, glass bake ware, aluminum ware, flashlights. Cowan Hardware, Ltd., London, Ont., show sport goods, ranges, electric heaters, wheel goods, cutlery, utensils. They make gift suggestions for various members of the family. A good toy ad. is that by Baxter's Hardware, Windsor, Ont., known as "The House of 1,000 toys." Peterboro Hardware Co., Peterboro, list silverware, aluminum ware and chinaware in specials for Christmas gifts. Another big toy ad. is that of Moose Jaw Hardware, Ltd., Moose Jaw, while cut glass, electric lamps, carving sets, chinaware are illustrated in the ad. by Budden, Beard & Co., Calgary. The ad. by Pow & Wilcox, Tilsonburg, Ont., deals with toys.

Why Only 45 Per Cent of the Customers Entering this Store Bought Merchandise

Some of the Opportunities and Problems of the Salesman---He is Most Important Man in the Store---Why Many Customers are Victimized

Address by A. G. PINARD, Advertising Manager, Lowe Bros., Ltd., Toronto, before Toronto Hardware and Paint Club

SPEAKING on the subject of Salesmanship, A. G. Pinard, advertising manager, Lowe Bros. Ltd., Toronto, addressed the meeting of the Toronto Hardware and Paint Club this week as follows:

"I think there is no more important subject in the commercial world than Salesmanship, and in view of all that has been written and said on the subject it is a compliment to me to be called upon to address this club, especially since you yourselves are salesmen.

"A retail store, as well as a manufacturing concern, is composed of several factors, and proper co-ordination is essential to success. You may have the best salesmen available in your store, yet if the relationship of this with other factors is not properly co-ordinated then there is little hope for you. Your business will retrogade.

"I have classified these factors as a group of M's; namely, Men, Money, Merchandise, Market and Method, and we have to consider them as the factors that constitute a business.

A Business Problem

"A gentleman with considerable experience as a merchant and who is now in business for himself as one of the world's best known business counsellors, was called in by a firm to advise on business problems. The head of the firm said to him, 'We have a new product. We have had considerable success and we have come to the point where we must develop, so we must advertise.' The counsellor asked, 'What were your profits last year?' The head of the firm asked what this had to do with the question, stating that he had $30,000 to spend on advertising. The counsellor replied, 'Profits have everything to do with the question.' The head of the firm eventually saw the point and asked the counsellor to go over the books with him. The records showed nine separate departments in the business and from a general standpoint the business was found to have paid. No separate records were available for each department, however, and the counsellor advised that before he could discuss advertising he must have figures by departments. When these were secured it was found that there were four profitable departments and these were carrying five unprofitable departments. The counsellor explained the significance of the figures as indicating that if the five unprofitable departments in another year proved too heavy a drag on the other four that the advertising would be blamed for something for which it was not responsible.

Failed Over Night

"I read a report in Bradstreet's recently concerning a man who had for some years successfully conducted business and then failed over night. Investigation showed that this merchant had arrived at a certain stage of success and then added a new department, buying articles of luxury for it and engaging high-salaried men to conduct it. The business absorbed month by month the losses being sustained in that department and gradually but surely ruined the whole business.

"These are two extreme cases but perhaps in a lesser extent the same thing is to be found in many retail stores in Canada today. Many merchants do not know sufficient about their business. They don't know if the various departments are paying. I have had retailers tell me that they did not add salary to overhead expenses because their salaries were the profits. They did not add rent because they owned the building. Some of them wonder why they fail.

"Up north I called on a merchant to secure settlement of a bill of $4.75 owed our firm. The merchant said he didn't owe us that. I explained that it was most improbable that he did not owe the bill, and he replied that he knew he did not owe the bill because he did not have an invoice for it. This merchant had a wire file and when he got an invoice he would put it on this wire. When he paid a bill he would tear the invoice up, so if the invoice was not on the file he considered it was paid. I asked him to go over the file carefully and there he found it. After my visit this merchant lasted in business 8½ months. This shows that we must consider all factors in the conduct of business.

A. G. PINARD
Advertising Manager Lowe Bros., Ltd., Toronto.

Selling Problems Alike

"In principle there is not such a great difference between the manufacturers' selling problems and those of the retailer. You retailers have a far greater opportunity because customers walk into your store each day. In principle your customers are to you what you are to the manufacturer and the selling principle is the same. We know what the evolution of business has been in the last five years. Manufacturers know more about their business. They have gone far statistically regarding their own business and the retail business, and a little more co-operation with manufacturers would mean a great deal to the retail salesman. It is absolutely necessary to have that co-ordination. But first you should know the profits per department of your business, to know if one is sapping the life of the other. Guesswork is no good.

"I will relate another experience I had in a small Ontario town. I was discussing our proposition with a merchant, and on looking over his shelves I noted he had about a $1,200 stock. He told me the population of his town was 500. This stock was divided among the brands of seven or eight manufacturers. I would not discuss our proposition with such a merchant. He told me he had sold $1,000 worth of paint in the year and thought this would interest me in discussing our proposition with him but I assured him it would do an injury both to himself and us to discuss it. Further investigation showed that this merchant had bought $600 worth of paint in the year, that making $1,800 worth of paint on his shelves in the year. He claimed to have sold $1,000 worth, but he had $1,200 worth on his shelves. He immediately saw what a mistake he

was making and has been working ever since to rectify matters. He was well on the road to failure because he did not understand the principles of business.

We Must Co-operate

"Salesmanship, while it may be the most important factor in business, is not the only one and it is dependent upon the proper co-ordination of other factors. Marcus Aurelius said it was a law of life that we must co-operate and, just as we are, so our business is. We must be careful of Finance, Sales and Management.

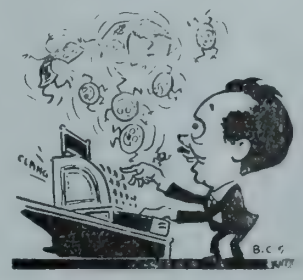
"A check was recently made in a large Chicago department store as to the number of people who entered the store as compared with the sales made. It was found that 200,000 people entered the store presumably to buy. At the end of the day they found that only 90,000 had bought, this being 45 per cent. This meant that this store was only 45 per cent. efficient. Assuming that many of those people did not go into the store with the intention to buy, the salesmen at least had a wonderful opportunity to sell them. Something led them into the store and they were in a receptive mood. There the retailer has an advantage over the manufacturer who must go out and find customers in the face of competition. Each one of those other 110,000 people who entered that store were potential buyers. So we see the possibilities for salesmanship.

Much Exploited

"Salesmanship in the past has been exploited a great deal. I recall a salesman who called on me, and on enquiry as to why he persisted in standing up while taking, he stated that this enabled him to dominate the person he was talking to. He had been reading of the so-called hypnotic influence and personal magnetism of the successful salesman. However, he got on my nerves and I told him to sit down if he wished to discuss business with me. I am not going to deprecate the question of tone, dress, etc., for a salesman, but I don't think they have a place in the law of salesmanship. There have been many rules laid down for salesmanship that have really disgusted many people. I have found that salesmanship is not a matter that can be measured in terms of clothes, dress, voice nor magnetism, but it rather hinges on more abstract and spiritual principles. There is no difference between salesmanship and the law that governs social intercourse. It is my belief that when a man starts out to exercise salesmanship on a customer he is on the wrong track. In proportion as you can realize the principles governing the sale you determine whether the prospect becomes a customer or a victim.

"The factors of salesmanship depend to some extent upon environment, nature of business and merchandise. It would be unsound for a man in a bank to be anything else but well groomed. On the other hand in a hardware store if I see a clerk dressed that way I would not be impressed and I would think he did not have much to do. When a customer enters a hardware store he doesn't expect to see clerks immaculately dressed. Therefore if a clerk approached a customer with soiled hands it is to be expected, because environment and nature of the business are important.

PROBLEMS FOR THE 1922 INVENTORY



The splendid article on Inventorying, by G. W. Hafner, which Hardware and Metal has secured for its readers and which was announced in last week's issue to appear in this issue, will appear in full in the December 23 issue. Watch for it.

Victimizes the Customer

"If you approach a customer with the attitude of the so-called 'salesman' you victimize that customer immediately. You may sell him, but don't fool yourself that you are a salesman. Your attitude toward your customer is very important. Personality is a big item, but when you ask the average man to define what it means there are few who will even attempt it. A man's gesture, voice, appearance may constitute personality, but here is where the principle in salesmanship comes in. Personality is a physical expression of something spiritual or mental. It is something invisible and cannot be described. If you feel toward a customer as you feel toward a friend then you are a successful salesman.

"Ten years ago business was simply an institution where men got together to make money, and there were such maxims as 'every man for himself' 'no sympathy in business,' etc. There has been a big change and men have come to realize that you cannot do the other fellow and keep on doing. Today it is the survival of the fittest. When a customer comes to your store he comes in to get service. He is not interested in your store problems.

"In the matter of dress it is obvious that the man who presents a clean appearance will get further, but no salesmanship course in the world will change a slovenly man. He must first change his nature.

Don't think the sale is complete when you ring up the cash register. It has just begun.

Salesman Most Important

"The salesman in the retail store is the most important man in it because he can do more in five minutes to wreck that business than he can do in months to improve it. A merchant spends much money in getting a store to sell goods, and whether he gets that money back depends upon his salesmen. Statistics show that some of the most successful men in business today have sprung from the sales field because they have had ambition. Many do not appreciate the opportunity. There is no more interesting job than selling.

"You should read your trade papers thoroughly. Hardware and Metal contains much information of vital importance to your business and if you are to be informed about merchandising ideas, new practices, markets, and keep in touch with new developments, such information should be read regularly by you. You should take advantage of every opportunity to assimilate knowledge. The salesman who leaves the retail counter to go to the executive position is the man who understands the working and principles of business. In the smallest retail store you have every opportunity to study the details underlying the largest industries, whereas if you were employed as a clerk in some of the large industrial firms you would be likely to remain in subordinate positions for years. In a retail store you are salesman, general manager and sometimes many other types of executive. You have the means of studying manufacturing activities and studying the elements of business. Don't depreciate the advantage you have as a salesman.

Must Use Tact

"Among other things necessary in the store is Tact, which unfortunately has not been very highly developed among some retail salesmen. The tendency among some salesmen is to ridicule the opinion of the customer and to argue. That doesn't sell goods. A customer may be irritable and require careful handling. One of the richest men in the world today was put in his position because of his courtesy and tact in dealing with a particularly irritable and peculiar woman customer. The woman happened to be a connection of Mr. Carnegie and her treatment from this retail salesman was such that she recommended him for a position in which he has steadily advanced to the position of power and affluence. Because of these peculiarities it is necessary for the salesman to have poise and balance. His duty is to serve all types of customers who come into the store, and there should be no discrimination.

"Remember that while it is easier to serve a pleasant customer, a sale made to an unpleasant customer gives satisfaction and if you please that customer you have really made a friend that will

be harder to take away from you because you have made him feel good.

Sell Customer Well

"Spend sufficient time with the customer to sell him well. The sale is only made when the customer has used the goods and is satisfied with them. If the customer is not satisfied you will get much damaging advertising and not only have you not made one sale but you have probably lost many others. This applies to any commodity.

"Courtesy is one of the most important terms in salesmanship. On a hot summer day a lady may come in and she is compelled to wait for a few minutes. Offer her a ten or fifteen cent fan. You will keep her in a receptive mood till she can be waited on. Or offer her a glass of water. Nine out of ten may refuse but they will appreciate the suggestion none the less. It takes only a few seconds to say it and it counts for a lot. Wrapping a number of small parcels into one large parcel is another small service which is much appreciated. It is the little things that count.

"A knowledge of the goods is very necessary in good salesmanship. If a customer comes in to examine an article and makes some very ordinary enquiries and the clerk says, 'Yes, that's it. Haven't you seen it before?' he is ridiculing the customer. The salesman should assume that the customer knows a good deal about the article and be agreeable in the discussion. Never disagree and don't express the surprised tone that the customer doesn't know all about it.

Object is Satisfied Customer

"The object of salesmanship is a satisfied customer and if you keep that in mind you have solved most of your troubles. Your customer is your meal ticket, pay, car tickets, vacation, pleasures. Look after them. You may take an interest in the customer's child. The mother's child is the next thing to her heart. The clerk can make some complimentary remark to the child and win much good will.

"One of our dealers had difficulty selling floor paint. To gauge how far he understood the principles of selling I asked him: 'When a customer asks for a can of floor paint, what does he or she want?' He replied: 'A can of floor paint.' I told him his customer was not concerned about a can of paint. On the other hand the customer finds that the floor is in a dirty, splintered condition and she has seen a color card that suggests that if the floor is painted and finished with a high gloss it will eliminate much work and provide more cheer. Objectively therefore she wants floor paint, but what she really wants is service; 60 cents worth of cheer and less drudgery. When the salesman can see the motive he will make more sales. It is an uninteresting thing to hand out a can of floor paint but it is very interesting if you imagine what that floor paint is for. If he can anticipate what it is going to do for that woman he establishes a mental connection. If the paint is going to improve the floor in the kitchen, other finishes such as stove pipe enamel, etc., are suggested.

Advertising counsellor insists on knowing the profits of each department as well as business in general.

Intention Must Be Right

"There is involved the subjects, Knowledge, Preparation and Intention. If your intention is right your action will be right and your personality will look after itself. If your intention is right you do not need to dominate the customer; you don't need to straighten your tie before you approach him. There are also involved the subjects Execution and Foresight. All your actions should be toward the end of not only making the immediate sale but paving the way for future sales. In actually filling the customer's requirements you merely meet his or her needs, but when you go to sell the customer you must meet the objection of unwillingness to spend money until the proposition has been well sold.

"In selling I would visualize the saving of money or the economy of using the article. In selling a wrench, for example, I would indicate the saving of money that might be spent elsewhere by enabling the prospective purchaser to do odd jobs around the home. If we can suggest how people can save money by purchasing an article then we have an interested prospect.

"Personality is the outward expression of our feelings, which in turn determine our intention. We should take every opportunity to improve our minds so that this will be reflected in our dealings with customers. If our mental attitude is not altruistic then we cannot impress our customers."

"Window Night" Brought Many Dollars to St. Thomas Hardwareman

A SOMEWHAT novel merchandising feature which brought good returns was the inauguration of "Window-Night" in St. Thomas, Ont., for the purpose of assisting local merchants to effectively display their Christmas lines. The feature was introduced by the Chamber of Commerce and consisted of canvassing every store in the city and having them sign their name to a petition that they would light up their window as bright as possible and have some feature display in the window on this one night. A band was hired, and at 7.30 the streets were packed with people, in fact, it was the largest crowd ever seen on the streets at one time.

Prizes were awarded for the best window in four or five different classes, which made the window-dressers very enthusiastic.

The Davey Hardware Co. state: "We went in more for window demonstrations. In one window we had a wall finish demonstration; in another we had an old woman washing clothes in the old-fashioned way, over an old wash-board, and beside her a girl, reading a book, while an electric washer did her washing for her. In another window we had an up-to-date living-room, with an electric vacuum being demonstrated in the centre of the room.

"We found this a very satisfactory way in getting the crowds to see the new lines of goods, and there was a continual line-up in front of the windows from 7.30 until after 10 p.m. The return from these demonstrations was very satisfactory."

"I Would Be the First to Shake Hands With Man Starting Up Hardware Business Next Door to Me"

Says Toronto Hardwareman At Meeting of Toronto Hardware & Paint Club

OPENING the monthly meeting of the Toronto Hardware and Paint Club, which took the form of a dinner at the Hotel Florence on Tuesday evening this week, President H. N. Joy stated that he had received a letter from a prominent paint manufacturer who had been reading closely the reports of the various meetings of the club, in which the manufacturer complimented the officers on the progress made.

In view of the fact that Christmas is near at hand, the attendance was not as large as at some former meetings, but some new members were out and added much to the discussion. Mr. Joy expressed the opinion that many of those unable to attend were following the reports closely, and that the reports of the various meetings as appearing in Hardware and Metal were both accurate and comprehensive. On asking how many of those present subscribed to Hardware and Metal, there was a 100% showing of hands. Mr. Joy advised that members read their trade paper closely.

Too Many Stores

The discussion of the subject of too many hardware stores which took place at the last meeting was briefly reviewed, Mr. Joy pointing out that, while some travelling salesmen and others thought the club did not mean business in taking up this matter, it was the intention to continue the movement toward curtailment of new stores. The following committee was appointed to represent the various districts in reporting to officers of the club instances where new hardware stocks are being placed where there is not considered to be room for new stores: Danforth, J. Boyd; Queen East, E. G. Bailey; Centre Yonge, R. P. Freek; North Yonge, H. Dow; Centre, M. Stirrett; West, D. Guffin; St. Clair, H. Stainton; Weston and Mt. Dennis, A. M. Oldam; Mimico, New Toronto and Highway, C. McFarlane; Bloor St., A. Lavin, Alexander Hardware.

Mr. Joy asked that any reports be made of the conditions outlined. Mr. Lavin stated that a group of builders had formed a company and entered the hardware business originally as wholesalers but were gradually entering into the retail field in premises near him on Bloor St. He is making further enquiries as to the wholesaler that supplied this firm.

Opposes the Move

Enquiry was made by F. W. P. Sinclair, manager The Toronto Hardware Co., as to what the idea was in trying to stop people from entering business. He doubted if the trade was much assisted by such action. Mr. Joy replied that the idea was more to give intelligent advice to those contemplating entering the trade than to merely utilize restrictive measures. Mr. Sinclair stated that he welcomed opposition because, in his opinion, it helped trade rather than hindered it. If wholesalers were taking long risks in selling to certain individuals he thought they would soon find out for themselves whether the risk justified their action. It was his opinion that this practice is gradually stopping and that the cure suggested by the club would be worse than the disease.

"When we have some opposition we step out more and buck up. Where the opposition sells at cost we will find that eventually we will be going along getting a fair margin when the other fellow is out of business and we will have held our customers by the service we give. I would be glad to shake hands with the men who would start up business next door to me," said Mr. Sinclair.

Mr. Lavin thought that if Mr. Sinclair had five hardware stores within a distance of 300 yards he would change his opinion, but Mr. Sinclair replied that he had been in an even worse nest of stores than that.

Question of Giving Advice

"I don't think the Hardware and Paint Club is going to make itself strong by raising objection to more people going into business," continued Mr. Sinclair. "Check up the firms which have gone into business and I think you will find that the most of these have been mushroom businesses. They may get some business by cutting price for a while, but your customers will come back and tell you that the service they get from you is worth the price. We had a case of that just recently in our store. Where it is a question of wrong advice given, I think you will find that much of this advice has been given by irresponsible salesmen who are no longer holding their positions. It is then a question of 'a fool and his money are easily parted,' and people who take such irresponsible advice on going into business would lose their money elsewhere if they did not lose it in this way."

In reply, President Joy emphasized that the action of the club was merely in an advisory capacity. "Some men in business today would appreciate such advice," said Mr. Joy. "If the man who fails in business could bury his stock with him it would not be too bad, but in one case the stock has changed hands six times and each time the owner has lost part of his capital. At last this store is closing out."

A. G. Pinard, advertising manager Lowe Bros. Ltd., Toronto, gave an interesting address on the subject of "Salesmanship," as reproduced elsewhere in this issue. Following this, F. R. Jackson moved a vote of thanks.

What Business Is

W. F. Macpherson, secretary Ontario Retail Hardware Association, was in attendance and spoke briefly on the conclusion of Mr. Pinard's address. Mr. Macpherson stated that many practical ideas had been given the audience, and emphasized the fact that business is the art of supplying the needs of the community. It was his opinion that a retailer must be natural in his actions and in following out the suggestions he should be urged on by spontaneous inspiration rather than forcing himself. Mr. Macpherson referred to the forthcoming convention of the association in February and pointed out that seventy-five per cent. of the 164 booths in the Armories had been sold to exhibitors.

The next meeting of the club will be held on January 9 in the Hotel Florence and will take the form of a dinner commencing at 7 p. m. The election of officers for next year will take place at this meeting and Wm. Crawford, Sheet Metal Products Co., will speak on the subject, "Hardware Stores As I See Them."

"HARDWARE STORES AS I SEE THEM"

At the next meeting of the Toronto Hardware and Paint Club on January 9, the election of officers for 1923 will take place. An additional feature of much interest will be the address by Wm. Crawford, Sheet Metal Products Co., on the subject above mentioned.

Seybold Walker Ltd., Montreal, have been appointed representatives for Ottawa, Quebec and the Maritimes for Smith & Hemenway, tool manufacturers, Irvington, N. J.

Season's Greetings to the Trade

HARDWARE AND METAL takes this opportunity of wishing all in the trade a Merry Christmas and a Happy and Profitable New Year. The year just drawing to a close has seen many interesting developments in this branch of trade. The pendulum has commenced to swing backward from the extreme which it reached about a year ago when prices and volume of business were at the lowest ebb. Progress has been made and the price trend has turned in an upward direction. There are signs of continued improvement, but there are dangers even in improvement, and care should be exercised to preclude any developments which might form the basis of another period of undue inflation. Next year should be a good one for business men who exercise care in the conduct of their business and take every advantage to learn more about their field. It is here that Hardware and Metal will render its service and close co-operation of readers will result beneficially to all in the New Year.

Business is Business

THE CLOSING out of several of the stores of the United Farmers' Co-operative Company Ltd., of Ontario, was recently referred to in Hardware and Metal. At the annual meeting of the organization in Toronto this week discussion centered around the question of operating retail stores. Losses of more than $55,000 were encountered during the year and the branch stores were said to be the chief cause of the loss. General Manager H. B. Clemes frankly declared in favor of closing out the branch store business entirely. He did not think it was the function of the co-operative company to try and sell a pint of oil, a pound of nails or such merchandise.

The president, too, in discussing the branch store problem also referred to the fact that U.F.O. members had not been loyal to their own stores but had succumbed as he termed it to the lower prices of competitors. It is questionable if this was as much due to lower prices as to the connection which independent merchants had worked up in the community spread over a number of years. The co-operative stores were able to buy most of their requirements at a margin over manufactured cost only sufficient to meet cost of handling through the warehouse. The president instanced one case where a club after ordering a carload of supplies had refused it because the market had declined and they found they could buy cheaper elsewhere.

The experience of the U. F. O. and of the Grain Growers' Grain Company and other co-operative organizations which recently have run into business troubles proves clearly that such organizations must be prepared to meet the same conditions as other business enterprises. Co-operative plans will not solve all the troubles of business and there will not always be dividends just because the profits of the business are to be shared. No objection is being taken to sound co-operative projects, but when such enterprises leave the field of marketing where they have brought material benefits, for the field of merchandising where long experience and careful judgment are necessary to success, they inevitably fail. They adjust themselves, however, through compelling the co-operators to suffer the loss, but where they are backed by governmental capital, such operations if not successful are harmful to the community.

Spreading the Seasonal Demand

SPREADING the seasonal demand for various lines of hardware is one way in which some resourceful merchants are endeavoring to increase turnover. At the convention of the National Hardware Association of the United States, as dealt with in a former issue, discussion centered around ways to spread the demand for motor accessories and certain other hardware. An analysis of these suggestions will show where a start may be made.

A retail hardwareman who has been analyzing the advertising of his trade has commented on the fact that many hardwaremen run large advertisements on Friday thus adding heavier burdens on Saturday which is already automatically loaded with business. It is suggested that merchants run their ads in Saturday afternoon papers and Sunday editions with big offers for Monday and subsidiary offers for Tuesday and Wednesday, thus "spreading" business over the week. The department stores have had conspicuous success following such a plan, but they are not alone in pursuing the policy of luring trade during the "off" times. Many manufacturers and retailers have succeeded in turning a seasonal into an all year trade. Paint is an example of successful achievement along this line. In many cases this has resulted in economies of manufacture which have resulted in reduced prices.

It is an exceptional industry nowadays that is bound to vacillate violently from the heights to the depths because of seasonal demand. There is generally some adaptation or idea which, backed with the right kind of advertising, can lower the mountains and raise the valleys created by seasonal demand, and thus put merchandising on a more stable and efficient basis.

Editorials in Brief

JUDGE GARY, testifying before the Federal Trade Commission in the Pittsburgh plus case, said that he did not believe a large corporation should take advantage of consumers even though sometimes able to do so. "There is a little more conscience in business than there used to be," he declared.

IN CONNECTION with the recent regulations barring automatic revolvers from entering Canada it is interesting to note the most recent figures showing the extent of our trade in revolvers. The figures do not single out automatics, but they form probably about fifty per cent. of the importations up until now. In the six month period ending September of this year Canada imported guns, rifles, muskets, pistols and revolvers to the value of $24,195 from the United Kingdom and $221,681 from the United States with smaller amounts from Belgium and other countries, making a grand total value of imports for the six months of $256,659. This is only about fifty per cent. of the value of imports of such weapons for the same period in 1920.

Christmas Greetings

GEORGE E. MAY

Toronto, President Ontario Retail Hardware Association

APPROPRIATE greetings at this Holiday period are conveyed in the following messages directed to the retail and wholesale phases of the Canadian hardware industry by the respective presidents in these two leading organizations.

THOMAS M. BIRKETT

Ottawa, President Canadian Wholesale Hardware Association

To The Hardware Trade of Canada

Gentlemen:—

On the threshold of another year I wish to convey to the hardware merchants of Canada, on behalf of the Ontario Retail Hardware Association, all good wishes for a Merry Christmas and a Happy and Prosperous New Year.

The year which is just coming to a close has been marked with much progress in various lines of business. Our experience has been broadened and another important period in the process of evolution has passed. Unique problems are facing the hardware trade of this country. Some of these problems may have temporarily passed their most acute stage, but others will probably beset us more in the future. There is no cause for fear or thought of danger providing we all apply our energies in the right direction, making use of our broadening experience and improving our intellects.

The past year has witnessed very satisfactory growth in the membership and scope of activities of the Ontario Retail Hardware Ass'n. In view of this the forthcoming convention of the association to be held in Toronto in February is expected to establish new records. A hearty invitation is extended to you to be present. The co-operation of all engaged in this trade, helping give a broader interpretation of the highest individual ideals will ensure for us a prosperous 1923 and a sure foundation for subsequent years.

(Signed) GEORGE E. MAY,
Toronto.

President, Ontario Retail Hardware Association.

To The Retail Hardware Merchants

Gentlemen and Friends,—

We are coming to the end of another year, and I think it is true when I state that we (Hardware Men) are all feeling much better in mind and pocket than we were even a short year ago.

For the past few years we have been attending to Christmas gifts and deeds in much the same manner as a machine, but this year I think we all feel more of the old spirit which I wish to convey to you all, when on behalf of the members of the Canadian Wholesale Hardware Association, I wish you, one and all, every pleasure and happiness in this festive season and full measure of business for 1923.

Yours very truly,
CANADIAN WHOLESALE HARDWARE ASSOCIATION
(Signed) T. M. BIRKETT, President.

Make Your Plans Now

—ON THE WAY

So you will be able to pack your bag and get on the way to the big convention of the Ontario Retail Hardware Association in Toronto February 13, 14, 15 and 16, 1923. Watch for preliminary details in Hardware and Metal.

Events in the Trade

PERSONAL

Stanley Emmerson, of Emmerson & Fisher, Ltd., hardware merchants, St. John, N. B., was elected president of the St. John Advertising Club, at the annual meeting held recently.

INCORPORATION

Pilkington Brothers (Canada) Ltd., has taken over the business formerly known as Pilkington Brothers Ltd., and will carry on the manufacture of glass at St. Catharines, with capital of $2,500,000.

G. U. HATCH NOW VICE-PRESIDENT IN CHARGE OF SALES OF MILLERS FALLS CO.

G. U. Hatch has been appointed vice-president in charge of sales of Millers Falls Co. Mr. Hatch has been with this company as general manager for approximately three years, prior to that time he was sales manager of the Winchester Repeating Arms Co., New Haven, Conn., for an equal period of time.

DEATH OF WORLD-FAMOUS MERCHANT PRINCE

The death is announced of John Wanamaker, world-famous merchant of Philadelphia and former postmaster-general of the United States. The name of Wanamaker is famous the world over, especially in merchandising circles where the unique methods adopted from time to time in the great Wanamaker store have been of much interest. The Wanamaker store in Philadelphia is considered to be one of the most imposing and beautiful buildings on the American continent and employs over 30,000 men and women.

OBITUARY

Calvin S. Laird, of Laird & Laird, owners of the Wyandotte Hardware, Windsor, Ont., is dead.

The death occurred in Montreal on Friday, December 8th of John Irving, for many years general sales-agent for the Nova Scotia Steel and Coal Co., Ltd. Mr. Irving had been ill for about a year, although not confined to his bed until recently. He was treated for some time at the Montreal General Hospital, but had been at his home for the last six weeks.

Mr. Irving joined the Nova Scotia Steel and Coal Co. in 1898. He began as sales manager and has been with the firm up until the time of his death. Montreal has been his headquarters for the last thirteen years.

FORM MANUFACTURERS' AGENCY FIRM

W. F. C. Turnbull, for a number of years with the Delaney & Pettit Company, Toronto, and James C. Campbell, formerly of the Acme Can Company, Montreal, have joined partnership as manufacturers' agents with offices at 80 St. Francois Xavier Street, Montreal. They are representing a number of prominent British manufacturers.

HARDWAREMEN ON CIVIC POWER COMMISSION

St. John, N. B.—Major Ronald McAvity, a director of T. McAvity & Sons, Ltd., hardware merchants, has been elected chairman of the St. John civic power commission, and A. M. Rowan, a North End hardware merchant, is a commissioner and so also is James Lewis, of William Lewis & Son, manufacturers of wrought iron work, bolts, nuts and fire escapes. Felix S. A. McMullin, another commissioner, is a machinist. Out of a commission of eight members, four are connected with the hardware business.

ALEX. McKENZIE

of Canadian National Carbon Co., was elected president of the Canadian Auxiliary of the Automotive Equipment Association, at the Chicago Convention.

FALLS HARDWARE FIRM PUSHING ELECTRICAL GOODS

Niagara Falls, Ont.—Electric stoves, electric reading lamps, electric vacuum cleaners and heaters together with a splendid assortment of carvers and small gifts comprise a very attractive window in the G. H. Clark Hardware here.

FRANK STOCKDALE'S TOPICS FOR HARDWARE CONVENTION

Hardwaremen will be interested in knowing that Frank Stockdale, retail merchandising expert, whose ability to handle retail problems is recognized, has been secured for two days at the convention of the Ontario Retail Hardware Association in Toronto in February next. Mr. Stockdale will speak on the following topics:

Wednesday morning—"How to Build a Selling Program."

Wednesday evening—"Golden Rule in Business."

Thursday morning—"How to Know Profit-making Lines."

Thursday evening—"Showmanship in Selling."

Retires After 51 Years in Retail Hardware Trade

Interest will be aroused by the announcement that the retail hardware firm of Purvis Bros., Ltd., of Sudbury, Ont., has sold out stock of hardware to J. F. Prieur & Son, Sturgeon Falls, Ont., which firm is removing the stock to their store. This announcement marks the passing of the oldest hardware business in Sudbury. The firm of Purvis Bros. commenced business in Barrie in December, 1872, and comprised the brothers David, Thomas R., and James. In December, 1889, James moved to Sudbury and opened the first hardware business in that town. David had opened the first hardware store in North Bay, ten years earlier. The latter brother died September 1, 1914 and Thomas R. Purvis died in January, 1916. James, the youngest brother, now retires after an experience of fifty-one years in the hardware business in Ontario. Mr. Purvis says, "I think I have been a subscriber to Hardware and Metal since its first issue." He is also a charter member of the Hardware Association. While still active, Mr. Purvis' health has not been very satisfactory of late.

Extending Chain of Retail Hardware Stores

In connection with the purchase by J. W. Peart of property formerly occupied by D. N. Flanders at Ingersoll, Ont., as mentioned in Dec. 2 issue of Hardware and Metal, the following statement has been secured: Mr. Peart advises Hardware and Metal that he will open an up-to-date hardware store in Ingersoll after the first of the year. Alterations will be made to the building and new fixtures of the same type as used in the new Cowan Hardware Co. hardware store in London, Ont. It will be fully modern from the standpoint of equipment and stock. Emerson Knowles now with the St. Marys Hardware, Ltd., St. Marys, Ont., will manage the store. The St. Marys Hardware, Ltd., has recently been reorganized and this extension is in line with the new policy of the company to open branches as opportunities arise. This company already operates the Woodstock Hardware, Woodstock, Ont., under the management of Mr. Carr late of St. Marys. W. H. Bartlett, who is a member of the executive of the Ontario Retail Hardware Association, continues to manage the St. Marys store. It is the policy of the company that all new branches will be in charge of persons financially interested in the company so that each branch will be equivalent to a local company at each point.

The reorganized company is controlled by the following directors: J. W. Peart, late of Peart Bros., Regina; W. H. Bartlett, vice-president; Wm. R. Carr, sec.-treasurer. Mr. Peart is also president of the St. Marys Wood Specialty Co., Ltd., which has recently been reorganized.

MONTREAL ANNUAL MOTOR SHOW, JANUARY 20-27

Announcement is made that the annual Montreal motor show will again be held under the auspices of the Montreal Trade Association Limited, from January 20 to 27 next. The exhibition for this year will take place in the Almy's Building, where two entire floors have been contracted for, following a resolution of the board of directors of the Association passed this week. It is stated that this will be the biggest motor show yet held in Montreal as the space which we occupied by the exhibition will be greater than ever before, and applications for display space have already been received from Canadian, American and European firms, which are apparently anxious to gain a share of Canadian trade.

SIMONDS MFG. CO. PUTS ON ESSAY CONTEST

Actuated by a desire to advance the study, and more general appreciation of economics, Alvin T. Simonds, president of the Simonds Saw Company of Fitchburg, Mass., and Chicago, Ill., proposes an essay contest open to pupils of high schools and normal schools in the United States and Canada. Mr. Simonds offers two prizes of $1,000 and $500 for the best essays written by students on the subject: "The Lack of Economic Intelligence and some of the Injuries it has Caused Individual and General Welfare since 1860." Rules governing the contest have been prepared, and persons interested may obtain copies of them by addressing the Simonds Economic Prize Contest, 470 Main Street, Fitchburg, Mass.

FARMERS ASK SPECIAL MOTOR LEGISLATION

Headed by W. A. Amos, a deputation from the United Farmers of Ontario appeared before the special legislative committee on the Motor Vehicles Act, asking that special consideration be given the farmers of the province. Following representations by automobile associations the question of prohibiting tractors and threshing machines from using hard surfaced roads had been seriously considered. Mr. Amos thought that legislation of the above nature would work a serious hardship on farmers. They realized that the cleats on tractor wheels did cut up hard surfaced roads, but it would require at least two days' work on the part of the tractor owner to remove them each time he came to one of the forbidden sections.

The deputation also opposed the suggestion to license all drivers, and the proposal to force all vehicles to carry lights after dusk. These they thought would cause considerable trouble to farmers. Mr. Amos asked why it was thought necessary to give police cars and newspaper distribution trucks right-of-way over the roads. The press trucks were being recklessly driven and were a menace to the public, he stated.

Standardization of turning and stopping signals and uniform parking regulations for the province were approved. The deputation also put itself on record as favoring the abolition of the searchlight.

Western Canada News

W. A. Ivers is commencing a hardware business at Regina, Sask.

John Cleverley, hardware, Strasbourg, Sask., has sold to E. C. Arthur.

Parkinson Hardware, Tompkins, Sask., is succeeded by J. H. Nelson.

E. G. Paddon, hardware merchant, Calgary, Alta., is reported to be selling out.

G. W. Endress, of Moncrieff & Endress Ltd., manufacturers' agents, Winnipeg, has just returned from a business trip to U. S. and eastern cities.

C. C. Craig of the C. C. Craig Co., manufacturers' agents, Winnipeg, has returned from a business trip throughout the western provinces and reports that business is showing a slight improvement.

The death is announced of W. H. Sparling who for some years conducted a hardware business in Minnedosa, Man., but who some four years ago retired and removed to Winnipeg. He had been mayor of Minnedosa during his residence there. Born in Seaforth, Ont., he was 62 years of age at his death. He went west in 1876 locating at Portage la Prairie before going to Minnedosa.

OVERFLOW OF HARDWARE CLERKS AT VANCOUVER

Wholesale houses at Vancouver report many requests during the last couple of weeks to place hardware clerks who have come to the coast from various stores on the prairie. Dealers point out that the condition of trade does not warrant taking on any extra help and that in several cases, they are taking care of members of their staffs whom they could at present do without.

WALTER STUART APPOINTED MANAGER OF THE MANITOBA STEEL & IRON CO.

Winnipeg.—Walter Stuart, formerly secretary-treasurer of The Manitoba Steel & Iron Co., Ltd., Winnipeg, has been appointed manager and takes over his new duties on the resignation of Charles A. Monkman who has held the position for the last five years. The Manitoba Steel & Iron Co. is a lineal descendant of the manufacturing companies—The Manitoba Bridge & Iron Works and The Manitoba Steel Foundries, Ltd., Selkirk. In speaking of business conditions, T. R. Deacon, president, said that country blacksmith shops, carriage shops and hardware stores are beginning to place orders for new stocks and business since the marketing of the crop has shown an improvement. The increased prosperity of the farmers following the good crop this year is given as the reason.

O. L. Lewis, representing Gerstendorfer Bros., New York, U. S. A., manufacturers of Sapolin, was a business visitor to Winnipeg.

R. F. Johnstone, buyer for the J. H. Ashdown Hardware Co., Ltd., of Saskatoon, Sask., is on a business trip to Winnipeg, Toronto, London and other points.

Join The 1922 Hardware and Metal Christmas Window Contest

Bigger and Better Than Ever Before

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting sales ideas into the display is what counts.

The contest closes on Monday, January 1, 1923. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

ACETYLENE HOT PLATES

McLeod Brothers, Milan, Que.—Kindly inform us who makes acetylene hot plates.

Answer: The Prest-O-Lite Co. of Canada, Ltd., Toronto.

"BELLE OAK" HEATER

Carter Bros., Picton, Ont.—Would you please advise us who manufactures the "Belle Oak" heater?

Answer: The McClary Manufacturing Co., Ltd., London, Ont.

GOLD MEDAL FURNITURE CO.

Reid's Hardware, Capreol, Ont.—Would you kindly advise us the address of the Gold Medal Furniture Co.?

Answer: This company is located at Racine, Wis.

SUPERB QUEBEC NO. 80

J. W. Richardson, North Bay, Ont.—Kindly advise who manufactures the Superb Quebec stove No. 80.

Answer: The Happy Thought Foundry Co., Ltd., Brantford, Ont.

"EVEREDY" BOTTLE CAPPER

Messrs. Henri Jalbert, Chicoutimi, Que.—Would you please advise where the Everedy bottle capper is made?

Answer: The Everedy Bottle Capper Co., Frederick, Maryland, U.S.A.

"CANNON BALL" HANGERS

Fennell & Chandler, Charlottetown. P. E. I.—Please give us the address of manufacturers of the "Cannon Ball" barn door hangers and track.

Answer: Messrs. Hunt, Helm & Ferris Co., Harvard, Ill.

OIL BURNERS

Diamond & Hyde, Belleville, Ont.—Kindly advise where we can procure oil burners to install in domestic furnaces.

Answer: The Fess Oil Burner Co. of Canada, Ltd., Toronto, and S. Aikens, Limited, Ottawa.

TABLE OIL CLOTH

The Mills Hardware Co., Ltd., 95 King St., E., Hamilton—Would you advise us the names and addresses of manufacturers of table oil cloth?

Answer: The Dominion Oil Cloth & Linoleum Co., Ltd.. Montreal, and the Canadian Oil Cloth Co. at Cornwall, Ont.

CHEMICAL CLOSETS

S. Schwanz, Rocanville, Sask.—Kindly advise names of manufacturers of chemical closets.

Answer: The James Morrison Mfg. Co., Toronto; The S. H. Whyte Co., Winnipeg; The Steel Trough & Machine Co., Tweed, Ont., and Kaustine, Limited. Toronto.

"CORONA" RANGE

The Saskatoon Hardware Co., Ltd., Saskatoon, Sask.—Would you kindly advise us who manufactures a range by the name of "Corona"?

Answer: The Tudhope-Anderson Co., Ltd., of Orillia, Ont. They also have a branch at Winnipeg.

SHOW CARD LETTERING

La Compagnie Martineau, 135 St. Joseph St., Quebec, Que.—Can you inform us where we can procure an illustrated book on show window cards?

Answer: Books on show card writing are published by The United Publishers Corporation Book Co., 243 West 39th St., New York City, and the Thompson School of Lettering, Pontiac, Mich.

LIVE STOCK MARKERS

Bonthron & Drysdale, Hensall, Ont.—Will you kindly advise us who manufactures cattle markers?

Answer: The Rideau Specialty Co., Smith Falls, Ont.

"TRIUMPH MOGUL" HEATER

The Trites-Wood Co., Ltd., Fernie, B.C.—Kindly advise us who are the manufacturers of the "Triumph Mogul" water tank heater.

Answer: The Dominion Radiator Co., Ltd. Toronto.

NEW EMPRESS RANGE

The Henderson Hardware Co., Englehart, Ont.—We want repairs for the New Empress range, made by the National Mfg. Co.

Answer.—The repair parts for all stoves and ranges made by the National Mfg. Co., Ltd., are still being handled at their Ottawa branch.

APEX ELECTRIC SWEEPER

Messrs Brown & Newell, Aylmer, Ont.—Kindly advise who manufactures the Apex electric sweeper.

Answer.—The Apex Electric Manufacturing Co., 1067 East 152nd. St., Cleveland, Ohio.—The Canadian branch is at 102 Atlantic Ave., Toronto.

GLOBES FOR INVERTED GASOLINE LAMPS

R. E. King, Maitland, N.S.—What firms in the United States are making globes for inverted gasoline lamps?

Answer.—The American Gas Machine Co., Albert Lea, Minn. Also MacBeath-Evans Glass Co., Pittsburgh, Pa., and the Gill Bros., Co., Stubenville, Ohio.

METAL CEILINGS

Jesse Wood, Brantford, Ont.—Kindly advise me where I can secure metal ceilings.

Answer.—The Pedlar People, Oshawa, Ont.; A. B. Ormsby, Ltd., Toronto; McFarlane & Douglas Co., Ltd., Toronto; Metallic Roofing Co., Ltd., Toronto; Metal Shingle & Siding Co., Preston, Ont.; Crossen Metal Works, Ltd., Winnipeg, Man.; Winnipeg Ceiling & Roofing Co., Winnipeg, Man.

CARPENTERS' APRONS

G. & A. Gardiner, Ltd., Sarnia, Ont.—Where can we procure carpenters' aprons suitable for putting on our name for advertising purposes?

Answer.—Messrs. Scythes & Co., Ltd., 9 Church St., Toronto.

RAYBONE RULE

The Saskatoon Hardware, Ltd., Saskatoon.—Kindly advise if the raybone rule is carried in this country by any distributor, or if we would have to import it direct from the Old Country.

Answer.—Messrs. T. Mortimer Co., manufacturers' agents, of Toronto, have the distributing agency for this product.

FIRE PLACE MANTELS

Klinek's Hardware, Elmira, Ont.—Kindly place before us the names of manufacturers of fire place mantels.

Answer.—

Marble

Smith Marble & Construction Co., Montreal.

Pressed Brick

Milton Pressed Brick Co., Milton, Ont.

Wood.

A. W. Allen & Son, Middleton, N. S.; P. E. Bourassa & Son, Montreal; Burton & Baldwin Mfg. Co., Hamilton; Canada Glass Mantels & Tiles, Ltd., Toronto; Christie Woodworking Co., St. John, N.B.; Lea Paul Co., Moncton, N.B. Paquet & Godbout, St. Hyacinthe, Que.; Robert Reid Co.. Montreal; Rhodes, Curry Co., Amherst, N.S; Schultz Bros. & Co., Brantford, Ont.; Wilson Bros., Ltd. Collingwood, Ont.

SUPER CEMENT

W. A. Lambert, Hardware Merchant, Beaverton, Ont.—We are having difficulties in securing super-cement. Would you kindly put us in touch with the right source?

Answer.—The Superb Cement Company, Mount Dennis, Ontario.

TRIUMPHANT HIGH WHEEL LAWN MOWER

Messrs. R. Chestnut and Sons, Fredericton, N.B.—We would be obliged if you could tell us who are the makers of the Triumphant high wheel lawn mower.

Answer.—The American Lawn Mower Company, of Muncie, Indiana, make a Triumph ball-bearing machine. The F. & N. Lawn Mower Company, of Richmond, Indiana, make a mower called the Triumph high wheel.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of November and December, 1902:

"J. & P. D'Avignon, manufacturers of stoves, Montreal, have registered."

"J. F. Stevenson & Co., hardware merchants of Hamilton, Ont., have sold out to Bradley Bros."

"The Fairbanks Company are giving considerable attention to their new machine tool department. T. S. Stephens is head of this branch."

"The Canada Paint Co. are well to the front as regards the manufacture of paris green. They have started to manufacture in Toronto and Montreal and will turn out immediately 250 tons."

"A. Dunn, superintendent of The Consumers Cordage Co., Ltd., Montreal, was presented with an address and silver smoking set by Division No. 2 A.O.H., of which he is president."

"T. B. Lee and J. Hardy, president and secretary respectively of the Canadian Wholesale Hardware Ass'n., have returned from New Orleans where they attended the convention of the National Hardware Ass'n."

"The twenty-second convention of The Sherwin-Williams Co., held at Cleveland, was the largest in the history of the company. President Sherwin and General Manager Cottingham received an ovation when they arose to deliver their addresses."

"The Sherwin-Williams Co. are about to greatly extend their manufacturing operations in Canada. Recently they purchased 120,000 feet of land on Atwater Avenue, Montreal and here they will put up a large plant. The price paid for the land was $20,000."

"The hardware section of the Toronto branch of the Retail Merchants' Association held a meeting this week at which Chairman E. R. Rogers presided. Numerous applications for membership were received and discussion concerned the forthcoming convention of the association at Hamilton in February."

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

THERE is the usual proportion of price adjustments in the current hardware markets. Developments include both reductions and increases, however, with easier price levels appearing on such products as pig iron, carpet felt, the Yankee line of ratchet screw drivers and drills, and snowshoes. On the other hand, advances are recorded on barbed wire, plain galvanized wire, coil spring and plain twist wire. A slight advance is also evident on canvas gloves. Paraffine oil climbs up this week, while higher levels appear on certain easier grades of inside and front door lock sets.

The firmer tendency in the market for crude rubber is now reflected on many finished goods, and slightly higher prices early in the New Year would not be surprising on such lines as automobile tires, belting and certain makes of hose. It is not expected, however, that any movement in this direction will affect garden hose quotations until after the booking season a little later in the spring.

The more general arrival of colder weather has not only stimulated the sale of holiday lines, but other seasonable goods now record brisk activity. Much attention is being paid to window displays of Christmas features and gift suggestions. Sustained sales activity is recorded for ash sifters, ice skates, weather strip, cross-cut saws, storm doors, lamps and lanterns, auto tire chains, as well as heaters and companion lines.

Montreal, Que.

MONTREAL, December 14.—A feature of the current hardware markets are the higher quotations on barbed wire, plain galvanized, coil spring, and plain twist wire. Another important change is on spades and shovels, through a revision in discounts, net prices being six per cent. higher. A slight advance is recorded in quotations on canvas gloves. Revisions also appear in the scrap material markets, rubber waste and wrought iron being advanced, while heavy melting steel is lower in price. There is still a firm tone in tin and spelter on primary metal markets and the recent advance in the former has stiffened the solder markets considerably. The trend of raw materials in recent weeks has softened the tone of certain iron and steel products, the lower levels of pig iron and improvement in the coal situation said to be reflecting on soil pipe and fittings.

SLIGHT INCREASE IN BARBED WIRE PRICES

Montreal.

As outlined in last issue of Hardware and Metal barbed wire, with other lines of galvanized wire, is now quoted at slightly higher figures. Following are new net quotations:

BARBED WIRE -

	Per 80 rod reel
2 x 5	3 55
4 x 6	3 85
4 x 4	4 10

Galvanized catch weights, $4.40 per 100 lbs.

HIGHER PRICES ON GALVANIZED PLAIN TWIST

Montreal.

An advance of ten cents per lb. is made in quotations on galvanized plain twist wire, and this is now quoted at $5.30 per 100 lbs.

SPADES & SHOVELS AT REVISED DISCOUNT

Montreal.

An increase of from five to six per cent. is announced in quotations on all grades of spades and shovels. These are now quoted at 50 per cent. off list prices, former discount being 53 per cent. This revision reflects the recent firmer tendency in many hardware lines of steel manufacture because of higher raw material costs.

FIRMER MARKET TONE DISPLAYED IN SOLDERS

Montreal.

Tin on primary metal markets continues in a very strong market position and solder prices are now described as firm. No changes are made at the present time but with the present tendency remaining in the virgin metal revisions in an upward direction would not be surprising. Spelter is also recorded as maintaining its more recent strength and lead is steady to firm. With these metals in their present position other lead products are also placed on a firm market basis.

ACTIVITY STILL EVIDENT IN CORRUGATED

Montreal.

Although the season for corrugated sheets is now well advanced dealers still describe the movement as seasonal, while much quieter than during the fall months. The usual dullness of winter months, however, is looked for at any time, one local manufacturer stating that they expected little further activity after the middle of this month. During the quiet season there is usually a little easier tone in the market for these products, but with galvanized sheets displaying a firmer tendency this season the undertone of the market is now said to be quite steady. Unchanged list prices and discounts are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

GALVANIZED COIL SPRING WIRE ALSO INCREASED

Montreal.

An advance corresponding with that announced on other galvanized wire is made on coil spring and No. 9 is now quoted at $4.10, No. 12 at $4.25 per 100 lbs.

WROUGHT PIPE MARKET RETAINS FIRMNESS

Montreal.

The undertone of wrought iron and steel pipe is said to be one of the strongest in the steel industry, this tendency having been well maintained for some weeks past. The delivery problem on raw materials, while improved, is still a strong factor in the market and demand is also keeping up in good volume notwithstanding the season of the year. In southern primary markets much the same conditions exist, and although there is a slight weakening in other steel pro-

ducts with pig iron and coke on a lower price basis, chances of an easier feeling in the wrought pipe market are considered remote for some little time.

HIGHER QUOTATIONS ON PLAIN GALVANIZED WIRE

Montreal.

Slightly higher quotations are announced on all gauges of plain galvanized wire. No. 9 will now sell at $4.05, No. 12 at $4.20 and No. 13 at $4.30 per hundred pounds.

TROUGH AND CONDUCTOR PIPE ON DULL MARKET

Montreal.

The dull season for eavestrough, conductor pipe and elbows is now at hand, manufacturers and distributors reporting very little doing. Current quotations are unchanged with a steady to firm tone in the market owing to the slight firming in galvanized sheets at production centres. Following are list prices and discounts:

EAVESTROUGH:

O. G. round and half round, per 100 ft. 8 in., $16.90; 10 in., $18.70; 12 in., $22.20; 15 in., $29.80; 18 in., $37.80.

O.G. Square bead, per 100 ft.: 8 in., $15.90; 10 in., $17.70; 12 in., $21.20; 15 in., $28.80; 18 in., $36.80.

Discount 70 per cent.

CONDUCTOR PIPE—Round, Plain and Corrugated. per 100 ft.; 2 in., $18.40; 3 in., $22.30; 4 in., $29.60; 5 in, $40.00; 6 in, $49.00; 6 in., $49.00.

Discount 70 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated, price per doz. 2 in., $5.25; 3 in., $6.00; 4 in., $10.50; 5 in., $24.00; 6 in., $29.00.

Discount 60 per cent.

SLIGHT REVISIONS IN SCRAP MATERIAL MARKETS

Montreal.

There is little trading again reported in scrap metals and all lines have a very dull market tone. Slight revisions, however, are made in quotations on some materials, rubber shoes showing a further slight increase, also wrought iron scrap. Heavy melting steel is again easier and nominal prices are reduced one dollar per ton. There has been a little inquiry for iron and steel, but this has now subsided into a state of dullness. Following are average dealers' buying prices:

SCRAP—

Automobile Tires	0 40
Rubber Shoes	0 02¾
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 04½
Lead, heavy	0 04½
Lead, tea	0 03
Heavy copper	0 11½
Wrought iron, R. Rd. No. 1 per gr. ton	11 00
Malleable scrap (ton)	9 00 to 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 00 9 50
No. 2 busheling	3 00
Boiler plate	8 00 to 9 00
No. 1 machinery cast	20 00 22 00

MAY BE HIGHER QUOTATIONS ON AUTO TIRES

Montreal.

Manufacturers of rubber products now describe the market for their products as being very firm, with the improvement in crude rubber during recent weeks. For many months this tendency has not been noted and its present appearance is welcomed by producers of finished products who state that some of their lines are selling today at very low prices. This would especially apply to automobile tires. With raw materials continuing on a steadily rising market higher prices on such lines as tires, belting, steam hose, fire hose and larger sized water hose, etc., are thought probable after the first of the year. Garden hose prices are expected to remain unchanged until after the booking season later in the spring.

NO FURTHER CHANGE RECORDED IN RANGE BOILERS

Montreal.

Range boilers are now selling at revised quotations announced at the first of the month, and although the season is advancing a fair amount of business is still in evidence. Dealers, however, anticipate a slackening at any time as the approach of the holiday season usually brings the close of the heavier movement in these products. Prices are firm at following list and discounts:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 40 per cent. Extra heavy, 30 per cent.

ADVANCED PRICES ON COTTON GLOVES

Montreal.

Canvas gloves are now on a firmer basis, quotations being advanced five per cent. Following are new prices:

COTTON GLOVES—	Per doz.
Plain	140
Knitted wrist	200
Jersey, men's size	2 70
Striped, knitted wrist	2 50

RAW MATERIAL TREND AFFECTS SOIL PIPE

Montreal.

Current discounts on soil pipe and fittings are unchanged with a slightly easier tone in the market. Considering the trend of pig iron, and the improvement in the coal situation, there is a possibility of a price change in a downward direction at a little later date, according to one local dealer. Prevailing quotations are:

SOIL PIPE—

2 and 3 inch	35%
4 inch	35%
5 and 6 inch	35%
8 inch	net

Fittings—

2 and 6 inch	45%
8 inch	net

RADIATORS AND BOILERS ENTER QUIETER PERIOD

Montreal.

Following a brisk trade during past months, radiators and boilers are now entering a quieter period, and sales have fallen off to quite an extent during the last week or so. This is not surprising and manufacturers describe the present movement as seasonal. There are also said to be prospects for a moderate amount of business in the following weeks.

Commenting on business this season one manufacturer stated that heating systems had been in good demand practically all through the past season and producers were well satisfied with records up until the present time. No change has been made in the following quotations:

RADIATORS AND BOILERS—

Radiator list prices are for 1, 2, 3, 4 and 5 column radiators, per sq. ft.

45 in., to 38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in., $1.40; 16 in., $1.50; 4 in, $1.55; 13 in., 1.60. Discount 55 per cent. for hot water, and 56 per cent. for steam.

Wall radiators—5 ft., $1.15; 6 ft., $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05; Discount 52 per cent.

Boilers—Round hot water boilers, sizes from 0 to 10, 60 per cent. off list.

Square or sectional hot water or steam boilers, 15 in., 15 per cent.

Square or sectional water boilers, 19 in., to 36 in., 20 per cent.

Square or sectional steam boilers, 19 in., to 36 in., 17 per cent.

Ontario Government trimmings, 15 per cent.

Round steam boilers, standard trimmings, 28 per cent . Ontario Government trimmings, 25 per cent.

F.o.b. Montreal, Toronto, Guelph.

MINOR CHANGE IN BAR PRODUCT MARKET

Montreal.

Conditions on the local market for bar iron and steel might again be described as seasonably quiet with little or no variation in current prices. Some are still of the opinion that slightly easier quotations may develop in face of the dull period during the following months, while others point to the delivery problem as offsetting this tendency to a great extent.

IRON AND STEEL—

Common bar iron, 100 lbs.		3 15
Refined iron		4 65
Irish finish machinery steel		3 20
Mild steel		3 15
Single reeled machinery steel		5 25
Band steel	3 50	3 65
Spring steel	4 75	8 50
Sleighshoe steel		3 15
Tire steel		3 35
Harrow tooth steel		3 30
Toe caulk steel		4 05
Mining tool steel, per lb.		0 20½
Black Diamond tool and cast steel, per lb.		0 20½

NOTE.—Refined iron is approximately $1.50 per cwt. over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

MODERATE TRADE REPORTED IN SHEET MARKETS

Montreal.

There is very little change on the local sheet markets, prices remaining at former levels and trade continuing in moderate proportions, although the sales movement in general was describ-

ed by one large distributor as slightly improved over the previous few weeks. In black sheets there is a little easier tone and one firm has slightly reduced quotations but this movement is by no means general as yet. In galvanized a steady to firm tone is recorded with these sheets still showing more activity than other lines. Tin plate and terne plate also have a steady undertone with little or no change in the market.

BLACK SHEETS—

10 gauge, base	4 25
12 gauge	4 35
14 gauge	4 45
16 gauge	4 55
18—20 gauge	4 80
22—24 gauge	4 85
26 gauge	4 90
28 gauge	5 10

GALVANIZED SHEETS—

Welsh polished, 60s	6 75
Galvanized, 52s	7 25
Galvanized 60s	7 75

Toronto, Ont.

TORONTO, December 14.—A complexity of market developments again features current hardware prices. Both declines and advances are more numerous. Easier quotations appear on mineral surface roofings, as outlined in last week's issue, while a slight readjustment is noted on some lines of building paper, including dry and tarred fibre and also heavy straw sheathing. A reduction is in effect in some quarters on carpet felt. Another decline has featured pig iron.

Galvanized wire prices move up ten cents, while a similar revision is made in coiled spring wire and barbed wire. Sash weight quotations are advanced locally, on both solid and sectional. Higher prices are also recorded on the cheaper grade of inside and front door lock sets. Paraffine oil also climbs up. There is some anticipation of an upward price revision on asbestos pipe covering at an early date. Further slight increases are also described as pending in cotton wastes.

GALVANIZED WIRE QUOTATIONS MOVE UPWARD

Toronto.

As briefly foreshadowed in last week's issue of Hardware and Metal, higher price levels have appeared on galvanized wire and kindred lines. The general advance is ten cents per cwt.

Galvanized wire, No. 9, is now priced at $4.05, and No. 12 at $4.20.

Coiled spring wire, 9 gauge, has been advanced to $4.10, with No. 12 at $4.25.

Barbed wire has also been revised, 4 x 6 now being priced at $3.85 per reel of 80 rods, and 4 x 4 at $4.10 for similar quantities.

PRICES ON PARAFFINE CLIMB UPWARD

Toronto.

An advance of 2½ cents per gallon is effective this week on paraffine oil. This revision brings the current list price up to 19 cents per gallon, subject to the usual discount of 15 per cent. No other developments are recorded in the oil market, coal oil remaining steady, while gasoline remains in a seasonally quiet state.

HIGHER QUOTATIONS ON SASH WEIGHTS

Toronto.

Sash weights have been advanced in price this week, the extent of the increase being twenty-five cents per cwt. This revision brings local prices on solid up to $3.00 and on sectional to $3.25 per cwt.

HIGHER PRICES ON INSIDE DOOR SETS

Toronto.

An advance has been made in prices on the cheaper lines of inside and front door lock sets. The cheaper inside are now being quoted at $8.59 per dozen sets. The market is described as very firm, with other lines increased in proportion.

REDUCTION OF TEN CENTS ON CARPET FELT

Toronto.

A reduction of ten cents per 100 pounds in announced in local quotations on carpet felt. This revision brings the current level to $3.90 per cwt.

REDUCED PRICES ON MINERAL SURFACE ROOFING

Toronto.

A reduction of fifteen cents per square is now made by manufacturers on the mineral surface roofings in both 18 and 36 inch widths. This development was briefly foreshadowed in last week's market report. The revised quotations are inserted on the current market pages.

READJUST PRICES ON BUILDING PAPERS

Toronto.

As briefly outlined in last week's issue of Hardware and Metal some readjustments have been made in quotations on building papers. This change affects both dry and tarred fibre No. 2, grades, the extent of the reduction being ten cents per roll. A corresponding decline is also in effect on heavy straw sheathings, both dry and tarred. The new quotations are contained in the current market price pages.

ANOTHER REDUCTION IN PIG IRON PRICES

Toronto.

Another reduction is recorded this week in pig iron prices, the extent of the current decline being $2.00 per ton. This development is in line with the easier levels foreshadowed in former issues of Hardware and Metal, and brings prevailing quotations to $30.80. It is pointed out, however, that the feeling prevails as to these levels being generally considered representative of existing values. Shipments of stocks of Scotch iron are stated to have ceased with the closing of navigation. Placing of orders for first quarter are reported at the revised levels. Just what effect this further reduction will have upon relative products is considered problematical, the situation in general being described as a natural step towards stability, a tendency more or less prevalent at this time.

MODERATE BUYING THE RULE IN IRON AND STEEL

Toronto.

December is the month for inventories and from now on until the end of the present year, it is the general opinion that only the most urgent and necessary supplies will be purchased. The opinion is also expressed that current stocks, both at warehouses and in the possession of consumers, are at a minimum. Quotations remain on a steady basis, with prospects for an increased volume of business in the coming year now attracting attention.

IRON AND STEEL—

Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40
Angle iron, base	3 35	3 50
Horse shoe iron		3 90
Tire steel		3 50
Spring Steel	**7 00**	**8 00**
Sleigh shoe steel		3 40
Cold drawn steel		4 50
Hoop steel		4 75
Norway iron		12 50
Toe caulk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

FIRM UNDERTONE NOTED IN SASH CORD

Toronto.

It is noted that quotations on sash cord in United States markets have advanced two cents per pound. In discussing this development with local distributors it was pointed out that trade in this line is falling off at this time of the year, otherwise the change might have had more effect on domestic levels. The cotton market is still firm, however, and it is stated that should any further increases be recorded in primary markets, such revisions would most probably be reflected in future quotations. At the present time, however, no changes are anticipated locally.

LOOK FOR PRICE REVISION IN ASBESTOS

Toronto.

The asbestos market continues to gradually improve. No change has yet developed in local quotations, however, manufacturers stating that present discount levels are generally expected to stand for a week or two. There are indications that some revision will be made prior to the New Year, however. It is noted that eastern centres have already recorded certain advances. Following are prevailing prices:

ASBESTOS PRODUCTS—

Pipe Covering—	
Air cell, 4 ply	60 per cent. off list.
Air cell, 3 ply	65 per cent. off list.
Air cell, 2 ply	67½% off standard list.
Boiler Covering	$1.50 per bag
Asbestos Sheathing	$6.75 per 100 lbs.
Magnesia pipe covering	less 40%

BOILER TUBES IN MODERATE DEMAND

Toronto.

Boiler tubes are now in moderate demand only, as it is pointed out that the former rush to obtain supplies for repairs and renewal of heating equipment for the cold weather months is now practically over. Supplies continue difficult to secure promptly, however, with prices generally remaining steady at the recently readjusted levels. Following are average prevailing quotations:

BOILER TUBES—

	Seamless	Lapweld
¾ inch	19 00	....
1 inch	20 00	....
1¼ inch	22 00	....
1½ inch	24 00	....
1¾ inch	24 00	23 00
2 inch	22 00	19 00
2¼ inch	24 00	21 50
2½ inch	27 00	23 50
3 inch	34 00	28 50
3¼ inch	36 00	33 00
3½ inch	38 00	32 00
4 inch	50 00	42 00

ROPE BOOKINGS REACH FAIR VOLUME

Toronto.

Bookings for spring requirements of rope and cordage are now being taken and are reported in fair volume. Most sections are slightly ahead of last year in this respect. It is pointed out that the recent reductions in price have offered an inducement for buyers to purchase for future. The undertone of the market in general is now described as firm, with some improvement in trade conditions. Manilla is on a steady basis, while neither jute nor hemp show any signs of weakness. Cotton rope is held at advanced prices given some time ago, and while the strength of the cotton market has recorded some fluctuations, there is no indication of an easier tendency, at present.

DULL CONDITION EVIDENT IN SHEET MARKET

Toronto.

With the arrival of cold weather and the annual inventory period, current trade in galvanized and black sheets is generally recorded as dull. It is pointed out that this condition is not unusual for this time of the year, however, and while the movement of sheets is undoubtedly restricted, yet this condition is only of seasonal duration. Following are unchanged local quotations on sheets and tin plates:

GALVANIZED SHEETS—

	Premier and Apollo
10¾ oz.	6 65
U. S. 28 base	6 25
U. S. 26 base	5 95
22 and 24	5 80
18 and 20	5 65
16	5 50
12 and 14	5 35
	Queen's Head
28 gauge, base	7 15
26	6 75
24	6 45
22	6 30
	Fleur de Lis
28 gauge, base	6 90
26	6 50
24	**6 20**
22	6 05

An extra 40c. per 100 lbs. is charged for Key stone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown in 20c. per 100 pounds.

BLUE ANNEALED SHEETS—

10 gauge, base	4 20
12 gauge	4 25
14 gauge	4 30
16 gauge	4 35

BLACK SHEETS—

18-20 gauge	4 90
22-24 gauge	4 95
26 gauge	5 00
28 gauge	5 10

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

FAIR SEASONAL ACTIVITY IN PIPE FITTINGS

Toronto.

The installation of fall and winter heating equipment has reflected in the current movement of pipe fittings to a seasonable extent, and distributors record that a fair amount of activity is evident. This condition is slightly ahead of the movement noted at this time last year. No price revisions have been made, quotations on these products remaining on a steady basis during recent weeks.

PIPE FITTINGS—

Cast iron fittings	27%
Plugs, case iron	27%

Discount, Classes, A B and C, less 70 per cent.

RUMOR OF FURTHER INCREASE IN WASTE

Toronto.

The revised quotations on cotton wastes, continue to reflect the firm trend of primary markets. Distributors state that there may be some further upward price revisions on cotton wastes early in the New Year, such a development depending upon the movement of raw cotton and basic elements in general. Following are prevailing quotations:

COTTON WASTES—

Cream, polishing	$ 0.19
White, XXX	0.19

ONLY OCCASIONAL TRADE IN CEMENT

Toronto.

Only occasional trade is now recorded in cement at this time of the year. Current conditions are comparatively dull, now that construction work is practically completed for the year. No change has been made in quotations, the following being existing local levels:

CEMENT—Carload Lots—

Per barrel	3 63
Less Carload Lots—	
Per barrel, f.o.b. yard	4 35
Per barrel, delivered	4 55

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

SLIGHT IMPROVEMENT IN SCRAP METALS

Toronto.

Copper scrap business locally has improved and prices are firmer. The demand which has been awaited for so long has apparently arrived and a better

trade in red and yellow metals is anticipated throughout the metal industry. Sales have been consummated at higher figures than formerly prevailed.

White metals have also shown some improvement. The cast iron market is slow, owing to the continued weakness of pig iron and the fact that grey iron foundries have completed their orders. Heavy melting steel is active with fractional gains and borings and turnings are in great demand.

Scrap rubber has been moving along at a better pace. Following are the usual averages of dealers' buying prices for fairly large quantities:

SCRAP MATERIALS—

Scrap Iron	
Heavy melting steel	10 00
Scrap pipe	7 00
Steel turnings	10 00
Malleable scrap	10 00
Rails, scrap	11 00

Auto tires	0 25	0 50
Solid tires	0 60	1 00

QUIETER TRADE FOR TROUGH AND PIPING

Toronto.

Business in eavestrough, conductor pipe and elbows is now falling away as regards volume, due to the arrival of cold weather and the consequent completion of building activity. Current trade is usually on a moderate basis at this time of the year, however. Quotations on these products remain unchanged, following being lists and discounts:

TROUGH (Eave)—

O. G. Square Bead—

Per 100 ft.		Per. 100 ft.	
8 inch	$15 90	15 inch	$28 80

DULLNESS KEYNOTE OF MARKET IN CORRUGATED

Toronto.

Dullness characterizes the current condition of corrugated sheets, the market being inactive at this period. With the completion of building schedules and the arrival of colder weather, prevailing interest is naturally on a subdued basis. No variation has been made in quotations, both lists and discounts remaining unchanged. It is pointed out that the inventory period also contributes to the low condition of stocks.

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00

No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

INGOT METALS RETAIN BETTER POSITION

Toronto.

The non-ferrous metal market shows no outstanding feature locally and domestic demand continues on a moderate basis. Copper is firming up again. Another sharp rise is recorded in tin on outside markets. Spelter quotations are considered strong and likely to record further increases.

COPPER.—Consumers of copper are exhibiting a recovery of interest, this being attributed to recent developments which tend to strengthen the position of producers. The expectation that some firmer prices will be recorded in the near future under the pressure of any continued movement in this direction is now prevalent.

TIN.—There have continued certain fluctuations in the London tin prices but this has been largely offset by the advance in sterling exchange. The domestic market is quiet, but the price trend has shown little variation, the local level being unchanged. A recovery on outside centres is generally looked for.

LEAD.—Prices on this metal continue on a steady basis, but the upward tendency is not nearly so distinct as formerly. Consumers are evidently well covered at the present time for their needs. This condition is different from that of a month or so ago, when consumers were seeking the market on account of slow receipts from the producers.

SPELTER.—The domestic zinc market remains quiet but the general position is described as fairly steady. There has been little change in either local or primary market prices, although the tone of certain outside centres is reported as slightly easier.

ANTIMONY.—This market locally is dull, with primary centres also recording a quiet condition. The current demand is just on a moderate scale. Prices, however, remain unchanged.

ALUMINUM.—Inquiries for aluminum are relatively few, but the market in general continues on a steady basis, with quotations at former levels.

INGOT METALS—

Copper	17 25
Tin	41 00
Lead	7 50
Spelter	9 50
Antimony	8 50
Aluminum	22 00

London, Ont.

LONDON, December 14.—Hardware business here continues seasonably good with Christmas lines in brisk demand. Merchants are giving attention to attractive window displays of holiday lines and gift suggestions and are getting good results from their efforts. Few price changes go into effect this week, most lines remain firm and steady.

BRISK SALE OF NAILS STILL EVIDENT

London, Ont.

A good seasonable sale is still evident for nails. Prices remain unchanged at the following levels:

Wire nails, base, $3.75 per keg.
Cut, do., base, $4.60 per keg.

SEASONAL CALL FOR AUTO TIRE CHAINS

London, Ont.

There has been a good demand for auto tire chains during the past few days in this district. Current quotations on the Rid-o-Skid and Weed chains remain unchanged at 25 per cent. off list from 1 to 10 pair, and 30 per cent. off from 11 to 49 pair.

FAIRLY GOOD SALE RECORDED FOR ICE SKATES

London, Ont.

A fair proportion of sales is generally recorded for ice skates. Quotations remain unchanged at former levels; the present level on the Starr line being list less 30 per cent.

TURPENTINE PRICE REMAINS AT REVISED LEVEL

London, Ont.

The local price of turpentine holds at the reduction recorded last week. At this lower level, sales are seasonably fair.

TURPENTINE

1 bbl. lots, $2.15; Imp. Gal.; 2 to 4 bbl. lots, $2.14 Imp. Gal.; 5 Gal lots, $2.30 Imp. Gal.

LOWER QUOTATIONS APPEAR ON SNOWSHOES

London, Ont.

Quotations on snowshoes are lower this season. Following are some of the new prices in effect locally:

SNOW SHOES—

	Pair
No. 3 Boys 10" x 33"	2 20
No. 23 Ladies 11" x 36"	2 60
No. 22 Men's 12" x 42"	3 10
No. 20 Men's 14" x 42"	3 35
No. 30 Shanty 16" x 42"	3 60

REDUCTION ON YANKEE RATCHET DRIVERS AND DRILLS

London, Ont.

Revised price levels, representing a

reduction of approximately 7 per cent. appear on the Yankee line of ratchet screw drivers and drills. It is stated that this easier level is not caused by any lowering of factory costs, but on account of the difference in duty on nickel-plated carpenter tools. New prices follow:

RATCHET SCREW DRIVERS—

No. 11 x 2"—$7.35 doz.; 11 x 3"—$9.01 doz.; 11 x 4"—$10.12 doz.; 11 x 5"—$10.59 doz.; 11 x 6"—$11.90 doz.; 11 x 8"—$13.48 doz.

No. 12—$10.50 doz.

No. 15 x 3"—$8.40 doz.; 15 x 4" $8.75; 15 x 5"—$9.10 doz.

No. 20 x 1"—$21.52 doz.; No. 20 x 2"—$25.02 doz.; 30—$33.69 doz.; 31—$45.24 doz.; 35—$25.02 doz.; 130—$38.50 doz.; 131—$51.98 doz.

AUTO DRILLS —

No. 40—$32.72 doz.; 41—$29.22 doz.; 48—$14.61 doz.; 44—$35.18 doz.

HIGHER LEVEL ON SPADES AND SHOVELS

London, Ont.

New higher prices are now in effect on spades shovels and scoops, this being for present and spring booking. The revised discount is less 50 per cent., this change representing an advance of around 6½ per cent.

New net prices on some of the good selling lines of spades and shovels follow:—

SPADES AND SHOVELS—

	Doz.
Black Cat and Star	12 00
Fox and Olds	12 50
Bull Dog and Jones	14 50

SCOOP SHOVELS—

	Black Cat	Moose
No. 2	16 00	17 25
No. 4	16 70	17 95
No. 6	17 40	18 65
No. 8	18 10	19 35
No. 10	18 80	20 05

NOTE:—These prices are for black finish. Add $1.00 per dozen for polished.

LINSEED MARKET IN STEADY POSITION

London, Ont.

Linsed oil prices remain unchanged this week, with the tone of the market and the volume of current trading practically steady.

LINSEED OIL—

	Raw Imperial Gal.	Boiled Gal.
1 to 2 barrels	1 10	1 13
3 to 5 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less Barrels, Add 15c. Gallon.

SEASONAL MOVEMENT OF LAMPS AND LANTERNS

London, Ont.

There is an exceptionally good sale for gasoline lamps and lanterns. Current quotations on the Coleman line are as follows:

LAMPS AND LANTERNS—

	Each
Lanterns, No. 327	7 00
Lamps, No. 307, Plain Shade	8 25
Lamps, No. 329	8 25
Lamps, No. 317F, Fringed Shade	9 25
Lamps, No. 324c Green Tinted Shade	9 25
Lamps, No. 318c Tan Tinted Shade	9 25
Mantles for Lamps and Lanterns doz.	0 90

ACTIVE SALES RECORDED FOR STORM DOORS

London, Ont.

Dealers record a brisk sale for storm doors and also for the combination storm doors. Following are current unchanged quotations on the Sanderson-Harold make:

STORM DOORS—

	Doz.
No. 60 Grained Only	30 00
No. 61 Grain Filled and Varnished	36 00

COMBINATION DOORS—

No. 80 Grained Filled. and Varnished per dozen	64 00

SUSTAINED ACTIVITY NOTED IN CROSS CUT SAWS

London, Ont.

Brisk activity is being recorded for crosscut saws, the movement of these products keeping up in good proportion. Following are present levels on the Maple Leaf line:

CROSS CUT SAWS—

Premier, Lance, Racer, Pangburn—5 ft.—$5.50 ea.; 5½ ft.—$6.25 ea.; 6 ft., $7.25 ea.

Arrow Head—5 ft.—$5.50 ea.; 5½ ft—$6.25 ea.; 6 ft.—$7.25 ea.

WEATHER STIMULATES SALE OF ASH SIFTERS

London, Ont.

The colder weather experienced has assisted materially in the movement of ash sifters. Prices on these goods are unchanged at the following levels:

ASH SIFTERS—

Common Wood Sides	Doz.	2 75
Banner, No. 2	Each	2 65
Banner, No. 3	Each	1 95

WEATHER STRIP AMONG BRISK SELLING LINES

London, Ont.

Weather strip continues to be numbered among brisk selling seasonal lines. Prices are, however, on a steady level at present. Following are existing prices:

WEATHERSTRIP—

Frost King—$5.00 doz.; Wood and Felt, 50/5 per cent. off list. Bronze, 1⅛" $1.05 per carton; Bronze 1¼" $1.12 per carton; Bronze, 1½" $1.15 per carton.

Winnipeg, Man.

WINNIPEG, December 14.—The arrival of colder weather has stimulated the movement of many winter lines and wholesalers report that sorting orders have been very satisfactory. Retailers indicate that trade is fair, as seasonable weather is assisting the call for Christmas goods. Collections are showing a slight improvement. Cotton waste has shown a slight advance. Galvanized range boilers are ruling firm and manufacturers have advanced their quotations but jobbers are quoting at the old prices.

LUMBERING TOOLS IN SEASONAL MOVEMENT

Winnipeg.

Wholesalers report that sales of lumbering tools have been very satisfactory and repeat orders are arriving in good volume. Some of the popular lines of peavies, round chain hooks and grab hooks are quoted as follows:

LUMBERING TOOLS—

Peavies—No. 5	40 30
Round Chain Hooks No. 243	1 10
Do., 244	1 50
Do., No. 245	3 50
Do., No. 247	3 70
Grab Hooks, No. 250	1 10
Do., No. 251	1 50
Do., No. 252	3 50
Do., No. 254	3 70

IMPROVEMENT NOTED IN SPRING PAINT BOOKING

Winnipeg.

Manufacturers state that spring bookings on paints have been heavy and are showing a decided improvement over former records. The demand at present, while naturally falling away, is holding up well considering the time of the year.

CURLING STONES NOW IN BRISK DEMAND

Winnipeg.

With colder weather the demand for curling stones has shown a decided improvement. Blue hone curling stones are quoted at $30.00, with red hone at $33.00.

FLUE BRUSHES NOW AT LOWER PRICES

Winnipeg.

Flue brushes can now be obtained at slightly lower quotations. Flue brushes, 4 inches in diameter are quoted at $4 and 2½ inches in diameter are quoted at $3.20.

TRADE SUBSIDES IN TROUGH AND PIPE

Winnipeg.

Current trade in eavestrough and conductor pipe is described as falling off with the arrival of colder weather. The demand for this line is subsiding due to the fact that building in general has practically reached the stage of completion. Quotations remain unchanged.

EXPECTED ADVANCE IN RANGE BOILER QUOTATIONS

Winnipeg.

There is a firm tone to range boilers and although manufacturers have advanced their prices on same, jobbing houses are still quoting at the old price. An advance is expected to be put into effect at any time.

INCREASED PRICES APPEAR ON COTTON WASTE

Winnipeg.

A slight advance has been reported in quotations on cotton waste. Following are the latest quotations:

COTTON WASTE—

NEH Full Bales	16 00
Broken Quantities, per lb.	0 17
10-lb. packages, per lb.	0 18½
REM Full Bales	18 75
Broken Quantities, per lb.	0 20
Colored Cotton, Full bales	13 50
Broken quantities, per lb.	0 14½
Wool Waste, full bales	20 00
Broken quantities, per lb.	0 21

QUIET CALL FOR CORRUGATED SHEETS

Winnipeg. —

With colder weather the demand for corrugated sheets is quieter and prices show no change.

LINSEED OIL STEADY AT REVISED LEVEL

Winnipeg. —

Prices on linseed oil remain steady at $1.15 per gallon for raw and $1.18 for boiled in barrel lots. There is a fair seasonable sale recorded.

TURPENTINE PRICES ON STEADY BASIS

Winnipeg. —

There is no change in quotations on turpentine. The demand is seasonable at $2.45 per gallon lots.

Hamilton, Ont.

Numerous Hardware Products Receiving Prominence in Holiday Displays

HAMILTON, Dec. 14.—Christmas orders are now shipped and total a good volume. Individual orders cover a better range of lines than in previous years, but with quantities on the conservative side, a good sorting on holiday lines is now evident as the regular swing of Christmas buying is felt. Gift hardware is being featured to a far greater extent this year, and much interest is being displayed in window exhibits of holiday goods in general, these being a distinct improvement over former years. Heating equipment, stoves and gas appliances continue to move out well.

Collections show a satisfactory aggregate for November, the volume increasing to good proportions toward the end of the month. Final outstandings for the year are expected to show up a much more healthy condition than at the end of 1921, due largely to careful buying and careful credit that has been in evidence during the past year, and to a real effort on the part of merchants in general to show up a clean statement.

An average trade is recorded in the sheet markets, with a conservative tone in bar iron and steel. There has been a seasonal falling off in radiator trade, together with a quieter session in scrap materials. Little variation is recorded in the non-ferrous metal group, tin and spelter exhibiting an inclination to recover from the recent reaction.

Electrical products are numbered among the numerous seasonal hardware lines at present enjoying a brisk holiday trade. Active sales are recorded for toasters, grills, irons, percolators, heaters, hair-curlers, flash-lights and batteries. Glass ovenware and silver plated flat ware, alarm clocks, skates, hockey outfits, and other sporting goods, as well as auto accessories and toys, are included in the list of products receiving prominence as gift suggestions at this period.

There is little variation in current prices for iron and steel, but conditions are evidently such as to render consumers somewhat cautious until the market is more fully developed. According to local dealers, there appears to be no outstanding reason for price changing at the present time, in view of the somewhat conservative attitude of the markets. Buyers still seem to be in control to a very definite extent, however, although difficult conditions surrounding production and delivery tend to loosen this attitude. Dealers report a good demand for interior building materials, such as metal lath. There is the usual restricted trade during the winter months.

St. John, N. B.

Maritime Hardware Concentrating on Christmas Trade in Gift Suggestions

ST. JOHN, N. B., December 14.—There have been a good many changes in the prices of hardware. While the majority of changes have been of a downward trend, car bits, bit-stock drills and oil clothing are slightly advanced. Seasonable goods, however, for Christmas trade are unchanged. Sporting goods are selling well and also hardware lines suitable for gifts. The sale of general hardware has fallen off a little, as is customary at this time of the year, but it is more than made up by the increase in other lines, such as skates, sleds, framers, hockey supplies, cutlery. All advertising is now devoted to Christmas suggestions, and windows have been trimmed accordingly. One or two of the hardware houses are making a special drive on automobile accessories suitable for gifts, and have circularized car owners in St. John and vicinity. This is a new move on the part of dealers, and the result of these activities will prove interesting. One merchant claims that already a much greater interest has been shown by customers in automobile goods, and that sales have shown an increase.

One of the lines to show an advance in price is that of oil clothing. The latest prices are as follows: Boys' long coats, $46.13. Twenty twenty coats, olive khaki, $85.88. Boys' olive khaki with clasps, $46.13. Slickers, olive khaki, $66. Regular brand black, motorman's with clasps, $59.25. Medium long coats with clasps, $44.25. Towncoats, $99.00. Shield brand, black or yellow, closed sides, bone buttons, jackets, $25.13; pants, $25.13; long coats, $46.13; medium long coats, $40.88. Three-quarter length pants, $23.63. Fish brand, yellow, common barvels, $12.38; petticoat, $27.00. Hats, black or yellow, Cape Ann, $9.75; Squams, $8.25; Storm King, $9.75; Fish, $9.75; Miners' Squams, $9.00; Cale Ann, b606, $12.38. Wagon covers, 7 ft. x 9 ft., $6.62 each; head to tail covers, 60 in. wide, $46.13 doz. Bit-stock drills are now quoted to the trade as follows:

BIT STOCK DRILLS

Size 2/32—$1.13 doz.; 3/32—$1.42; 4/32—$1.58; 5/32—$1.84; 6/32—$2.10; 7/32—$2.36; 8/32—$2.63; 9/32—$3.15; 10/32—$3.68; 11/32—$4.20; 12/32—$4.44; 13/32—$4.82; 14/32—$5.51; 15/32—$6.17; 16/32—$6.82; 17/32—$7.48; 18/32—$8.34; 5/8—$9.45; 3/4—$12.60; 7/8—$15.75; 1 $18.90.

Car bits, No. 606, Ford pattern:

CAR BITS—

No. 606, Ford Pattern 4/16—$11.25; 5/16—$11.25; 6/16—$11.25; 7/16—$11.25; 8/16—$11.25; 9/16—$12.50; 10/16—$13.75; 12/16—$16.25; 13/16—$17.50; 15/16—$20.50.

The above all represent advances. There has been a decline in turpentine, quotations are, barrels $2.55, less than barrels $2.35. Linseed oil also shows a decline, raw, barrels, $1.07, less than barrels $1.17; boiled, barrels, $1.10, less than barrels, $1.20. Cocoa mats are now being quoted 14 x 24 $8.60, 16 x 27 $11.30, 18 x 30 $14.40. Christmas tree holders $7 doz. Butcher knives have been reduced, latest prices being:

BUTCHER KNIVES—

Russell's No. 518—5" $5.65; 5½—$5.85; 6—$6.05; 7—$7.30.

Russell's No. 15—5"—$5.30; 6"—$5.50; 7"—$7.05; 8"—$8.70; 10"—$12.25; 12"—$16.00.

Galvanized corrugated conductor pipe, eave trough, elbows, shoes and hinged hooks all show a decline.

GALVANIZED CORRUGATED CONDUCTOR PIPE—

Machines and Attachments—1—$50.00 net. 3—$48.50 net.

Attachments Only—$9.50 net.

Vancouver, B. C.

Snowfalls Assist Coast Hardware Trade in Movement of Seasonal Goods

VANCOUVER, B. C., December 14.—With the initial snowfall of the season, whiolesalers report an active demand for shovels and coasting sleighs, which indicates to a marked degree, jobbers say, that retailers are carrying no surplus of stocks. Usually there is very little snow in Vancouver, Victoria or New Westminster, and as a result the retail trade is not inclined to stock extensively of winter lines for which the call is spasmodic. However, there is a movement which will account for a good proportion of stocks in distributors' hands.

The temperature on the coast has also been fairly low, and this has meant a run on skates and boots. The weather has also been responsible for a demand for heating stoves and furnaces which are moving fairly well.

The retail trade is into the Christmas rush in earnest, every local store making the most of its window space for display purposes. Enquiries are being made for cutlery for gift purposes and in several instances where wholesalers are sold out, shipments are being brought out by express from the east. Retailers and distributors here have shown a disposition this season to lay out more capital in such special lines in which there is only a transient demand.

Building hardware is on a ten per cent. higher basis this week as the result of advices from the east. It is the opinion of some of the wholesale trade that the advance is due to rush of business which was immediately followed by an increase in the general list by Canadian manufacturers. Deliveries are still slow.

A broker who placed orders in the summer for a line of cheap German pocket-knives has been unable to make good on orders placed. Jobbers were attracted by the prices named and took a chance on obtaining deliveries, which have failed, with the result that rush orders, in some instances were placed with Canadian firms for the holiday trade.

Pittsburgh, U. S. A.

Interesting Developments Recorded on Current Primary Steel Markets

PITTSBURGH, December 14.—The week's developments in the iron and steel market are particularly interesting, although it certainly cannot be said that they stand together in making the market situation either better or worse than was estimated before the information came out.

As to production, the steel ingot production rate in November is found to have been almost exactly the same as the rate in October, about 40,000,000 tons a year, while the rate of pig iron production in November was about 34,900,000 tons a year against a rate of 31,350,000 tons in October, showing an increase of 11 per cent. Merchant furnace production of pig iron increased 20 per cent. and steel works' production of pig iron 9 per cent.

As the steel works cannot possibly have had any stocks of pig iron October 1 on which to draw, the October production of steel was no greater than the production of pig iron would support, and with more pig iron made in November and no more steel, the plain inference is that some pig iron was stocked. As to the merchant furnaces, it is known that recently some of them had to begin stocking iron. As the steel production rate did not change, this has no bearing on the question of steel demand, present or prospective, but it does suggest that possibly some steel interests are disposed to stock some pig iron against April 1 when there may be another coal strike. Some observers express the opinion, as the result of their observations, that the majority of men who are following this subject think it more likely than not that there will be another coal strike April 1. Those who think there will not be rest their opinion largely upon the argument that the operators' and miners' leaders would not have the courage, in the face of public opinion, to indulge in another strike. Surely, however, their record in the past hardly justifies such confidence.

Continuance of steel ingot production at a 40,000,000-ton rate, which has now been maintained since the beginning of October, is in itself an interesting event, since the rate is 15 per cent. above the average rate in the six months preceding when seasonal conditions were more favorable to steel consumption. One can hardly avoid believing that not all he steel being made and shipped is being currently consumed. If buyers are piling steel there must be a particular reason. Normally they are particularly averse to doing so late in the year on account of inventory. Probably the strike fear has an influence in a double way. First, the buyers probably feel it a measure of safety to accumulate some steel, for if there is another strike next April the steel mills cannot possibly be as well fortified in the matter of stocks of coal to meet it as they were in the case of the strike last April. Second, much of the steel now being shipped, at any rate in the case of bars, shapes and plates, is at considerably less than current market prices, the purchases having been made some time ago.

SMALL DISPLAY STAND SELLS

(Continued from page 45)

mediately before the customer being waited on at the counter.

How He Started On Auto Accessories

Mr. Jackson does a good trade in automobile accessories. He tells a story of an incident which started him in the sale of this line. He does not mean to class all garage dealers with the one with whom he had this experience, but it was the case which started him in the sale of this line. He drove his car into a garage and, after a considerable wait during which time no one showed up to wait on him, he commenced sounding his horn at regular intervals. After some delay a greasy individual came from nowhere and very rudely enquired why he was making so much row with his horn. His general demeanor made Mr. Jackson feel that he was more of an impostor than a customer. After making known his need of a spark plug, the garageman rummaged among a lot of dust-covered stock on the shelves and produced a somewhat worn looking box with the name of a well-known spark plug on it. Mr. Jackson opened the box and found a spark plug which was obviously second-hand and which, furthermore, was not of the make as represented on the box. On protesting the matter, the garageman asked very vehemently: "Well, do you want it?" Mr. Jackson assured him that he did not and promptly drove away. It did not take him long to make up his mind that even though this case was not representative of garages as a whole, that there was a splendid opportunity for a hardwareman to sell accessories providing he gave good service to customers.

Curb Pump Helps

He has developed an active trade in accessories, with the aid of a curb pump, and finds his business chiefly runs into lines such as tools, headlights and bulbs, spark plugs, bolts, etc., being general lines. He finds that the articles which might be better referred to as "frills" do not sell as well, particularly as a number of them are now to be found as equipment on new cars being produced.

"Without a gasoline pump the hardwareman's chances in the automobile accessory business are not so good," says Mr. Jackson, who believes the pump constitutes service which the hardwareman must be prepared to give in order to attract customers in competition with garages.

Selling Paint to Christmas Crowds

How a Montreal Hardwareman Used His Little Boy to Distribute Circulars Interesting the Christmas Shoppers in Paint and Varnish Specialties—Some Novel Uses for Seasonable Specialty Lines

WITH THE usual rush of Christmas shoppers on one of Montreal's busiest thoroughfares a local merchant in this locality was of the opinion that the paint department could also show good returns if advertised, and paint products prominently displayed. Other lines in the store were sure to sell well, but in the past paint and varnish were always more or less "back numbers" during the holiday period, when time and energy were spent on pushing the regular lines suitable for gifts. People, however, were surely anxious that their homes should present a bright and cheery appearance, and many of them would be persuaded to buy if a suggestion were offered.

An experiment therefore was planned and the pushing of paint sundries along with other seasonable goods was a feature of the Christmas trade in this store. R. LeTourneux stated that preparations meant advertising in the local paper quite extensively two or three weeks before Christmas, and at that time when Christmas shopping commenced in earnest, he brought his four year old son, dressed in painter's clothes and cap, to the store each afternoon to assist. When customers were purchasing their goods Master LeTourneux would approach them with a circular inviting their attention to the paint department.

Printed on the pamphlet was the following:

"There are paint products here to add that touch of brilliancy to the interior of your home which reflects itself in the gaiety and sparkle of your spirits at the most festive season of the year.

"Do the radiators need painting? Use —

"Are the stove pipes getting rusty? Buy a tin of — stove pipe enamel.

"If there are some chairs, tables, etc., that should be renovated — will make them like new.

"The linoleums and oilcloths will have a new lease of life with one coat of — floor varnish.

"Young people's feet will dance all the more blithely if you wax your floor with — wax.

"There are 101 ways to beautify and preserve your property. Take home a can of — paint."

When interviewed by Hardware and Metal, Mr. LeTourneux stated that earlier results were very encouraging. Many paint specialties or sundries, such as floor wax, stains, radiator paint, stove pipe enamel, linoleum varnish, etc., were good sellers and he was convinced that practically none of this business would have been done if a special drive had not been planned.

Some good ideas for extending the field of usefulness of certain specialty lines and therefore of broadening the possibilities for business are given by another hardware merchant as follows:

" 'Before and After' exhibits are almost always effective with us. We recently had a very attractive window display of this kind. An old radiator section was refinished, with each coil in a separate color—gold, aluminum and various shades of enamel suitable for use on radiators, leaving three coils at the end in their dingy, unsightly condition without refinishing. The vari-colored effect was most striking. To complete the display, ribbons were run from the radiator coils to cans of paint of the same color. This proved a good salesman."

Leather Dressing

This merchant continues: "The same leather dressing that we sell for automobile tops and cushions is good for the leather upholstered davenport, and the big leather chairs in the living room. Dad's old easy chair may look out of place in the midst of a lot of new furniture, but it will look a lot better if given a coat of varnish stain, and the ease with which it can be applied has saved many a piece of furniture from the discard.

"For the floors, sell crack filler and wax. The young people will dance, as well as the old. The phonograph people are opening a wide market on floor wax. If you are on good terms with the local phonograph dealers, they might give you the names of everyone to whom they sell a machine, and then you could go after the same people to develop sales of wax, weighted brushes and floor varnish.

For the Dining Room

"What a field there is for the sale of specialties just for the equipment of the dining room; that one room where in many homes the whole family gets together, and where at Christmas will be held the family reunion. Food is much more enjoyable when taken in pleasant surroundings. We all know that, but many housewives do not realize how easy it would be for them to make their dining rooms more cheerful.

"Floor wax on the top of the dining table and buffet will save the surface from many a scratch. The floors are constantly in need of a coat of varnish, especially the path leading to the kitchen. Enamel for the woodwork, flat wall paint for walls and a new coat of stain for the baby's high chair will also be needed.

"The dining room is due for a cleaning up if we show them how.

For the Motorist

"For the motorist, keeping his own car in condition, top and seat dressings speak for themselves, as do metal polish and auto finishes. Aluminum enamel is good for exhausts, manifold pipes, outside of crank cases, oil pans and any number of places around the working parts of the car that should be painted to prevent rust. And then, too, it is much easier making repairs on a car where the surfaces are light in color instead of dark.

To Our Friends
Everywhere.

Out of your friendship has arisen the success that has marked our progress; the pleasures we have sensed, and all the worth while experiences which have gone to elevate and humanize our business.

At this happy conclusion of the year it is but natural then for me to express my personal appreciation and hearty thanks to:

Our Agents, whose confidence and enthusiasm,
Our Patrons, whose good will and loyalty,
Our Competitors, whose courtesy and respect ..
.. it has always been our privilege to enjoy.

Earnestly we hope our ideals and practices may always merit your estimation. Heartily we reciprocate your sentiments, and sincerely we wish you and yours the happiest of Christmases and a continuity of the best that this Happy Season can bring.

Very cordially yours,

RJP/DLB.

SELLING PAINT TO CHRISTMAS CROWDS

(Continued from page 66)

"Certain varnish is fine for painting the underparts of the body and floor boards. Tough, durable, and inexpensive, it is much better for the careful car owner to touch these surfaces up now and then, than leave them exposed. Try it on your own car first Mr. Dealer and you will sell with more enthusiasm."

H. B. Connon in the American Paint and Oil Dealer says: "Don't make your paint department merely a house-paint, a barn-paint, and a lead and oil department. While you can make profit out of handling these heavier goods, the best profits are made in the sale of varnishes, enamels, stains, buggy paints, wagon paints, screen enamel, inside wall paints, and specialties of this nature.

"I believe that more than 25 per cent. of the varnish that is sold in the average community is used on new work. Who has a better chance of selling varnish for this new work than you?

"The women are largely responsible for the purchase of the small package goods, such as enamels, floor paints, stains, etc. You can get the women to come into your place, no matter your location, if you make the effort to establish a reputation for being the paint authority of your community.

In this matter of handling lead and oil, let me say that, while the profit is not large, they are necessities of a well-conducted paint department, and you must have them, for you want to be able to give any man anything that he calls for that can be reasonably expected to be found in a paint store. However, in handling lead, establish a price for it, and stick to the price. Know that your lead is of standard make, but don't stock too much at one time.

TWO WEEKS' COURSE IN EXPORT TRADE

In conjunction with the Department of Trade and Commerce, Ottawa, and with the co-operation of the Canadian Manufacturers' Association, an extension course in export trade is being planned by the authorities of McGill University. The course will comprise two weeks of intensive study of the underlying principles of export trade and of familiarizing the students with the practical details of management. During these two weeks a series of lectures and addresses by professors of economics and by officials of the Department of Trade and Commerce will be given. The course will open on Monday, January 29, and will conclude on February 10.

For this class of business men the University hope to interest in the project, the conditions are ideal—no specified entrance requirements, beyond a very moderate fee, no examinations and no certificate. It is particularly devised for the assistance and training of export managers, assistant managers and clerks, and co-operation of export firms in this work is particularly hoped for.

H. R. Pousette, director of the Commercial Intelligence Service, Ottawa, who initiated the idea, in connection with the course states as follows:

"It is not pretended that two weeks are sufficient to train an export manager. But we do believe that it is sufficient to start an energetic, intelligent and ambitious young man on the way to acquiring a scientific knowledge of the business of export trade. These extension courses should be regarded in the light of an experiment, the success of which depends upon the Canadian business men. If supported, they should be but the forerunners to longer and even regular courses at the University. When it is realized that Canada stands fourth among the nations of the world as to volume of goods exported, and first on a per capita basis, the necessity for such knowledge will be appreciated."

LONDON HARDWAREMAN ILLUSTRATES HOW GOOD PAINT IS CHEAPER THAN POOR GRADE

London, Ont.—"People do not realize the economy of painting, or at least the saving involved by the use of the best paint securable," declared J. A. Page, hardware merchant, 807 Dundas street, "Just to show the difference in paints," continued Mr. Page. "A man had a house to paint, and he figured out that he had 2,700 square feet of surface to cover. One firm was selling a supposedly good paint at $4.35 a gallon, which was only guaranteed to cover 300 square feet per gallon, using two coats. This man purchased what he though to be the cheaper paint.

"Now, if he had thought of quality before price, he would have been much better satisfied. And in the long run, the use of the dearer paint would have been cheaper by far.

"Had he talked this matter over with me, I could have sold him paint at $5 a gallon which is guaranteed to cover 450 square feet per gallon, using two coats. In that way a saving of more than $9 would have been made, and better results obtained.

"A citizen told me a few days ago that he had decorated his entire home while out of work, and was surprised how little it cost him, and what an improvement it made."

OIL REFINERY SUFFERS FIRE LOSS

Loss of $40,000 was caused when fire destroyed a new filtering plant at the refinery of the Canadian Oil Co., Petrolia. The plant was completed during the summer and had been in operation about two months.

Dean of Paint Salesmen Enthuses Over "Save the Surface" Campaign

ROBERT BREMNER

Veteran traveller in Western Ontario for the Canada Paint Co., who gives his ideas of the Save the Surface campaign herewith.

THE FOLLOWING opinion of the value of the Save the Surface campaign, as recently expressed by Robert Bremner, veteran travelling representative of the Canada Paint Co. in Western Ontario, is of more than passing interest coming as it does from one who has sold paint and varnish in Canada for over forty years. Everyone knows that it is difficult to initiate one with such a record into new adventures in the selling world. Mr. Bremner might be called the dean of paint and varnish salesmen in Canada. He is still a worthy representative as attested by his statement that he can "still lick his weight in wild cats."

Concerning the Save the Surface campaign he says: "I am fully in accord with it as being the best and most effective style of advertising that paint and varnish manufacturers have ever done. The results are very apparent, for instance, at Hamilton, my home town, while going down town one morning recently, I counted forty-two jobs of painting in progress. Painters tell me there never was such a rush of work as this fall and especially for outside."

(Sgnd.) Robert Bremner.

No Price Cutting!

The sales price on Genuine Elephant White Lead has and always will be strictly maintained according to our regular Genuine Elephant White Lead price schedule.

This policy has won the hearty support of merchants and jobbers throughout Canada as it assures a square deal to all.

We solicit the support of merchants and wholesalers in maintaining the Elephant selling schedule in order to assure a fair margin of profit to both.

The high grade and uniform quality of Genuine Elephant White Lead does not permit of price cutting on our part.

Genuine Elephant White Lead richly merits its wonderful popularity on account of its pure permanent whiteness, its smooth fine finish and lasting qualities.

Weekly Paint Markets

Montreal

MONTREAL, December 14.—The feature of the paint markets this week is an advance of three cents per gallon in linseed oil quotations. Flax-seed markets, both domestic and foreign, are firmer, the latter showing a gain notwithstanding recent reports of big crops for the coming season. Turpentine again displays an easier tendency, with demand both locally and on primary markets reported quiet. In the south a further drop in prices was recorded earlier in the week and with this tendency continuing lower prices locally would not be surprising in the near future. Opinions are again expressed, however, that the present easier tone is not for long standing, and higher levels will be reached before the new crop in the spring months. Last year's crop has been fairly well disposed of, and when demand becomes more active it is thought questionable whether or not ample supplies will be obtainable. There is still a strong tone reflected in white lead in oil although there are rumors of an unsettled market, with price shading in some quarters. Paints, varnishes and sundry lines, also brushes, are selling well for future delivery, bookings said to be quite satisfactory, and generally much better than last year at this time.

PAINT BOOKINGS ARE IN SATISFACTORY VOLUME

Montreal.

Reports from paint manufacturers are to the effect that bookings on paints, varnishes and sundry lines are coming to hand in quite satisfactory volume. Prospects for next season being a good paint year are therefore bright. With the undertone of the market in a firm position, dealers are doubtless not as reluctant in placing orders for early deliveries as in recent years. Regarding the future price trend of products in general, opinions are unanimous that from the viewpoint of raw material costs there is an upward tendency in the market, but whether or not revisions to higher levels will be announced after the first of the year is considered problematic. Some state that with production costs on the increase they may be forced to quote higher figures, although these will not likely develop unless the undertone of the market continues to show firmness. Certainly chances of reduction seem very remote for the coming season.

STRONG TONE STILL REFLECTED IN WHITE LEAD

Montreal.

With raw materials continuing on a firm trend, there is still a strong tendency in the undertone of white lead in oil and quotations are considered on a very firm basis by producers. There are again rumors of unsettlement, however, and certain instances of price-shading on spring bookings. Some are of the opinion that with the market in its present strong position this unsteadiness will gradually right itself, while others state that the firm tone is off-set by the present tendency. Bookings up to the present have been encouraging and point to a good season next year. Present unchanged quotations are $12.25 in 5-ton lots, $13.00 in 1-ton lots, and $13.35 in less quantities.

EASIER TONE AGAIN NOTED IN TURPENTINE

Montreal.

Although an easier tone continues in the turpentine market, local prices are again unchanged. Importers state that with local stocks gradually dwindling a slight recession in the near future would not be surprising, unless a sudden turn is noted in primary centres. In the south the movement is also limited and a further decline was recorded earlier in the week. The opinion is generally expressed, however, that the present tendency will not be for long standing and higher values will be reached before the early spring months. Following are unchanged quotations:

TURPENTINE—	
1 barrel lots	2 10
2 to 4 barrel lots, per gal.	2 08
Broken lots	2 20

PAINT BRUSHES ALSO SELLING IN GOOD VOLUME

Montreal.

Not only is there a good amount of activity in paint circles on future delivery orders, but brush manufacturers also report a very satisfactory movement of their lines, sales being well in advance of last year. Bookings this year commenced a little earlier than usual as prices were adjusted on September 1, for the later months. In these products also there is a strong undertone in the market owing to prevailing costs of raw materials and the active selling movement since the last revision. One local manufacturer stated that there was certainly no possibility of easier prices, on the other hand a revision in the other direction would be warranted under present conditions after the first of the year.

ANOTHER ADVANCE IN LINSEED OIL QUOTATIONS

Montreal.

Linseed oil quotations are advanced three cents per gallon with a firmer tone continuing in the market. Domestic seed markets continue to make a gradual gain and a further strengthening tendency is lent by the advance in Argentine seed. Reports from there state that the recent unfavorable weather had little ill effects on the crop, but nevertheless prices began to climb. Whether or not this is a temporary condition is hard to say but in view of the good crop reported it would seem probable that prices will not reach much higher figures. Demand for linseed oil locally is quiet, but in seasonal volume, and little further activity is looked for until after the turn of the year.

LINSEED OIL—	Raw	Boiled
1 to 2 bbl. lots, per gal.	1 08	1 10
5 to 9 bbl. lots, per gal.	1 03	1 05

Less quantities, add ten cents per gallon.

Toronto

TORONTO, December 14.—A review of the current paint markets reveals the fact that business in turpentine continued to drag along this week. Reports from the south indicate a much easier trend, which is reflected to some extent locally, although no price changes have been made. Inactivity at Savannah caused the increased weight of accumulated offerings to result in a sharp price decline. It is stated that receipts have been quite liberal for this time of the year while shipments are correspondingly light. Holidays and the inventory period and similar reasons which would induce buyers of linseed oil to hold stocks down around the end of the year are already making themselves felt, with a lessening in the demand for both oil and meal. Flaxseed has been firmer and while buyers of linseed are evidently content to hold off for the present, there is no movement to shade prices. In fact, they are quite firm. Buying interest in some quarters seems to be centered upon more distant positions.

WEAKER TONE APPEARS IN TURPENTINE

Toronto.

Chief interest in turpentine this week centres around the Savannah market which has exhibited further weakness. However, no corresponding developments have been recorded locally, although the easier level of $2.10 per gal-

(Continud on page 72)

A Happy Christmas

A Greeting that—like Jamieson's Products—has "stood the test of time" and tendered now in all sincerity to the Canadian Hardware Trade.

May it be truly a Happy Christmas for you all, and may the New Year see the realization of your fondest hopes in increasing business prosperity.

Calgary **Montreal** **Vancouver**

If interested tear out this page and place with letters to be answered.

TORONTO PAINT MARKETS

(Continued from page 70)

lon has appeared in certain quarters. This trend again brings into effect a variation in prevailing distributing prices, the extent of the range being five cents per gallon. The tone of the market in the south has been decidedly easier, although such lower levels have fail to stimulate current buying, as trade is usually on a moderate scale at this time of the year, and with the inventory period at hand, it is stated that there remains little inducement to increase stocks.

TURPENTINE—

1 barrel lots	2 10	2 15
2 to 4 barrel lots	2 09	2 14
5 gallon lots	2 25	2 30

Less barrels, add 15 cents per gallon.

Turpentine steel drums galvanized 5c. per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, Montreal, but freight may be equalized from any of these points.

QUIET TRADING IN LINSEED OIL MARKET

Toronto.

There is little trading evident in linseed oil on the local markets, but no further change has resulted in prevailing quotations as the flax seed prices are again recording a firmer attitude, both on primary and domestic centres. While the movement of linseed is moderate at this time of the year, however, the firmer trend in seed is described as assisting in the maintenance of existing price levels. Distributors state that current requirements are seasonal for this period.

LINSEED OIL—

	Per gallon Raw	Per Gallon Boiled
1 to 2 barrels	1 10	1 13
3 to 4 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less barrels, 15 cents per gallon.

SHELLAC PRICES ON FAIRLY STEADY BASIS

Toronto.

The current requirements in shellac locally are described as just moderately active, but prices continue fairly steady. This is generally attributed to expectations regarding receipts from primary markets being more restricted during the ensuing month o two. While trade is quiet, therefore, this factor has a tendency to steady prevailing quotations, which remain as follows:—

SHELLAC—

	White	Orange
Five gallon jugs	4 25	3 75
One gallon jugs	4 85	4 45

RAW MATERIALS CONTRIBUTE TO FIRM UNDERTONE IN WHITE LEAD

Toronto.

The general situation in white lead in oil remains the same, with a firm trend in primary centres. That some unsettlement has crept into the market, however, is recorded in certain quarters, th development being described as in the nature of shading to attract orders. That any tendency of this kind will be readjusted in the near future is the opinion expressed in local distributing circles, as it is pointed out that while linseed is in a fairly steady position, pig lead continues strong. Therefore, the feeling that the existing prices may be revised upward has also become prevalent, but no step in this direction has yet materialized and current local quotations are unchanged as follows:—

WHITE LEAD IN OIL—

In five gallon lots $12.70 per cwt.
In one ton lots, $13.45 per cwt.
In less quantities, $13.80 per cwt.

SPRING PAINT BBOOKINGS IN FAIR VOLUME

Toronto.

Spring bookings of paint and varnishes continue to provide interest in manufacturing and distributig circles. It is stated that current prospects indicate many increased opportunities for a brisk volume of business in paint and the allied products during the spring season. Quotations on all lines remain unchanged, but it is pointed out that a firm undertone is apaprent in the markets, primary raw materials entering into the question of production costs to some extent. Certain manufacturers, however, state that very little in the nature of price developments is looked for. In general, however, dealers record the fact that the proportion of bookings for spring are satisfactory and slightly in advance of similar business tabulated at this time last year.

WINDOW GLASS MOVEMENT NOW SUBSIDING

Toronto.

Fair weather conditions have primarily assisted in prolonging the current movement of window glass, which has also been stimulated by the amount of fall building activity. Although the current movement of this product has now subsided to some extent from the brisk volume recorded during the past few weeks, yet a fair degree of seasonal trade is recorded. It is expected that the balanc of th season's requirements will be taken care of from stocks, which, although depleted, are described as moderate for this time of the year. Prices are continuing of a firm nature, the recent revision in discounts being in effect.

BOOKING EARLY SPRING BRUSH REQUIREMENTS

Toronto.

Brushes are no attracting attention in view of placing orders for 1923 spring requirements. Manufacturers and wholesalers record that in some cases orders are now being placed for spring delivery, and preparations are generally under way for another brisk season in these products. No great volume of activity, however, is looked for in certain quarters until the annual inventory period is safely negociated. It is estimated that both collective and individual efforts in the paint industry will again be centered upon establishing new sales records for 1923, and that a direct reflection of this anticipated activity is naturally expected in the brush trade.

"SAVE THE SURFACE" IN AFRICA

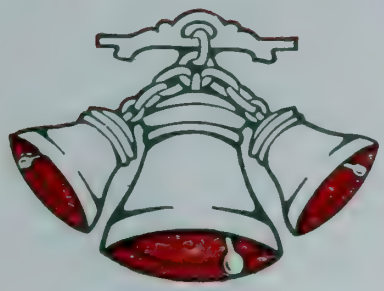
The spreading of the gospel of "Save the Surface and you save all" is proceeding apace. In South Africa, Geo. Parker Wood has interested himself to the extent of getting newspapers in Johannesburg, Durban, East London, Port Elizabeth and other important centres to publish some of the articles issued by the "Save the Surface" campaign, also he has written articles for the local trade newspapers on "Salesmanship," embodying the "Save the Surface" theory. Mr. Parker Wood is in communication with the Secretary of the Canadian and U. S. "Save the Surface" campaigns and is endeavoring to get their support for the extension of the work to South Africa.

SAYS CANADIAN TRADE IMPROVING

St. John, N. B.—Major Gordon B. Johnson, of Glasgow, Canadian Trade Commissioner for Scotland and Ireland, arrived in St. John last week, completing a three months' tour of Canada from coast to coast. He said that he found trade prospects brighter than they had been for the last two years, and improving all the time. In St. John he has been in touch with some of the prominent lumber exporters, and brush and box manufacturers.

RECEIPT TAX HANDICAP TO 'PHONE TRADE

(Continued from page 43)



sued in these departments are very common day after day."

Handicap in Telephone Business

Another merchant stated that in doing a cash trade over the counter they are not called upon to give receipt at all times. A cash register issuing receipts is used, but he is convinced that quite often the customer puts this in a pocket or hand bag and it is forgotten. In future this slip will not be given the customer unless asked for.

An extensive trade, however, is enjoyed by this firm over the telephone. Stiuated in a thickly populated section of the city, the telephone is used by many housewives and men in offices for delivery orders. These people are for the most part in fairly good circumstances and this store allows credit on most of the business secured in this way. A host of monthly accounts therefore is issued, and in payment people usually present the statement which must be receipted. A few are in the habit of sending cheques through the mail marked "payment in full of account to date," or othere words to the same effect, but usually the statement is also enclosed and a receipt is returned. Some of the burden might be lifted by asking customers to mark their cheques the former way, but this would appear "small" business to the individual who did not understand the position the merchant was placed in when called upon to pay a receipt tax on a large number of payments each month.

Christmas

1922

ONCE MORE as the year comes to a close and Christmas approaches, we want to express to you with whom our business relations bring us in contact our fullest appreciation of your courtesies and to extend to you our heartiest greetings.

May you enter upon the New Year with that knowledge that we are approaching a period of prosperity and promise, and may yours be a full share of that prosperity.

1923

—*A MESSAGE OF THANKS:*

IN greeting you again at this festive season with the season's compliments, we would like to express our thanks also for the spirit of goodwill and friendliness which has been shown by our patrons during the year just closing. Our hope and determination is that we will be able to render even more efficient and greater service during the year 1923 and succeeding years.

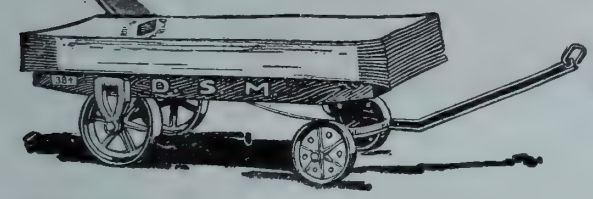
INVENTORY TIME



Will soon occupy the dealers and jobbers attention. You will know what is on hand, **Galvanized Sheets** as well as other items.

Our Inventory occurs December 1st so that we can prepare a month in advance to fill your orders in January. We're now engaged in making up short items, both **"Premier" Steel** and **Toncan Metal Galvanized Sheets.**

Next year our customers will be better served in every way than heretofore.

We hope you'll take advantage of this.

Holiday Greetings

In a few days the Christmas Bells will ring out the age old Angel song of "Peace on earth, Goodwill to men." Already the murmurings of their joyous notes are heard in the shops and public places, telling us that the Christmas spirit is abroad.

In extending to you our heartiest greetings and sincere good wishes for your health and happiness at Christmastide and throughout the New Year, permit us to express the hope that the Merry Christmas Bells will ring out all of your troubles and cares and ring in an abundance of pleasure and prosperity.

FORTY YEARS OF SUCCESSFUL PAINT MANUFACTURING

FOUNDED ON INDUSTRY INTELLIGENCE AND INTEGRITY

A Merry Christmas

And a Happy New Year

It is with sincere appreciation of your goodwill throughout this, the greatest year in our business, that we again send forth the old, old Yuletide Greetings.

Particularly do we wish to thank those whose loyal co-operation has enabled us to reach the Company's fortieth year of business.

That the coming year will bring you health and happiness is our sincere wish.

REASONABLE PROFITS
FOR
WHITE CAP WASHER DEALERS

To the dealer who desires to handle a profitable electric washer agency for the year 1923, we would recommend the WHITE CAP ELECTRIC WASHER as the machine that will bring REASONABLE PROFITS.

This washer has been a tremendous sales success from coast to coast from the very first day it was put on the market. This year our branches show big increases in their WHITE CAP WASHER SALES.

We want dealers who are business go-getters, to swell the ranks of our present WHITE CAP DEALERS, who are cashing in on their big sales opportunities.

Write us today for full particulars.

THE WHITE CAP WASHER TRADE MARK

BEATTY BROS. LIMITED

HEAD OFFICE - FERGUS, ONT.

Branches : London, Ont. Toronto, Ont. Montreal, Que. St. John, N.B. Winnipeg, Man. Edmonton, Alta. Vancouver, B.C. London, Eng.

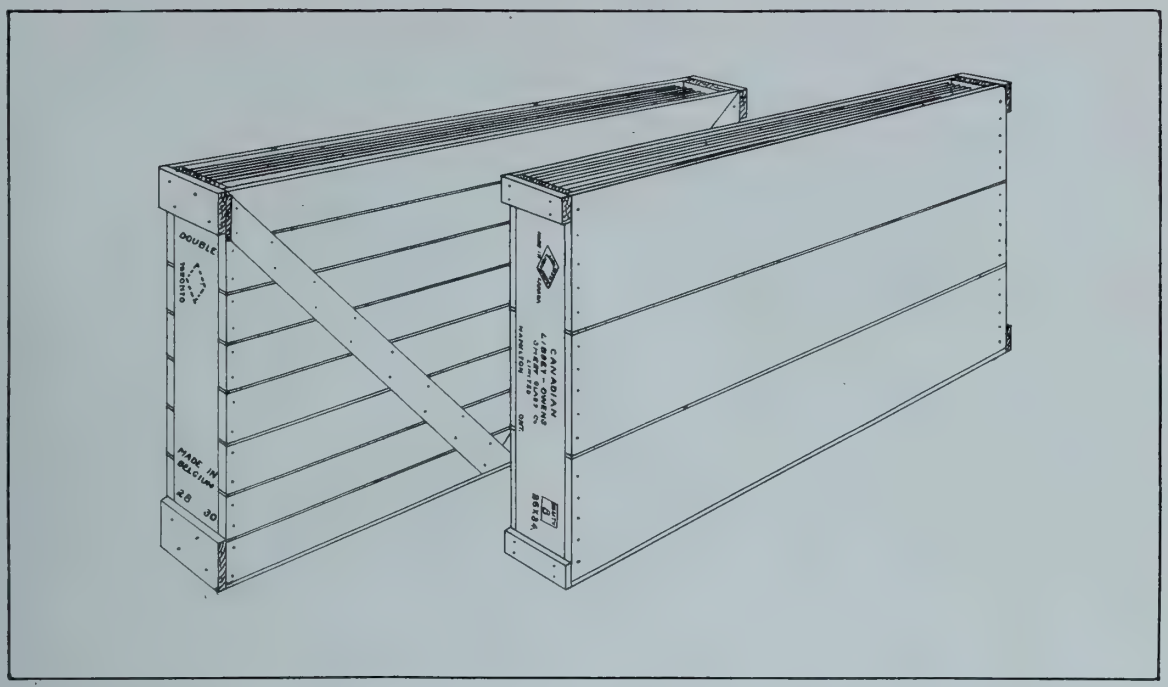
COMBINATION SQUARES

LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS



JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.
On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

SEND FOR CATALOGUE — LUFKIN — MECHANICS' TOOLS

CRYSTAL WARE

Full Line of This New Triple-Coated White Ware Now in Stock

The vogue for high class white enameled ware grows stronger every day. And we produce Crystal Ware to satisfy this demand. Merchants handling it are reporting most enthusiastically on Crystal Ware. It is a good line.

Recent additions to the SMP Crystal Ware line include Rice Boilers, Savoy Cookers, Convex Kettles, London Kettles, Preserving Kettles, Straight Kettles, Dish Pans, Flaring Sauce Pans, Straight Sauce Pans, Potato Pots, Roasters and Roasting Pans. This makes Crystal Ware a complete line—the equal of which cannot be found anywhere on the market.

Crystal Ware is triple-coated clear white enameled ware, trimmed on edges in royal blue. All pails have black enameled hardwood grips. It has the finish of finest white crockery without the breakage. It appeals to women because of its unusual beauty, and because it harmonizes with the porcelain white trims so popular on electric, coal and gas ranges.

Crystal Ware sells on sight. It is proving one of the best propositions that any hardware man can handle. It makes a beautiful window display and is a handsome line to display inside your store. Be wise and place your order for Crystal Ware immediately.

'RICE LEWIS' NEWS

Merry Christmas
and a
Happy New Year

Enter New Year Resolutions in This Book

The season has come again, the 75th time for Rice Lewis & Son, Limited, when we wish the hardware trade a Merry Christmas and a Happy and Prosperous New Year. It is with the utmost sincerity that we express this sentiment.

But with the coming of the New Year come also new duties and new obligations. One of the first of these new duties that follows the rush of the busy Christmas season is that of stock taking.

As you are engaged in your inventory and notice lines that need replenishing remember that our stocks are in good shape, we solicit your business. Make a note in your New Year Resolution Book to send us your mail orders, which will have prompt attention.

Stocking and Featuring—

the ORIGINAL SAMSON BIT BRACE if not already being done by you, deserves your serious consideration from the standpoint of PRESTIGE AND PROFIT.

The ORIGINAL SAMSON BALL BEARING BIT BRACE, always popular with the man having a fondness for first class tools, has just been further improved by the addition of a device which acts as a stop when the chuck is opened to its full capacity, thereby keeping the shell and jaws in proper place and in perfect alignment.

The No. 915 Safety Hasp

A Little Better Than The Others

Smooth even action is assured by the accurate spinning of the pin and by snug-fitting joints.

The strap of the hasp is off-set at the joints, allowing it to lie perfectly flat along the front surface.

The screw holes of the hasp and staple plate are countersunk, are perfectly smooth and are concealed—making it impossible to remove the hasp when locked.

The movable plate staple takes care of door shrinkage—there is seldom need of re-setting.

The vertical staple permits the padlock to hang straight. The No. 915 Safety Hasps come neatly packed: one dozen hasps in a strong attractive box. Sizes 3″, 4½″ and 6″.

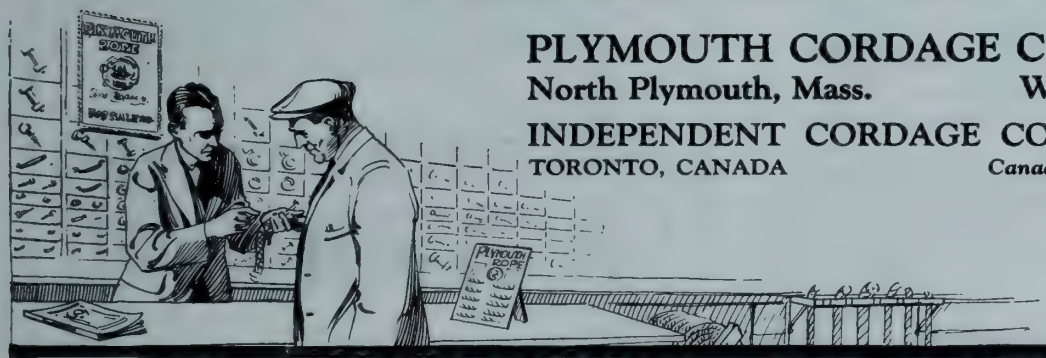
The General Manager said:—

"and Plymouth Rope made that success possible"

RECENTLY the general manager of a very successful company building heavy machinery told a friend some of the problems which they had been obliged to overcome.

He described the bringing out of the machine upon which their reputation had been built and said:



"For a long time we were afraid that it would be a failure. You see, it depended for its operation on a rope drive, and we could not find a rope that would stand up under this service more than three months.

"We tried nearly every rope on the market. Customers who were forced to shut down every ninety days while a new rope was installed began to complain and threatened to take the machine out.

"It was then we tried Plymouth Manila Rope. It lasted eighteen months. We equipped all of our machines with this rope and found that Plymouth Rope gave consistently six times the service of any other rope we could buy. For years now hundreds of those machines have been in successful operation, and Plymouth Rope made that success possible."

To dealers who are anxious to build up a reputation for high-quality merchandise, Plymouth Rope offers that opportunity, and in addition, the Rope-by-the-Foot method enables them to increase their rope profits.

Full information about this money-making method of rope selling sent on request.

COGHLIN
Springs
FOR FORDS

We give the same exacting care to the production of springs for Fords that we give to the manufacture of Coghlin Springs for larger cars.

Only the finest quality of alloy spring steel is used in the springs we make for Ford. They are heat-treated, oil tempered, and assembled in graphite. Every spring undergoes an exacting test before it leaves the factory.

And each leaf of every spring bears the Coghlin trademark.

Our experience of more than half a century of making springs to meet the exacting conditions of railway use gives us a knowledge that guarantees first grade service from every Coghlin Spring you buy.

Dealers: If you take pride in giving your customers full value and satisfaction, DEMAND Coghlin Springs from your jobber. If he cannot supply you, write to us.

Westinghouse

The Perfect Electric Range

The Westinghouse types "M.H." and "H-1."

Ranges are the culmination of fifteen years' experience in designing and building Electric Ranges and are built to last a lifetime.

The **Westinghouse** is the only range that has its fuses so located that they are easily accessible and each directly beneath the switch controlling the circuit it protects, so that renewing a fuse is but the work of a few seconds.

The **Westinghouse** is the only range in which all the heating elements are of the open type and are removable without disconnecting any wires. They plug in just like your electric iron or toaster in your lighting socket. Anybody can do it—no need of an electrician.

The **Westinghouse** is the only range having solid bus bar construction of the heater-box, which means that every wire is absolutely protected from the effects of heat.

The **Westinghouse** is the only range that has top heating elements with two distinct heating areas, 6″ and 8″, which permits the use of smaller cooking utensils without waste or loss of heat.

The **Westinghouse** was the first range to use a crumb tray and heat reflector under the top heaters, thus ensuring faster heating.

The **Westinghouse** is the only electric range that can be secured equipped with a thermostat and alarm bell, which rings automatically when the oven reaches the heat desired.

The **Westinghouse** is the only range having a seamless porcelain enamel-lined oven with all the oven parts and heaters removable, permitting the oven to be cleaned thoroughly and with ease.

The **Westinghouse** is the only range which has a 2,000 watt heater for broiling—the only efficient broiler on the market.

The **Westinghouse** is the only range employing heat baffling in the oven, ensuring even heat distribution.

The **Westinghouse** was the first range to use the reciprocating double pole switch permitting turning from any one position to any other position and in either direction.

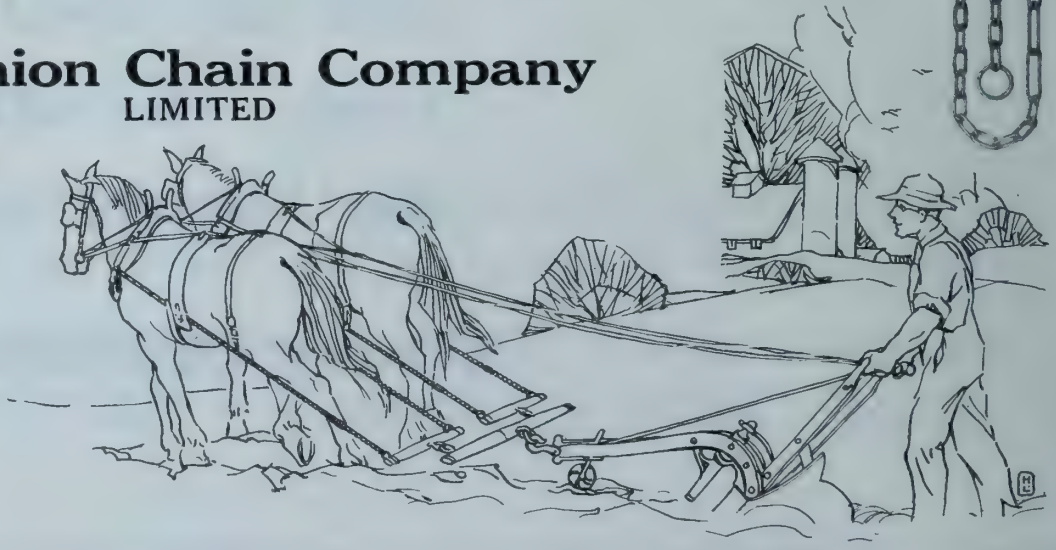
ENGLISH PATTERN TRACE CHAIN



Cautious buyers insist on purchasing trace chains that have been the standard for years. They have confidence in the English Pattern trace chains manufactured by the Dominion Chain Company. They know that every one of these trace chains is tested to one-half the average breaking strain, and that if any chain falls short of its rated strength, it will be cheerfully replaced.

These English Pattern Trace Chains are formed and electrically welded on automatic machines, thus insuring uniformity of construction and strength. Made with ring or hook.

ATKINS STERLING QUALITY SAWS

Every Saw User Knows Atkins Silver Steel Saws—

It means that the farmer, and the carpenter, and the mechanic, also the butcher, the grocer and the householder, are sold on the high quality of Atkins Sterling Quality Saws.

We are advertising them through the leading trade journals and other papers.

But you, are you cashing in on our advertising?

Are you showing the public that you have Atkins Saws for sale?

Are you using our free window display service? If not, then write us for our plans to help you sell more saws—Atkins Sterling Quality Saws.

How About This?

"A Modern Sewage Disposal System for a Rural Public School"

The attendance at the Mount Dennis public school is 400 persons. A sewage disposal system—sewage pump capacity 300 gallons per minute—has recently been installed. You will want to read the article dealing with the installation—don't forget: it will be in SANITARY ENGINEER.

"Big Changes Suggested in Taxation Measures"

In conference behind closed doors, new taxation directly affecting plumbers, tinsmiths, etc., has been prepared. A special report from SANITARY ENGINEER has followed up these conferences closely and some valuable inside information on the probable trend of such changes will be given in the December 15 issue.

"Further Sidelights on Plumbing Installments"

If you haven't been following Major Anthes' witty articles on plumbing and the plumber—"the guy that makes water run upstairs"—you want to start right in with this one. The stories are funny and the illustrations are screams, but every one of them is pointed with an idea for increased business for the plumber. This particular article is on how to sell high class plumbing fixtures. Read how this plumber got a line on prospective business by following the lumber wagons. Yes! It's in the mid-December number, too.

"Problems of the Inventory this Year"

If you just naturally hate the thoughts of inventory taking, you'll find relief from your problems in this article. It's written specially for SANITARY ENGINEER by S. W. Hafner, head of an accounting firm showing the particular troubles to be met and overcome this year.

And Most Important of All—"Markets"

Do you follow the market price fluctuations of your staple supplies? Do you take advantage of a favorable market to buy in? Do you know what the saving is between haphazard buying and buying at the right time?

SANITARY ENGINEER Price Quotation Section will inform you twice monthly of market conditions and will place before you quotations on all your supplies.

Read the headlines over again. Do they interest you? Do they make you want to read the articles and find out what they are pointing to? Act on that impulse! Treat yourself to a well-earned Christmas present by subscribing to receive SANITARY ENGINEER regularly—every two weeks for all next year. It will be a pleasure—and it's a sound business investment for BETTER BUSINESS IN 1923.

Send the Coupon While You are Thinking of It—NOW!

Would Compel Passing On of Sales Tax

Early Discussions of Joint Conference Recommendations Bring Out Plan for Eliminating Absorption of Any Part of Sales Tax —Would Favor Imported Goods Says One Manufacturer—Why a Tinsmith is a Manufacturer for Tax Purposes

THERE HAVE been some discussions in the last few days of the resolutions which were framed at the joint meeting of the manufacturers, wholesalers and retailers as dealt with in December 9 issue of Hardware and Metal, but there is little unanimity of opinion as yet. A number of wholesale hardware firms, members of the Canadian Wholesale Hardware Association, have expressed themselves in favor of the resolutions opposing the tax on receipts, scheduled to go into effect on January 1, 1923, and also favoring the elimination of the graduating feature of the stamp tax on cheques, drafts, etc. In the case of drafts the opinion has been expressed by some wholesale hardware merchants that the stamp tax should not be applied until the draft has been accepted. This is in harmony with arguments advanced in previous issues to the effect that a draft is not a negotiable instrument until it has been accepted.

While expressing favor with the general principle of the Sales Tax, a common opinion among wholesale hardware firms is that the Sales Tax should be applied at the source only, namely on manufacturers and importers. They see little reason for continuing this tax on down through the various stages of distribution when it can be collected and refunded to the government by manufacturers and importers and passed along to the consumer. Some argue that this plan would prevent the inclusion of the tax in the amount on which profits are figured, such as is now done to some extent.

The Retailers' Position

The retail merchants have not yet held a meeting for the discussion of the resolutions, but it is known that they generally favor the Sales Tax applied at the source only, and the slight increasing of this form of taxation if necessary to enable the elimination of the receipt tax and other such minor impositions which take up the retailers' time. Definite opposition is taken to the receipt tax and any other tax which enters into the transaction over the counter. Argument advanced in favor of the receipt tax is that providing it is not applied to every cash register slip or counter check and only on amounts over $10 that it will not seriously hamper business and be a big producer of revenue. It is thought it might have some effect in discouraging these credit accounts which would combine a number of small items into an amount which would require a tax on receipt when paid for. Similarly it might encourage credit accounts grouping amounts over $10 so as to render necessary the use of only one tax stamp. The question of telephone orders or mail orders where some receipt or other evidence of money paid must be forthcoming has also entered into the discussion.

Manufacturers have been holding some meetings this week and it is understood they have expressed favor with the abolition of the receipt tax though they are of the opinion that there is little likelihood of it being withheld either temporarily or permanently. It is understood that their discussions have also favored the establishment of a uniform stamp tax on cheques, drafts, etc. The resolution of the last meeting favored a tax of two cents on cheques up to $100 and four cents on all cheques over that amount, as preferred to the present tax on a graduated scale of two cents for every fifty dollars. It is understood the manufacturers favor a straight four cent tax on all cheques. This would, it is claimed, simplify the matter for firms handling many cheques, would be less of a handicap to big business transactions, and would tend to curtail the number of very small cheques.

Paint Manufacturers Suggest Changes

The Sales Tax principle has been upheld by the manufacturers, though some modification has been suggested by the paint manufacturers as outlined in last week's issue of Hardware and Metal. The amendments put before the gathering by Royal Cluxton, manager Canada Paint Co., provide for the charging of the full sales tax of 4½ per cent. on sales by manufacturers or wholesalers, but eliminating from taxation the sale from manufacturer to wholesaler. The idea of this is to equalize the tax and not give an advantage to wholesalers as has frequently been the case in the past. This suggested plan would disallow the absorption of any part of the tax by manufacturer or wholesaler, thus the whole amount of the tax would be passed along to the retailer and on to the consumer according to the government's intention.

While the retailer's chief complaint has been registered against taxes such as the luxury tax which enter into the transaction over the counter there is also some objection to any plan which will make the burden any greater for the retailer. At present the retail merchant finds it necessary to absorb the sales tax on certain lines. In the case of nails, screws and other such lines sold in small quantities, the tax is a fraction. The retailer is said to have little opportunity to fairly collect such a tax. In the case of merchandise such as certain safety razors which carry a suggested resale price, advertised throughout the country to consumers, the retailer has had to absorb part of the sales tax because of his inability to ask an odd price involving a few cents more than the advertised price. If an explanation of the odd amount is offered, there immediately arises in the customer's mind that distasteful idea of having to pay tax at every turn. This constituted the chief objection to the Luxury Tax. In some cases where hardware lines have carried a suggested resale price, the manufacturer has revised prices so as to lighten the retailer's burden. If this is to be disallowed in future it is pointed out that it will be up to the retailer to collect the odd amount of the tax.

(Continued on next page)

In discussion of the Sales Tax plan as outlined, one importer has pointed out that under the plan of eliminating any absorption of the sales tax, he would have to pay 3 3-4 per cent. on import and the merchandise would carry the usual 4 1-2 per cent. sales tax before reaching the consumer whereas the retailer could import a competitive product from a foreign manufacturer and pay only the 6 per cent. import tax. This would constitute an advantage of two and one-quarter per cent. in favor of foreign goods. Obviously this would favor the department stores and other large retail buyers who do considerable importing. This and other angles of the question were fully discussed.

Arguments favoring the amendment of the paint manufacturers include the elimination of any unfair competition due to partial absorption of the tax as for instance, where wholesalers follow the policy of absorbing part of the tax thus forcing the manufacturer to do likewise on his sales direct to the trade. In view of the likelihood of the sales tax being increased it is also felt to be advisable to place the collection of this tax on a different basis where it will not involve such an expense to the manufacturer or wholesaler in future. Added to this is the fact that it is not the government's intention that this tax be absorbed, but that it be passed along to the consumer.

Retailers as Manufacturers

Among the more minor resolutions on which there was less conflict of opinion were the receipt tax, stamp tax, and the taxing of certain retailers as manufacturers. This latter point is important to tinsmiths, harnessmakers, etc. It will be recalled that in the efforts to classify a manufacturer, a retailer, the mechant tailor, blacksmith, tinsmith, etc., were all placed in practically the same category. It was decided that tinsmiths were manufacturers whereas blacksmiths were retailers. Merchant tailors were retailers, whereas confectioners were manufacturers. The reason for this is not at once apparent, but it is due to the fact that tinsmiths and confectioners produce articles which can be sold in the ordinary course of retail trade to almost anyone. The mechant tailor makes a suit of clothes for a customer and in the ordinary course of business it will fit no one else and would not be sold in the regular course of retail trade. The same thing applies to blacksmiths. The line of demarcation between these trades is definitely fixed in the resolutions now being considered and the unsatisfactory condition which has existed for some time in connection with these trades may be eliminated.

Would Tax Drafts When Accepted

Such is Recommendation of Montreal Metal and Hardware Ass'n. at Annual Meeting—Ask That Receipt Tax be Withheld for Further Enquiry—Sales Tax Provides Mounting Revenue

MONTREAL.—At the annual meeting of the Montreal Metal and Hardware Association, the following officers were re-elected for the ensuing year: president, Lieut-Col. Robbert Starke; vice-president, T. M. Hutchinson, general manager, Drummond McCall & Co.; treasurer, H. T. Diplock, Steel Co. of Canada; directors, A. Jeannotte, A. A. Robertson, T. H. Jordon and W. Beverley Robinson.

Asks for Postponement of Receipt Tax

The most important question discussed at the meeting was the tax on receipts, effective from January 1 next. After considerable discussion and criticism it was decided to ask the council of the Montreal Board of Trade if they would consider the advisability of asking Parliament to postpone the effective date of this tax for six months in order that the matter might be more fully discussed by those who would have affixed the stamps. It was recognized that the government must have the money, but it was hoped that with this delay some less annoying alternative method of securing it might be worked out.

Too Many Taxes in Business

It was felt that the multiplication of these regulations and other stamp demands was an irritating hindrance to ordinary business, and the hope was expressed that eventually all these comparatively small applications of tax charges might be concentrated into one general tax which would give the requisite revenue without impeding business as at present. One of the most irritating stamp taxes was that which was applied to bills of exchange. In the case of unaccepted bills and drafts, the members approved of the suggestion made by the council of the Board of Trade to the Minister of Finance that, "Since bills of exchange are valueless until accepted, when they are returned unaccepted and other means of settlement arrived at, the tax has to be paid twice or even more on the same transaction." Therefore the council asked that the Act be amended so as to provide that stamps may be affixed only to such bills after they were accepted.

COL. ROBERT STARKE

Starke-Seybold Co., Ltd., Montreal, re-elected president of Montreal Metal and Hardware Association. At the annual meeting of the Association Col. Starke gave some interesting details of revenue from various taxes.

President's Annual Report

In his annual address Col. Starke dealt chiefly with the Sales Tax, the Stamp Tax and insolvency legislation. Regarding the sales Tax, figures were quoted showing that from May 19, 1920, to March, 1921, the amount derived from this tax by the government was $38,000,000. For the fiscal year ending March, 1922, the amount increased to $61,000,000, and there was no doubt that a very substantial increase in the revenue from this tax would be shown during the present year. It was very interesting to note, he said, that the rate of the Sales Tax as applied by manufacturers or producers to wholesalers or jobbers had increased 125 per cent., and by manufacturers or producers to retailers or consumers 150 per cent., while its rate on importations by manufacturers or wholesalers, or jobbers had increased 275 per cent., and on importations by retailers or consumers 300 per cent.

He then outlined the more annoying features of the Stamp Tax, especially with regard to drafts and bills of exchange which produced the general discussion outlined above.

Other interesting figures presented were those in connection with the sale of stamps just previous to, and immediate-

ly after, the enforcement of the tax. The sale of stamps during the month of July this year amounted to about $2,000,000, during the month of August about two and three quarter million dollars, and during the month of September $2,600,000. It would, therefore, appear that the revenue from the stamp tax would be from $8,000,000 to $10,000,000 for twelve months.

Reviewing the work of the committee appointed early in the year under H. T. Diplock in connection with the Bankruptcy Act, it was pointed out that three of the recommended amendments were incorporated into the Bankruptcy Act which passed the House of Commons in June last.

Regulations regarding the marking of importations were briefly dealt with as the Act to amend the Customs Tariff, 1907, passed by Parliament on June 23 last did not affect the metal and hardware trade of Canada up to the present time.

WHY A TINSMITH IS A MANUFACTURER FOR TAXATION PURPOSES

Tinsmiths have long wondered why they were classed as manufacturers, for taxation purposes, while blasksmiths, merchant tailors and others producing certain articles were classed as retailers.

The reason, as outlined in the resolutions being considered now, is that tinsmiths and confectioners produce something which can be sold in the ordinary retail way to practically anyone, whereas the product of a blacksmith or tailor is to special order and could not be sold in ordinary retail trade.

PNEUMATIC TIRES REQUIRED

IN THE near future all motor buses operated in the Province of Ontario will be required to carry pneumatic tire equipment, according to Hon. F. C. Biggs, minister of highways. This step has been under consideration for some time and apparently definite action has been decided upon.

There are two reasons for the decision. One is the government's belief that passengers in these buses are entitled to the greatest available comfort and the other is that as these buses invariably travel at fairly high speed and frequently carry very heavy loads they should be so equipped as to permit of their operation with a minimum of damage to the roads upon which they travel.

Recommendations were made to the government that all commercial vehicles should be required to use pneumatic tires.

Three Thousand Telegrams to Ottawa

Falls Far Short of the Hundred Thousand Which Were Anticipated But Some Interesting Points Were Brought Out—Want Revenue Department Stamps Used Instead of Post Office Stamps —Cannot Stop Enforcement of Act

IN THE near future all motor buses circles in Ottawa considerable interest has centered in the attack which has been directed by certain retailers against the tax of two cents on all receipts of ten dollars and upwards, which becomes effective January 1st. The telegrams from merchants in every part of Canada voicing dissatisfaction with the measure have been placed before the Premier, but up to the present he has not made any public statement respecting his attitude. It had been thought likely that the protests, together with the fact that the Finance Deparment experts who have been studying the English receipt tax regulations, have not yet returned to Canada, would delay the putting into force of the Act, but it is now stated on high authority that nothing can prevent the tax becoming operative on the first day of January.

Delegation Will Follow

As was pointed out in the last issue of Hardware and Metal the telegrams were merely preparation for personal representations which would be made to the Prime Minister in the near future. It is the intention of the trade, now that the matter has been taken up, to press for the abolition of the measure as vigorously as possible. It is expected that a delegation will visit Ottawa shortly for the purpose of interviewing the Government, and pointing out to them the importance of having everything removed that will hamper and lessen the speed and flow of trade and commerce. The delegation will also argue that as retail merchants have been made the unpaid tax collectors of the Government they should at least be consulted as to what effect any measure proposed by the Government would have on their trade.

With a view to getting definite facts regarding the number and nature of the

(Continued on page 46)

Regulations Governing Receipt Tax

A CANADA GAZETTE extra contains the regulations governing the stamp tax on receipts of $10.00 and upwards. This tax becomes effective on and after January first.

The regulations follow:

"Counter sales slips and cash register tickets are not taxable, provided no words implying or stating acknowledgment of the receipt of the payment of money appear thereon.

"Payrolls, signature of employe thereon being receipt for wages, taxable in respect of each such signature.

"Receipts for payment of legacies are taxable. A receipt for money in a deed or mortgage is taxable.

"Receipts for payment of taxes except those given to or by the Dominion Government or a Provincial Government, are taxable.

"Individual freight bills and periodical statements of same, acknowledging receipt of payment, are taxable.

"Customs House brokers receipts are taxable.

"Letters forwarded by mail, also postcards, acknowledging the payment of money, are regarded as letters and cards and are not subject to this tax.

"All insurance policies, whether fire, marine, life, or casualty, wherein the payment of money is acknowledged, are taxable.

"All insurance receipts, acknowledging the payment of money, are taxable.

"Receipts drawn out of Canada, but not valid until countersigned in Canada, are taxable.

"Voucher cheques and cheques with receipts endorsed thereon when drawn upon or addressed to a bank, are not taxable as receipts.

"Remitter's counterfoil, being part of a taxable express money order, is not taxable as a receipt."

Persons violating or evading the regulations are liable to a penalty not exceeding $100.

NOTE: Persons or firms who desire to have receipts stamped by means of a die, may make application for stamping to the Department of Customs and Excise, under regulations which have now been established.

"Make Range Prospect Hungry for Luscious Canned Fruits and Brown, Juicy Viands"

Says Western Hardwareman, in Contrast With Sale of a Range Merely as So Much Cold Iron and Steel—Week's Demonstration in Mid-Winter Stimulates Stove Business—Where to Look for Prospects—Grouping Seasonable Lines

GROUP selling of various hardware lines is practised to a considerable extent in the Saskatoon Hardware Co., Ltd., retail store in Saskatoon, Sask. Discussing business methods with a representative of Hardware and Metal, the management of this store pointed to the advisability of going over the stock carefully and grouping the commodities which will have a seasonable appeal. These lines are then grouped on display tables, in the window displays and in the advertising for the purpose of associating them in the minds of customers. It is found that one of the difficulties in the way of a bigger turnover of merchandise is to bring people to a more definite appreciation of the value of the article and to show vividly how it can be linked up with their needs and either save them money in other ways or provide comfort to such a degree that they will not be without it at any reasonable price.

This idea is being followed out in connection with fall sporting goods, stoves, household necessities, etc. Take the case of sporting goods, the window display shown herewith reveals a grouping of guns, ammunition, decoys, gun cases, ammunation belts, hunting garments, etc. A wider grouping of articles of interest to the hunter is found in the store interior adding such lines as camp equipment.

Group Cold Weather Needs

In the other window is shown a grouping of a number of seasonable lines which ordinarily are hard to display and which seldom are found in such a group. With the cold weather here much time is spent around the grate fire. What is more desirable than fireplace equipment such as fire baskets, screens, fire irons, etc.? For the kitchen stove, stove boards are needed. Some compact heaters are also shown in the window.

Discussing stove, range and heater sales with this and other Western hardware firms, a number of splendid selling ideas were secured.

One firm which has sold over one hundred pieces, that is coal, gas and combination ranges, keeps plugging away with consistent advertising. They also have some other helpful ideas as was indicated by a further discussion of the subject. In the spring of the year a special week is given to a demonstration of gas ranges, and it is significant that as result of interest stirred up at such a demonstration, ranges are sold throughout the summer months and into the fall. On the floor a complete line of coal, gas and combination ranges are shown and all are kept well polished. It is found that customers are impressed with a full line to choose from and also by the stock being in attractive condition. Buying a range calls for an investment of a considerable sum of money. To some buyers it is a most important matter and one long to be remembered. Such prospects should, therefore, not be treated lightly, according to this merchant.

Show Canned Fruit With Gas Ranges

One or two gas ranges on the display floor are always connected up for demonstration purposes and the ranges are consistently featured in the window displays. On glass shelves above the gas ranges, near the front of the store, is a grouping of some bottles of luscious canned fruits and vegetables done by a special process involving the use of a range giving an even heat and showing the temperature existing in the cooking oven. Throughout the year, but more particularly around preserving time, and in the cold weather after the fresh fruit is all gone, such a display makes everyone's mouth water. No one entering this store fails to show interest in this display, and this gives the store salesman an opportunity to talk the outstanding qualities of his particular range.

When a range is sold an inspection is made of it when installed to make sure that the oven heats to proper temperature and instruct the buyer as to the many uses to which it can be put. This interest generally secures a list of other valuable prospects as well as cementing relations with the buyer. This firm does not make a house to house canvass, but they urgently follow up all select prospects secured in the above manner.

Not So Much Iron and Steel

Salesmen in selling the particular range sold by this firm deal with its select points of comparison and dwell particularly upon the splendid results to be secured in cooking, roasting, etc. The manager of the store explained that when a salesman sells a range he does not sell so much iron and steel, but he sells a medium for achieving a satisfactory result in connection with the household duties. This is what the housewife has in mind when buying a range, and while, of course, details of construction have to be dealt with in order to convince her that she is receiving value for her money, yet the idea of making the prospect "hungry" for the brown juicy viands and other edibles done to a turn, is what clinches more deals than anything else. We know from actual experience just what the range is capable of doing and how to get these results, and then it is up to us to so convince the customers that these are the results they desire.

Mid-winter Sales

Some question has been raised as to whether stoves and ranges can be actively pushed in the mid-winter months after the initial business of fall is over. There may be some handicaps to such business but the fact remains that aggressive hardwaremen are making a success of mid-winter trade. Details were secured from a number of Western hardwaremen concerning their plans which have made possible the sale of eighteen, twenty or tweny-five ranges during the month of December and some of them in past years have sold that many ranges in January and February. The reason underlying most of these successes appears to have been an aggressive spirit which refused to admit that ranges could not be sold at this time of year. Even in some districts where crops were not so good and farmers said to be hard pushed, active sales of ranges have been reported in some instances. The fact that a stove or range is an article of utility, that it fills an integral part in the household equipment, takes it out of the class of article which may be more of a semi-luxury and which can be done without undue stress. This point has been emphasized by these merchants who have made a success of winter business done in ranges in the farm districts.

Mid-winter Demonstration

One firm which sold eighteen ranges in a couple of weeks in December advertised that an expert from the factory would be on hand to conduct a demonstration during one week, and that all who had the least interest in a range even though they did not contemplate buying one for some little time, could learn something from the demonstration. There was a fair turnout on the first day and no attempt was made to sell. Note was taken of those who were more particularly interested and sales-

men made personal calls upon them in the ensuing days. The demonstration was followed with continual talk of "ranges" instead of talking about the low prices of farm products. He contends that once you get a prospect to think more of the comfort and service to be secured with a range than of the conditions existing in other fields at the time, that they are on a fair way to being sold despite the acuteness of their other affairs. This merchant talks "service and satisfaction" rather than the price or quality. He has found by experience that too much stressing of "quality" in the early stages of the talk is apt to make a prospect imagine that the range must be away out of proportion to his or her ability to pay.

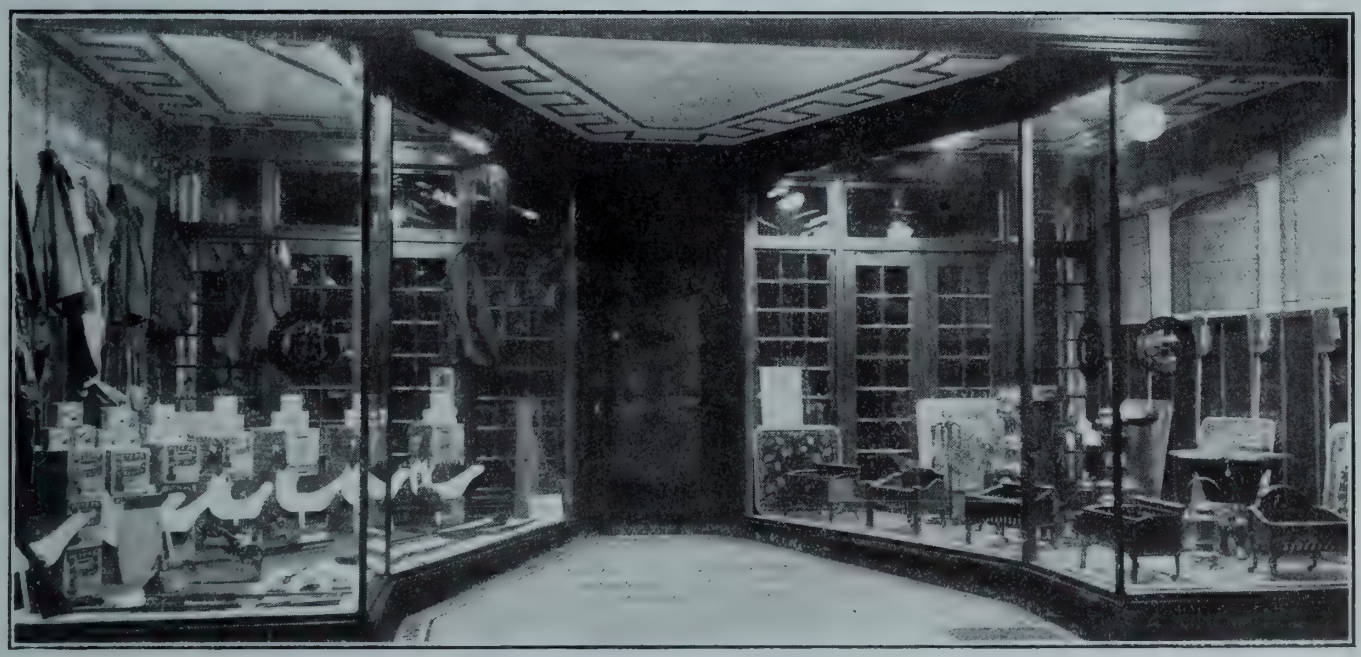
The sales manager of a large stove manufacturing firm discussing the opportunities for the sale of stoves gives the following helpful advice: Instead of concentrating selling abilities entirely to the opportunity of equipping farmers with labor-saving devices, the same sales energy directed toward kitchen equipment would result in doubling the sales of ranges. The letter is undoubtedly the most important single article in the household.

Every time the county clerk issues a marriage license there is created a stove prospect. The couple may never own an automobile, may never possess a phonograph and may never need a baby carriage, but some time or other they are going to be in the market for a stove.

We have bought tires on the strength of the tire mileage. Why not sell a range the same way? A $90 range, good for 16 years can provide 16,000 meals. A range selling for $70 a saving of only a tenth of a cent per meal and then there are the many superior features, conveniences and comforts to be had in the higher priced range.

The importance of keeping prospects well lined up before they reach the buying point is emphasized. Certain lines of heaters, tractors, automobiles, etc., are found to dominate certain districts. This is attributable largely to the efforts of an aggressive dealer. The same thing can be applied to stoves and ranges. By consistent advertising the prospect can be brought to an appreciation of the value of your range. This confidence if developed gradually is hard to tear down and he will be half sold by the time he finds it necessary to make a purchase. The range question can be tactfully broached to everyone who is a buyer of some other article in the store, pointing out that when they are in the market for a range this is the one they should consider.

One merchant follows a rather ingenious plan for encouraging confidence. When he has a prospect fairly well sold on his range he pulls down a shade on a window-shade roller, on which are written the names of all who have bought the same type of range. The prospect will be interested in examining the list and noting the names of neighboring families who are known to be well satisfied with their ranges. The size of the list too conveys confidence.



The foregoing are practical ideas which have been proven in stimulating range sales and they indicate that these plans if put into effect can be just as effective in the winter as at any other time of year.

WILL WORK ON FREIGHT RATES

Sydney, N. S.—For the purpose of securing concerted action in regard to freight rates and other matters affecting the industries of Cape Breton Island, a joint committee has been selected by the Cape Breton Boards of Trade.

A warning of the dangers surrounding the use of naked lights on Christmas trees has been issued by the safety department, in the hope that these warnings will tend to cut down the fire hazard.

Group Selling Plan Brings Large Returns

The splendid display windows of the Saskatoon Hardware Co., Ltd., store at Saskatoon, Sask., which, according to a last minute announcement appearing in this issue, has been destroyed by fire, are shown herewith. It is a coincidence that this store is seen to be featuring a card concerning Fire Prevention Week. When visited recently by Hardware and Metal, emphasis was laid by the management on the importance of constantly changing window displays and showing in an effective manner seasonable hardware lines. Hunting equipment is shown in one of these windows and with the big game season in full swing this layout can be copied to good advantage yet. Stoves, stove boards, fire baskets, screens, sifters, fire irons, portable gas lamps and lanterns. These latter form a group of articles which are hard to display and which are more or less related.

Problems of This Year's Inventory

Trend of Price Fluctuations This Year Raises Some New Problems in Pricing the Stock on Hand—What the Inventory Should Include—Pricing at Cost or Market Whichever is Lowest

Written for Hardware and Metal by C. W. HAFNER, Manager G. W. Hafner, Inc., Auditors.

AN inventory is a part of a statement of the financial position and operating condition of a business upon a certain day. And yet anyone at all familiar with actual conditions will agree that the inventory is usually the most dubious figure in the financial statement or balance sheet. It may look very precise, but it commonly covers a multitude of sins. The entire process is often full of guessing and juggling; and, to cap it all off, a thoroughly unsound scheme of valuation may be employed.

What an Inventory Should Include

The influence of the closing inventory figures upon the showing of net income and financial position is so great as to demand the most searching scrutiny of inventory practices, and the insistence upon the use of principles and procedures which are as rational and accurate as possible. Especially in these days of heavy income and profits taxes has the inventory process—both taking and pricing—become a matter of utmost significance to all business men.

Hence our endeavor should be to ascertain, not alone how to take the inventory so as to eliminate mistakes, but also the best manner in which to price the inventory after it is taken. What we should be interested in is getting at the facts, whatever they may be. We want to know what the goods on hand on a certain day are worth as an asset of the business.

The merchant or manufacturer must not forget that, where the title to the goods is vested in him or in his concern, the following classes of merchandise should be taken into account in the inventory: consigned goods, in the hands of customers; goods in public warehouses, subject to order; goods in transit and the like.

Pricing at Cost

A choice of two distinct methods of valuing the inventory is offered: "Inventories should be valued at (a) cost, or (b) cost or market, whichever is lower." However, the use is permitted under abnormal conditions, of the selling price, **if actual selling prices were lower than cost or market.**

When used as a basis for pricing inventories, the word "cost" in the first method means the actual invoice price paid for the merchandise plus freight, hauling and handling. At the option of the taxpayer, cash discounts, may or may not be deducted, but the method adopted by the taxpayer in this respect must be followed consistently thereafter.

Now, the question immediately arises, how are cost prices to be determined? A plan widely adopted by business men is of assuming that goods utilized or sold are always taken from the oldest lot first; or in other words that the stock actually inventoried consists of the most recently acquired lots. In carrying out this plan it is necessary merely to arrange invoices in a chronological sequence; and beginning from the latest, take off both quantity and value figures until a quantity total has been obtained equivalent to the quantity shown on the physical inventory. Thus, the corresponding value total would be the value of the inventory. By this means the inventory value is drawn from the actual records in a simple and systematic way, all guesswork and uncertainty being eliminated.

Pricing at Cost or Market

Where the second method—"Cost or market, whichever is the lower"—is used; it becomes necessary to set up three price columns on the inventory records, designated as "Cost," "Market," and "Lower," as illustrated by Fig. 4. The cost per item or unit should be entered in the first column. the market price in the second column; and the lower of the two preceding figures, in the third column. The number of units of each item appearing on the inventory sheets are then extended at the values showing in the third column.

Market is defined as the current bid price prevailing at the date of the inventory for the particular merchandise. In establishing a "bid" price it is necessary to show actual tradings in the particular merchandise, goods or materials at the prices used. But it is not necessary for the individual taxpayer, himself, to have made the transactions used to establish the market price; the known transactions of others are acceptable evidence of the validity of such a price. Getting at the market price is sometimes difficult, but there is no mystery about getting such values in the same form as it is bought.

The material part of any manufactured product, such as in the case of tinsmiths, would also be priced at market, plus labor and overhead. In labor

Fig. 4 provides columns for designating the Cost, Market and Lower price. The number of units of each item are then extended at the values showing in the third column.

and overhead the use of "market" also applies. These are usually measured of course by the actual payments for labor during the period, and by actual overhead for the period, or by an average rate or a standard rate of overhead. Thus the labor represented in the goods being inventoried may have been at a higher rate than that obtaining at the close of the year. The actual burden rates at the end of the year may, likewise, be lower than the rates applied when the products were manufactured. In such cases the lower rates in effect may be substituted.

In the Nature of a Photograph

This whole matter of pricing the inventory will be simplified and clarified, if it is borne in mind that the inventory is in the nature of a photograph, a snapshot, of the value of the stock on a particular day. It is not an impressionable painting that brushes into the values either the hopes or the fears of the future. Neither is it a forecast of what the business will be in a week, a month, or six months hence.

It is advisable, then, from every conceivable standpoint that inventories be valued by the second method; i.e., "cost or market, whichever is lower." As an indication of financial condition on a specific date, actual cost is not, in the very nature of the case, a satisfactory valuation. Price changes between purchase and inventory dates, are quite likely to be so striking as to render "cost" an extremely dubious representation of the true economic position of the concern. Especially during a phase of depression, with the trend of prices constantly downward, such as that we are now experiencing, it would put a valuation upon the inventory entirely too high.

Taking the Inventory

The taking of a true physical inventory involves some considerable preparation. This matter of preparation is a governing factor in securing accurate quantities. If you want an exact inventory you must begin some time in advance. A definite plan of procedure must be laid out, definite instructions sent to all officials and employees, and everyone must familiarize himself with the instructions. For the guidance of business men in this respect, the following general instructions are presented:

The following instructions outline the means of taking a physical inventory of stock at the close of business, December 31st, 1922. In order to obtain dependable information, these instructions must be understood by the executives of the company, as well as by ALL the individuals who will handle the detail work of counting, checking, pricing, recording and extending the inventory.

The manager will assume the entire direction and responsibility for properly carrying out instructions and taking inventory. He will determine that all persons in any way connected with the work understand the instructions, and are thoroughly familiar with just what will be required of them.

The department manager, or individual in charge, in each department will be held responsible for the count of all merchandise which is within the boundary of his department at the time of taking inventory.

Each department manager will assign certain individuals in his department, who are competent, to the various sections to make the court of all stock within such section. Since the department manager will be held responsible for the accuracy of this work, he should use care in choosing the men who write legibly, know the stock thoroughly and are careful and accurate.

The Working Arrangement

The men shall work in gangs of two, one counting the stock, and the other writing up the description and other necessary information on the tags to the proper lot of merchandise. The tags marked "general stock" (figure 1) shall be used for listing all stocks of merchandise; the tag marked "goods in process" (figure 2) for all products in course of manufacture; and the tag marked "supplies" (figure 3) for sundry items of supplies on hand.

Every tag will be numbered, and all of them must be accounted for. In case an error is made in writing a tag, under no circumstances must it be destroyed. It shall be marked void, and given to the department manager.

As soon as an entire department or section has been completed, the department manager will notify the inspection committee, who will make a sufficient examination to determine that all stock has been tagged, that the description on each tag is correct, that the proper unit appears on the tag, and that the quantities appearing on the tags are correct.

As this is done, the inspectors will tear off the bottom portion of the tag, place their initials in the space marked "checked by," and turn the tags over to the department manager. The department manager will see that all tags received by him are accounted for, and will then turn them over to the office, for checking with the issue records. The stubs must remain with the merchandise and no stock shall be removed until all tags are accounted for.

Pricing Clerks' Work on Tags

When the tags are received in the office, and are checked with the issue records, they will be turned over to the pricing clerks, who will price the tags under the direction of the manager.

When all the tags are accounted for and priced, they shall be assorted, first by the following classifications, and then by particular items.

1—General Stock.
2—Goods in process.
3—Supplies.

Having been thus assorted, they shall be listed on inventory sheets (figure 4) and the first extension made on the stub of these sheets.

After this extension has been made, all sheets will be numbered, the stub to bear the same number as the sheet. The stub will then be torn off and the final extensions made in the column provided on the sheet proper. By comparing the total of each sheet with the total of its respective stub a proof of the clerical accuracy of extensions and footings will be obtained.

PETRIE-GURNEY COMPANY HEADED BY STEEDMAN

Hamilton.—Announcement is made of the merging of the Petrie Manufacturing Company of Hamilton, manufacturers of the "Magnet Separator," and the Gurney Scale Company, also of Hamilton. The new firm will do business under the name of the Petrie-Gurney Company. J. P. Steedman, president of the Gurney Scale Company, will head the new company.

Use of Trade Acceptances is Extending

To Avoid Losses and the Husbanding of Funds, Trade Acceptances Replacing Open Accounts in Many Instances—Book Debts Have Caused Much Trouble in Assignments

TO AVOID losses in most cases, and a desire to husband funds in others, are the material factors in spreading the movement in the Dominion in favor of trade acceptances with a consequent abandoning of open accounts. It is rather surprising to find the number of firms using this method of doing business to-day and also the percentage that have been employing it for years. Out of a large file of letters giving views on the efficiency of trade acceptances over open accounts, not one argued against the proposal, while many offered reasons and arguments in favor.

Recently the Canadian Credit Men's Trust Association of Winnipeg, focused attention on the matter by sending a plea to many business organizations for assistance and co-operation in increasing the use of trade acceptances, drafts and bills of exchange, in commercial transactions and to decrease as far as possible the system of open accounts.

One of the main arguments in favor of such a move is that the Bankruptcy Act of 1921 made null and void general assignment of book debts as against the trustee in bankruptcy, except in provinces where there is provision for registration. The draft or bill of exchange is, therefore, advanced as a legal admission of liability when accepted by the customer, whereas book debts have in the past proven the subject of never-ending disputes.

Manufacturers in Favor

The Canadian Manufacturers' Association took the matter up with its membership and received quite a general response in the way of letters. To these might be added the views of some bankers. One of the latter stated that the time was coming when drafts and bills of exchange will be almost exclusively used. Many industrial heads of the Dominion stated that they were reluctant now to carry an open account for any firm and did not do so if they could possibly avoid it.

"As a young concern we found it very inconvenient to have large sums tied up in open accounts," wrote one maritime firm. He said it was found to be the only proper method of settlement and enabled them to get along much better on their limited capital.

An old banker, now the head of a large industrial organization, declares that he long realized the great benefit of trade acceptances. He never encouraged open accounts. His main reason for this was that they caused a great portion of the business losses of the day.

One Montreal miller declares that he has not kept an open account for some time and declares that to-day all milling sales are subject to either draft or note.

The one stumbling block discovered relates to the stamps on bills of exchange. Some of the business men fear that they would lose considerable on unaccepted paper. However, there is a movement in this regard in co-operation with the larger one. It is to have the stamps payable only once. The details of how it is proposed to work this out have not yet been advanced.

VEHICLES SHOULD CARRY LIGHTS

Ottawa, Ont.—That a law should be passed making it compulsory for all horse-drawn vehicles to carry lights after dusk and that spotlights be allowed for use on country roads, was urged by the majority of representatives of automobile associations and dealers who appeared before the committee appointed at the last session of the Ontario Legislature to hear suggestions for the revision of the Ontario Motor Vehicles Act and other laws respecting highways, which met at the City Hall.

A number of other important suggestions were made by the number who addressed the committee. Hon. F. C. Biggs, Minister of the Department of Highways, was chairman.

A. A. Dion, representing the Automobile Club of Ottawa, and the Board of Trade, suggested that autos when parked on city streets should be only required to exhibit one light, which would be visible from both rear end and front view. The spotlight he very strongly favored, asserting that it protected the motorist against dangerous ditches on country roads. It also enabled the motorist to pick out road signs, he said.

A BUSINESS EVOLUTION

Forty publishers of morning newspapers met in Chicago a couple of weeks ago and formed an association to promote the morning newspapers' interests in competition with the evening newspaper as an advertising medium. The chief method by which they say they intend to accomplish this is through announcements in the business newspapers of the United States—that is papers of the type of Hardware and Metal.

This is an interesting evolution—the recognition of the place and power of the specialized newspaper.

'Newsy' Auto Accessory Ads Produce Business

Giving Some Item of News of Automobile Accidents Gets the Attention of Motor Car Owners

THE MANNER in which Sumner Co., Ltd., Moncton, N. B., make use of news developments in connection with their sale of automobile accessories is shown in the two sample ads shown herewith. This plan has been found to lend much effectiveness to the sale of certain automobile accessories, particularly in view of the large number of accidents which are happening in cities throughout the Dominion. The majority of motorists will take any precautions within their power to prevent accidents and when they can be shown that by the employment of windshield cleaners, chains, etc, they can reduce the danger of accident, they are easily sold. This form of advertising therefore has a double value.

Two samples of recent ads of this nature are shown herewith:

TWO AUTOS HAD WHEELS SMASHED

In City Yesterday for Lack Of Tire Chains

A Ford truck came to grief at the corner of Main and Highfield Streets yesterday. It skidded into the curb and broke a front wheel and bent an axle. Later a car lost a rear wheel at the corner of Gordon and Highfield the same way. It's cheaper to buy chains than wheels. Better get yours to-day, they may save you a more serious accident. We have them in all sizes.

SUMNER CO., LIMITED. DRIVE TO THE RIGHT

At Midnight "The Rule of the Road'" Changes

No doubt at first some people will forget and accidents will be apt to occur. For their own protection and for the sake of others motorists will want to be absolutely sure that they have their cars under perfect control all the time. At this season of the year this is impossible without using Tire Chains. Let us fit you out with a set to-day.

SUMNER CO., LIMITED.

REDUCE FIRE HAZARD IN RETAIL STORES

St. John, N. B.—In order to reduce the fire risk in the St. John stores during the Christmas season, the Commissioner of Public Safety, John Thornton, issued a request to all store-keepers, particularly in the business section, to leave their blinds up at night during this week. He said that if this were done, in the event of a fire breaking out in any of the shops, it would be more likely to be noticed before it had made any appreciable headway. The commissioner stated that many of the shop-keepers pursued this practice all the year round, and some of them left a light burning in the store. He felt that this was a protection, not only from fire dangers, but also from thieves.

Timely Showcards For Hardwaremen

Describing the Layout and Lettering for Posters and Showcards Advertising the January Clearance Sales—How to Obtain Attractive Effects, Design and Coloring—Ornamental and Conventional Styles

By JALEXO

WE have seen enough and to spare of the sale poster that flaunts cranes in a sky and ducks in a pond. That's the kind of poster one looks at but seldom reads. There is a certain other kind of poster however, that is made to be read and remembered; it is the poster that subordinates the decoration to the lettering. As weeds are a drawback in the ground where flowers should grow, so is excessive decoration a detriment on the poster where lettering should show.

There should be no difference in the poster used in the cities from that used in the smaller towns where the agitation of the cities does not reach. The poster that looks attractive in one place is bound to look equally attractive in another. There is no exclusiveness about city posters that cannot be obtained in the country.

Appropriate Sizes and Shapes

The most satisfactory poster delivers its message readily and at the same time focuses one's attention on the window. The depth of such a poster should not reach below the level of the eye. In other words, the bottom of the poster ought to be at least six feet from the ground. This permits a clear view of the window and its contents and on the whole is infinitely more presentable to both the customer and the store. The poster requires careful handling. Nothing so mars the effect of a sale as unsightly window announcements. The poster might easily be large and impressive and yet appear neat and pleasing.

The average poster takes an oblong shape, and many desirable effects may be worked out in this style. This kind of poster may show display lines straight or curved, and the same rules hold good for the poster work as for showcards. The dominating words should be made to stand out in bold relief so that he who runs may read. The lettering should be clean-cut so that there will be no doubting the purpose of the message.

In the case of a poster measuring nine feet long by three feet deep with the inscription, "Great January Clearance," the size of letters, border and coloring may take any one of a number of forms. The writer recalls one particularly attractive poster containing the beforementioned inscription and has had it reproduced in the accompanying illustration. The lettering was done in an excellent poster style showing an attractive brown color with an outline of yellow striped around each letter. The poster itself was in a tan shade and was decorated with a wavy line border done in a color slightly darker than the poster. The entire color scheme presented quite a striking appearance and is worthy of repeating in any store today.

The "Pre-Inventory Sale" poster was sufficiently attractive to warrant reproduction in this treatise. The poster in this case was tinted in a pale green. The lettering was done in ultra marine blue showing a yellow stripe running through the component parts of each character. The sketch of the "sweeper" and the border effect were both done in a harmonizing shade of dark green. This on the pale green ground produced a pleasing poster. A character sketch of the sort reproduced on this poster is easily sketched even by one who has little, if any, artistic ability.

Another poster quite as remarkable as the foregoing, contained the words "January Hardware Sale." It was a study in blue and white. The poster was white. The border lines were done in pale blue. The curtain effect above the oval was done in a shade of blue somewhat darker than the borders yet not so dark as the lettering. The lettering was in royal blue and overshadowed everything else. The modified style of lettering was less severe than the plain block and was decorative without being freakish. The size of this poster was approximately 3 x 3½ feet.

The illustration which shows the man and the box is simple and realistic. The box offers a tempting surface for embellishment, so we have "Clearance Sale" lettered on it. This atttractive sketch done in red and black on a card 22 x 22 inches attracted considerable attention. The color scheme was something after this fashion: The man, lettering and box were in black, and the border lines were in light red. This kind of card as you can see is not difficult to do. The color scheme might be altered to meet any requirement. The box could be in natural shade with blue lettering; the man in black and the border lines in pale blue; all on a white card.

Since the lettering, borders and sketches on these posters are interchangeable, the showcard writer ought to find no difficulty in producing different effects, according to his individual ideas. The example shown here will give the reader some idea regarding the extent to which the decorative motifs may be carried out without detracting from the legibility of the poster. Each example contains as much art work as the subject will bear, and to add further embellishment might seriously impair the balance and technique of the work.

The season of clearance sales will soon be upon us. There will be posters

Interesting Market Developments

MARKET developments during the holiday period are on the conservative side. Hardware price changes, however, are generally expected to become more numerous again with the arrival of the New Year. Considerable interest is manifest in the trade concerning the trend of hardware quotations, and while some reductions are more or less anticipated on certain lines, yet the firm undertone apparent in raw material centres is also reflected in the strengthened attitude of numerous finished products. In recent years, a lengthy budget o price revisions appeared during the first few weeks following the holiday period, and while the opinion is expressed that 1923 will be no exception in this respect, yet market developments may not be on such a broad scale as in former seasons, owing to the trend of basic elements on the one hand, with the seasonal requirements of the industry on the other. Market reports in Hardware and Metal during the opening weeks of the New Year should contain both interesting and valuable information.

The "Deluge" Was a Fizzle

THE RECEIPT TAX which is scheduled to come into effect on January 1 next will most likely be enforced. The reasons advanced as likely to bring about a temporary deferring of this tax have been materially lessened by the issuance of the regulations governing the tax as outlined elsewhere in this issue. The efforts of retailers, wholesalers and manufacturers were being concentrated on securing a temporary withholding of this tax pending a more complete enquiry. It was felt in view of this unanimity and the fact that the taxation experts studying the English law as a basis would not return to this country until the end of the year, that a temporary withholding was quite to be expected. It appears now, however, that only an Act of Parliament can withhold this tax. It cannot be accomplished by an Order in Council under present conditions.

Thus it is evident the alleged "shower" of telegrams from retailers has had little effect. The truth of the matter is that only about three thousand wires were received after the secretary of the Dominion Board R. M. A. had broadcasted the information that well nigh one hundred thousand telegrams would be sent by retailers. True some telegrams represented a group of merchants, but as a whole the "shower" was a fizzle, and the aftermath is none too desirable from the standpoint of the retail trade of Canada. Intelligent retailers give constructive suggestions in such matters, and it is doubtful if a mere protest without offering any such suggestion carries very much weight. In addition such a protest stamps the retailers of Canada as a group of kickers, in the eyes of the public as well as the government. Furthermore the moral effect of promising a deluge of protests and then receiving only a weak-kneed one makes the government believe that the retailers themselves are not a unit in making the protest. It would appear from the small number of telegrams received as if there were more retailers in favor of the Recipt Tax than there are against it. This point will be readily seen by government officials and render the retailers' case weaker than it was before.

How an intelligent protest could be made on this subject before the official regulations were in hand is something to be wondered at. As outlined in this issue these regulations are far less onerous than the preliminary information indicated. There are many things to be considered in connection with the new regulations and some definite rulings made concerning some technicalities in them. An opinion has been expressed that the regulations indicate a desire on the part of the government to let the retailer off as easily as possible, in view of the disfavor which the tax has brought forth and the fact that it cannot be wholly withheld until the next session of Parliament.

Editorials in Brief

A STAGGERING figure, running into millions of dollars each year, finds its way from the pockets of Canadians into wild cat speculations. Many retailers have suffered as result of such schemes. In this connection it is interesting to note a report of the Associated Advertising Clubs of the World which states that ninety-five per cent. of oil stock advertising is misleading and deceptive. The report says "such advertising is an orgy of lurid words and bombastic figures. It contains false statements and promises which do not stand one chance in a thousand of being fulfilled."

IT IS unfortunate that in Canada as also in the United States, the policy of retrenchment in replacement and new construction of railway rolling stock has resulted in much loss of business to the steel industry and much loss of revenue to the business interests of the country including retailers. The average increase in freight carried on American railroads in the last twenty years has amounted to fifteen billion tons carried one mile. During that time there has been very inadequate construction of rolling stock to carry it and the present shopmen's strike adds the final touch to a congested situation which is proving a severe blow to business on this continent.

IN THE interview with a police official which appeared in Hardware and Metal recently concerning the barring of automatic revolvers, it was mentioned that some quantities of automatic revolvers were being smuggled into the country by criminals and that a certain amount of such traffic would probably continue. It is significant that a case in the Toronto police court this week concerned an ex-soldier who had been caught selling revolvers to members of a newly-formed soldier organization. He had purchased six revolvers in Buffalo for $78 and was selling them in Toronto for $20 each. The Crown-Attorney stated that fifty revolvers, mostly automatics, had been brought into Canada in this way just recently.

"Force Manufacturer to Sell to Consumer at Same Price as Wholesaler or Other Trader"

Such is Effect of Decision of Federal Trade Commission of U.S. Which Hardware Wholesalers Are Opposing—Would Play Into Hands of Co-operative Retail and Chain Store Organizations

A SITUATION of much interest to the retail and wholesale trades has developed in the United States, recently, in connection with an appeal by The Mennen Company against the Federal Trade Commission due to a decision of the latter body which is said to limit the freedom of sellers in formulating and carrying their selling policies into execution.

In this connection a brief has been filled in the United States Circuit Court of Appeals, at New York, in behalf of the National Hardware Association, American Brush Manufacturers Association and other bodies. These are wholesale firms and it was felt that as The Mennen Company were manufacturers, that these representations would present a more complete aspect of the questions involved.

This brief contends that the commission has misconceived, in the order appealed from, the purpose and effect of Section 2 of the Clayton Law making unlawful any discrimination in price between different purchasers of commodities, where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce. Cases where this decision did not conform with other decisions of the United States courts in similar matters were given. It is further pointed out that the arguments presented by counsel for the government are fallacious. Among others the following statement was made at the hearing: "If all manufacturers in the drug and sundry lines adopted the marketing system of the respondent, it would force the closing of the doors of every concern discriminated against in price. The evidence in this case shows that the marketing system of the respondent was adopted to:

Forces Resale at Suggested Price

"1. Force resale of its products at its suggested prices. 2. Penalize efficiency and economy. 3. Satisfy complaints and demands of individual members of the National Wholesale Drug Association, competitors of co-operative wholesale houses."

The brief goes on to point out that there is nothing to show that The Mennen Company endeavored to force resale of its products at its suggested resale prices, and the other charges are said to be without foundation.

The brief points out that if the order appealed from be affirmed and the method of business be forbidden, the result will be to lessen competition to a vastly greater extent than if such order be reversed and such method be declared lawful. The argument is summarized to the effect that if the contention urged by the Federal Trade Commission should be declared law, it would follow:

"Firstly: That wholesalers would be seriously hampered, their business materially impaired and their future existence imperilled, if not terminated.

"Secondly: Retailers not within the class of chain stores, department stores, mail order houses or members of co-operative corporations, buying clubs or syndicates (and the retailers who are not within such class are immeasurably the larger number of retailers in the country) would be unable to compete with the retailers in the classes named, their business would be impaired and their future existence imperilled, if not made impossible.

Favor Individual Consumer

"Thirdly: If the system contended for by the Federal Trade Commission be established and manufacturers forbidden to discriminate in price as between wholesalers and co-operative corporations and the like, the same principle would forbid such discrimination as between the two classes named and the individual consumer when the latter buys the same quantity of a given commodity as the former. Such a situation is not only conceivable, but it is a matter of common occurence that an individual consumer does buy certain commodities in the same quantity as a wholesaler, e.g., a box of soap, a stove, a range, an automobile. If the new system of business here contended for be declared to be the law of the land, a manufacturer would be compelled, in the instances named, to make direct sale to the individual consumer at the same price as to the wholesaler. The obvious result of this would be the impairment of the business of the wholesaler and of the retailer and a serious derangement and disorganization of the business of the manufacturer. It is not too much to say that the result would be little short of chaos. Nor is the illustration chimerical or fanciful. It but depicts the natural consequence to be expected from a paternalistic and meddlesome interference by government with the conduct of private business. Even if these results should not occur in the precise detail and to the precise extent indicated, such interference and control on the part of government would necessarily tend to check the initiative of the merchant and manufacturer, by imposing upon the free exercise of his judgment as to the most efficient method of conducting his business, the judgment of a governmental tribunal and of the courts. It cannot be doubted that such a procedure would impair efficiency, check and hamper individual enterprise and energy, and to tend to deprive the trade and commerce of the country of the benefits which normally flow from business skill and acumen when not exercised by methods inherently wicked or constituting offenses mala in se—methods not claimed to be present in the case at bar.

"The value of the 'old line wholesaler' in the scheme of distribution of manufacturers is an economic fact long established. They constitute, in substance, the salesmen of the manufacturer. They gather together under one roof the products of many manufacturers and hold in readiness in their warehouses these countless products for prompt and ready distribution in small quantities to the retailer. By closer acquaintanceship derived from propinquity to their retail customers, they are better able to judge of the financial credit of the latter than the more distant manufacturer. If these wholesalers be driven out of existence, the manufacturer in most lines of industry would be confronted with the need of making direct deliveries to countless customers, at great distances, in relatively small quantities, and without adequate opportunity of determining the credit standing of such customers. It seems fair to say that such an undertaking would be impossible. The wholesaler now fills this function to the satisfaction of the manufacturer and of by far the greater number of retailers in the country. Shall this time-honored institution be disrupted by the inauguration of the new and unheard-of system here urged by the Federal Trade Commission—and so urged upon the basis of a statute never designed to that end; and, in the debates which accompanied its passage through Congress, no word in support of such a system was ever uttered?

"The order appealed from seems to have been based upon a superficial reading of Section 2 of the Clayton Act, without regard to its history and to its declared purpose; without regard to the decisions of the courts adjudicating it and the other anti-trust laws; and without regard to the vastly greater injury to trade and commerce which would follow from the procedure which that order would inagurate, than from the long-established procedure which that order seeks to prohibit."

Events in the Trade

NEW FIRMS

Capreol, Ont.—T. E. Torrance has opened a new hardware store here and desires catalogs from manufacturers and wholesalers.

FIRE LOSS

Goderich, Ont.—Chas. C. Lee, hardware, suffered fire loss.

Westport, Ont.—T. G. Butler, hardware and tinsmith, has suffered fire loss.

Sussex, N. B.—Fire last week in Sussex, N. B., completely gutted a three-storey building occupied on the ground floor by Walter S. Fairweather as a hardware store, the two upper stories being used as a dwelling by Mr. Fairweather. The store was heavily stocked for the Christmas trade, and Mr. Fairweather's loss is heavy. The damage is estimated at about $30,000.

MOVED TO NEW QUARTERS

The B. Greening Wire Co. have moved their Montreal office and warehouse from 18 St. Maurice St. to 244 St. Paul St. W., where a new building was recently purchased.

INCORPORATIONS

Canada Electric Co. Ltd., head office Toronto, capital $100,000, to manufacture electric fixtures, hardware, etc.

Kil-Shok Co. of Canada Ltd., head office Toronto, capital $100,000, to manufacture shock absorbers and other auto accessories.

Colonial Chemical Corporation of Canada Ltd., head office Toronto, capital $100,000, to manufacture chemicals, paints, varnishes, stains, rubber goods, etc.

OBITUARY

The death is announced of Fred D. Palmer, vice-president Galt Stone Co.

Charles A. Sargent, western manager for Darling Bros., Ltd., Montreal, died in Chicago while on a business trip. At the age of 14 Mr. Sargent commenced with the above firm, and remained with them until time of death. He was 44 years of age, and for the past twenty years resided in Winnipeg.

PERSONALS

L. D Campbell, vice-president of the B. & S H. Thompson Co., of Montreal, has arrived in Toronto to take charge of the local sales office.

PERSONAL

R. M. Inglis, sales manager of the Ruberoid Co., Montreal, is visiting Toledo, and will be away for the next three weeks.

J. W. Gates, sales manager Enterprise Mfg. Co., Philadelphia, visited their Canadian representatives, Adcock & Co., Montreal, this week.

John Grimble, manager of the Winnipeg office of A. C. Leslie & Co., is returning after spending ten days at the head office in Montreal.

C. J. Kirklin has been appointed to the position of district sales supervisor of the Barrett Co., Ltd., Toronto, in succession to A. H. Marden, who is leaving the services of the company at the end of the month.

Allan Lemmon, of the firm John Lemmon & Sons, Kingston, Ont., hardware and tinsmiths, is retiring from the Board of Education at the end of the year, after a service of nine years, in which he occupied the position of chairman of the board, also serving as chairman on the various committees. At the final meeting of the board Mr. Lemmon was warmly commended by the members of the board for his work along educational lines in the city. Although a very busy man in his own business, Mr. Lemmon gave much time and thought to the work of the Board of Education.

PORTLAND FOUNDRY BRANCHES OUT

The Portland Foundry Co. of Portland, Conn., has purchased the John T. Young Co. of Norwich, Conn, manufacturers of the line of heaters selling under the brands of Red Jacket, New Queen, Vulcan, Young and Norwich. The Portland Co. has taken over the entire business with all rights, patents, trade marks, and good will.

LIQUOR SEIZED AT CHATHAM CAMOUFLAGED AS HARDWARE

Chatham, Ont.—A consignment of five thousand dollars' worth of Scotch whiskey and champagne was seized at the G. T. R. depot here, by License Inspector Matthew Side and Provincial Officer Low.

The shipment was consigned as "hardware," and was evidently intended for the Christmas bootlegging trade. It was sent to a fictitous business man of Chatham. Some of it was consigned to another fictitous hardware man of Stoney Point. The whole shipment has been sent to the Government Dispensary at Toronto.

CRANE LIMITED TO OCCUPY NEW PREMISES

Crane Limited, Toronto, expect to occupy, by January 1, 1923, their new three-storey office and warehouse, Front St., West, which is to cost $125,000.

MARITIME RETAILERS OPPOSE RECEIPT TAX

St. John, N. B.—In an interview with Miss Frances P. Alward, provincial secretary of the New Brunswick branch of the Retail Merchants' Association of Canada, Inc., she advised that the protest which went from retailers against the tax on receipts was being strongly endorsed here. Miss Alward said that it was felt by the retail and wholesale merchants that the tax would be a burdensome affair, if allowed to come into effect on the first of the New Year.

PROCESS BUILDING ADDED TO OIL REFINERY

The British-American Oil Co. is enlarging its Toronto refinery by adding a new process building which contains machinery for the production of certain lubricating oils. This plant will enable it to manufacture oils which heretofore it has not made in large quantities. The company has also established six new branches in Ontario and Quebec, each of which has tank storage accommodation as well as warehouse and office facilities.

KINGSTON MERCHANT'S NOVEL PLANS FOR XMAS TRADE

Kingston.—Every year there is an appeal on behalf of the merchants for the people to do their Christmas shopping early. "Shop Early" is an old, old slogan. The Kingston merchants state that this year the appeal for early shopping has been met with a ready response, in fact they state that this year the Christmas shopping commenced much earlier than for some years past, and that it has been a great help to the shopkeepers. All this week the shops have been keeping open every night in order to give the citizens ample time to purchase their Christmas gifts.

This year the merchants on Princess Street secured a large number of Christmas trees and decorated their store fronts. Colored electric lights are being used to good advantage, while a big streamer across the street reads, "Kingston merchants welcome the Christmas shoppers."

News Notes of Western Canada

Fred Schneider, Kronan, Sask., has been succeeded by Thos. Lesk.

Vancouver.—The National Paint Co., Ltd., is offering to compromise with its creditors at ten cents on the dollar.

Vancouver.—The stock of Salsbury's Ltd., who recently assigned, has been sold to George Williams.

W. Marshall of Marshall & Son, hardware merchants of Nanton, Alberta, visited the wholesale trade of Calgary.

E. C. Arthan, formerly of Tompkins, Sask., has purchased the store and stock of John Cleverly of Strassburg, Sask.

S. C. Wright & Son have disposed of their business at Woodrow, Sask., to A. Campbell, Shanmore, Alberta.

N. J. Etienne, representing the Chicago Spring Butt Co., Chicago, spent a few days in Winnipeg in the interests of his firm.

J. F. McMullen, manager of the Marshall Wells Alberta Co. Ltd., of Edmonton, visited Calgary on his way home from eastern Canadian points.

J. J. Raple of the Tide Water Oil Co., Toronto, who spent a short time in Winnipeg in connection with the Wood-Vallance convention, has returned to the East.

A. J. Webb, sales manager of the Martin-Senour Co., Ltd., Winnipeg, gave an interesting address on modern paint manufacturing before the Greater Winnipeg Save the Surface Association. The address was thoroughly enjoyed by members present and a short time was spent in discussing and answering questions on the subject.

The J. H. Ashdown Hardware Co., Ltd., Winnipeg, 1923 year book is now ready for distribution and is being forwarded to members of the hardware trade. Great credit is due the printing and catalogue department of the above firm for the prompt manner in which the book was prepared and also the splendid make up of same.

Calgary.—Tinsmiths, gas-fitters, and plumbers have been particularly busy changing heating plants from gas to coal. This is a usual procedure, as coal is commonly used for heating purposes as soon as winter sets in, while gas is used for the spring and fall months. The augmented gas supply seems sufficient for cooking purposes, and for those who have gas heating appliances only, but the majority of householders will depend on coal for the balance of the winter.

Optimistic Over Trade Outlook for 1923

Annual Salesmen's Convention of Wood Vallance, Ltd., Brings Opinion That Trade in West is Now Definitely on Road to Improvement

AN OUTLINE of general conditions as they affected the hardware trade in Western Canada was given by J. C. Falls, vice-president and general manager of the Wood-Vallance, Ltd., Winnipeg, on the occasion of the annual salesmen's convention. Mr. Falls also dwelt at some length on the prospects for business during 1923.

All traveling salesmen were in attendance, as well as the members and heads of the various departments. Optimism concerning the outlook for the coming year was the keynote expressed throughout the gathering. Prospects were freely discussed and the general opinion was that trade is on the road to improvement.

In concluding the convention a splendid program was arranged for, which included a dance and buffet supper. The following were in attendance:

J. C. Falls, general manager, F. W. McGuire, D. F. Ferguson, J. C. Gillespie, F. W. Lynde, J. H. Waugh, R. G. Consterdine, R. A. Grant, J. P. Wing, H. A. Sutherland, J. A. Jack, F. J. O'Neill, D. Miller, R. M. Pritchard, F. B. Stott, J. S. Bates, H. S. Spencer, H. A. Bestall, M. P. Barnes, A. H. Jackson, J. G. Beatty, G. H. Herity, H. L. Huyck, W. Dawson, W. N. McCoig, A. T. Redmond.

Association of Western Sheet Metal Firms

Metal Shingle & Siding Co., Ltd., and Western Steel Products, Ltd., Arrange Basis of Association Covering Manufacturing and Marketing of Products

AN ARRANGEMENT has just been made between the Metal Shingle & Siding Co., of Preston and Montreal, and subsidiaries of this company having offices and factories at Winnipeg, Calgary and Saskatoon, and the Western Steel Products Limited of Winnipeg, having branch offices and factories at Calgary, Edmonton and Regina.

The offices of the Metal Shingle & Siding Co. Limited, in Manitoba, Saskatchewan and Alberta at the three points above mentioned will be closed on January 1st, 1923, and the Western Steel Products Limited, will take complete charge over the territory of the four provinces of the manufacture and sale of the products of the factories of both companies.

W. J. WILSON

General Sales Manager, Western Steel Products Co., Winnipeg.

In addition to selling the products of the combined factories in the west, the Western Steel Products Limited, will act as exclusive selling agents for the Metal Shingle & Siding Co. Limited, of Preston and Montreal, for products which are not made in the Western factories—such as metal lath, rolling steel shutters, steel sash, O. K. Thimbles, Swartwout ventilators, etc.

Under the new arrangement factories and sales offices will be operated at Winnipeg, Saskatoon, Regina, Calgary, Edmonton and Vancouver, and from these centres the products of the factories, both east and west, will be distributed throughout the adjoining territory.

The Metal Shingle & Siding Co. Ltd., the older of the two companies, had its origin in Smithville, Ont., in the middle nineties of the last century. The development of the business requiring additional investment, Cyrus Dolph, a young Preston business man, became interested and provided the necessary funds. The business was moved to Preston in 1897. In 1907 an additional factory was opened in Montreal.

Another figure prominent in connection with this industry was W. J. McMartin, who came to Winnipeg from Duluth in 1904 and established the Winnipeg Ceiling and Roofing Co., Ltd. The development of Western Canada made necessary additions to factory production in this line and the first extension was at Calgary under the name of Sheet Metal Mfg. Co., Ltd. Another was opened subsequently at Edmonton under the name, Edmonton Metal Works. Ltd. In 1920 the associated industries

received a severe blow in the sudden death of W. J. McMartin.

The officers of the Western Steel Products Ltd., are: H. Ormond, President; H. C. McMartin, Vice-President and General Manager; and R. R. Symington, Secretary. The active cultivation of the Western business will be under the direction of H. C. McMartin, Vice-President and General Manager; R. R. Symington, in charge of finances; and W. J. Wilson, General Sales Manager.

WESTERN CANADA NOTES

The building and premises of the Saskatoon Hardware Co., Saskatoon, Sask., have been destroyed by fire.

Western Tin Shop, Winnipeg, has dissolved.

A. G. Pothier, hardware, Bresaylor, Sask., has been succeeded by E. E. Mack.

The Marshall-Bevers Hardware Co. Ltd., of Calgary, has been reorganized and will now be known as The Marshall Hardware Co. Ltd. Mr. Bevers is retiring and Fred Marshall continuing the business under his personal management. The First Street West store is being closed and the stock amalgamated with the Main Street store. Fred Marshall was in the hardware business in Orangeville, Ont., for some time coming west about fifteen years ago, and was engaged actively in mercantile lines at Medicine Hat.

CELLULOID CUTLERY HANDLES NO DANGER

Sir Albert Hobson, a Sheffield manufacturer, in evidence before a royal commission on fire brigades and fire prevention, said that any danger through knife handles being made of celluloid was infinitesimal. At the present time the cutlery trade was in a very critical and impoverished condition, as the British manufacturer was undersold by German competition. It would be a serious thing to impose restrictions. There were some things especially liable to produce danger, such as Christmas cards when celluloid was used to brighten them, but table cutlery was not dangerous, a great deal of patience being needed to cause a match to set fire to celluloid handles. He was not in favor of stamping knife handles, as that would disfigure them and discourage their sales.

CORRECTING MISINFORMATION SUPPLIED TO HARDWARE AND METAL

In the report of the meeting of the Toronto Hardware and Paint Club which appeared in December 16 issue of Hardware and Metal, the initials of Mr. J. H. W. Sinclair were incorrect due to misinformation provided. Mr. Sinclair furthermore is purchasing agent and not manager of the Hardware Company of Toronto.

Prosecute for Giving Short Measure in Gasoline Sale Even if Pump Seals Not Broken

IN THE December 9 issue of Hardware and Metal appeared a report from Calgary to the effect that an inspector had given evidence showing that a gasoline pump rendering the owner of the pump liable to action providing the government seals on the pump were not broken. In connection with this article, E. O. Way, director of Weights and Measures, Ottawa, states as follows:

"Any service man selling short measure in gasoline can be prosecuted under Section 61a of Chapter 75—'An Act to amend the Weights and Measures Act'—in which short weight and short measure is made a statutory offense. This service has a district office and staff in Calgary under District Inspector G. D. Fyfe and if any complaints of short measure in gasoline are reported to him he will investigate and prosecute if necessary.

"The fact that a weighing and measuring machine is government stamped, is no protection or defense against sale by short measure as accredited to Mr. 'Inspector Steele's' statement. If the equipment also is inaccurate beyond the toleration allowed by the Weights and Measures Act, the offender can be further charged for having in his possession and use in trade a machine that is false and unjust.

"The breaking of the seals on a pump is no offense in itself but constitutes offense in-so-far as it leaves the device 'unstamped' and its use in such condition an offense under the Weights and Measures Act, subject to prosecution and involving the confiscation of the machine."

GETTING XMAS TRADE IN WINGHAM

Wingham, Ont.—A. J. Ross of this town has two very attractively arranged Christmas windows that are pulling business from the "early shoppers." In one he has an electrical washer and keeps it in action by having the cord connected to the lighting socket above. At night the light is turned on above and the crowds of shoppers who are out viewing the windows cannot miss the washer. The window has brought in several inquiries already and among them are prospects which will be followed up and developed into sales.

In the adjoining window is shown a handsome electric grate and various lines of brass ware particularly appropriate for Christmas gifts, This window has also proved a business getter.

Discussing the business outlook for 1923 Mr. Ross stated that the year just closing has been a very satisfactory one and he is looking forward to a goood volume of trade in the New Year.

The hardware firm of Thompson and Buchanan which opened here not long ago is featuring stoves in one of its windows and in the other is a mixed display. In the foreground are shown poultry supplies and the background is composed of rolls of roofing.

CONSIDERABLE STRENGTH IN PRIMARY STEEL CENTRES

More general strength is being displayed in the iron and steel situation than any time in several months. This is due in large part to the heavy accumulation of orders for future delivery, a considerable part of which has been acquired in recent weeks. This tonnage is well spread through the first quarter of 1923 and it presents a very fair probability that the industry will be enabled to maintain its present operations of 80 to 85 per cent. through that period. Upon this foundation, prices are hardening. With better car supply now enabling producers to clean up tonnage recently and piled on mill yard and all shipments moving more freely, the entire industry is permeated with a more cheerful sentiment, says the Iron Trade Review.

We'll be Called Together

by President George May of the Ontario Retail Hardware Association in Toronto on the morning of February 13 for the big convention and exhibition lasting until the 16th.
Watch for preliminary details in Hardware and Metal but make your plans NOW to attend.
It will be the best convention yet if you do your part by attending.

Only One More Week

Before the Closing Date for Entries in the Hardware and Metal Xmas Window Contest

Before you take your display out be sure to arrange for a photograph and enter it in this national event.

EIGHT PRIZES are offered by *Hardware and Metal* for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting sales ideas into the display is what counts.

Contest Closes January 1st 1923

Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

TRIUMPH GAME TRAPS

H. F. Johnston, general merchant, Rolla, B.C.—Kindly let me know where I can procure Triumph coil spring game traps.

Answer.—The Triumph Trap Co., Oneida, N. Y.

DEHORNING CLIPPERS

John Fennell & Son, Kitchener, Ont.—Please inform us who manufacture dehorning clippers.

Answer: Messrs. J. F. Hartz, 24 Hayter St., Toronto.

"ACME" WASHING MACHINE

H. S. Howland Son & Company, wholesale hardware, Toronto.—Do you know who are the manufacturers of the "Acme" washing machine?

Answer: Messrs. Fairgrieve & Son, 50 Dovercourt Rd., Toronto.

"ATLAS" WOOD PRESERVATIVE

Latimer & Johnston, Collingwood, Ont.—Could you advise us who makes the "Atlas" wood preservative?

Answer: The Atlas Preservative Co. of America, 95 Liberty St., New York City.

"LITTLE GIANT" PUNCH AND SHEAR

La Compagnie Martineau, 135 St. Joseph St., Quebec, Que.—Could you give us the address of the manufacturers of the Little Giant punch and shear?

Answer: The Little Giant Punch & Shear Co., Sparta, Ill.

CANADA BARREL & KEGS, LTD.

Oltman Bros., Limerick, Sask.—Kindly advise us the location of the Barrels & Kegs, Ltd.

Answer: This firm is the Canada Barrel & Kegs, Ltd., Waterloo, Ont. The former name was Chas. Mueller & Co.

CEDAR CHESTS

The Foster Hardware Co., Orono, Ont.—Kindly advise us names of manufacturers of cedar chests.

Answer: The Crown Furniture Co., Ltd., Preston, Ont.; J. H. Connor & Son, Ltd., Ottawa, Ont.; The Lindsay Woodworkers, Ltd., Lindsay, Ont.; Keenan Woodenware Mfg. Co., Ltd., Owen Sound, Ont.; Waterloo Furniture Co., Waterloo, Ont.; Czerwinski Box Co., Ltd., Winnipeg, Man.

SASH WEIGHTS

The Moncton Supply Co., Ltd., Moncton, N. B.—Would you kindly advise us the name and address of a manufacturer of sash weights?

Answer: The Katie Foundry Ltd., Galt, Ont.; Tallman Brass & Metal Co., Ltd., Hamilton, Ont.; John Watson & Son, Ltd., Montreal, Que.; The Smith Foundry Co., Fredericton, N.B.

METAL CEILINGS

The St. Denis Hardware Co., Windsor, Ont.—Can you inform us where we can secure metal ceilings?

Answer.—The Pedlar People, Ltd., Oshawa, Ont.; A. B. Ormsby, Ltd., Toronto; Metallic Roofing Co., Toronto; Metal Shingle & Siding Co., Preston, Ont.; McFarlane-Douglas Co., Ottawa, Ont.; Galt Art Metal Co., Galt, Ont.; Winnipeg Ceiling & Roofing Co., Winnipeg, Man.; Crossen Metal Works, Ltd., Winnipeg, Man.; J. W. Wright, Winnipeg, Man.; Campbell & Grill, Vancouver, B. C.

CROSSBY WIRE ROPE CLIPS

J. L. Demers, Thetford Mines, Que.—Will you kindly give us the name of the manufacturers of Crossby wire rope clips?

Answer.—These are made by the Broderick and Bascom Rope Company, 4600 Main North, St. Louis, Mo., U.S.A. Canadian manufacturers of wire rope clips are as follows: The Dominion Wire Rope Company, Limited, Montreal, Quebec; The R. C. Greeening Wire Company, Hamilton, Ontario.

WALL PROTECTORS

Messrs. McKinley & Northwood, Ottawa, Ont.—In one of your issues an advertiser illustrated a galvanized wall protector, which is intended to be placed between a heater and the wall. We would like to get in touch with the manufacturer.

Answer.—This product is manufactured by the Guardian Fire Screen Mfg. Company, who are located at Ville St. Pierre, Montreal, Que.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

HOBBS HARDWARE CATALOG

The December, 1922, Catalog of the Hobbs Hardware Co., London, Ont., is now being distributed to the trade. This has a seasonable cover design, with 278 pages of descriptions and illustrations of practical hardware lines.

PEASE BLUE PRINT

The Pease Foundry Co., Ltd., Toronto, have prepared a blue print showing various warm air furnace connections. This information has been gathered under the supervision of the Pease Foundry engineer, and illustrates the correct fittings to be used in the installation of Pease warm air furnaces. Copies of this blue print will be sent to those dealers interested therein, upon request to the above manufacturers.

BLACK AND DECKER TOOLS

The Black and Decker Manufacturing Co., of Towson Heights, Baltimore, are distributing their 1923 catalog on portable electric tools, and shop equipment. These include electric grinders, valve grinders, screwdrivers, electric bench and pedestal grinders, and electric air compressors. This book is very finely illustrated on stock coated paper. Various details showing the pistol grip and trigger switch principles, as well as the capacity and dimensions of each product attract special attention. The purposes for which each tool is designed as well as certain other uses are outlined, with descriptive matter on their application.

RADIO HAND BOOK

The Radio Experimenter's Hand Book, by M. B. Sleeper, has been prepared for the instruction of those interested in the development of radio apparatus for experimental purposes. The chief object of this book is to enlighten the novice and advanced student on practical matters pertaining to the construction and operation of radio appliances. One chapter devoted to questions on antennae, both for transmitting and receiving; many helpful suggestions are found throughout the entire 16 chapters. A chapter is devoted to radio rules and regulations and includes the latest information on how the antennae should be protected from lightning and meet the requirements of fire underwriters. This book is published by the Norman W. Henley Publishing Co.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

4432. **Roofing and clout nails**—A Liverpool firm ask quotations on an assortment of 10 tons of round and oval nails, 1 inch to 6 inches, lath nails 1 inch by 14 inches, and bright clout nails, ¾ inch by 12 inches, and on 10 tons of 2 inch, 2¼ inch, 2½ inch and 3 inch by 4 gauge bright cone head chisel point roofing nails.

4433. **Steel**—A Birmingham firm state they are open to buy mild steel plates, angles, bars, etc.

4434. **Wire nails**—A South Wales buyer of iron and steel is open for an agency for wire nails.

4435. **Shoe rivet wire**—A Birmingham manufacturer would import shoe rivet wire if price right.

4436. **Hardware**—A Manchester firm seeks representation of Canadian manufacturers of any general hardware lines, particularly specialties.

4437. **Hardware**—A buyer in the Midlands of plumbers' supplies, shelf, builders' and general ironmongery, would entertain an agency business.

4438. **Builders' hardware**—A Birmingham firm of importers of builders' hardware, calling on wholesale ironmongers and factors throughout England, desire to act as buying agents for any salable lines of Canadian hardware.

4439. **Hardware, etc.**—A Bristol firm are open to consider exclusive agencies for any lines suitable for sale to the ironmonger and agricultural implement agent in the United Kingdom.

4825. **Aluminium rounds.**—Canadian manufacturers of aluminium rounds, 20 to 600 mm. (about) are requested to communicate with a company in Copenhagen.

4826. **Aluminium.**—Ingots and barrels are required by Swedish firm.

4827. **Nickel.**—A concern in Stockholm desires to get in touch with Canadian firm in a position to export nickel (granulated).

4828. **Pig lead, lead pipes and lead sheets.**—A concern in Christiania wants to import pig lead, lead pipes and lead sheets.

4829. **Metals.**—A Goteborg concern wants to receive quotations for copper and brass sheets, wire, bars and rods. Is also interested in nickel cubes or picules.

4830. **Metals.**—A firm of wholesale merchants in Christiania would like to hear from Canadian exporter of aluminium ingots, sheets and wire; antimony ingots; pig and sheet lead; phosphor bronze; copper and tin; copper ingots; sheets, rods, wire; brass sheets, bars, wire; tin bars and ingots; and zinc bars and sheets.

4831. **Metals.**—A Danish importer of metals, tools and machinery would be glad to hear from Canadian manufacturers of the following: copper ingots, tubes, sheets and wire; brass ingots, tubes and wire; nickel; aluminium sheets and ingots; galvanized sheets and bearing metals for all purposes.

4832. **Metals.**—A firm in Christiania would like to hear from a Canadian concern in a position to export brass and copper ingots, rods, sheets, tubes and wire; zinc sheets; tin bars and ingots; aluminium ingots, sheets, tubes; antimony ingots; also pig lead, lead sheets, wire and tubes.

4833. **Metals.**—A firm in Malmo are interested in the importation of copper, zinc blocks, tin plates.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

THE HOLIDAY atmosphere is apparent in the current hardware markets and price revisions are conservative in number. This week's reductions include such products as asphalt felt, certain lines of roofings, and the Black & Decker line of drills, while lower price levels also appear on curry combs. Easier booking prices for spring 1923 are recorded on Cyclone grass seeders. On the other hand, advanced quotations appear on knife handled wrenches and pig iron. The upward development in pig iron is in direct contrast to the recent easier tendency. There is also a ten per cent. increase on carpenter socket chisels. Quotations on whips are considered very firm, there being a stronger tone in the market for these products. Some higher prices are, therefore, thought possible in the New Year. An upward tendency has also developed in corn brooms, this reflecting the climb of corn prices. Further increases in this direction are also considered possible.

A popular movement is recorded in ice skates, glass ovenware, hockey supplies, and accessories, hockey sticks, horse shoes and calks, hand sleighs, silverware, cut glass, razors, pocket cutlery, brass ware, cross cut saws and other seasonal merchandise. Jobbers are now taking stock, and most of the hardware salesmen are off the road until early in the New Year. Spring bookings are reported as more general in the last two weeks. It is pointed out that the nature of buying throughout the year has resulted in retailers' stocks generally being at a comparatively low point.

Considerable interest is now manifest in the trade regarding price developments after the first of the year. In recent years a lengthy budget of revisions was announced during the first month or so and many think that 1923 will be no exception. It is quite reasonable, however, to expect that changes will cover both advances and recessions. There is a strengthening attitude in the raw material markets for many hardware lines, while on the other hand some declines, of a more or less slight nature, are looked for. Market reports, therefore, should contain some interesting and valuable information during the opening weeks of the New Year.

Montreal, Que.

MONTREAL, December 21.—Both price advances and declines feature the current hardware markets. Revisions in a downward direction are announced on certain lines of ready roofing, asphalt felt and curry combs. Although no change is made in other quarters, on roofings, it is admitted that the market is in a slightly easier position. Price advances are recorded on pig iron and knife handled wrenches. This marks a sudden reversal in the pig iron market, and opinions are again expressed that the bottom was formerly reached. While no change is made in quotations on whips there is a very firm tone on these products, and higher prices are thought likely after the first of the year. The market for corn brooms has developed a very strong tendency owing to a climb in corn prices, and a shortage in some quarters. Prices on these have already been advanced and further increases are considered probable. In iron and steel markets there is now a firmer feeling, with prospects for an improvement in general commencing in the opening months of the new year.

FURTHER SLIGHT REDUCTION IN READY ROOFING

Montreal.

Following a revision some few weeks ago a further reduction in ready roofing is announced by certain manufacturers. In making this adjustment producers state that it is an effort to establish a steady price basis for trade in the new year, following a slightly easier trend in raw materials. Other manufacturers have not up to the present made any change in a downward direction, but admit that the undertone of the market is a little weaker and revisions are probable in the near future. Following are new lower prices on some of the Barrett lines:

ROOFING—

Tomahawk—1 ply $1.15; 2 ply $1.50; 3 ply $1.80.
Panamoid—1 ply $1.40; 2 ply $1.75; 3 ply $2.10.
Everlastic—1 ply $1.65; 2 ply $1.90; 3 ply $2.25.

VERY FIRM TONE IN MARKET FOR WHIPS

Montreal.

Manufacturers of whips state that they are experiencing a very firm market situation on their products, raw materials such as raw-hide and cotton recording higher values. One manufacturer announces that indications point to higher prices, and revisions in this direction may be expected after the first of the year. It was also pointed out that whip prices in Canada on the average are lower than quotations in the United States on the same quality.

ASPHALT FELT SHOWS PRICE REDUCTION

Montreal.

A reduction of twenty-five cents is announced in quotations on asphalt saturated felt, bringing present price to $3.75 per 100 lbs.

PIG IRON PRICE ADVANCES ONE DOLLAR PER TON

Montreal.

After a receding market for some weeks past, domestic pig iron prices are now advanced $1.00 per ton. Although this marks a sudden reverse trend, this development does not come as any great surprise to some well-informed, as the former level was recognized as well down to bottom and with conditions in the steel industry promising well for the new year it was thought improbable that prices would remain at levels recently announced. Reports from United States markets show that many customers took advantage of the reduced prices and this was a strong factor in producing higher quotations. An advance of $1.00 per ton is also announced this week in some quarters. Although local pro-

ducers of steel products are sufficiently supplied with pig iron for the opening months of the new year at the present ratio of operations, stocks are by no means heavy and a trade revival would place them in the market for pig before many weeks passed. Present local quotation is $34.15 per ton.

STEADY TONE NOTED IN ASBESTOS PRODUCTS

Montreal.

Notwithstanding a little quieter demand in most products, and higher price levels recently announced, a steady to firm undertone is still noted. Trade in pipe and boiler has slackened during recent weeks, but there is a fair amount of activity recorded in magnesia covering and slower deliveries also adds to the firmer tendency on this product. Following are unchanged quotations:

ASBESTOS PRODUCTS—

	Off list prices
2 ply pipe covering	57½%
3 ply pipe covering	55%
4 ply pipe covering	50%
85 per cent. magnesia	40%
Boiler covering	$1.50 per bag
Asbestos Sheathing	$7.75—$8.25

STEADY TO FIRM MARKET TONE IN SOLDERS

Montreal.

The trend of metals on primary markets still reflects a steady to firm undertone in lead and zinc products, especially solders. Tin is again recorded in a firm market position and lead has made a further slight gain in price. Spelter, however, is a shade easier but this tendency is not sufficient to materially affect the markets for finished products. One local manufacturer stated that little change in prices was now expected until after the turn of the year although the tendency was still in an upward direction in most products. Unchanged price levels are as follows:

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs., up to 2"	14 00
Do., 2" to 8"	15 00
Do., 8" and over	16 00
Lead waste, per 100 lbs.	15 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs., sq. ft. lb.	0 11
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs., sq. ft. lb.	0 10

Cut sheets ¼c. lb. extra, and cut sheets to size ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 22½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 36
Zinc sheets, casks	0 11
Do., broken lots	0 11½

ONLY SEASONAL MOVEMENT IN SHEET MARKETS

Montreal.

Following a little brisker trade in galvanized sheets last week, the movement is now said to be quieter, although seasonal. Other sheets are also on a dull market at the present time, and little further activity is anticipated until after the inventory period. Interest is now being taken in the prospects for later winter and spring months. Indications point to improved conditions in the steel industry, and certainly sheets should be no exception. It is felt that trade next year will be assisted by a steady market as producers now describe the undertone of these products as firm and this tendency should be further strengthened by a more active turn in trade. Although it was expected in some quarters that certain firms would quote slightly lower levels in the hope of lowering stocks around inventory time the market at the present time has every appearance of being a steady one. Following are average prices locally:

BLACK SHEETS—

10 gauge, base	4 25
12 gauge	4 35
14 gauge	4 45
16 gauge	4 55
18—20 gauge	4 80
22—24 gauge	4 85
26 gauge	4 90
28 gauge	5 10

GALVANIZED SHEETS—

	Queen's Head	Fleur de Lis
28 gauge	7 25	7 00
26 gauge	7 00	6 75
18—20 gauge	6 40	6 15
24 gauge	6 70	6 45
22 gauge	6 65	6 40
Other Brands—		
10¾ oz.	7 00	——
28 U. S. base	6 50	——
26 U. S. base	6 25	——
24—22 gauge	6 10	——
20—18 gauge	5 90	——
16 gauge	5 75	——

Above prices are for ½ ton lots in English iron and 1000 lb. lots in American iron with an extra charge of 25c. for less quantities. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 25c. per 100 lbs.

Further extra for sheets 4 ft. wide according to gauge.

TIN PLATE—	
20 x 28 x 100 lb. basis	12 25

Galvanized, 52s	7 25
Galvanized 60s	7 75

FAIR SORTING BUSINESS IN PIPE FITTINGS

Montreal.

A fair amount of business is again reported in pipe fittings, orders being of a general sorting character. No revision in prices are announced and quotations are still said to be on a steady basis. Prevailing discounts are the following:

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, small	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Dart Unions, blk., ¼ to 2 in.	331-3%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, black and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ; in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., running thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—

Price list effective June 1st, 1922. Discount 70 per cent.

ONLY MODERATE TRADE IN SOIL PIPE FITTINGS

Montreal.

Current trade in soil pipe and fittings is now said to be of moderate proportions, although fair for this season of the year. Regarding the undertone of the market for these products a local manufacturer stated that they were watching more recent developments in pig iron markets with interest, and while the advance in prices this week is of a minor nature, it may mean the turn to a stiffer market which would directly reflect on products such as these. With pig iron continuing to show recessions their products were placed on an easier market although supplies on hand were sufficient to carry them over the present quieter period. It was now very problematic what existing values would be when they were again in the market for raw materials. Unchanged discounts are:

SOIL PIPE—	
2 and 3 inch	35%
4 inch	35%
5 and 6 inch	35%
8 inch	net
Fittings—	
2 and 6 inch	45%
8 inch	net

FIRMER TONE PRESENTED IN STEEL MARKETS

Montreal.

The attitude in local iron and steel circles is a little changed and in quarters where slightly lower prices were thought probable there is now a feeling that the market may continue on a steady to firm basis, regardless of the quieter period during the following weeks. As pointed out in past reports any tendency towards a softer tone would in all probability be evident from a distributing standpoint, and due to the above reason. Indications point to a much improved condition in the industry in the new year, and producers are fairly optimistic regarding the trend of business commencing in earlier spring. Reports from southern mills indicate that the first half at least will be an active one. Domestic mills are also convinced that home consumption will be greater with industrial interests already showing some interest. Opinions are expressed, therefore, that rather than any weakness, the market should maintain a strengthening attitude from now on.

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per cwt. over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

QUIETER PERIOD NOW EVIDENT IN CORRUGATED

Montreal.

Following a quite satisfactory movement in corrugated sheets up to the present time, there is now a slackening in sales with the approach of the holiday season. Quotations on these products are unchanged and the market is again described as steady. Following are list prices and discount:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

BOILER TUBES MOVE IN SMALL QUANTITIES

Montreal.

Boiler tubes are only selling in limited quantities, and the market is described as quiet. Deliveries from the mills are a little slow but because of the quiet demand no shortage is felt. Quotations are unchanged at the following average quotations:

BOILER TUBES—

	Seamless	Lapweld
1 inch	20 00	.....
1¼ inch	22 00	.....
1½ inch	21 00	.....
1¾ inch	24 50	24 00
2 inch	21 00	19 75
2¼ inch	24 00	22 25
2½ inch	27 00	23 25
3 inch	33 00	29 50
3½ inch	38 00	34 25
4 inch	49 00	43 50

Prices per 100 ft. f.o.b. Montreal.

KNIFE HANDLED WRENCHES AT HIGHER LEVELS

Montreal.

Through a revision in discounts quotations on W. & B. knife handled wrenches are advanced, and these are now less 37½ per cent. Coes' are quoted at 30 per cent. off.

REDUCED PRICES APPEAR ON CURRY COMBS

Montreal.

New lower prices are announced on curry combs, and No. 121 is now quoted at $1.35, No. 127 at $1.90 per dozen.

VERY STRONG MARKET IN CORN BROOMS

Montreal.

Scarcity and continued increases in cost of broom corn has placed the market for corn brooms in a very firm position. Manufacturers state that raw material costs have continued to soar, and in many quarters the question of further supplies is an important one. Quotations on brooms, therefore, are on the upgrade. Although substantial advances in prices have already been made there would seem to be every likelihood of still higher levels unless some relief is found in primary circles.

INGOT METALS ARE QUIETER BUT CONTINUE FIRM

Montreal.

Ingot metal markets remain quite firm although there are certain evidences that the holiday spirit is prevailing. Copper is the feature of the markets this week, this metal being particularly strong in tone, although there is no sign of weakness in any other lines.

TIN.—After showing a sharp advance in London the early part of the week tin re-acted slightly, but the tone is still firm and it is thought probable that higher prices will rule after the holiday period. The advance in Sterling means higher prices on this side. Local price is slightly higher at 43 cents.

COPPER.—The situation on this metal has altogether changed during the past few weeks, and the tone of the market is very firm. Electro is quoted at about 14¾ cts., refinery, i. e., an advance of almost one cent in two weeks. London also reflects the improved tone on this side and export has picked up as well as local consumption. Market is firm here at 18 cts. for electro and 17½ cts. for casting.

LEAD.—Another advance in trust price was recorded in the U. S. A. this week, while London also went to a higher level. Demand remains remarkably good and production is only about equal thereto. Local quotation 8 cents.

SPELTER.—East St. Louis has again re-acted on cessation of English buying, but it is thought that a seven-cent level will bring about a resumption of this, and further advances may follow. The statistical position of this metal remains good as supplies are still short and it will be difficult to increase production during the winter months. Local prices are firm at from 9¾ to 10 cents.

ANTIMONY.—There is no particular feature to this market, but offerings from China are said to be fairly heavy and reasonable in price. This metal is undoubtedly cheap and it is thought only a question of time until an advance is made. Chinese is quoted at 7¼ cts., high grade English at 7¾ cts.

ALUMINUM.—Aluminum is firm in the U. S. A., but the market is quiet here with quotation unchanged at 22 cents.

Toronto, Ont.

TORONTO, December 21.—A holiday atmosphere has pervaded the hardware markets this week, and price revisions are moderate in extent. A development of some interest is the upward climb of pig iron quotations, this being a distinct reversal of form from the tendency exhibited throughout recent weeks. There is also an increase of approximately ten per cent in knife handled wrenches. The current reductions include lower prices on the Black & Decker line of drills, easier levels on asphalt felt, and a slight decline in quotations on certain makes of roofings. There is a firmer undertone in crude rubber which is naturally reflected in automobile tires. Radiator valves are now generally quoted at 59 per cent. off in comformity with the movement in this direction noted in former reports. While current activity in stoves, ranges and furnaces is now slackening, a brisk movement in electric ranges is well maintained.

INCREASE ON KNIFE HANDLED WRENCHES

Toronto.

Quotations on knife-handled wrenches are advanced this week, the extent of the upward revision being approximately ten per cent.

LOWER PRICE EFFECTIVE ON ASPHALT FELT

Toronto.

A reduction of 25 cents per cwt. is made on asphalt felt price levels. This revision brings the prevailing quotation to $3.75 compared with the former level of $4.00.

SLIGHT DECLINE IN ROOFING QUOTATIONS

Toronto.

Some slight downward price revisions are effective this week on certain lines of roofings, mostly two-ply and three-ply. The adjusted quotations, as outlined by certain manufacturers, are contained in the current market price section, and show a reduction of five and ten cents per roll.

BRISK MOVEMENT MAINTAINED IN ELECTRIC RANGES

Toronto.

Manufacturers state that the movement of electric ranges is still active, and one distributor expressed the opinion to Hardware and Metal, that "it was astonishing how well this movement keeps up for this time of the year."

There is not much new business now developing in stoves, ranges or furnaces, however. The brisk call for heaters has now eased off a little, with requirements having been satisfied, while trade in furnaces is also slackening off, although a few are still moving on former contracts. Prices have continued steady, with a firm undertone in raw materials.

LOWER PRICES ON BLACK AND DECKER DRILLS

Toronto.

The Black and Decker Mfg. Co. are putting into effect a further reduction in prices on their special types of drills and other products. The revised levels

are effective from January 1, 1923. The reduction varies between ten and twenty per cent. on their quarter-inch drill, half-inch special, bench drill stand, post drill stand, and six-inch electric bench grinder.

FIRMER UNDERTONE IN RUBBER AND AUTO TIRES

Toronto.

Recent increases in the prices of crude rubber and raw cotton, which materials enter largely into the manufacture of auto tires and tubes, have resulted in the impression that the downward trend has reached terra firma and, insofar as tires are concerned, it seems generally accepted that should any price movements develop in the future, they are likely to be of an upward nature.

PIG IRON PRICE IN SEE-SAW MOVEMENT

Toronto.

Following the reduction in pig iron prices of $2 per ton, an advance has been recorded this week, which indicates the improved activity of the market as outlined in a former issue. The extent of the increase is $1 per ton, this change bringing the prevailing quotation up to $31.80. Brisk activity in placing contracts at the former low level is described as leading to the current revision.

MAY BE REVISION IN CAST FITTING PRICES

Toronto.

Business in pipe fittings is stated to be just on a fair basis at present. While reports from certain distributors describe trade as "ordinary for this time of the year," others state that it is "not good." It is evident that there is no activity worth mentioning, and not much is expected during the stock-taking period. That some revision may develop early in the New Year on cast iron fittings is rumored on the local market, slightly easier levels being said to be pending on account of anxiety in certain quarters to open up the market. Discounts in general remain unchanged at the following levels:

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, case iron	27%
Do., solid	27%
Do., countersunk	27%
Bushings, mail	30%
Bushings, cast	30%

Discount, Classes, A B and C. less 70 per cent.

BOOKING WELL AHEAD ON SHEETS AND PLATES

Toronto.

While current trade in sheets is described as moderately quiet at this period of the year, it is also pointed out that mills are still considerably behind on deliveries, and bookings are now being placed in some cases for March business. Quotations remain unchanged, both on domestic and primary markets, with prevailing market tendencies being closely watched. Prices on plates now show a narrower range, and the opinion has been expressed that the recent recovery in pig iron, although of slight extent, contains some indication of the developments in semi-finished steel products.

PLATES, CANADA—	
Ordinary, 52 sheets	4 90

26 gauge	5 00
28 gauge	5 10

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

RADIATOR VALVES NOW AT 58 PER CENT. OFF

Toronto.

Manufacturers and distributors record a fair volume of activity keeping up in brass compression goods. Trade for this time of the year is described as brisk, a condition caused generally by recent building operations, and repair work. In conjunction with the current annual inventory period, the hum of activity in warehouses is therefore evidently reflecting these causes. Quotations remain unchanged, with the tone of the market steady. Raw materials have fluctuated within narrow limits, but no marked developments have been recorded. Radiator valves are generally quoted at 58 per cent. off, as a result of the unsettlement referred to in recent market reports.

COMPRESSION GOODS—	
Compression work, standard	45%

HOLIDAY SEASON IN IRON AND STEEL MARKET

Toronto.

Greater activity in the pig iron markets, both domestic and outside, coupled with the local advance in price of $1 per ton, is taken to indicate that finished steel quotations are hardly likely to go any lower at present. It is pointed out that some lines of finished steel where price softness was formerly marked, now appear on a firmer basis due to improved booking operations in certain quarters. Another favorable aspect of the current market situation is the greater confidence which is being displayed in obligations for material for forward delivery at prevailing price levels. Local business is described as good for this time of the year, in spite of the holiday season, inventory period and winter dullness. Prices are unchanged, as follows:

IRON AND STEEL—		
Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40
Angle iron, base	3 35	3 50

Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

SATISFACTORY TRADE IN SOIL PIPE AND FITTINGS

Toronto.

Business in soil pipe and fittings is described as keeping up remarkably well for this time of the year. A brief review of trade during 1922 indicates that the volume of business has been of a more satisfactory nature, with good prospects ahead for the coming year. Prices remain on a firm basis, with little likelihood of change at present. While the current pig iron market is at easier levels than formerly, it is pointed out that existing quotations are now lower than was the case early in the fall when a revision in soil pipe discounts was put into effect. With raw materials gen-

erally showing a firm to steady trend and with labor costs on an equal basis, it is stated that production costs hardly permit of downward revisions at this time. Current quotations follow:

SOIL PIPE—
2 inch .....Less 33 1-3 per cent.
3 inch .....Less 33 1-3 per cent.
4-inch .....Less 33 1-3 per cent.
5 and 6 inch .....Less 33 1-3 per cent.
8 inch ..... net
FITTINGS—
2 to 6 inch fittings .....Less 45 per cent.
8 inch fittings ..... net

SLIGHT BETTERMENT IN BRASS AND COPPER

Toronto.

With a slightly firmer attitude recorded in primary metal centres, the condition of brass and copper products is again stated to be on the road to improvement. Current trade in sheets, rods and tubing is described as fairly good for this time of the year, and slightly better in volume than was evident a few weeks ago. This is attributed to the general improvement in business conditions, coupled with a more active interest in raw materials. Prices on these products remain unchanged at the following levels:

BRASS—
Sheets base, per lb. 0 23
Tubing, base, per lb. 0 30
Rods, base, per lb. 0 22
COPPER—
Rods, base, per lb. 0 30
Soft Sheets, plain, 16 oz. and heavier, per lb. 0 29
Do., plain tinned 16 oz. and heavier, per lb. 0 36
Do., polished and tinned, 16 oz. and heavier, lb. 0 41
Tubing 0 33

SEASONAL QUIETNESS IN LEAD AND ZINC GOODS

Toronto.

In lead and zinc goods the primary metals entering into production are described as just holding their own, and quotations on the finished products listed below have remained unchanged. Current trade is moderate, a condition usually evident at this time of the year, when activity is light on account of inventory and holiday factors. Some variation is still noted in lead sheet prices, the range being between 9½ and 10 cents per pound. Other quotations remain at the following levels:

LEAD AND ZINC GOODS—
Lead pipe, list per lb. 0 14
Lead Waste, pipe, list, per lb. 0 15
Do., over 8 in., list per lb. 0 16
Lead pipe is subjected to a discount of 10%
Lead traps and bends 15%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb. 0 09½ 0 10
Cut sheets, ¾c. lb. extra and cut sheets to size 1c lb. extra.
Solder, wire, per lb. 0 31

SPASMODIC TRADE NOTED IN BOILER TUBES

Toronto.

Current trade in boiler tubes is now stated to be of a spasmodic nature. The improvement in volume which was formerly recorded has now subsided somewhat, although fluctuations in the amount of business are more or less evident. Prices are continuing on a moderately steady basis, with the upward tendency still being recorded in certain primary centres owing to the somewhat uncertain future position of raw materials. Domestic quotations remain unchanged at the following nominal levels:

BOILER TUBES—

	Seamless	Lapweld
¾ inch	19 00	....
1 inch	20 00	....
1¼ inch	22 00	....
1½ inch	24 00	....
1¾ inch	24 00	23 00
2 inch	22 00	19 00
2¼ inch	24 00	21 50
2½ inch	27 00	23 50
3 inch	34 00	28 50
3¼ inch	36 00	33 00
3½ inch	38 00	32 00
4 inch	50 00	42 00

IMPROVEMENT MAINTAINED IN ASBESTOS MARKET

Toronto.

Quotations on asbestos products, including air cell pipe covering, remain unchanged on the local market, but improvement in this direction is still evident. With current trade registering a larger comparative volume of activity and renewed interest in these products, some higher quotations have developed in certain quarters. That a similar revision may become effective on the local markets in the near future is the general opinion expressed by manufacturers and distributors. At the present time, however, the following quotations are in effect, but it is considered possible that some readjustment may be made early in the New Year:

ASBESTOS PRODUCTS—
Pipe Covering—
Air cell, 4 ply .....60 per cent. off list.
Air cell, 3 ply .....65 per cent. off list.
Air cell, 2 ply .....67½% off standard list.
Boiler Covering .....$1.50 per bag
Asbestos Sheathing .....$6.75 per 100 lbs.
Magnesia pipe covering .....less 40%

STRONG UNDERTONE IN RANGE BOILERS

Toronto.

While current business is described as a little quieter in range boilers, there is quite a comfortable margin of trade for this season of the year, according to manufacturers and distributors. The impression is also noted that producers are now in a better position for keeping up with the current demand, although no marked increase in stocks is evident. Prices continue on a firm basis, this reflecting the tendency in raw materials and replacement costs. No change has developed from the following list and discounts:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 40 per cent; Extra heavy, 30 per cent.

WROUGHT PIPING REMAINS ON FIRM BASIS

Toronto.

Business in wrought pipe is described as easing off a little at the present time, this condition being naturally due to seasonal conditions, the inventory period, holidays, etc. Prices on piping are still very firm, however, manufacturers pointing out that certain raw materials remain somewhat difficult to obtain. The following list No. 57, continues to govern local markets:

WROUGHT PIPE

Price List No. 57. November, 1922.

Standard Buttweld Pipe S/C

Size	Steel Blk.	Gen. Wrot. Galv.	Iron Blk.	Iron Galv.
⅛ in.	6.00	8.00	....	....

10 in.	2.47	3.13	3.63	4.37

SLACKENING OF ACTIVITY IN RADIATORS

Toronto.

While seasonal business is recorded in radiators and boilers, there has been a noticeable falling off in volume from the brisk activity evident earlier in the season. Current orders, however, are described as in fair proportion. Some interest is attached to production costs in view of the easier trend to present pig iron price levels, but producers indicate that the former upward trend of quotations on radiators and boilers was based upon earlier costs of basic raw materials, and therefore current developments in pig iron fail to produce any easier trend in the market for the finished product. No change has been made in either lists or discounts, the following levels being described as firm:

RADIATORS—
Revised radiator list prices are for 1, 2, 3, 4 and 5column radiators per square foot.

38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in. $1.40; 16 in. $1.50; 14 in. $1.55; 13 in. $1.60.

Discount on 2, 3, and 5-column standard sizes, 55 per cent. for water and 56 per cent. for steam.

Discount on 1-column standard size, and 2, 3, and 4-column hospital sizes 47 per cent. for water and 48 per cent. for steam

Discounts on 1-column hospital size, water, 33 per cent.; steam, 34 per cent.

Wall radiators—5 ft., $1.15; 6 ft. $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05. Discount 52 per cent.

BOILERS—
Water:
Round, 60 per cent off list. Square, 2[illegible] per cent. off list.
Steam:
Round, 25 per cent. off list; square, 15 per cent. off list.

HOLIDAY ATMOSPHERE IN SCRAP MATERIALS

Toronto.

The holiday atmosphere has apparently descended upon the domestic scrap material markets, and current trading is on a quiet plane as a result. Steel scrap is described as showing a slight improvement but cast iron is weaker in tone. The demand for copper and brass scrap has also fallen off and dealers state that very little is now moving. There have been no changes in prices this week, and the opinion is expressed that quotations will probably remain at present levels until the beginning of the New Year. Lead and zinc scrap are firm, however, and considerable orders are reported to have been placed lately. Scrap rubber has maintained the slight improvement previously referred to. Following are the usual averages of dealers' buying prices for fairly large quantities:

SCRAP MATERIALS—

Scrap Iron	
Heavy melting steel	10 00
Scrap pipe	7 00
Steel turnings	10 00
Malleable scrap	10 00
Rails, scrap	11 00
Net tons—	
No. 1 cast	18 00
Stove plate	14 50
Car Wheels, (std.)	14 00
Scrap Metals	
Heavy copper wire	11 00
Light copper	9 00
No. 1 composition	9 00
Red brass turnings	7 00
Light brass	4 50
Heavy yellow brass	5 25
Heavy lead	4 50
Tea lead	3 00
Scrap zinc	3 50
Scrap Rubber	
Boots and shoes	2 25 — 2 75
High rubber boots	1 50 — 1 75
Auto tires	0 25 — 0 50
Solid tires	0 60 — 1 00

BETTER FEELING REMAINS IN INGOT METALS

Toronto.

There is a better feeling generally evident throughout the ingot metal group, but no great changes are recorded. There is little trading at this period, due to holidays and inventory needs. Prices have remained on a fairly steady basis, both in domestic and primary markets.

COPPER.—The undertone of copper is decidedly stronger, with the pendulum now commencing another upward swing. While domestic price levels are unchanged, as yet, it is noted that United States quotations are slightly higher, while any corresponding advance in London is tempered by exchange conditions.

TIN.—This metal continues on a strong basis. Tin prices are again showing an inclination to rise, both in London and the U. S. markets. Sentiment is described as much more cheerful. Domestic quotations remain fairly steady, local levels being given below.

LEAD.—The general tone of the market for lead is steady to firm, with no great developments expected at this time of the year, due to the holiday and inventory interests. While the aspect of this market has lately shown temporary periods of listlessness, with slight wavering in primary quotations, the large and steady consumption that is going on is pointed out as maintaining a sound underlying position.

SPELTER.—This metal continues quiet with very little change in either prices or market quotations. The present tone is quiet, a condition not unusual at this season. London prices are reported as slightly firmer, but this trend is not reflected in domestic circles.

ANTIMONY.—The market undertone in antimony has remained dull. In the absence of any trading to speak of, prices have remained nominally unchanged, both on primary and domestic markets.

ALUMINUM.—Inquiries are stated to have been more numerous for aluminum, but it is noted that actual transactions are relatively light. Prices are firm and unchanged from previous levels.

INGOT METALS—

Copper	17 25
Tin	41 00
Lead	7 50
Spelter	9 50
Antimony	8 50
Aluminum	22 00

London, Ont.

LONDON, December 21.—Business here at present is seasonably good. Winter and Christmas lines continue to move nicely. Prices are very firm and the number of changes is again light. Collections are reported as very fair at present and are expected to improve with a good holiday trade.

EASIER PRICES ON ASBESTOS SAD IRONS

London, Ont.

New shipments of asbestos sad irons coming in are about ten per cent. easier in price.

Asbestos irons, No. 70	$2.60 set
Dover irons, No. 60	2.00 set

HOLIDAY LINES RECORD BRISK ACTIVITY

London, Ont.

Silverware, cut glass, razors, pocket cutlery, brassware and other holiday lines are selling good just now.

QUIET TRADING IN LINSEED OIL MARKET

London, Ont.

There is little trading evident in linseed oil on the local markets, but no further change has resulted in prevailing quotations as the flax seed prices are again recording a firmer attitude, both on primary and domestic centres.

LINSEED OIL—

	Raw Imperial Gal.	Boiled Imperial Gal.
1 to 2 barrels	1 10	1 13
3 to 5 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less Barrels, Add 15c. Gallon.

REVISED PRICES ON CYCLONE GRASS SEEDERS

London, Ont.

The new prices on Cyclone grass seeders for 1923 spring booking are a little easier. The revised level is $21.50 per doz.

SOCKET CARPENTER CHISELS HIGHER IN PRICE

London, Ont.

Quotations on the Canadian socket carpenter chisels recently advanced approximately ten per cent. The new prices are list less 47½ per cent.

EASIER QUOTATIONS ON NO. 2 BUILDING PAPER

London, Ont.

Recent reductions in prices on cheaper grades of building paper are now in effect here.

Plain paper No. 2	65c roll
Tarred paper No. 2	85c roll

BETTER MOVEMENT OF CROSS CUT SAWS

London, Ont.

A better movement of cross cut saws is now generally recorded. Prices, however, have remained unchanged at the following levels:

CROSS CUT SAWS—

Maple Leaf Lance, Premier, Pangburn, Racer, and Shurley's Arrow Head—5ft., $5.50 ea.; 5½ ft., $6.25 ea.; 6 ft., $7.25 ea.

Philadelphia Lance, and Champion, 75c. ft.

LIGHT SALES EVIDENT FOR TURPENTINE

London, Ont.

There has been no change this week in turpentine quotations. The sale is noticeably light at present, a customary condition at this season.

TURPENTINE—

	Imp. Gal.
1 bbl,. lots	2 15
2 to 4 barrel lots	2 14
5 Gal. lots	2 30

HOCKEY STICK TRADE NOW IN FULL SWING

London, Ont.

A good sale continues this week for hockey sticks. Activity in hockey supplies is now in full swing. Prices are unchanged, as follows:

HOCKEY STICKS—

	Doz.
Boy's Red	2 00
Boy's White	2 85
Youth's White	3 25
Spalding No. 0	8 50
Munro Professional	9 50

BRISK CALL EVIDENT FOR SKATE STRAPS

London, Ont.

A fairly brisk demand is also recorded at the present time for skate straps. Prevailing quotations on these products follow:

SKATE STRAPS—

Canvas, 21 in., $1.25 doz. pr.; 27 in., $1.45 doz. pr.; 33 in., $1.65 doz. pair.

Solid Leather—21 in., $1.45 doz. pr.; 24 in., $1.75; 27 in., $2.10.

BETTER MOVEMENT RECORDED IN ICE SKATES

London, Ont.

Dealers now report a fair movement of ice skates. During the past week, orders have been more numerous. Booking prices continue in effect on the Starr line at list less 30 per cent.

GLASS OVENWARE SALES IN FAIR VOLUME

London, Ont.

A brisk volume of activity is still evident in Pyrex glass ovenware. Sales are seasonably good, with a steady demand being recorded for these products. Quotations remain unchanged at list less 33-1/3 per cent.

FAIR SALES ACTIVITY NOTED FOR NAILS

London, Ont.

A fair volume of sales is stil recorded for nails. Prices continue unchanged at the following levels:

NAILS—
Wire nails, base, $3.75 per keg.
Cut, do., base, $4.60 per keg.

EXCELLENT SALE FOR SHOES AND CALKS

London, Ont.

There is an excellent sale recorded at present for Neverslip horse shoes and calks. Current quotations follow:

Shoes ..... List less 10%
Calks ..... List less 15%

BRISK BUSINESS RECORDED IN HAND SLEIGHS

London, Ont.

Good sales were generally reported during the past week for hand sleighs. Quotations are on a steady basis, the prevailing level on the Canadian-Buffalo sled make being list less 35 per cent.

Winnipeg, Man.

WINNIPEG, December 21.—There are few price revisions on hardware this week. Brooms and whisks have advanced. Cotton gloves are also showing an upward tendency. Aluminum plumbs and levels are quoted at lower quotations. Linseed oil has strengthened and prices are higher. Turpentine continues steady. Business generally is showing an improvement and collections are slightly better. Wholesalers report that Christmas trade has been very satisfactory and a steady business is looked for during the winter months as present stocks held by retailers are low.

BROOMS AND WHISKS MOVE UP IN PRICE

Winnipeg.

In sympathy with the strong tone prevailing in the corn market, prices on whisks and brooms have advanced slightly. Following are new quotations on some of the staple lines. Whisks are quoted at $3 to $4.80 per dozen.

BROOMS—	
Firmset, special, per doz.	11 50
Firmset, Parlour, per doz.	12 50
Firmset, Warehouse, per doz.	11 50
House Brooms—	
No. 3, per doz.	10 30
No. 4 per doz.	12 00
No. 5, per doz.	14 75
No. 6, per doz.	16 00
Wire Bound	
No. 9 per doz.	12 75
Metal Bound—	
No. 2514, per doz.	11 00
Curling Brooms—	
No. 11, per doz.	15 00
Stable brooms, bass—	
No. 4	8 40
No. 5	11 20
No. 6	14 00
Stable brooms, cane—	
No. 4	8 40
No. 5	11 20
No. 6	14 00

COTTON GLOVES SHOW SLIGHT RISE IN PRICE

Winnipeg.

Cotton gloves have shown an advance and the following lines are quoted as follows:

COTTON GLOVES—	
No. 1182, per doz.	1 90
No. 1187, per doz.	2 00
No. 215, per doz.	2 50
No. 449, per doz.	3 00

ALUMINUM PLUMBS AND LEVELS AT LOWER PRICES

Winnipeg.

There has been a slight decline on some lines of aluminum plumbs and levels.

PLUMBS AND LEVELS—	
237 x 12	4 00
237 x 18	5 85
237 x 24	5 75

REVISION IN PRICE ON AUGER BIT SETS

Winnipeg.

There has been a slight revision on the following numbers of auger bit sets:

AUGER BIT SETS	
No. 111	3 20
No. 120	5 30
No. 132	7 60

BULLDOG SHOVELS SHOW SLIGHT PRICE DECLINE

Winnipeg.

There is a slight decline on bulldog long handle square point shovels and number two are quoted at $15.20 per dozen.

SEASONABLE DEMAND FOR STOVE BOARDS

Winnipeg.

There is a seasonable demand for both paper and woodlined stoveboards and quotations have advanced slightly. Following are the latest quotations:

STOVEBOARDS PAPERLINED—	
No. 24 x 24	9 71
No. 26 x 26	11 22
No. 28 x 28	12 33
No. 30 x 30	14 20
STOVEBOARDS WOODLINED	
No. 24 x 24	17 49
No. 26 x 26	19 87
No. 38 x 28	22 23
No. 30 x 30	24 12
No. 30 x 33	30 27
No. 36 x 36	35 00
No. 18 x 28	17 98
No. 24 x 32	23 65
No. 26 x 34	25 06
No. 26 x 38	26 95
No. 28 x 44	37 83

SLIGHT ADVANCE IN LINSEED OIL QUOTATIONS

Winnipeg.

Linseed oil quotations have been fluctuating and quotations on raw in barrel lots this week are $1.20 per gallon, with boiled at $1.23.

TURPENTINE PRICES REMAIN ON STEADY BASIS

Winnipeg.

There is no change in turpentine quotations this week. Price of $2.45 per gallon is well maintained under a seasonable demand.

St. John, N. B.

Hardware Merchants in St. John Paying Special Attention to Advertising

ST. JOHN, N. B., December 21.—The St. John hardware merchants are evidently testing out the value of advertising, and going to the limit so far as newspaper space goes. Several of the local hardware men have been using full and half page newspaper spaces in addition to their regular spaces, and have been doing everything possible along the lines of advertising to boost Christmas business. Some of them have issued pamphlets, sent out circular letters and used the movie screens. Judging by the crowded stores, this advertising is bringing results.

Hardware and Metal's representative recently dropped in the stores of T. McAvity & Sons, Ltd., W. H. Thorne & Co., Ltd., Emmerson & Fisher, Ltd., and found every salesman busy and many customers waiting to be served. Just how sales compare with those of last year throughout the city is not known, but S. E. Fisher, retail manager for W. H. Thorne & Co., Ltd., stated that their sales were about the same, and for the past month had been good.

Automobile accessories are selling in large quantities, and the nature of them indicates that they are intended for Christmas gifts. There is also a very large demand for tubular skates. One

salesman in a sporting goods department stated that they had never before had such a demand. "Everybody seems speed crazy," were his words. This is no doubt brought about by the big revival of ice sport in St. John. It has been planned to hold an ice carnival here, to last a week, and all skaters are busy practising.

There have been a few re-adjustments in prices during the last week, mostly advances. New Brunswick log rules are quoted at $28.25 per dozen. Savannah duck has advanced to the following prices, 29 inches wide, 8 oz., bolt 29c, cut 30c; 9 oz. bolt 33c, cut 34c; 12 oz. bolt 44c, cut 45c.

Ullathorne's shoe thread shows a decline and is quoted per pound, (8) $1.15, (10) $1.36, (12) $1.48, (15) $1.55. Cyclone dry sheathing, per roll, $1.19; Surprise dry sheathing, .74; light dry sheathing, .69; tarred sheathing, .90; heavy dry sheathing, per 100 lbs. $3.60; tarred felt, $3.75; carpet felt, $4.30. Waterproof cement, in dozens, $2.80. Electric solderine, $2.80. Fix-a-tear, $4.00. Wonder cleaner, $2.80. See-ezy, $4.00. Aluminum solder, $4.00. Shoe colors, $4.00.

Galvanized wire fencing is quoted as follows:

GALVANIZED WIRE FENCING—

Barb—

4 point 6" catch weights, per 100 lbs.	4 85
4 point 6" 80 rod reels, per reel	4 20
2 point 5" 80 rod reels, per reel	3 90
PlainTwist—per 100 lbs.	5 70

Coil Spring—

9 gauge, per 100 lbs.	4 50
12 gauge, per 100 lbs.	4 90

Plain—

9 gauge, per 100 lbs.	4 50
12 gauge, per 100 lbs.	4 55

Prices on Sterno goods are now as follows:

STERNO GOODS—

Canned Heat—
5006—$1.35 job doz.; 4008 $2.85 job doz.; 4016 $9.00 job doz.

Folding Stove Stands—
4038——$2.00 job doz.

Disc Stoves—
4020 $20.00 job doz.; 4019—$29.00 job doz.

Curling Iron Heaters—
4050—$3.20 job doz.

Stoves—
4000—$26.00 job doz.; 4002—$24.00 job doz.; 4036—$30.00 job doz.; 4014—$24.00 job doz.; 4009—$12.00 job doz.

Above prices net.

Hamilton, Ont.

Colder Weather and Holiday Goods Combine for Seasonal Hardware Trade

HAMILTON, December 21.—There is the usual proportion of price adjustments in the current hardware markets. Developments include both reductions and increases, however.

The more general arrival of colder weather has not only stimulated the sale of holiday lines, but other seasonable goods now record brisk activity. Much attention is being paid to window displays of Christmas features and gift suggestions. Sustained sales activity is recorded for ash-sifters, ice-skates, weather-strip, cross-cut saws, storm-doors, lamps and lanterns, auto tire chains, as well as heaters and companion lines.

The sale of general hardware has fallen off a little, as is customary at this time of the year, but it is stated that this is more than made up by the increase in other seasonal lines, including sleds, hockey outfits, cutlery supplies, and winter automobile accessories. The retail trade is into the holiday rush in earnest, local stores now making the most of window space for display purposes. All advertising is now generally devoted to gift suggestions.

The firmer tendency in the market for crude rubber is now reflected on many finished goods, and slightly higher prices early in the New Year would not be surprising on such lines as automobile tires, belting and certain lines of hose. It is not expected, however, that any movement in this direction will affect garden hose quotations until after the booking season, a little later in the spring.

The week's developments in the iron and steel markets are particularly interesting, although it certainly cannot be said that they stand together in making the market situation either better or worse than was formerly estimated.

Spring bookings of paints and varnishes continue to provide interest in manufacturing and distributing circles. It is stated that current prospects indicate many increased opportunities for a brisk volume of business in paint and the allied products during the spring season. Quotations on all lines remain unchanged, but it is pointed out that a firm undertone is apparent in the markets, primary raw materials entering into the question of production costs to some extent. Certain manufacturers, however, state that very little in the nature of price developments is looked for. In general, therefore, dealers record the fact that the proportion of bookings for spring are satisfactory, and slightly in advance of similar business tabulated at this time last year.

Vancouver, B. C.

Prospects for Improved Trade During Coming Year in Coast Hardware Circles

VANCOUVER, December 21.—Cold weather on the coast, the coldest in several winters—and at that no lower than nine degrees above zero—has had a material effect upon the wholesale and retail hardware trade during the past Christmas sales to boost up any declines in previous months but there is a general complaint that the snow has kept people indoors, the week's business both downtown and in the suburbs being decidedly slow. There is a certain degree of optimism abroad, however, that the remaining days before the holiday will in a large measure make up for past deficiencies.

Snow precipitation has had the effect of curtailing all outdoor construction work, about the only activity shown being in indoor finishing. Though there have been no price changes this week, the market is firm and surprise is not manifested either wholesale or retail as upward adjustments are effected these days.

The snow has also had another effect—the closing of a large number of the lumber and shingle camps throughout the province. On the other hand it has caused a more active demand for all kinds of heaters, though furnaces are little affected.

Collections are reported to be fairly satisfactory this week, although wholesalers say it is necessary to keep an eye on all backward accounts and push for payment. Vancouver Island buyers are showing a tendency to hold off due to the fact that the mines are at present reduced to a four day a week basis. Sentiment has improved slightly in the Okanagan because there is a decided tendency toward higher prices for the late variety of apples. Shippers are inclined to hold off what stocks remain on hand until, in their opinion, market prices warrant movement east or west. Buyers laid in stocks very slowly during the fall but now as they find their shelves low, many rush orders are reaching the coast.

Wholesalers are largely through with the Christmas rush and are selling odd

lines which are moving under seasonable demand. In the meantime preparations are being made for stocktaking at the year-end.

BARS—Crow, $11.00 per 100 lbs.

BELTING—Lace, rawhide sides, $1.15 lb.; cut, $1.75 lb.

BOLTS, CARRIAGE—(in full packages), ⅜ and smaller up to 6-in. long, less 30/10 off list; over 6½ in. 20/10 off list; 7-16 and larger, all lengths, less 17½/10 off list.

BOLTS, MACHINE—⅜ and smaller up to 4-in. long, less 40/10 off list; over 4-in. less 25/10 off list; ⅝ and ¾, less 20/10 off list.

BOLTS, STOVE—Less 60 off list.

BOLTS, TIRE—Less 25/10, add 10% on all bolts for broken packages.

BOARD, BEAVER—Per 1,000 to 5,000 feet, $51.00 per 1,000 feet.

BOILERS, RANGE—30 gals. $12.80 each.

BUILDING PAPER—Tarred, $1.07 to $1.54 per roll. According to quality. Plain, 78c. to $1.25 per roll.

BUTTS—Plated, 341, antique copper and dull brass finish. 2½ x 2½, per pair 32c.; 3½ x 3½, per pair, 37c.; 4½ x 4½, per pair, 73c.

BUTTS—Wrought steel, No. 804, 2½ x 2½, $1.35 per doz.; 3½ x 3½, $2.40 per doz.; 4½ x 4½, $4.73 per doz.

CHAIN—Coil B, electric weld. 3-16, $18.50 per 100 lbs.; ¼, $16.75 per 100 lbs. 5-16, $14.00 per 100 lbs.; 3-8, $11.75 per 100 lbs.; ½, $12.00 per 100 lbs.

CHAIN—Logging, 5-16 x 14, $2.75 each; ⅜ x 14, $3.25 each.

CHOPPERS, FOOD—Universal, No. 0, $1.55 each; Universal, No. 1, $1.90 each; Universal No. 2, $2.25 each; Universal, No. 3, $3.15 each; Home, No. 55, $2.30 each; Home, No. 65, $2.75 each.

FILES—Great Western, 55% off list; Black Diamond, 35 per cent. off list.

HINGES—Per doz. pairs—Heavy strap, 4 in., $2.30; 5-in., $2.65; 6-in., $2.90; 8-in. $4.15.

CORRUGATED TEE—Per dozen pairs—4-in., $2.20; 6-in., $3.60; 8-in., $5.90; 13-in., $12.

HORSE SHOES—Iron, Nos 0 to 1, $10.00 per 100 lbs.; iron, Nos. 2 and larger, $9.75 per 100 lbs.

IRONS, SAD, COMMON—Per 100 lbs.—6 lbs. and over, $19.45; 3, 4 and 5 lbs., $25.25.

KNOBS, RIM DOOR—Japanned, $3.25 per doz.

LAMP CHIMNEYS—A, per case 8 doz., $1.20 per doz.; A, per doz., $1.50; B, per case 6 doz. $1.40 per doz.; B, per doz. $1.70.

LANTERNS—Short or long globe, plain, $10.50 doz.; Japanned, $11.00 doz.

MATTOCKS—Pick, $12.60 per doz.; Cutter, $12.60 per doz.

NAILS, WIRE—Base, $5.30 f.o.b. Vancouver; Cut, base $7.00 f.o.b. Vancouver.

NETTING, POULTRY—Per roll—2 x 12, $1.95; 2 x 24, $3 00; 2 x 36, $4.20; 2 x 60, $6.90; 1 x 12, $2.95; 1 x 24, $5.35; 1 x 36, $7.50.

NUTS—Per 100 lbs., advance over list—Square, small lots, $3.00; square, case lots, $1.00; hexagon, small lots, $3.50; hexagon, case lots $1.50.

RIVETS AND BURRS—Black carriage, 5 lb. Packages, less 35 per cent off list, copper rivets, No. 8, 42c. per lb.; assorted copper rivets and burrs 45c.; No. 8, assorted coppered rivets and burrs, 28c. per lb. No. 8, copper burrs 70c. per lb.; Coppered Rivets 22c. per lb. Coppered burrs 32c. per lb.

ROPE, SISAL BASE—British manila, base, 18c.; pure manila, base 19c.

SAWS, BUCK—Happy Medium, $16.50 per doz. Happy Idea, $15.12 doz. Disstons, No. 6, $16.20 doz.

SCREWS—Bright ⅜ flat head 70/10/10 off list; bright round head, 70/10 off list; brass flat, 65/10 off list; brass round head 60/10 off list.

SCREW, CAP—50 off list.

SCREWS, SET—50/10/5 off list.

SHOVELS AND SPADES—Olds or Fox, $12.60 per doz. ⅝ Jones or Bulldog, $14.40 per doz.

IRON, BAND—Per 100 lbs.—1½ in., $5.50; 1¼ in., $5 50; 1 in., $5.50.

IRON, BLACK SHEET—per 100 lbs.—16 gauge $5.35; 14 gauge $5.25; 18-20 gauge, $5.85; 26 gauge $6.45.

IRON, GALVANIZED SHEET—Per 100 lbs.—28 gauge American or English $7.40; 24 gauge, $7.00; 18-20 gauge $6.80.

WIRE, BARBED—Per roll—4 point, cattle, 80 rod. $4.75; 4 point hog, 80 rods $5.25.

WIRE, PLAIN GALVANIZED—Per 100 lb.—No. 9, $5.50; No. 12, $5.75.

WIRE—O & A—per 1000 lbs. No. 10 $5.50; No. 11, $5.55; No. 12, $5.65

WRINGERS—Eze, $6.35 each; Safety, $7.30 each; Bicycle, $6.40 each; Ajax, $13.55 each.

WASHING MACHINES—Velox water power, $33.00 each; Seafoam Electric, $78.50 each; Canadian $10.15; each; Patriot, $16.95 each.

VISES, WARREN SOLID BOX—35 lbs. $9.50 each; 50 lbs. $11.50 each.

Calgary, Alta.

Seasonal Activity in Winter Hardware Lines With Spring Bookings in Better Shape

CALGARY, Dec. 21.—Hardware market developments have been submerged by the holiday spirit and current revisions are conservative in character. Christmas trade is now in full swing, and this will be followed by the customary inventory period. Buying is thus more or less restricted at the present time, although wholesalers report that forward spring bookings are coming along in better volume. Winter goods are generally well into the middle of seasonable activity.

Recent bank clearings are showing well above a year ago, which in a measure confirms the late favorable reports regarding collections. In earlier years buying would have been much freer after a large crop year than has been the case this fall and winter. However, the feeling is that this year's crop returns are being handled wisely, and anything above actual requirements is being applied to liquidate the result of too free buying in the past.

There has been a heavy run on such seasonable lines as coal hods, coal and ash shovels, ash sifters, weather strip, etc. A good business is reported on gas heaters and a fair amount of coal heater business. In the motor accessory departments, tire chains and anti-freeze preparations are very active while robes, gauntlets and other cold weather motor requisites are moving out steadily. Repeat orders are coming in, and the volume of business in sleds, skates and hockey supplies is far above the average.

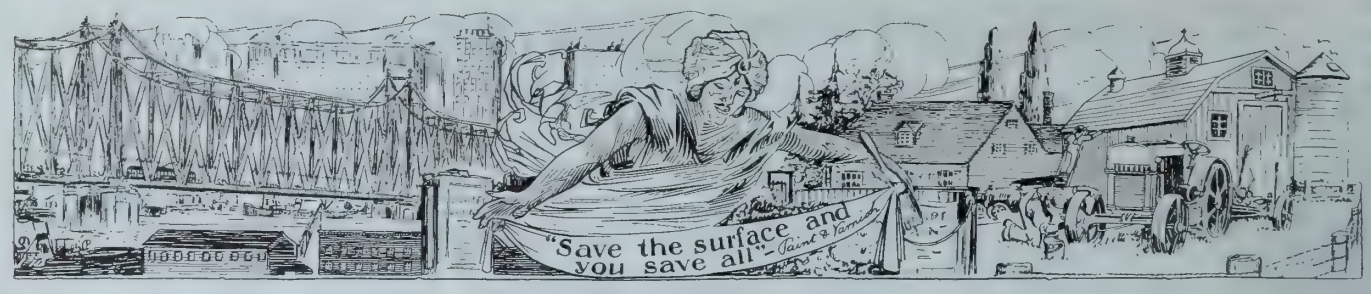
Pittsburgh, U. S. A.

Demand for Steel Shipments Partly Due to Fear of Another Coal Strike

PITTSBURGH, December 21.—Operations at steel mills reflect various conditions as to order books. Some subsidiaries of the Steel Corporation have reduced operations in the past week or ten days, while others have increased. The Carnegie Steel Company has put on several additional blast furnaces, while the National Tube Company now has the Riverside plant, in the Wheeling district, in practically full operation. Several independents have decreased operations.

Steel ingot production was at a rate of about 40,000,000 tons a year in both October and November, and in the first week or ten days of this month was probably at a rate distinctly above this, but with the decreasing operations already seen at some points and with the curtailments that are likely over the holidays, this month's total output may show a reduction.

There is a heavy pressure for production of wire nails and of merchant steel pipe, while other lines are under no particular pressure.



Operations are being watched for the indication they may furnish as to business conditions next year. Movements just now as to production are not particularly significant, however, on account of the near approach of the annual inventory date. Normally buyers like to have reduced shipments at this time to lighten inventory, even though they may need much more material later. To illustrate, production of ingots last December was 15 per cent. less than the average of October and November and 20 per cent. under the average of January and February.

There is increased ground for suspicion that part of the demand for steel shipments at this time is due to fear on the part of buyers that there will be another coal strike April 1. Opinion on this subject is divided. Nearly half the people in the trade think the balance of probability is that there will be a strike, and nearly half think the balance is the other way. Whether the chances are six in ten, five in ten or four in ten is merely a detail. Everyone recognizes that there is a possibility, hence there is a contingency to be provided for.

The steel industry is running largely on momentum. Operations are sustained not so much by fresh buying as by the old orders that are left to be filled. Much the same condition exists with the customers of the industry. They may not be selling a great deal just now but they have old orders to fill. In some lines, such as builders' hardware, stocks are abnormally light and need to be brought up to the normal.

Those who were predicting a month and six weeks ago that there would be a decided falling off in steel production and shipments this month have now modified their prediction and expect the decrease to occur in January. The coal strike may loom more prominently then and make the predictions prove wrong even though they were well based as to general trade conditions. Others, however, perhaps the majority, have not expected any material decrease in steel movement for several months. Opinion among business men and bankers seems to be crystallizing now on the idea that general trade activity is marked to keep

New Selling Policies in Paint Dep't

Hardwaremen Introducing Changes for the New Year May Consider Some New Policies—Good Ideas From Complaints—Salesmen's Conferences Bring Out Selling Arguments—Sell Paint by Total Cost for the Job

DURING THE past year a great many very practical ideas for stimulating the sale of paint and varnish have appeared in Hardware and Metal. Making some investigation to find out how these ideas are being applied, it was found that while many merchants are using them, there are many others who have been figuring on a definite reorganization of their paint departments at the end of this year, when the holiday rush of business is over, and in this connection they have planned to introduce some of these ideas for business in 1923. This is the best time of the year to lay out a definite plan of this kind, and so that some of the most helpful features may be introduced, let us briefly review some of these ideas:

One of the first of these was the experience of a certain hardwareman who found that by giving all complaints careful attention he was able to increase his clientele of satisfied customers, and at the same time put his hand on the source of the trouble and so eliminate the likelihood of further difficulties. Some fixed policy is a good thing to have for handling such complaints, and they occur in the best of stores. It is the easiest way out to blame the contents of the can, but in doing so both the merchant's and the manufacturer's reputation is being injured. Complaints are divided into the following three classes: 1. Where the goods are at fault. 2. Where the goods are not at fault. 3. Where it is difficult to see where the trouble is. A study of paint problems will enable a paint salesman to greatly reduce the number of such complaints, and ability to pass on information to customers will also help the situation. With those eliminated that come in these classes it will not be found difficult to settle up the others satisfactorily and not so expensive if some concession has to be made.

Discuss Argument at Conference

At a conference of the paint salesmen at the opening of the new year there might be discussion of arguments to be advanced in selling paint and varnish. For instance, the question of linking up with the arguments of the "Save the Surface" campaign may be taken into consideration. The early months of the new year are those when surfaces which have not been adequately protected are showing the effects of neglect. Veranda floors, house floors and other exterior and interior woodwork in homes, industrial plants, auto bodies, implements, vehicles, etc., will be showing plenty of signs of wear and provide excellent opportunity for big sales of paint to "Save the Surface."

Adequate stocks are an important factor in securing the largest possible volume of business. There is a psychological effect on customers when they see a well kept, complete range of colors and quantities among the paint and varnish stock. Full, clean, well arranged shelves impress the customer favorably. Adequate stocks also help the merchant to retain customers. Many true stories are told of customers who have left one hardware store and gone further afield to get a better selection and perhaps better advice and other service in paint buying. In deciding on having adequate stocks, a survey might be made of the past year to see which have been the best sellers, next best, etc., and let the information thus secured guide the buying of the new year's stock.

Point Out Painted Houses

The aggressive paint salesman will point out to a paint prospect some homes in his district which have just recently been finished with that store's paints. When the prospect enquires as to the cost per gallon, do not answer until information has been secured as to the dimensions of the house so that an estimate can be made of the amount of paint required. When the total figure has been arrived at it can be pointed out that it would have cost, say $42 to paint the house last year, but it can be done now for $30 because of the decline in prices. The firm tendency of paint prices and the possibility of higher costs may also be dealt with though it doesn't pay to try to scare the prospect.

If the question of a cheaper grade of paint arises, as it very often does, the salesman can point out that his store is giving best value to customers, and that if the cheaper priced paint was cheapest in the final analysis that his store would be handling it. The big reduction in oil that can be made in the more expensive paint and therefore the bigger surface which it will cover per gallon, is the argument to offset this. Concerning the use of lead and oil it can be pointed out that the customer must do his own work, and that the prepared paint of first quality is sufficiently heavy to be thinned down so that 6 gallons of prepared paint would do the job where it might take 9 or 10 gallons of lead and oil paint specially prepared. In addition there is the right content of oxide of iron and other ingredients which make the prepared paint probably more desirable in finish and lasting quality.

Set Good Example

There are advantages in setting a good example and the retailer might well repaint his store front and stain or varnish the shelving and counters in the paint department. Encouraging pride in the home town and the cleanliness of its buildings always repays in the form of increased prosperity because the town presents an attractive appearance to outside interests. Cases have been known where industrial plants have been located in a town which has not as good facilities as a neighboring one merely due to the fact that it had a more pleasing appearance and homelike atmosphere, due very largely to its buildings being well kept. This is the spirit which should be encouraged through the advertising and dis-

Dougall Varnish Co. Hold Annual Sales Conference

The Eastern Canada sales force of the Dougall Varnish Co. were gathered together at their head office in Montreal on Monday, Tuesday and Wednesday of this week. This conference was preliminary to the annual convention which will be held in conjunction with that of the Murphy Varnish Co. in Newark, N. J., on January 16, 17 and 18.

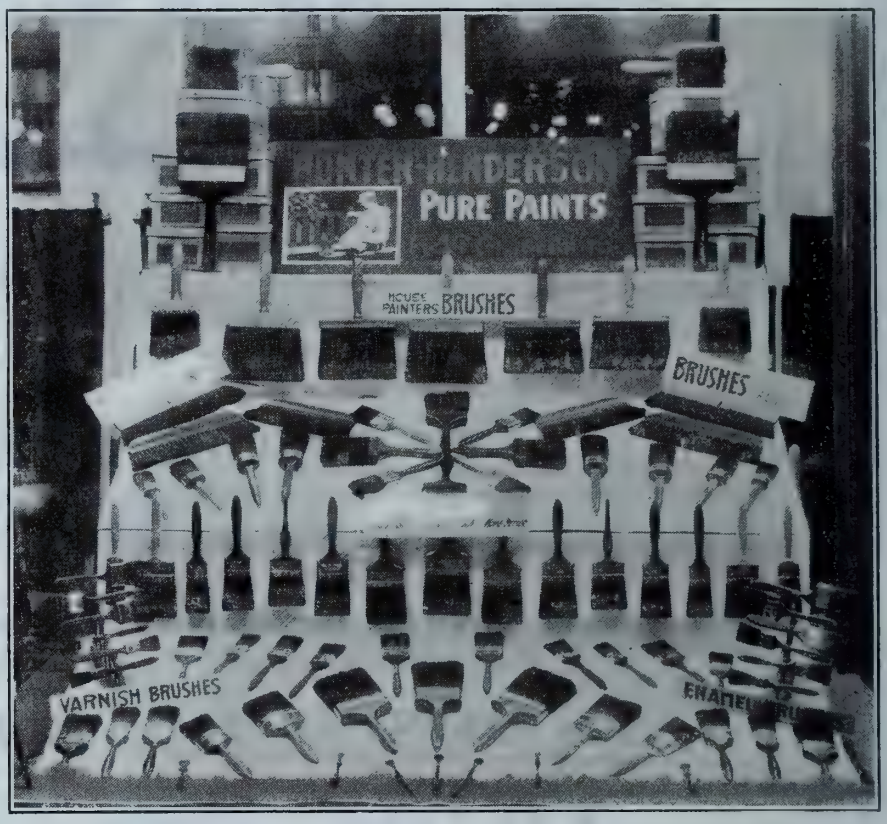
At the gathering this week plans for the coming year were discussed, and the opinion was unanimous that prospects for the coming year were bright for a bigger and better season in every way. Following the sessions on Monday the representatives attended the annual banquet of the Dominion Commercial Travellers' Association in the Windsor Hotel. W. Harris, general superintendent of the Murphy Varnish Co., journeyed to Montreal and addressed the gathering.

NEW SELLING POLICIES

(Continued from page 44)

plays. Do not overlook the fact that getting one property owner to paint his house will very often set many others doing the same thing. It would pay to concentrate on a house or two on a street where there are many others which would look better for the treatment.

Another hardwareman keeps an experienced painter always at his beck and call, to visit the homes of prospects and advise on the application of paint. This painter in his spare time arranges stencils, sample color combinations, etc., which are available to the paint salesmen and which can also be taken to the home of the prospect. The painter will give preliminary instructions at small cost, and of course, he very frequently secures some good business for himself.



This store always enquires what the customer wants the paint or varnish for. It finds in a very large number of cases that there is some other product which is more suitable for the use designated, and about which the customer knows nothing. This practice avoids many difficulties for the customer and the result is a better job, one which encourages the customer to paint more.

TIMELY SHOWCARDS FOR HARDWAREMEN

(Continued from page 27)

galore attesting all manner of sale announcements. It is not a bit too soon to begin planning your posters for the big event. The store that embodies some attractive color scheme and lettering in its posters will be in a fair way to secure more attention. After all it is largely a matter of a little extra time and care to turn out something different in posters. The card writer should be too much of an enthusiast to relax his efforts without succeeding in his object. So this coming season let us have posters that are uniquely smart.

The Brush Department

Some very novel effects can be secured in arranging brush displays. Take this one, for instance, as arranged by Hunter-Henderson Co., Vancouver, B. C. It shows paint and kalsomine brushes in various sizes in a number of different designs presenting a pleasing appearance. Small stands are used on each side in the foreground. The larger brushes form an arc of a circle with smaller brushes intertwined. On the raised portion another design appears with larger brushes and the largest ones are at the back. Oftentimes hardwaremen want to arrange a brush display in a small window, and for this purpose this suggestion will be helpful. They are arranged on a spotlessly white background which conveys the impression of cleanliness and good care of the stock.

THREE THOUSAND TELEGRAMS

(Continued from page 21)

telegrams which were sent to Ottawa on Dec. 12 and 13, Hardware and Metal visited the Premier's office. In looking over the list of the places from which the telegrams were sent, they were found to be about equally divided among all of the provinces, and most important cities and towns were represented. Some had as many as fifty, sixty and seventy names attached. Some branches sent telegrams signed by the president and secretary of the branch on behalf of the members. In all, there were approximately three thousand telegrams and about one hundred letters. The telegrams ranged from ten words to 200 words.

One point brought out in the telegrams was that as no provision had been made for the use of other than ordinary postage stamps, there could be no way of telling where the revenue was going to; whether it was going entirely to the post office department, or to help wipe off the nation's debt.

Another view was that if the regulations were to exempt cash register checks, it would be unfair to those who are not possessed of cash registers, and who give a large number of receipts.

Boeckh's Brush News

The Peerless Floor Waxing Brush

Practically every householder or apartment house dweller needs a floor-waxing brush these days, and of all kinds, Boeckh's Peerless is the one to recommend your customers. The Peerless is a brush of unusual merit, one that measures up to Boeckh's Standard in every way, and it is a brush well liked by women who have used it.

It is equipped with rubber protectors that protect furniture and woodwork, has reversible polished handles, easily operated with a ball socket, and all its metal parts have a nice aluminum finish. Moreover, the Peerless, while heavy enough to really polish, is so weighted and balanced, that it travels evenly and easily over the floor. Any woman can operate the Peerless without tiring herself unduly. Then, too, you can assure your customer that the bristles used in Boeckh's Peerless will give longer, more faithful service than ordinary waxing brushes.

Boeckh's Peerless Floor Waxing Brushes are the ones your customers will be absolutely satisfied with. Why not put them on display on your window for a time? An attractive display of Peerless Floor Waxing Brushes, along with floor wax, occasionally, would do much to increase the demand for them.

We will gladly forward any display suggestions.

Weekly Paint Markets

Montreal

MONTREAL, December 21.—Linseed oil again attracts attention in the current paint markets where prices show a further advance of two cents per gallon. Quotations on future deliveries are also higher, the gain being slightly more on these than on immediate deliveries. This upward tendency is due to strength shown both on domestic and Argentine flax markets, and although the firmer tone was first evident on the foreign markets, it was closely followed by home markets where seed deliveries are still an important factor.

After a period when an easier tone was noted in the turpentine market, this product is now somewhat firmer with a better buying movement reported from primary centres. There is a feeling that prices are likely to advance after the first of the year because of a better demand in the south. Locally this market is quiet with stocks low in accordance with demand. Shellac prices are unchanged with a wide variation between local firms. Indications at primary sources point to a steady to firm market for this product. There is now a quieter movement of window glass, but this market also is displaying a certain amount of firmness, assisted by the continued gain in the exchange value of the franc.

LINSEED OIL PRICES ARE AGAIN ADVANCED

Montreal.

A further advance of two cents per gallon is recorded in linseed oil prices, thus bringing the present level to $1.10 for raw oil in one barrel lots The undertone of this market continues on a firmer basis, due to the gains made both on domestic and foreign flax seed markets. Not only has this tendency affected the immediate market, but quotations for early spring deliveries were also advanced three cents. Formerly the market for future displayed a softer tone than was evident on the cash market, but with the gains made there is only a slight variation between delivery in December, and during the earlier months of the new year. Regarding the seed market in the North West, apart from the rising tendency due to news from outside markets, there is a shortage in deliveries again noted. This condition was predicted a few weeks ago when it was stated that the close of navigation must be taken into consideration. Seed stocks locally are low, and it is thought doubtful whether or not there will be any great accumulation for requirements next spring, notwithstanding the quiet period usual for the next number of weeks. Following are revised quotations:

LINSEED OIL—	Raw	Boiled
1 to 2 bbl. lots, per	1 10	1 12
5 to 9 bbl. lots, per gal.....	1 05	1 07

Less quantities, add ten cents per gallon.

SHELLAC MARKET ON STEADY TO FIRM BASIS

Montreal.

Current quotations on shellac are unchanged, with certain firms still quoting considerably less than figures given in other quarters. At primary sources the movement of this product is only seasonal but new receipts are expected to be light during the remaining winter months and this factor is having a strengthening effect on the market. Although present price levels are considered high there is a feeling in some quarters that higher levels are more probable than reductions at a little later date owing to the likelihood of a shortage when trade becomes more active. Local prices are the following:

SHELLAC—	White	Orange
In barrels	4 25—5 05	3 75—4 55
5 gallon jugs	4 25—5 15	3 75—4 65
1 gallon jugs	4 55—5 25	4 05—4 75

TURPENTINE MARKET DISPLAYS FIRMER TENDENCY

Montreal.

The turpentine market remains quiet, with little or no change from last week. This product is selling in most quarters at $2.10 per gallon in one barrel lots, and some firms report practically no stocks on hand. It is realized that the following weeks will be a quiet period for turpentine, and the interest is not displayed in the market in the South as would otherwise be the case. From indications, however, it would appear that the easier feeling at primary centres is past. Recent reports state that the market is in a much firmer position with a larger buying movement. With little activity locally this stronger tone is not expected to reflect on the market at the present time, although it is generally recognized that the situation is now steady to firm and any changes will in all probabilities be in an upward direction.

TURPENTINE—	
1 barrel lots	2 10
2 to 4 barrel lots, per gal.	2 08
Broken lots	2 20

FIRMER TONE CONTINUES IN WINDOW GLASS

Montreal.

Although current trade in window glass is somewhat quieter with the appearance of real winter weather, there is a firm tone continuing in the market. Prices were recently advanced to take care of increased transportation costs since the close of navigation, but prevailing price levels are still said to be firm. It is pointed out that quotations on import are higher, assisted by the recent gain in the exchange value of the franc. Unless a recession is noted in currency exchange a steady to firm market is looked for during the coming winter months. Owing to this recent stronger tendency prices on figured and wired glass are also advanced approximately three cents per foot.

Toronto

TORONTO, December 21.—While current trading in paints and varnishes is described as quiet, forward spring bookings are reaching a good total and the aggregate is said to be satisfactory. The window glass situation is still the same, and while business is not so quiet as in oil or turpentine, yet a slackening in volume is now recorded. It is pointed out that a steady to firm market is looked for in window glass for the balance of the winter months, as quotations on imports are higher since the close of navigation, while in conjunction with this condition is the fact that the exchange value of the Belgian franc is gaining. Shellac is on a steady to firm basis, the prevailing movement being described as seasonal, but primary centres record a gain in strength owing to new receipts being lighter for the balance of the winter period.

There is a tail-end quietness in turpentine this week, with local price levels practically unchanged. After a period of weakness in price and inactivity in trade, the southern markets are appearing with a slightly firmer attitude again. This condition, however, has not affected domestic quotations to any extent, as yet. Linseed oil has been quite firmly maintained during the week, although current business in this product is also dull. In attaining a firmer trend, oil has reflected the upward movement in flax seed. The recovery in Argentine flax has been a leading factor in influencing domestic price developments.

To Our Readers from Coast to Coast.

THE CURTAIN is about to rise on the year 1923. It is at such a time that one is constrained to look backward—and then forward—to calmly reflect on the happenings of the year just closing; to peer into the coming year with a sincere desire to apply the lessons of experience to its unrevealed history.

The hardware trade of Canada was never in as sound and solid a position as it is to-day. Team work has been largely responsible for the satisfactory condition which exists at this time. During 1922 there has been greater co-operation between the various branches of the hardware trade than in any previous year in the history of hardware manufacturing or selling in Canada.

One of the most pleasing features of the activities of the hardware trade in 1922 has been the splendid manner in which manufacturers, wholesalers and retailers have responded at all times to requests for information, suggestions or anything which would prove of benefit to the hardware trade as a whole. The spirit of co-operation is percolating through the hardware trade of Canada to an extent that was undreamed of even a few years ago.

During the coming year HARDWARE AND METAL will enter upon its thirty-fifth year of service to the hardware trade of Canada. We have planned many splendid new features which will prove of real practical value to the trade during 1923.

HARDWARE AND METAL is your paper, and you are the man we are trying to serve. We are going to make our thirty-fifth year our greatest year in service to the trade.

We wish to express our appreciation of the splendid co-operation which we have received from the trade during the year just closing, and the entire staff of HARDWARE AND METAL extend their sincere wishes to all readers for a most Happy Christmas and a Prosperous New Year.

TORONTO PAINT MARKETS

(Continued from page 48)

DULL SEASON IN TURPENTINE MARKETS

Toronto.

There is very little trading at present in turpentine, but the market tendency is being very closely watched, both in domestic and primary centres. Reports from Savannah indicate that the prevailing tone is slightly firmer again, but this condition follows on the weaker period referred to last week. With the establishment of a decidedly lower trading basis at southern producing points, there was greater interest manifested by consumers and a revival in demand was recorded. It is pointed out that the statistical position in the south has changed somewhat, the movement from the woods still being comparatively light, but stocks are in fair volume owing to the lighter demand at this time. Local prices have generally become established at the level of $2.10 for what little trading is evident, and although the nominal quotation of $2.15 is also still on the market, the appearance of the lower price and the absence of activity has served to preclude its existence.

TURPENTINE—

1 barrel lots	2 10
2 to 4 barrel lots	2 09
5 gallon lots	2 25

Less barrels, add 5 cents per gallon.

Turpentine steel drums galvanized 5c. per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, Montreal, but freight may be equalized from any of these points.

STRENGTH OF FLAX SEED IS REFLECTED IN OIL

Toronto.

Recent strength shown in Argentine flax seed and also in the domestic seed markets, has created a slightly firmer tone in linseed oil this week. Local quotations remain unchanged, but in certain quarters a slight advance has been recorded. It is pointed out that crushers have advanced oil prices, and in turn state that quotations on future deliveries of seed are higher. Notwithstanding the quiet nature of trade at this time, the linseed market is firmer. In discussing forward positions with local distributors, the feeling was apparent that some easier price levels on oil may become effective in the early months of the year when reliable reports concerning the extent of the Argentine flax crop are available. Existing prices follow:

LINSEED OIL—

	Per gallon Raw	Per Gallon Boiled
1 to 2 barrels	1 10	1 13
3 to 4 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less barrels, 15 cents per gallon.

SLIGHTLY FIRMER ATTITUDE IN SHELLAC

Toronto.

Although trading in shellac is of a seasonally quiet nature at present, a slightly firmer attitude has crept into the market due to increased interest and higher levels recorded in primary centres. Prices are unchanged, however, the local quotations continuing steady, reflecting a firmer undertone. Owing to the holiday season and inventory work, current business is described as dull, but a revival of activity is looked for in the New Year. Following are prevailing levels:

SHELLAC—

	White	Orange
Five gallon jugs	4 25	3 75
One gallon jugs	4 85	4 45

WHITE LEAD IN OIL PRICES REMAIN FIRM

Toronto.

The demand for white lead in oil is on a quieter basis at present, and no development has been recorded in regard to prices. While production costs were described as soaring higher by manufacturers, yet some price shading was outlined in other quarters. A settlement of this condition is expected, it being pointed out that pig lead prices remain firm and linseed oil is on a higher basis than was formerly anticipated for this time of the year.

WHITE LEAD IN OIL—

In five gallon lots $12.70 per cwt.
In one ton lots, $13.45 per cwt.
In less quantities, $13.80 per cwt.

TEMPORARY LULL NOTED IN PAINT CIRCLES

Toronto.

A temporary lull is now evident in paint and varnish circles, which is principally attributed to the inventory period and holiday season. It is stated that general prospects point towards another brisk session of activity for these products in the spring of 1923, and manufacturers and distributors report making preparations accordingly.

With regard to paint price levels, it is stated that while upward changes are in doubt, there is at least no possibility of any lowering in quotations for some time. "We don't see any chance in the world for reductions," stated one manufacturer to Hardware and Metal, but on the other hand it was pointed out that the firmer tone of materials entering into production costs reflected a strong undercurrent in the paint market.

Another producer stated that, "Paint prices are generally on a firmer trend as the basic elements entering into the manufacture of paint are correspondingly stronger."

PITTSBURG MARKETS

(Continued from page 43)

up for several months in the new year, and even to increase somewhat, with a decrease in activity about the middle of the year. If these predictions are right, the steel trade may be expected to move in harmony with the general condition.

Steel Prices

Finished steel prices are unchanged. Merchant pipe at 66 per cent. basing discount and wire nails at $2.70 are very strong. Sheets are fairly steady at 3.35c for common black, with only one or two mills shading. Tin plate is firm on the general basis of $4.75, with concessions for large orders smaller than usual. Bars, shapes and plates are moderately steady at 2.00c as an open quotation for small lots, with concessions for large lots as for some time past.

Buying Movement in Foundry Iron

In the past week the buying movement in foundry iron went farther. Large consumers, who at first were disposed to cover for only a portion, say a third or a half of their first-quarter requirements, later decided they had better cover for the remainder also, and went into the market again. All told, the business has been heavy, both in this district and elsewhere. Approximately all the consumers with definitely known requirements in foundry iron for first quarter have covered, while the furnaces seem to be correspondingly well sold. In the local market the business was done at precisely $25, valley basis. Furnaces would not concede a particle from this figure nor would buyers pay any more. Gradually the furnaces began to withdraw the $25 price in favor of $26 and the last has now done so, $26 being not merely an asking price but a firmly-held price. The foundry iron market has scored to square advance of $1 a ton.

Conditions in basic iron were different. The steel works that buy their iron did not have much steel sold for first quarter and therefore were indisposed to buy largely as they had little to cover, while there was another factor that, while in foundry iron the production is limited, in basic iron there are several steel works with surplus blast furnace capacity and some are quite ready to sell iron. There has been some buying of basic iron at $24.75 or $25, but not a great deal. Basic iron may decline from $25 whereas foundry iron may easily go above $26 by the end of the year. Bessemer is off 50 cents, being offered at $27.50, valley.

New Turn in Coke

Connellsville coke, which had been softening and softening as production increased and consumption experienced little change, has suddenly had a new condition thrust upon it, a heavy inquiry from the East for coke as domestic fuel. Dealers have been in the market for lots of 10 cars, 25 cars or more, ready to buy anything so it is "coke." The point is that the East had an exaggerated impression of the importance of the lake movement in anthracite, and expected a large increase in offerings when lake navigation should close. When it was found that this made little difference they turned to coke with a rush. Whether the movement will amount to much depends on the attitude of domestic consumers, to whom coke may or may not appeal. If it does, the coke market will be taken out of the hands of the furnaces by a greater factor being in the market.

Keep Up To Date With Brown Boggs Tools

In the stress and bustle of modern competition you need every possible aid to cut costs and increase production.

With Brown Boggs Quality Tools in your tin shop you can turn out more and better work in less time.

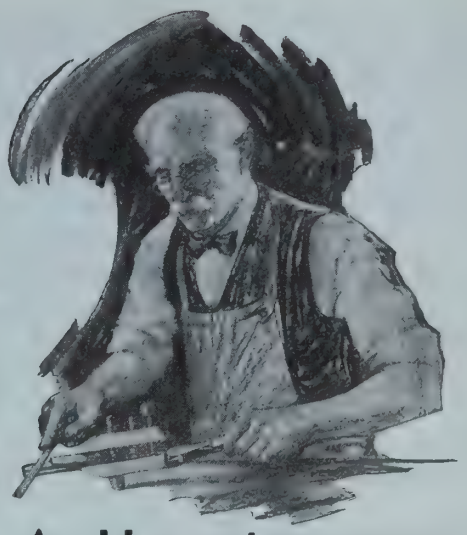
Many uses —many lands

BT

"Shoe nails, box nails, top-hat nails, bowler-hat nails—and other nails you've never heard of all belong to my family, B. T. They emigrate or stay at home. They are in the Arctics and in the Tropics. All have the best of reputation everywhere."



"The packages they are shipped in must be well made to stand all that strain, W. N."

"I'll say they are, B. T."

THE LAIDLAW BALE TIE CO., LTD.

HAMILTON, CANADA

Be specific--say "Laidlaw Products"

A Handy new Starrett hand vise

This new Starrett Hand Vise No. 200 is a tool that can be sold to any mechanic. Its convenience in holding pieces of work make it just as useful in the garage and the home as it is in the machine shop. Provides a firm clamp for any kind of work up to one inch. The stationary jaw has three V-grooves to hold wire and other cylindrical shapes. All steel parts are case hardened—hardwood handle, stained and polished. A very useful, inexpensive tool.

Write for Catalog No. 22M.A. and the Supplement describing the new Starrett Tools.

The L. S. Starrett Co.

The World's Greatest Toolmakers
Manufacturers of Hacksaws Unexcelled

Athol, Mass.

Notice the angular adjustable handle which can be clamped at different positions with relation to the jaws.

TWO BEST SELLERS

PATENTED IN CANADA

Better Selling Value Than Ever

We have equipped our Steel Baths with **Pressed Steel Removable Legs** and 3 inch **Roll Rim** around the top, for which we have secured a Canadian Patent. This **Roll Rim** adds greatly to the selling value of

TWEED ENAMELLED STEEL BATHS

They now look like the expensive cast enamel baths but are the **same price** as before.

Our new patent Roll Rim Enamelled Steel Baths are now ready for shipment—Order samples.

TWEED SANITARY CHEMICAL CLOSET

Stamped out of Black Sheet Steel and is very strong, durable, attractive, and guaranteed to be absolutely sanitary, and to satisfy every user or money refunded.

Up-to-date facilities and special machinery enable us to produce these superior grade closets at a very low price.

We will help you to get started by sending you circulars, talking points and cut for local advertising.

Large stock on hand, can ship promptly. Get after Fall business. Write for catalogue.

STEEL TROUGH & MACHINE CO., LTD., TWEED

"TRIMO" Pipe Wrench

The Trimo Pipe Wrench is made in eight different sizes.

The Steel Frames will not break.

The Nut Guards prevent accidental turning of the adjustment nut.

The Spiral Spring is always in place.

The Inserted Fixed Jaw can be removed when worn.

All Trimo Tools are good tools.

TINKER TOM'S TALKS.

No. 390

THE EMPLOYEES, MANAGEMENT

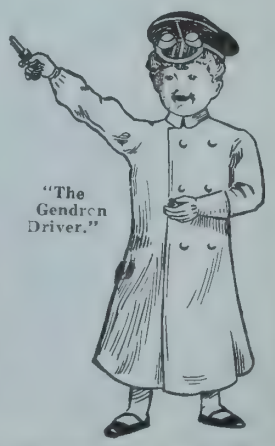
And Shareholders of the Dominion Sheet Metal Corporation, Ltd., wish you and all those within your circle, a most sincere and heartfelt

MERRY CHRISTMAS

TINKER TOM.

"Hercules" Sash Cord

The reputation of this brand has been thoroughly established in the Canadian market for the last eighteen years. It compares in quality with the best imported brands, but is sold at a considerably lower price and can be safely recommended for any job.



All wholesale hardware dealers carry "Hercules" Sash Cord and can fill orders promptly.

Manufactured in Canada

Merry Christmas Everybody!

Another Christmas Season has come; another opportunity to extend to you, our friends, a cheerful Christmas greeting.

It is our sincerest wish that this Christmas will be the happiest and the New Year the most prosperous you have ever known.

THE GENDRON MFG. CO.
LIMITED

Maple Leaf Stitched Cotton Belting Longer Life

Maple Leaf Stitched Cotton Duck Belting, has proved itself, and satisfied critical mechanical men in hard machine-shop use where belting is severely tested. Its construction of stitched cotton duck wins out.

For the dealer it means new customers, profits and repeat orders.

Why Hardware and Metal Dominates Western Canada

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg, Calgary and Vancouver.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London, St. John, Hamilton and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing." Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

Member A.B.C. **HARDWARE & METAL** *Member A.B.P.*

Canada's National Hardware Weekly Since 1888

143-153 University Avenue, Toronto, Canada

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

No. 208 Torch
List Price Each $17.00.
Ask for Discount.

THE "DOUBLE NEEDLE" IS A BETTER TORCH

The No. 208 Double Needle Torch has all up-to-date improvements, that give the maximum service. Powerful Burner produces 300 degrees more heat, burning gasoline or kerosene. Gas orifice is cleared by using upper cleaner Needle fitted with wire tip. Lower Needle regulates flame. Both have blunt points, making it impossible to ruin Burner as with other makes having sharp pointed Needle. Not affected by wind or extreme cold. Jobbers supply at factory prices. SPRING SHACKLE BOLTS

The No. 110 Bolt is designed for use with either oil or grease as the lubricant; the head is tapped for ⅛ in. pipe thread or can be fitted with an oil cup, a grease cup or the fittings of any high pressure lubricating system. Made in all sizes from the best low carbon steel, carefully heat treated and accurately ground to size.

DOWEL PINS

For patterns. Made from brass in six sizes. The ratchet thread allows them to be readily screwed or driven into position.

Write for catalog and prices covering our complete line of oil cups, grease cups, etc.

The No. 112 Bolt is designed for grease lubrication; it is fitted with a plain cap having a simple, but effective locking device which prevents the cap from jarring loose; by turning down the cap grease is forced in as with an ordinary grease cup. Made in all sizes from the best low carbon steel, carefully heat treated and accurately ground to size.

No. 110 **CANADIAN WINKLEY COMPANY, LTD. - WINDSOR, ONTARIO** No. 112

May we quote you on

Rats!

Sell this Sturdy Trap

The offspring from a pair of rats, if unmolested, will number in five years over 6,000,000 — U.S. Public Health Service.

Rats are a menace to health and property. They carry bubonic plague and typhoid and other germs. Damage to food stuffs and property runs into millions each year.

Macdonald Rat Traps catch rats and hold them. It is the most effective trap your customers can buy.

Macdonald Wire Goods Co., *Reg'd.*

Drummondville, Que.

Buy "Maple Leaf" Saws—They Are Better

In the forest—in the factory—on the farm, ever since 1873 Maple Leaf saws have been the standard by which other saws have been judged.
These Canadian Made saws are built to meet the particular requirements of this country—and they do meet them. Sturdy, keen edged, durable, they give the sterling service their users demand.

MADE in CANADA

Little Giant

Simpler— Stronger— Lasts Longer— only 3 parts

NUTS, rods and pipes are frequently located in almost inaccessible places. When replacements are necessary the man without a "Little Giant" Pipe Wrench is sadly handicapped. The Little Giant grips and lets go quickly and surely, and with it a much greater turn can be accomplished.

In running pipe lines close to walls, ceilings or corners the labor cost is apt to be high. It can be lowered by using the LITTLE GIANT WRENCH. The jaw opening can be thrust on to the pipe, rod or nut as easily as a pair of pliers. It grips instantly, gives a far greater turn and requires less muscular effort by reason of the extra long handle.

There are but three drop forged hardened steel parts in the LITTLE GIANT. It has two to four times the service life due to extra sets of teeth.

Hundreds of users have written us enthusiastic letters concerning LITTLE GIANT performance. You'll add to their number once you see it in action.

Cary's "Self Tightening" Round Wire Box Strapping

This strapping is put up in reels of 5,000 feet each, or in bundles cut to special lengths. Made from a special soft coppered round wire in number 14, 15 and 17 gauges. Nails are to be driven between twisting points; the further in nail is driven, the tighter the strap is on the case. *Samples and dealers' discounts upon request.*

CARY MFG. CO. - Manhattan Bridge Plaza BROOKLYN, N. Y.

Manufacturers of Shippers' and Packers' Specialties--Send for Complete Catalogue.

GOOD PROFITS

Big sales mean big profits, if the margin is good. Sell

"CANADA" AND "VICTORY"

Padlocks and you will have rapid turnover and big profits.

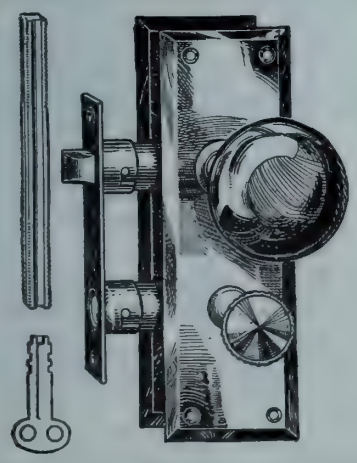
Order our four colored displays from your own jobber. The displays sell the padlocks quickly.

C. O. CLARK & BRO.
Montreal, Que.

Cut down your Losses and Depreciation on your stock by always buying

STILL'S HANDLES

name is stamped on each handle for your protection.



Here is the list, order from your jobber:

Still's Axe Handles
Still's Pick Handles
Still's Sledge Handles
Still's Hammer Handles
Still's Peavie Handles
Still's Cant Hook Handles

No losses through discards when you sell the products of

J. H. Still Mfg. Company

DEXTER TUBULAR LOCKS, LATCHES

No mortising — No gouging — Just bore four holes

The Dexter Tubular Lock is rapidly taking its place as the most desirable and most practical inside lock set ever designed from the standpoint of user, builder and the hardware trade.

NO MORTISING—TUBULAR IN DESIGN

The outstanding feature of the Dexter Tubular Lock is tubular construction that eliminates the necessity of mortising and gouging to fit, as is the case with the ordinary lock. With the Dexter Lock and Boring Jig, the door can be prepared in a fraction of the time that it requires to apply any other make of lock. All locks have simplex knobs. Fifteen different key changes.

Manufactured by

DEXTER LOCK CO., LIMITED
Hamilton, Canada

Superior Snow Shovels

Our "Cole" Patent shovel has a broad curved basswood blade, with sides reinforced with iron plate, steel tips, and wood or iron D grips. For shovelling off sidewalks and light snow they give particularly good satisfaction.

Our "Acme" shovel has lightness and strength so combined as to make it most serviceable for all uses. Basswood blade, steel tips, wood D handle and varnished. It cannot be beaten for stable use, shovelling snow, etc.

No. 66 is our kiddies' shovel.

HERE ARE BUYERS FOR BASSICK CASTERS

Office Managers responsible for the efficiency of large offices, housewives who move daily thousands of poorly castered beds, heads of families who every evening rumple rugs and mar floors moving easy chairs nearer reading lamps: these and many others are all prospects for BASSICK CASTERS.

Your community is made up of such people. Every one of them will buy BASSICK Casters once they learn the saving in energy and money which they make possible.

Send in the coupon below and get the details about these wonder casters and the sales helps which accompany them.

Bassick Casters

The Everlasting Veneer Toilet Seats

This is the strongest and cleanest toilet seat made. There are no cracks—made of 7 and 9-ply, air-seasoned wood veneer, held together by our special wood cement.

These seats are proof against heat, cold or dampness—will never crack, warp or split. They cost no more than the so-called "cheaper" toilet seats, and always bring repeat business.

Have you written for our prices?

Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. **THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE.** That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Ninety-four New Lines Added to Lumino Ware in the Past Year

A year ago SMP Lumino (Pure Aluminum) Ware consisted of seventeen lines. In the past year Lumino has grown steadily. To-day it embraces one hundred and eleven lines in all sizes and styles, an increase in one year of ninety-four lines.

Lumino Ware is a good seller. One of the most successful introduced in some years. A profit builder for hardware merchants.

Lumino Ware is made from hard, selected and pure aluminum sheets. In the quality and weight of aluminum sheets used, Lumino Ware is not excelled by any other make. In addition Lumino has special features like the Lumino Cold Handle, the massive cover knob and other improvements that make the line unsurpassed.

Our entire interest in manufacturing enameled ware, aluminum ware, retinned ware, copper ware, etc., lies in seeing that the utensils are the best of their kind. Years of thought and experience in catering to the kitchen utensil needs of the Canadian housewife have been put into the manufacture of "Lumino Ware." The SMP trade mark appears on each article.

In your kitchen tonight

YOU know the part "Armco" Ingot Iron plays in building construction, but do you know the part it plays in preparing your evening meal?

In your kitchen, as baking *pans* and as a *gas range,* "Armco" Ingot Iron cooks the food. As a huge *gas holder* it supplies fuel to the range. After supper "Armco" Ingot Iron continues to work for you.

Down in the cellar as a *gas water-heater* it heats the water for your wife. She places the dishes in an *electric dish-washer* made of "Armco" Ingot Iron, or else washes them in an *enameled sink.* She places them to drain on a *porcelain-top table* or on the *enameled lids of the wash tubs.* She throws the supper refuse into a *galvanized garbage pail,* and places the left-overs in the *refrigerator.*

Of course, these are only a few isolated instances of "Armco" Ingot Iron's wide use. It has hundreds of other uses, not only in the home but also in almost every industry. This widespread familiarity with "Armco" Ingot Iron on the part of the public is a big asset to you.

Everyone likes to buy what is universally used, and "Armco" Ingot Iron has practically a universal use in some form or other. There is a reason for this, naturally. It lies in the superiority of this metal over other iron and steel. "Armco" Ingot Iron is a specialty product that performs a special job in its resistance to rust.

The countless people who know the little "Armco" triangle and who have experienced this metal's long life in some product or other, are quick to appreciate its rust-resisting qualities in the sheets you use.

Bring Them to Your Store

File users will come to your store for files when they know that you stock one of these five standard brands.

That means they will probably buy other things at your store.

To stock standard brands is to get the reputation for handling first class goods. Those who come to buy these standard brands will have faith in the quality of other merchandise about which they know less.

Where files are concerned, ask your jobber for one of these standard brands:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE

Nicholson File Company

PORT HOPE - ONTARIO

Can You Conscientiously Recommend Ordinary Solder—

to the novice who knows little or nothing about fluxing? *Of course not!* But unhesitatingly you can say, here is Kester Acid Core Wire Solder—it requires only heat.

And then you know when *that* customer walks out, either he or she will be perfectly satisfied with the results of Kester Solder.

In this way you have made not only a *quick, profitable sale,* but you have built something far more valuable—*confidence,* in you and your recommendations.

The experienced mechanic, too, is a repeat buyer of Kester Solder, because he has already found that the self-fluxing feature of Kester saves him hours of valuable time and permits cleaner and more substantial work with less effort.

A growing demand for Kester Acid Core Wire Solder is being constantly stimulated by our intensive advertising, and live dealers everywhere are stocking this fast-moving item and enjoying a splendid return on their time and money.

The Gillette year never ends

Says the Wise Old Owl

Years may come
and years may go-
Gillette goes
on for ever.

We have called the Gillette sales "Sales with Tails."

A Gillette sale never ends.

A Gillette year never ends.

For Gillette dealers 1922 will be wagging its tail for years to come.

Every package of blades, every lather brush or other shaving accessory that you sell in 1923, to 1922 purchasers of Gillette razors, rightfully belongs to 1922. They are the wagging of its tail.

The sales with tails
Are the sales that count —
A hammer sells nails
And the two sales mount.
A brush sells paint
And I make two trades —
But, best of all,
The Gillette sells blades.

What shall you push during 1923?

What most deserves that odd ounce of selling effort that is yours alone to give?

It is the Gillette Safety Razor.

On Gillette and 1923, you can build a bigger 1924—on 1924, a bigger 1925.

The Gillette Safety Razors are natural business builders.

Every boost you give them they can live up to and return in kind.

Make 1924 your biggest Gillette year yet!

"Gillette Sales 100% Better—
I Pushed Harder"
writes one enthusiastic dealer

SPRING SHACKLE BOLTS

The No. 110 Bolt is designed for use with either oil or grease as the lubricant; the head is tapped for ⅛ in. pipe thread or can be fitted with an oil cup, a grease cup or the fittings of any high pressure lubricating system. Made in all sizes from the best low carbon steel, carefully heat treated and accurately ground to size.

DOWEL PINS

For patterns. Made from brass in six sizes. The ratchet thread allows them to be readily screwed or driven into position.

Write for catalog and prices covering our complete line of oil cups, grease cups, etc.

The No. 112 Bolt is designed for grease lubrication; it is fitted with a plain cap having a simple, but effective locking device which prevents the cap from jarring loose; by turning down the cap grease is forced in as with an ordinary grease cup. Made in all sizes from the best low carbon steel, carefully heat treated and accurately ground to size.

Make 1923 a Coleman "Quick-Lite" Year

Go after Quick-Lite lamp business with greater vim in 1923.

With conditions stabilizing and prospects bright for the best year's business since war time, there will be a wonderful opportunity for you to sell these profit making lamps and lanterns.

Every farm in your district should have one or more Quick-Lite Lamps.

If you display these Quick-Lite Lamps and tell your customers of their all-around utility, their positive safety and their unequalled brilliance, sales cannot help but follow.

Your jobber is ready for your order; or a line to us will bring you our latest catalogue, price list and selling helps.

Tax Counter Checks Marked "Paid"

Customs and Excise Official Points out Some Technicalities in Receipt Tax Regulations—Cash Register Manufacturer Advises Striking Words "This is a Receipt" off Printing Machinery—Would Not Use Post Cards for Receipts

MANY QUESTIONS are likely to be raised by the trade in connection with the application of the receipt tax, effective from January 1 next, as outlined fully in last week's issue of Hardware and Metal. While some of the regulations are sufficiently clear, there are others which may be misconstrued. Discussing the subject with an official of the Toronto Department of Customs and Excise and some manufacturers, Hardware and Metal secured some information which may assist in dealing with this subject, though no detailed rulings have been issued as yet and it is stated that none are likely to be issued from Ottawa until after the receipt tax has been made effective and specific complaints are brought to the attention of the authorities.

The chief division of opinion seems to be in connection with the provision which states "Counter sales slips and cash register tickets are not taxable, provided no words implying or stating acknowledgment of the receipt or the payment of money appear thereon." Some retailers have enquired if a cash register slip or counter check showing the amount involved is to be classed as a receipt for taxation purposes. A. E. McLean, sales manager of the National Cash Register Co., Toronto branch, stated to Hardware and Metal that on a great many cash register slips the words are printed, "This is a receipt." With these words the cash register check constitutes a receipt and is, therefore, subject to tax on amounts of $10 and over. In this connection, Mr. McLean stated: "We will have these words eliminated on new machines. Merchants are well advised to have this change made in their machines at once, as it is an easy operation and will save them much trouble. Some of the large department stores have already done so, anticipating that the check handed out from the cash register with these words on it would be subject to tax."

The official of the Department of Customs and Excise confirmed the foregoing concerning cash register slips. He gave it as his opinion that where a counter check is issued and the merchant marks the word "paid" on it that it constitutes a receipt and is subject to tax. It was pointed out that frequently merchants used the word "paid" on such checks and sometimes followed it with their initials. It was not thought that this would be a serious tax insofar as counter sales were concerned because very few customers asked for a signed receipt on a cash sale. Where it would be felt more would be on C. O. D. orders. Discussing this angle of the subject, it was pointed out that while the customer purchasing goods and paying cash over the counter would not necessarily require a signed receipt, that the customer ordering goods over the telephone on a C. O. D. basis would rather hesitate to pay any considerable sum of money to a delivery boy without receiving a receipt which would be an adequate acknowledgment of the money paid. The possession of the parcel might be taken as sufficient evidence of the money paid in some cases but it would constitute a practice which would be open to abuse. Of course, the customer could be accorded the alternative of running an account for such orders, but this is undesirable to retailers. Generally speaking, it was thought the tendency would be for retailers to encourage more cash business so as to keep down the number of accounts over $10 and to eliminate as many C. O. D. orders as possible so as to keep down the number of tax stamps they would be compelled to use.

It was the opinion of this official that the ordinary counter check showing goods purchased and amount, but not marked "paid" or bearing any other words implying a receipt, would not require to bear a tax stamp.

It was pointed out by this official that a cheque may not be shown to be in settlement of an account and, therefore, a signed receipt may be required by the debtor even though a cheque is used. The fact that a cheque may not be classed technically as a "receipt" also raises the possibility of certain debtors who pay by cheque requiring a signed receipt which is taxable.

Another practice which comes under the new regulations is the use of transfer cards in large stores. Certain department stores make use of such a card on which a number of small purchases are entered in various departments and payment made by the customer in a lump sum at the end of the shopping tour. This card is now stamped "paid" when the cash or a cheque is tendered and would ordinarily come under the regulations requiring it to be taxed when of $10 or over.

Each signature of an employee on a pay roll being a receipt is taxable for each signature covering an amount of $10 and over. Some of the large firms put salaries on deposit for employees in a bank and the employees put a tax stamp on withdrawal orders. In certain other cases two or three officials of the firm are on hand when the staff is being paid and no receipt is asked for from the employees.

Individual freight bills and periodical statements of same, acknowledging receipt of payment are taxable. An enquiry has been made if this includes "way-bills" which the railway freight handler signs in acknowledgment of the freight and which may bear record of freight classification and rate applying. It was pointed out that, while details of classification and rate chargeable may appear on the bill, the receipt conveyed by the signature of the freight handler is merely cover-

ing the merchandise, and is not taxable. The periodic statements of account issued to collect freight charges and receipted in the ordinary way are the ones which are taxable.

There is some division of opinion concerning the provision covering receipts in the form of letters forwarded by mail being taxable. Letters in an envelope must carry stamps which include revenue under the War Revenue Act so that tax is paid in that form. Asked as to whether or not postcards would come into use for the purpose, bearing only one cent postage, this official thought it unlikely that any firms would care to show receipts so publicly.

Favors Mail Order

The provisions exempt remitter's counterfoil, being part of a taxable express money order. This counterfoil is the acknowledgment received for money paid for money order. It is suggested that in connection with mail order business where cash is paid in advance for merchandise and where such cash is generally forwarded by money order, that the customer has a receipt for money paid without requiring the mail order firm to give it. To secure a receipt for money paid to the local merchant either by cash or cheque, a second tax applies.

E. M. Trowern, Dominion Secretary R. M. A., states that the intention of the government is evidently to exempt cash register checks and counter slips in cash transactions. He states that the provisions might mean that all cash register slips and counter checks are not exempt, but he is of the definite opinion that the retailer may not feel any concern in regard to such taxes.

Would Revise Business Income Tax

Proposals of Joint Conference on Taxation Understood to Include Recommendation that Business Income Tax be Put on Same Basis as Personal Income Tax—Exclude Gifts to Charities, Etc.—Recommend Flat Tax on Cheques of Two Cents

DISCUSSING the proposals of the joint conference on taxation which since being outlined in a November issue of Hardware and Metal have been put before various manufacturing, wholesale and retail associations, some better idea of probable final meaning of the recommendations has been gleaned. A group of resolutions was passed unanimously at that conference with the understanding that these were to be referred back to the national organizations concerned and that a second conference of representatives of these organizations would be held in Ottawa in January to put the resolutions in final form before the government.

It is understood that it is designed to make up any loss of revenue brought about by following out the recommendations, by reducing government expenditures and by slightly increasing the sales tax if necessary; that purchasers are to be furnished with invoices on which the amount of such sales tax to at least the extent of 2¼ per cent. must be shown; that the regular rates of Sales Tax should apply to all purchases by or on behalf of the government. This policy is followed in connection with import duties and it is planned to make no exception under the Sales Tax.

Will Determine Status of Trade

Some discussion has also taken place concerning difficulties arising in connection with the value on which Sales Tax is assessed and as to the status of various branches of trade such as tinsmiths, harnessmakers, etc. Under the suggested regulations, it is understood that the Minister would be given power to determine the status of the individual or firm, subject to appeal to higher authorities. The recommendations of trade organizations on the subject are to be considered in connection with such appeals. It is also understood that importers who sell in this country under exclusive selling rights should be classed for Sales Tax purposes as wholesalers in respect to importations and sales in Canada, under the proposal.

The proposal in connection with the status of certain branches of the trade such as tinsmiths, provides that hardware merchants and tinsmiths, harness and leather goods makers, etc., who produce goods which they wholly retail from stock over the counter in the premises where they are produced, to consumers, shall be compelled to collect sales tax on such manufactured goods if their turnover in such goods exceeds in value a set amount to be agreed upon by the organization which represents their interests. The proposals also include a clause, it is said, which provides that sales tax shall not apply on sales by retailers who manufacture or produce articles made to the order of individual customers and sold over the counter or in the premises where they were made direct to such individual customers.

Two-Cent Stamp on All Cheques

The proposal re the Stamp Tax on cheques was originally two cents on all cheques, drafts, bills of exchange or promissory notes, up to and including one hunderd dollars and a flat rate of four cents for higher amounts. It is understood the manufacturers favor the further amendment of this proposal so that there will be but a flat rate of two cents on each cheque irrespective of amount.

It is understood the income tax on corporations also came in for some consideration, and that the suggestion was made that the normal tax of 10½ per cent. on the income of corporations exceeding $2,000 per annum be reduced to the present rate applying to individuals of 4 per cent. on incomes up to $6,000 and 8 per cent. on all incomes over that amount without any surtaxes. It was also understood to be a recommendation that net loss from business for any taxable year be deducted from the net income of the succeeding year and that any unabsorbed balance be a deduction from the net income of the next succeeding year. Income Taxes payable to other authorities such as provincial or municipal governments should be counted as an expense of doing business and deducted from the taxable amount as well, according to the recommendations. The deduction of gifts to charities totalling not more than 15 per cent. of the taxpayers' net income should also be deducted from taxable income according to the proposals. The same provision would be applied to personal income tax and also including deductions of life insurance premiums not exceeding 5 per cent. of net income. Suggestions for simplifying the method of computing the tax are also made. Repeal is also suggested of the tax of 5 per cent. on premiums paid to unlicensed insurance companies.

The proposed amendment of the paint manufacturers, as outlined in a recent issue of Hardware and Metal, would be inserted in place of the provision that the purchaser be furnished with written invoice which shall state separately the amount of tax to at least the extent of 2¼ per cent. The suggested amendment of the paint manufacturers provides that no absorption of any part of the tax be allowed, that the sale from manufacturer to wholesaler be exempted from taxation and that the sale from either manufacturer or wholesaler to retailer be subject to the full Sales Tax of 4½ per cent.

341 Retail Hardware Stores Show Average Profit of $53.87 Each on 1921 Business

Increased Cost of Doing Business in 1921 Revealed —Cost Items Show Little Opportunity For Reduction in Dollars and Cents—Increased Turnover must be Developed—Three Groups Show Better Experience

THAT the average cost of doing business in the retail hardware trade was increased during the year 1921 compared with 1920, is shown by a group of figures compiled by the National Retail Hardware Association, according to the National Hardware Bulletin. The figures show that one of the greatest problems of the hardware retailer is that of increasing his volume of sales. The figures are taken from the records of three hundred and forty-one dealers in all sections of the country and comparing the average with those of previous years.

In 1920 the average retailer enjoyed a sales volume of $67,026.42 obtained at an average cost of doing business of $11,400.73 or 17 per cent.

In 1921 the average retailer's sales volume was only $51,669.00 and his average cost of doing business expressed in dollars was $11,127.54 or 21.54 per cent.

Thus while there was a loss of $15,356.47 in the average sales volume, the reduction in the expense account amounted only to $273.19. This accounts for the sharp increase in the percentage figure for the cost of doing business, an increase of from 17 per cent. to 21.54 per cent.—an increase sufficiently large to virtually wipe out the profits of the average dealer.

Some of the loss in volume can be readily accounted for from the fact that retail prices were reduced and the tonnage of merchandise sold in 1921 would not bring the same number of dollars in 1920. But this does not alter the fact that a study of the actual dollars paid out for expenses shows little chance for reduction, nor that dealers can sell much more merchandise than they do without increasing the cost in dollars and cents, of doing so.

Study of the itemized expense figures shows that the largest single item in the expenses account is for salaries of all kinds which amount to $6,321.56 of the total budget of $11,127.54, or 12.22 per cent. Yet the average salary of the owner of a retail hardware store is only $1,888.51 while the average annual wage to salesmen is $1,332.01. Obviously there is little opportunity for reduction there.

But the need for increased volume and opportunity for it is rather well shown by the fact that while the average sales per salesman, including owners as salesmen, is only $13,674.40, there are numerous cases where individual stores show average sales per salesman of more than $20,000.

COST OF DOING BUSINESS IN 1921

Based on the Average of $61,669.95 Volume of Sales

Item	Amount	Per centage
Owners' salaries	$3,112.46	6.03
Clerks' salaries	2,835.89	5.50
Exclusive office salaries	373.21	.70
Office supplies	94.09	.18
Store supplies	88.84	.17
Postage	73.87	.14
Advertising	384.46	.74
Heat, light and water	253.01	.50
Delivery	480.46	.93
Telephone & Telegraph	87.98	.17
Collections	29.75	.05
Rent	1,021.48	2.00
Repairs	88.90	.17
Insurance	295.23	.57
Interest	408.76	.80
Donations	61.12	.11
Taxes	478.12	.93
Miscellaneous	312.18	.60
Depreciation, Furn. and Fixt.	155.27	.30
Depreciation Delivery Equip.	126.35	.24
Losses from bad debts	368.13	.71
	11,127.54	21.54%

Compare this experience with your own and make your budget for 1923 so that your expense ratio will not exceed this one. Volume increases can be had without increasing the cost even if individual expense items cannot be reduced in dollars and cents.

If the data obtained for this survey may be considered typical of the hardware trade as a whole it is quite evident that the retail hardware business was very unsatisfactory from the standpoint of profit in 1921.

The tabulation shows that there was an average profit of about one-tenth of one cent for each sale of $1.00, requiring a sale of $10.00 to produce one cent profit. Unquestionably this poor showing

PROFIT AND LOSS STATEMENT FOR 1921

(Combined figures of 341 stores)

Sales		$17,619,452.01
Inventory beginning year	$ 7,030,446.69	
Merchandise purchased	12,619,938.37	
	19,650,385.06	
Inventory end of year	5,943,802.50	
Cost of merchandise sold	13,806,582.56	
		13,806,582.56
Margin		3,812,869.45
Expenses		3,794,492.17
Profit		18,377.28

The foregoing showing the combined experience of 314 dealers indicates a profit of $18,377.28 on a business of over seventeen and one half million dollars. The stores represented average a profit of $53.87 each.

THE AVERAGE BUSINESS EXPERIENCE OF 341 RETAIL HARDWARE STORES DURING 1921

Sales	$51,669.95
Loss in Sales Volume Compared with 1920	23%
Made an average margin on sales of	21.64%
Average cost of doing business was	21.54%
Average profit was (on sales)	.10%
Average inventory was	18,877.18
Shrinkage in inventory from 1920 was	16.00%
Average salaries drawn by owners	1,888.51
Average salary paid employees was	1,332.01
Average stock turn was	2.14
Average volume of sales per employee, including owners, was	13,674.40

was the result not only of dealers following the declines in prices in selling, but also of their writing off book values at the end of the year by taking inventories at market price rather than at the price paid for merchandise. Regardless of how the low percentage was obtained, the figures show the average margin for 1921 to be 21.64 per cent. of the selling price, while the cost of doing business was 21.54 per cent. This showing emphasizes the necessity for a more careful study of margins for 1923. It proves the need for Invoice and Profit Register forms. With this form in use the dealer has the opportunity to check his margins as the goods are placed upon the shelves instead of waiting until the end of the year to find that he has lost money because he has not added a fair margin to his invoice price. Study of the individual returns shows some dealers to have made a margin of only about ten per cent. for 1921.

Analysis According to Population

While a study of the figures on the basis of a general average for the country is of interest it is recognized that there is some variation in expenses according to the size of the town in which the store is located. Therefore the figures have been sub-divided into six groups as will be seen from the figures on this page. This grouping enables dealers in various sized towns to study with especial care the average experience of merchants who are similarly located as to population.

In this subdivision the averages in the group of from 25,000 to 50,000 population are less conclusive than the other because for some reason the number of dealers reporting from towns of this size is not large. Naturally the more reports that are analyzed the truer the figures are for the average. It is also worthy of note that the figures from the larger cities are from stores of average size rather than large establishments.

Only Three Groups Show Any Profit For 1921

The subdivision of the figures shows that profit was made in only three groups. The average dealer located in a town of from 2,500 to 10,000 crept over to the right side of the ledger by the narrow margin of $373.96, while his brother in towns of less population than 2,500 showed an average loss of $476.73.

The average dealer in towns of 10 to 25 thousand population was able to show a profit of $2,049.58 while the average loss in the next division, 25 to 50 thousand, was $1,739.82.

Likewise dealers located in towns of from 50 to 100 thousand showed a loss,

AVERAGE EXPENSES DIVIDED ACCORDING TO POPULATION OF TOWNS AND CITIES

Items	2,500 and under	2,500 to 10,000	10,000 to 25,000	25,000 to 50,000	50,000 to 100,000	100,000 and up

Donations	.11	.14	.14	.08	.19	.05	.11
*Taxes	.92	.99	.72	1.53	.73	.65	.93
Miscellaneous	.55	.58	.55	.56	1.32	.46	.60
Depreciation							
Fur. and Fix.	.28	.32	.27	.30	.58	.26	.30
Deprec. Delivery	.25	.25	.26	.27	.14	.25	.24
Losses Bad Acct.	.82	.52	1.10	.43	.32	.51	.71

The high tax figure in group four is due to the fact that the number of returns from towns in this class was low and one set of exceptionally high tax figures threw the average out of balance. Note how rents increase with population.

amounting to $1,224.60 while those in cities of more than one hundred thousand made the best showing of any group, a profit of $2,955.88.

The showing of the large city dealer is probably accounted for by the fact that he was able to use the services of the jobber to great advantage and thus was not forced to write off heavy losses on account of declines, nor to accept as much loss in his selling prices by marking down his goods in accordance with the market. At least this is the impression which the figures make, showing a margin of 28.39 per cent. and a stock turn of 2.54 times, both being the largest of any of the classifications. It will be noted also that the inventory in this class is only $1,600 more than the inventory of dealers in the smallest classification.

Cost of Doing Business According to Population

There is presented in this connection a tabulation of the various percentages entering into the cost of doing business according to the size of the town in which the dealer is located.

It will prove of interest to dealers to check these expense ratios with their own for the purpose of detecting evidence of expense items in their own businesses that are above the average and to devise means of revising them downward.

Nothing in the conduct of a business deserves more thought and attention than the expense and margin percentages, for unless they are in proper relation there can be no profit.

GLASS INSURANCE REDUCED

Ottawa.—A reduction of ten per cent. in the cost of plate glass insurance, which becomes effective on January 1st, was announced by local agents of plate glass insurance companies. The reduction follows notice which has been received from the plate glass underwriters, which have headquarters at Toronto and Montreal.

The drop in the insurance rate, it is stated, is due to larger supplies of Belgian and British plate glass coming into the American market.

AVERAGES DIVIDED ACCORDING TO POPULATION OF TOWNS AND CITIES

Figures from 335 Stores

	2,500 and under	2,500 to 10,000	10,000 to 25,000	25,000 to 50,000	50,000 to 100,000	100,000 and over

Average sales per salesman or owner	13,071.34	13,546.61	13,298.30	14,360.54	13,761.95	13,641.13
Average inventory	16,302.09	20,348.00	23,992.22	27,575.54	18,963.30	17,950.55
Average stock turn	2.20	2.04	2.19	2.43	2.20	2.54

*Here are the business histories of **hardware** retailers for 1921, divided according to the size of towns in which they were located. Note that in the smallest classification there is a loss, though the cost of doing business is below the average. And the experience of the fourth group shows that volume alone cannot make profit. The typical dealer in the large city, with small stocks of individual items, made the best showing of all, though his operating costs were 4.45% higher than those of his country brother.*

Demonstrations Sell Radio Equipment

Few Buyers Know What They Require and if Not Well Advised They Give Up the Game and Many Possible Buyers Are Lost—Montreal Hardwareman Turns $100 Stock of Radio Supplies Each Month—Resembles Gramophone Business in Early Days

WINDOW displays of wireless equipment backed by snappy advertising in the local paper and store demonstrations at stated hours have been helping Cyril McMurtry, of the George A. McMurtry Hardware, St. Thomas, Ont., to develop a splendid trade in the department of which he has charge.

As may be seen from the illustration, the firm carries a stock that is complete enough to take care of all requirements whether those of the beginner or the veteran "radio bug."

Right here it might be mentioned that no small part of Mr. McMurtry's success in handling radio equipment is due to the fact that he is a veteran himself. As an operator of eleven years' standing, part of which time he served in the war, Cyril McMurtry is in a position to give real service. When he talks about radio or radio equipment he knows all about the game and this, he says, has been invaluable to him in building up his big trade in radio apparatus.

Gives Good Advice

Very few of those who want to buy equipment know very much about what they really need, Mr. McMurtry says, and if left to themselves might buy apparatus totally unfitted for their requirements. This would result in troubles and disappointment and failures and would be a bad advertisement for what Mr. McMurtry regards as one of the greatest wonders of the age. By a few minutes' questioning he is usually able to size up what is needed and give expert advice regarding selection and the result is satisfied customers, and Mr. McMurtry says he has proved time after time that a store can have no better advertising than well pleased customers

Mr. McMurtry has installed equipment from that needed by the merest boy amateur, and costing only a few dollars, to community sets running up into the hundreds.

Sells Itself

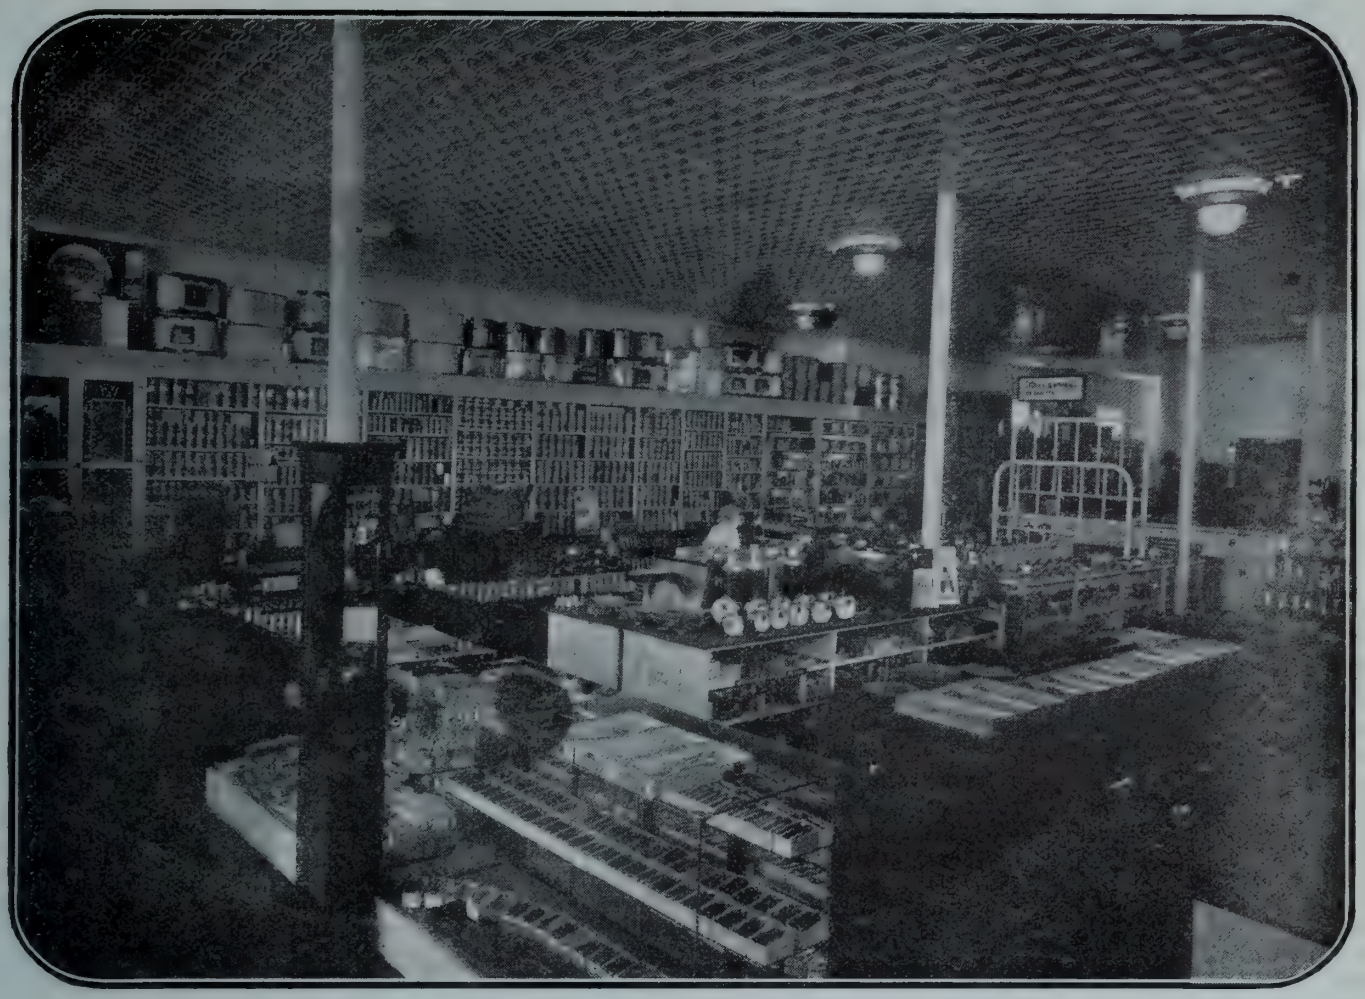
He believes that the more demonstrations he can give the more people he is going to convert into radio fans and the more equipment he will sell. With this object in view he has put on hundreds of entertainments in the city and district in addition to the regular concerts at the store.

One result is that St. Thomas and Elgin County has perhaps more radio "bugs" than any city of its size in the country and the number is steadily growing. As it grows, so the business of McMurtry's radio department grows, and Mr. McMurtry is enthusiastic over the prospects for the future.

He expects to do a big trade this winter season in radio sets and equipment as a result of the interest the community is taking in wireless.

"There is not a large net profit on radio parts, but we get it on turnover. For our trade here we have found that it is only necessary to carry in stock around one hundred dollars' worth of accessories, and we turn this over in a month to six weeks. Radio sets are a little different, but the more expensive outfits can usually be sold from the catalogue and we only stock the cheaper crystal sets," said Jas. Gelineau, hardware merchant on Westminster Ave., Montreal West.

Radio Parts in Big Turnover



Mr. Gelineau stated that their experience with radio led them to believe that it was much like the gramophone business was a few years ago. The first trade in these was in $25 to $50 machines, but it grew and extended until now people are in the market for expensive cabinet phonographs running into hundreds of dollars. In selling radio they tried to sell a cheaper crystal set and when this was in use for a short time very often the enthusiast would plan building or installing a tube set which would enable him to get in touch with distant points. The main thing was to establish the "bug" and the bigger and better trade would follow.

Parents Become Enthused

The future of radio in Montreal West was predicted last spring, the opinion being that many more people would go in for radio after the summer months. This forecast proved true, as Mr. Gelineau is not only selling parts to the younger folk, but fathers and mothers are also interested. He told of a man living across the street who has two boys who recently built a small crystal

A very wide selection of radio sets and parts is frequently shown in the windows of the George McMurtry Hardware, St. Thomas, Ont., in connection with the selling methods outlined. This gives some idea of the parts which are most needed to form the stock.

A hardware man this week enquired as to how the stock could be put within close reach of the customer and everything in sight, and yet guard against an appearance of disorder and overcrowding. This view of the Sutherland-Stelck Hardware Co. store at Dauphin, Man., is a splendid example of how this can be accomplished. A wide range of goods is neatly arranged here, some under glass and other lines on top of counters and cabinets where they can be closely examined by prospective purchasers. The importance of this factor in selling is emphasized by this firm.

set. They would run into a problem in construction and go to their father for help. The parent became interested and now he was building a bigger set himself, one which would afford entertainment for the whole family. From information he has secured from people entering the store, Mr. Gelineau has learned that a good many of his customers have just about reached a decision to go ahead and install one of these vacuum tube sets.

It is realized that much of the enthusiasm commences with the younger people, and it is through them that the radio business will extend for the most part. A form of advertising to the boys in the schools is used in the shape of blotters distributed among classes. On the blotter reads:

The radio season is under way.
Have you started yours yet?
Now is the time. Drop in and ask
For a catalogue and prices.
Jas. Gelineau The Radio Man

To back this form of advertising up a vacuum tube set with horn was attached on the counter at the rear of the store and with a loud-speaking attachment concerts or announcements could be heard from the pavement outside when the transom over the door was open. This brought many people in off the street, thus enabling the distribution of literature and good sales talks on what could be accomplished in their own homes.

Radio has "come back" this fall and early winter, and Mr. Gelineau predicts bigger development in future. As far as Montreal West is concerned he is now convinced that it will become as popular and common in the homes as the phonograph, which means continued good trade in the hardware stores. Parts were now more inexpensive than they were a year ago, and market was on a more uniform basis, and these will greatly assist future radio business.

IRON FROM THE REGIONS OF THE UNKNOWN

In the museum connected with the McGill University there are three meteors which should make interesting study for students of metallurgy as well as those of astronomy. Where these meteors came from no one knows. They fell from space and came to a standstill when they struck our earth. They were supposed to be of pure iron, and have been spoken of often as being the only kind of pure iron known. Practically ever book on metallurgy will say that pure iron is impossible except in the case of meteors which fall from space. This argument has now been exploded as it has been found that these iron meteors contain different other metals. One weighing 370 lbs. was picked up at Madoc, Ont., in October 1854, lying on the surface of the ground. This was put on the planer a short time ago and planed on one side when it presented the appearance of pure iron, but the chips, on being analyzed, were found to contain 6.35 per cent. nickel. Another one of similar weight was taken from the Canyon Diabola, at Coon Butt, Arizona, and was also considered as pure iron until analyzed when it was found to contain 90% iron and the balance made up of nickel, cobalt and carbon.

Still another one was from New Mexico and analyzed 91.39 iron; 7.86 nickel and .52 cobalt. They all have the appearance of sponges, probably from the intense heat to which they were exposed in the short time required to penetrate our atmosphere and get to earth.

Applying the Idea

ELSEWHERE in this issue will be found an article giving the results of a survey of some three hundred and forty-one hardware stores, showing that the average cost of doing business in 1921 increased to twenty-one per cent. from seventeen per cent. in the previous year. There was, of course, much writing down of inventories in the year 1921, due to the big price reductions which were experienced, and the record for 1922, even with the same turnover, should be much more satisfactory. The figures reveal some interesting facts, however, among which is that the various overhead costs cannot be much lowered except by an increase in turnover with approximately the same expense. While much attention must be paid to buying and credit and other departments of the business, it is apparent that the real solution of many of the retail hardwareman's problems will come only through a big increase in turnover. To accomplish this, more use should be made of the selling suggestions which appear in each issue of Hardware and Metal throughout the new year, and by following a policy of applying every possible idea which might prove helpful. Plans are being made for improving and extending the service to readers in the next year, but this will be of little avail unless the readers take to heart the lessons learned by others and make definite application of every idea which would result in more business.

Groping in the Dark

IT IS unfortunate that the retail trade is left to grope more or less in the dark insofar as the government's tax regulations are concerned. The receipt tax is scheduled to become effective January 1, yet all that has been issued so far has been a mere skeleton regulation which lends itself to much misconstruction. Some indication of the way one official of the department of customs and excise thinks on the subject is contained in an article in this issue in which he places a rather different aspect on the government's intention concerning the taxing of counter receipts than is given by the secretary of the Dominion Board, R. M. A., who claims that the government's intention is to make all sales over the counter free from tax, but the official of the department of customs points out that receipts marked "paid" or slips with the words "this is a receipt" are taxable. Meanwhile the discussion proceeds and the government will give no further light on the subject until after the tax has been put into effect and specific complaints are registered.

The advisability of using inland revenue stamps for this tax and eliminating the use of post office stamps has been pointed out in previous issues of Hardware and Metal. Apparently nothing along this line is contemplated, nor is it likely to be, because of the fact that it would greatly inconvenience many merchants in smaller localities where the post office is handy but where there is no provision made for the sale of inland revenue stamps. It is learned that very few post offices sell inland revenue stamps, and that, as far as the government is concerned, the post office stamp does just as well because it brings in the revenue. Such revenue is likely used to cover up deficits in certain divisions of the post office, and in this way a true record of the revenue is not available, and the country is being subject to much inconvenience in various forms of taxation to cover the situation. The reason the majority of post offices stopped selling inland revenue stamps is said to be that some people commenced using them for postage on letters. However, it is noted the post office have no objection to their stamps being used where inland revenue stamps should be used.

Some Dangers Which Threaten

AN ACTIVE holiday trade in hardware commodities has maintained the steady improvement in volume of business being experienced and, with more tendency to book orders, conditions are auspicious for much improvement during next year. The average retailer has had as good volume of business this year as in 1921 and the big write-offs in inventories which wiped out profits have not been experienced. This increased business is reflected to some extent in the curtailment of unemployment, but the same unemployment has caused a shortage of labor in some lines and has brought about a firming of prices. The recent tendency has been distinctly upward on some lines of hardware, though the average price trend for the year will show a decline compared with the previous year.

There are dangers involved in this situation. One is the tendency to inflation of prices where little difficulty is experienced in getting the higher price. Another is that the higher prices which have followed shortage of labor and other considerations increase the spread between what the farmer gets for his product and what he must pay for his hardware. Wholesalers' stocks are also low in many cases, but retailers should be careful not to construe this as indicating a shortage in merchandise which they must guard against by ordering too far ahead.

There is unlikely to be a shortage in merchandise. Confidence on the part of manufacturers in producing for stock and on the part of wholesalers in completing their lines so as to be able to fill the retailers' requirements is all that is needed. The retailer can hardly be expected to take chances when those nearer the production stage are unwilling to do so. There is just a danger for some retailers to become panicky over this situation, and if they do so and start ordering promiscuously there will develop real shortage of goods which will be abnormal and later on they will be forced to take losses on the same merchandise. The present firmness in prices should not scare any retailers, for the general tendency is downward and some of the advances which have been taking place have been due to certain conditions which may be short-lived.

THAT THE oil industry is becoming more scientific and a more important element in national life today is evidenced by the establishment of a Chair of Petroleum and Oil Engineering in Birmingham University, England.

Some Retail Contests that Are Illegal

Guessing, Lottery, Punch Board, Wheels of Fortune and Shell Game Contests That Run Foul of Dominion Act Should be Avoided by All Merchants—Often Entered into Ignorantly, Not With Desire to Violate Law

By E. M. TROWERN

AT THE last session of the Dominion Parliament our association secured an amendment to the Criminal Code, which reads as follows:

"Every one is guilty of an indictable offence and liable to two years' imprisonment, and to a fine not exceeding two thousand dollars, who disposes of any goods, wares or merchandise by any game or mode of chance, or mixed chance and skill, in which the contestant or competitor pays money or other valuable consideration, or

"Induces any person to stake or hazard any money or other valuable property or thing on the result of any dice game, shell game, punch board, coin table or on the operation of any wheel of fortune."

Guessing Number of Beans in a Bottle Now Illegal

Previous to the passing of the above amendment to the Criminal Code, the Courts have held that guessing the number of beans in a bottle or other similar device was not covered by the Act, and as we had so many complaints regarding this matter from all parts of Canada, it was brought before the Annual Convention of the Dominion Board of our Association, and they unanimously decided to secure legislation to stop it.

This amendment was prepared and secured through the efforts of our association to prevent a host of schemes such as the above, which have for some years been creeping into the economical life of Canada, and which we believe tend to lower the trading policy of retail merchants, and do injury to the public as well.

Some of the members of the druggists' section of our association requested our opinion recently as to the legality of a proposal which was submitted to them, and which we understand was submitted to retail druggists generally, by a firm of manufacturing pharmacists, and which we understand was withdrawn when it was found that the above amendment to the Criminal Code made it illegal.

The proposal was as follows:

The firm offered to sell goods to retail druggists valued at seventy-five dollars ($75.00). Along with these goods they were to supply a doll valued at fifteen dollars, for which they asked nine dollars and forty cents. The company was to supply a pound bottle full of beans and also tickets, and asked the retail druggists to give one of these tickets to every purchaser of the above preparations who purchased twenty-five cents' worth. The customers receiving the tickets were to have had the right to guess how many beans there were in the bottle; the one guessing the nearest number of beans contained in the bottle to get the doll as a prize. The number of beans contained in the bottle was made known to the retail druggist and the drawing was to have taken place sometime in December.

All such schemes are now illegal, and if any such scheme, or schemes of a similar character, should be in operation in any city or town, and any retail merchant should have any doubt as to the validity of the Act and desires to test it out in the courts, we will be pleased to take charge of the prosecution.

On September 27th, 1922, a well-known firm conducting a department store, desirous of holding a special sale to celebrate the founding of their business, advertised and conducted a birthday anniversary sale. With every sale they made, and to anyone who asked for one, a metal coin was given bearing a number. Duplicates were kept and on the 16th of October the duplicates of the coins issued were placed in a churn, and

Disagrees With English Hardwareman's Remarks Concerning Canadian Trade

THERE HAVE been a number of interesting comments made by Canadian hardwaremen concerning the article in December 2 issue of Hardware and Metal, outlining the views of an English hardwareman concerning the Canadian trade. Another interesting comment on the points brought out in that article is that from Geo. F. Irons, Peart Bros. Hardware Co., Ltd., Regina, Sask., as follows:

Editor, Hardware and Metal,
Toronto, Ontario.

I read with very much interest the reproduction of Mr. James S. Mountford's article from the English Ironmonger, dealing with his views on the Canadian retail hardware business.

With only two exceptions, Mr. Mountford has stated the facts well. However, as a hardware man who has travelled the globe and is conversant with both the English and Canadian trade, there are several points in Mr. Mountford's article that are open to criticism and explanation from the Canadian trade. While it may be true that fireside hardware is conspicuous by its absence in Calgary, such is not the case as far as most of the other cities in both Eastern and Western Canada are concerned. In the city of Regina the company I am connected with carry a stock of brass kerbs, fenders, fire brasses and coal boxes that would be a credit to any English house furnishing store in England. The same may be said for J. H. Ashdown, of Winnipeg, and Jas. Walker Hardware Company of Montreal, and many other such stores throughout Canada, that I might mention. The English manufacturer has not neglected this field and I have personally examined the samples and made purchases from no less than four such manufacturers during the last few months, and these same companies have been selling this line of goods in this country for years.

In regard to the absence of fancy brass and copper goods his statements are true, but this condition is due to the fact that Canadian housewives prefer these articles in other metals, pottery or wood, which require a great deal less cleaning. Servants are not as cheaply obtained in Canada as in England, and the Canadian housewife is thus compelled to reduce all unnecessary cleaning and polishing such as brass and copper call for. I, of course, refer more particularly to trays, tea-kettles and hot water kettles.

I am also disappointed at Mr. Mountford's remarks regarding the Canadian stores (I take it he was referring to both hardware as well as departmental stores), as I feel just the contrary is the case. As far as hardware stores are concerned, J. H. Ashdown, of Winnipeg and Calgary, the Consumers Hardware Company of Lethbridge, and both the Sommerville and the Northern Hardware in Edmonton, and our own store in Regina, will more than favorably compare with anything I have seen in any other part of the globe, both in regard to fixtures, store and window displays.

The English hardware manufacturers could do more in the Canadian fields if they would give more serious thought to the Canadian requirements. To be specific, they should pack all shelf goods with screws and also have the catalogue numbers cover both the size, finish and description of articles shown or listed. If the latter detail was given more consideration they would receive more cable orders which would help to overcome the disadvantage of distance.

I much enjoyed Mr. Mountford's article and trust if he reads my remarks, he will accept them in the spirit intended. His article will be read by hardwaremen throughout the country and will be much enjoyed because he has been so specific.

(Signed) Geo. F. Irons.

Drumming Up the Crowd

FOR the big convention of the Ontario Retail Hardware Association in Toronto on February 13, 14, 15 and 16.

Put these dates down on your calendar NOW, and be on hand for what is expected to be the biggest and most profitable convention and exhibition.

Scores of splendid educational and entertainment features have been provided for this year's convention. Details will shortly be announced in Hardware and Metal.

Keep those dates open and plan now to attend.

a drawing was made to ascertain who were the winners of the prize.

On October 27th, 1922, the firm was charged in the Police Court, Ottawa, with having unlawfuliy conducted or managed a scheme, contrivance or operation, for the purpose of determining who were the winners of certain property, to wit: One automobile, one grafonola, one cabinet, one electric vacuum cleaner, one lady's coat, one stove, one set of dishes, one overcoat, one comforter, one smoking gown, one silk negligee, one blouse, one girl's coat, one boy's suit, one club bag, woollen blankets, one electric heater, one silk sweater, one electric iron, one pair of gloves, one hand bag, and one pair of stockings, proposed to be advanced, given, or disposed of by such scheme, contrivance, or operation.

Acted on Solicitor's Advice

In conducting the prosecution against the firm the Crown Attorney presented the following argument:

"It was an advertising scheme purely and simply, the firm expecting to be reimbursed for the expense for the cost of the prizes through increased sales, and where the discs were given to non-purchasers this was not done through generosity, but to try and protect themselves from just such a prosecution as this. I contend that what has been done in this case has been a direct violation of the statute, and that a conviction must be effected. Nobody believes the firm knowingly did wrong; it acted in good faith, on the advice of its solicitor, but it has erred, and the statute has been contravened."

The counsel for the company made the following statements:

"The difference between my learned colleague and myself narrows down to a small thing. There is such a thing as good will between a merchant and his customers. A merchant's business must be built up on the faith and trust that he can instil in his patrons, or he cannot succeed. If you find that the company has not acted upon this basis, then my client is guilty, but to reach this climax, you must disbelieve the evidence he has given that he did not enter into it for profit, and find that he conducted this scheme for motives of profit or gain."

In giving judgment on October 31st, 1922, the police magistrate said:

"In weighing the Act carefully, I find that the accused has violated the law as far as carrying out a scheme of lottery is concerned, and I impose a fine of $500 and costs, and I also direct and order that the said goods of the company be confiscated and held and disposed of as the Attorney-General may direct."

The above cases give further evidence of the necessity of all retail merchants keeping in close touch with our association in all matters of a commercial character; it is your association, and it is equipped to take care of your interests; we ask you to use it.

If you hear of any violations of the above Act, please notify the Secretary of the Provincial Board of our Association in your province, and they will receive our immediate attention.

The above cases cover in a general way most schemes of this sort. They all vary, of course, more or less in detail, and for this reason we ask all of our members—those who may be induced to enter into any such plan, or those who are opposed to all such measures—to submit to us, through the Secretary of the Provincial Boards of our Association, whose addresses appear hereon, any plan that may be suggested to our members, or any plan of the sort that is now in operation, and we will gladly give you our opinion regarding same.

Keeping the Windows Clear of Frost

Annual Difficulty Which Many Hardwaremen Experience Can be Satisfactorily Solved by Some of the Methods Outlined Herewith

NOW THAT the winter months are at hand merchants in all parts of the country are faced with the old trouble of window freezing. As this is one of the worst annoyances merchants have to contend with in the winter, every precaution should be taken. Windows that are covered with frost are as bad as no windows at all and, realizing this, a number of merchants in different parts of the country have asked Hardware and Metal for pointers on the art of keeping the windows clear. Herewith are presented some tips which the merchant might find useful:

The method usually advised to prevent the deposition of moisture and frost on the window-panes are the employment of double windows, or the coating of the glass with some one of the various liquids which have been recommended for the purpose. Another very efficient measure is said to be a small fan, so placed as to blow directly upon the glass.

Some years ago a correspondent of the "Scientific American" reported to that journal a number of experiments he had made to remove ice or congelation of water from window-panes. He placed the efficacy of the remedies he employed in the following order:

(1) Flames of an alcohol lamp; (2) sulphuric acid; (3) aqua ammonia; (4) glycerin; (5) nitric acid; (6) hydrochloric acid; (7) benzine; (8) hydriodic acid; (9) boric acid; (10) alcohol; (11) cobalt nitrate; (12) infusion of nutgalls; (13) tincture or solution of ferrous sulphate.

Some years ago H. F. Ruhl, of Manheim, P., read a paper before a State association in which he declared that the only really effective way to avoid window frost was to have the window properly constructed in the first place, and to use suitable methods of heating and lighting in the second. He had remodelled his window in accordance with his particular ideas. To quote a portion of Mr. Ruhl's paper:

"It is a well-known fact that where illumination is produced by kerosene, gas, or gasoline, the condensation of moisture on the glass is worse at night. This shows that illumination has something to do with the frost on the window. Heat supplied from a stove, a hot-air furnace, or a steam boiler also causes more or less condensation of moisture.

"In the writer's store the window is left open at the back, except that a mirror back is used; this is 30 inches high,

(Continued on page 44)

For the Man Behind the Counter

What the Retail Hardware Salesman Should Sell to Justify His Salary

Relation Between Sales and Salaries Quickly Apparent by Reference to This Chart

THERE is more or less uncertainty among retail merchants as to the relation which should exist between the sales made by their employees and the sales these employees make.

It is, of course, understood that allowance must be made in cases where the employee is only engaged in actual selling and delivery over the counter part of the time, but generally speaking, all of a salesman's salary might well be charged against his sales, even if at times he may be performing other duties not directly connected with the selling of merchandise.

The Harvard Bureau of Business Research and other organizations engaged in similar work have compiled data from which the chart shown in the accompanying illustration has been made, and by the use of this chart it is an easy matter to ascertain just what the relation is between Jim Jones' salary and his sales.

It is worthy of note in this connection that the same sources of information also furnish data regarding the percentages of various items of selling costs to total sales in hardware stores, as follows:

Rent, 3.41 per cent.
Salaries, 10.11 per cent.
Advertising, 1.12 per cent.
Heat and light, .43 per cent.
Delivery, .91 per cent.
Supplies, .6 per cent.
Insurance and taxes, .99 per cent.
General expenses, 2.01 per cent.
Depreciation and shrinkage, .52 per cent.
Bad debts, .31 per cent.
Percentages of total expenses to sales, 20.41 per cent.

It will, therefore, be seen that if Jim Jones sell $200 worth of hardware in a week and his salary is $25 a week, he is not earning what he ought, and it will thus be up to his employer to liven up employee, so that Jim will boost his sales record, or else to tell him to find another job.

Going back to the chart it is a comparatively easy matter for the "boss" to decide as to whether Jim is entitled to a raise. He may be selling $350 worth in one week, $250 the next week, and for a period of, say, six months make an average of $288 per week.

On the 10.11 per cent. basis, the chart will tell the merchant that Jim can be paid about $30 a week and still be close to the average allowed for salaries.

Generally speaking, however, it is safe to say that ten per cent. is too much to pay to a salesman who does nothing but selling.

We know of a very successful retail hardware merchant who employs five "outside" salesmen. These men are out five days of every week, and usually spend Saturday in the store.

They are paid on the basis of 33 1/3 per cent. of the gross profit on what they sell.

Let us see how this would work out in the case of a man who devotes his entire time to the selling of stoves, for example.

Chart Showing Relation Between Salaries and Sales.

Events in the Trade

NEW BRANCH STORE

Fred C. Jelfs, has opened up a branch at 269 Kenilworth Ave., Hamilton. W. A. C. Ford is in charge.

NEW FIRMS

The Ideal Plumbing & Hardware, have commenced business at 306 James street N., Hamilton.

Sidney J. Gibson is now in a hardware, plumbing and heating business at 684 Pape Ave., Toronto.

FIRE LOSS

Sturgeon Falls, Ont.—Fortier and Beauchaesne's Hardware was destroyed by fire.

Fire broke out in a tank filled with 37,000 gallons of crude oil and threatened to spread to the buildings of the British-American Oil Co., Toronto. It was confined to the receptacle however with damage of $1,000.

INCORPORATION

Perfection Radiators Ltd., head office Montreal, capital $750,000 to manufacture and deal in radiators.

Trelford Paint & Varnish Co. Ltd., head office Toronto, capital $100,000, to manufacture and deal in paints, colors, varnishes, etc.

Hickey & Aubut Ltd., head office Montreal, capital $50,000 to manufacture furnaces, stoves, ranges, piping, sanitary apparatus, etc.

DODGSON NEW HEAD COMMERCIAL TRAVELLERS

A year of good progress was revealed at the fiftieth annual meeting of the Commercial Travellers' Association of Canada, held in Toronto this week.

It was stated that representatives of the Association had interviewed Hon. W. S. Fielding regarding the discriminatory tax travellers had been called upon to pay on portions of their expense account classed as income, the Finance Minister having since removed the objectionable levy. The Board of Railway Commissioners had also taken off the 20 per cent. increase in excess baggage rates.

PRATT & LAMBERT BIENNIAL CONVENTION

About 175 sales representatives, executives and managers, from all parts of the United States, Canada, England, France, Spain and South America will attend the 75th anniversary convention of Pratt & Lambert-Inc., to be held at Buffalo, January 8-9-10-11, 1923, with headquarters at the Statler Hotel, and meetings conducted at the plant of the company.

ASK FOR INCREASES IN PEDDLERS' LICENSES

Quebec.—Peddlers' licenses in Quebec may be increased from $40 a year to $500 for those who travel afoot and to $1,000 for those who travel with horse and rig. They may be required to take out a license for each judicial district in which they wish to do business, and may have to have a photograph on their license, so they can easily be identified.

CANADA PIPE & STEEL CO. SOLD TO CRANE LTD.

Canada Pipe & Steel Co., Ltd., (Cluff Brothers) have decided to discontinue the plumbing supply business which has been operated for the last fifteen years at 85 Church St., Toronto, and have sold out to Crane Limited, effective from January 1, 1923. All orders on the books for delivery after that date will be filled by Crane Ltd. Messrs. R. J. and W. J. Cluff will in future confine their efforts to manufacturing only, through Galt Brass Co., Ltd.

CANADIAN CUSTOMS OFFICERS AROUSE IRE OF U.S. MERCHANTS

Brockville.—Ogdensburg, on the United States border, is only 11 miles east of here and annually it is a Mecca for scores of Brockville, Prescott and other nearby people to do their Christmas shopping.

Ogdensburg merchants are up in arms, so to speak, over the alleged actions of two Canadian Customs officers, one each from Ottawa and Toronto, who are attempting to detect the smugglers of goods. The merchants say they have a description of the officials, and have resolved to expel them from their stores should they make their re-appearance.

That these officials have no right to follow people into stores and spy on what they buy was the opinion expressed in Ogdensburg legal circles, and it was said that the charges of disorderly conduct would be sustained if the alleged practices are continued.

REPRESENT FOREIGN HARDWARE LINES

Warnecke & Co., manufacturers' agents and importers have opened an office at 543 Canada Cement Bldg., Montreal, and announce that they will represent manufacturers of enamel ware in Sweden and Czecho-Slovakia, Brillo Mfg. Co., Brooklyn, Grossman Mfg., Co., Chicago, and Monarch Aluminware Co., Cleveland.

FIVE-DAY TRIP FOR SANTA CLAUS

Summerside, P. E. I.—During Christmas week, R. T. Holman, Ltd., Summerside, conducted a novel advertising campaign, covering about sixty miles of road. Santa Claus was conveyed by a gaily-trimmed sleigh drawn by a pair of horses, from North Cape, P. E. I., to the Holman store. The trip was started on a Tuesday and ended on Saturday of the same week, lasting five days. Santa stopped at every village and town on the way, and explained that he was on the way to the Holman store for a supply of toys for girls and boys.

FINED FIFTY DOLLARS FOR FALSE ADVERTISING

Emphatic disapproval was expressed by a Toronto judge of the practice of deceiving prospective customers by publishing false statements in advertising circulars. Paul Reuben was fined $50 and costs for publishing advertisements containing false representations. The advertisement took the form of a handbill relating to a bankrupt sale, the goods advertised as being of a certain grade, when they were not. The judge called it "dishonesty" and would not accept the excuse that "everybody is doing it."

KLING CUTLERY PLANT LIKELY TO MOVE TO WELLAND

Welland, Ont.—Following a conference with James L. Wilhoit, of New York City, representing the Kling Cutlery Company, Lynn B. Spencer issued a statement to the effect that negotiations under way and likely to be completed in a couple of days would likely result in moving the entire New York plant of the firm to Welland. Two months ago this company completed the purchase of the Fulton Motors' industrial building on Ontario Road with the intention of establishing there a Canadian branch. The intention now is to place in Welland the entire plant, and if this is carried out manufacture will begin in February.

News of Western Canada

K. H. Ranton, hardware, Rembey, Alta., has suffered loss by fire.

J. A. McIntyre, of Leslie, Saskatchewan, spent a few days in Winnipeg on a business trip.

S. E. Leavitt, Saskatoon, Saskatchewan, spent last week in Winnipeg on a business trip.

Geo. Wright, western representative of the Galt Brass Co., paid a visit to Calgary and Edmonton.

J. McLarty of Macleod has purchased the hardware business of McPherson Bros., Red Deer, Alta.

A. G. Richards, manager of the plumbing and heating department of Marshall Wells Alberta Co., Ltd., of Edmonton, was a visitor to Calgary.

C. E. Tisdall, president, Tisdalls Ltd., wholesale sporting goods firm of Vancouver, B. C., was again elected to the Mayoralty of Vancouver for 1923 by an increased majority.

Congratulations are in order to C. R. Thompson, Manitoba and Saskatchewan representative of the C. C. Craig Co. Ltd., Winnipeg, who was married to Miss A. D. Ross, of Winnipeg.

RETAILERS OPPOSE SATURDAY CLOSING

Victoria, B. C.—The retail executive of the Chamber of Commerce went on record as being strongly opposed to a change in the present weekly half holiday arrangement and as being in favor of retention of Wednesday as the day for store closing.

The retailers also opposed the proposal to compel the placing of stamps on all receipts of over ten dollars, on the ground that such procedure would result in unnecessary inconvenience to traders and buyers alike.

BIG STEEL INDUSTRY IN B. C. PREDICTED

Victoria.—In discussing his bill, on second reading, to ratify an agreement for joint provincial and Dominion exploration of the iron ore resources of the province, Hon. William Sloan, minister of mines, declared that this agreement would have much to do with the development of British Columbia.

It had been pointed out that money was lost through the overlapping of the work of the two governments. The minister said that the agreement would prevent this, and should lead to the securing of knowledge which would aid in the establishment of an iron and steel industry in this province.

Mr. Sloan said that the Dominion government had materially assisted in the building up of an important steel industry in Nova Scotia and that could be done in this province. In the wake of a steel industry would come other industries, he declared.

Saskatoon Hardware Co. Wants Catalogs

J. L. S. Hutchinson, Saskatoon Hardware Co. Ltd., Saskatoon, writes to Hardware and Metal concerning the fire which destroyed the store, as outlined in last week's issue and as illustrated in this issue. Mr. Hutchinson asks that manufacturers send catalogs and current price lists. He points out that, while the firm's loss will be heavy, it does not prevent them from commencing operations immediately and that temporary premises have already been secured in which business will be done until such time as the firm can rebuild.

BILL TO REGULATE ELECTRICAL GOODS

Victoria, B. C.—Hon. Dr. Sutherland's bill in the legislature, to regulate electrical concerns and the equipment and supplies used has been up for further consideration. He explained that the federal government was bringing in legislation applicable to all provinces in this connection, which should do away with the objections now being offered to the bill. The minister explained that the users of electrical supplies should be protected against inferior Japanese goods.

He explained also that there was no intention on the part of the government to enter municipalities and interfere with the work of inspectors there, nor would fees be paid to provincial inspectors who might have to make inspections The bill was passed.

The progress and aftermath of the fire which destroyed the Saskatoon Hardware Company's premises in Saskatoon, Sask., as outlined in last week's issue of Hardware and Metal, is shown herewith. Volumes of smoke in the upper picture give some indication of the serious nature of the fire. Below the devastated building hung with icicles, is a grim evidence of the effects of fire. Little vestige remains of the fine hardware store which existed before the conflagration.

Weekly Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

"ALADDIN" GAS MANTLES

La Compagnie Martineau, Quebec City—Can you please tell us who makes the "Aladdin" gas mantles?

Answer: The Welsbach Light Co., Gloucester, N.J.

WASTE PAPER BALER

The Davey Hardware, Ltd., St. Thomas, Ont.—Would you kindly advise us the name of the manufacturer of waste paper baler?

Answer: The Climax Baler Co., Hamilton, Ont.

CANADA STOVE DAMPERS

W. Walker & Son, wholesale hardware, Toronto—Can you tell us who makes the "Canada" steel stove pipe damper?

Answer: The Myers Manufacturing Co., Dresden, Ont.

"PAZZO"

Eastland's Hardware, Thornbury, Ont.—Kindly advise us who makes a preparation called "Pazzo," this being used to stucco houses.

Answer: The Toronto Builders Supply, Ltd., 106 Don Esplanade, Toronto.

SLEIGHS 42 IN. WIDE

Messrs. Dittmer & Robb, Burns Lake, B. C.—Can you advise us who manufactures a sleigh with a width of 42 inches from centre to centre of runners?

Answer—The Gregg Manufacturing Co., Ltd., Winnipeg.

BISHOPRIC WALL BOARD CO.

Messrs. W. Walker & Sons, wholesale hardware, Toronto—Kindly give us the address of the Bishopric Wall Board Co., manufacturers of stucco board.

Answer: This firm is located at Ottawa, Ont.

AGENTS FOR SOLIGNUM

P. T. Calkin Limited, Kentville, N. S.—Kindly advise us who are the agents in Canada for Solignum.

Answer: Messrs. Sturgeons Limited, 66 Richmond St. E., Toronto, Ont.

ELECTRIC SANDERS

The Saskatoon Hardware Co., Ltd., Saskatoon, Sask.—Would you advise us who manufactures an electric sander for sanding hardwood floors?

Answer: The Elliot Woodworker Co., Belleville, Ont.

B. S. A. AIR RIFLES

D. Becker, New Hamburg, Ont.—Kindly let us know where we can secure the B. S. A. air rifles.

Answer—The Canadian agents for this are Messrs. Fraser & Co., 10 Hospital St., Montreal.

KNITTING MACHINES

The Geo. Taylor Hardware, Ltd., Timmins, Ont.—Would you advise us the name of the maker of knitting machines?

Answer: Creelman Bros., Georgetown, Ont.; The Dundas Knitting Machine Co., Dundas, Ont.; The Georgetown Foundry & Machine Co., Georgetown, Ont.; Harley-Kay Ltd., Georgetown, Ont.

FLY SCREENS

W. J. Aldrich, Regina, Sask.—Can you supply me with the address of a manufacturer of fly screens?

Answer: The Kasement Skrene Dore Co., Toronto; Sanderson-Harold Co., Ltd., Paris, Ont.; Ham Bros., Ltd., Brantford, Ont.; The Anderson Mfg. Co., Ltd., Winnipeg; Cushing Bros., Ltd., Calgary, Alta., and Saskatoon, Sask.

QUICK SAFE CAN OPENER

The Thos. Davidson Mfg. Co., Ltd., Montreal—Can you give us the address of the makers of the Quick Safe can opener?

Answer—This product is made by the John Chumbley & Co., Nashville, Tenn., U. S. A.

WOOD FIBRE TUBING

The Davey Hardware Co., Ltd., St. Thomas, Ont.—Will you please let us know where we can procure wood fibre tubing about 1¼ inches in diameter, with a one inch hold?

Answer—The Diamond State Fibre Co. Carlaw Ave., Toronto.

"DOMINION" ELECTRIC WASHER

The Aikenhead Hardware Ltd., Toronto—Where can we secure the Dominion electric clothes washer and churning machine?

Answer—This is distributed by the Smith-Stewart Co., London, Ont. It is manufactured by the Dominion Motor Castings Ltd., Windsor, Ont.

MANDERS BROS. PAINT

Western Canada Hardware Co., Ltd., wholesale hardware, Lethbridge, Alta.—Kindly advise us if Manders Bros., manufacturers of paint, have agents in Montreal or Winnipeg.

Answer: The address of their Montreal agency is 144 St. Paul St. East. In Winnipeg the Winnipeg Paint & Glass Co. handle a few of their lines such as varnishes and japanned colors.

Trade Enquiries

Names and addresses of firms making enquiries can be obtained only by those interested in such lines upon application to Hardware and Metal, 143 University Avenue, Toronto. Please quote reference number when requiring addresses.

735. **Electrical Supplies**—A Port Elizabeth firm of commission agents are inquiring for an agency from Canada for electrical supplies.

734. **Steam Radiators**—A Japanese firm in Tokyo desire catalogues and price lists of Canadian manufactured steam radiators, boilers and steam valves.

737. **Firearms and Ammunition**—A Japanese firm in Tokyo wish catalogues and prices on firearms, ammunition, etc., immediately.

731. **Motor Car and Motor Cycle Accessories**—A Swedish firm wish to have catalogues, quotations, etc., from any concern in a position to export motor car and motor cycle accessories.

739. **Carborundum Grains**—A Japanese manufacturer of grindstones, who uses 5,000 pounds per month, desires to receive samples and prices from Canadian firms manufacturing carborundum grains or other abrasive material used in the manufacture of grindstones.

746. **Aluminiumware**—An Edinburgh firm, who had a complete exhibit of aluminiumware at Edinburgh Exhibition, desires quotations from Canadian manufacturers of aluminiumware. Samples may be forwarded to Canadian Trade Commissioner, 87 Union Street, Glasgow.

736. **Electrical Fittings**—A large import house in Tokyo specializing in the import of all kinds of electrical supplies, is interested in Canadian sources of supply for electric fittings, for both indoor and outdoor use; also conduit pipes, reflectors, switches, etc., as well as electrical appliances for the home. Catalogues and prices requested immediately.

738. **Piston Rings**—A Japanese importer of motor car accessories desires to receive samples and prices of Canadian-made piston rings.

741. **Asbestos Fibre**—A Mexican firm wish to import from Canadian manufacturers asbestos fibre for the manufacture of asbestos cement shingles.

732. **Automobile Wheels**—A Japanese motor car accessory house desire to have catalogues and prices on wooden wheels for motor cars; also interested in the steel fittings used in connection with demountable rims.

740. **Asbestos**—Foreign import house of long standing who did considerable business in asbestos before the war, desires to hear from Canadian mines in a position to export crude and fibre asbestos to Japan. Samples and prices requested. This firm would prefer to hear from parties who are not already represented in Japan.

20 Years Ago

Following items reproduced from Hardware and Metal of December, 1902:

"The Grant-Hamilton Co., Ltd., Toronto, are making a new line of paints consisting of 23 colors under the name 'Sterling.' "

"O. Bowyer, Listowel, Ont., has sold his business of stoves and tinware to Adolph & Bonnett, hardware merchants of the same town."

"The Hoffman-Corr Mfg. Co. have established a warehouse and factory at 118 Bay St., Toronto, where they intend to manufacture a large line of hammocks, and to handle rope, twine, thread, etc."

"The new foundry and machine shop which Gurney Foundry Co. Ltd., are erecting at Toronto Junction, is being rapidly pushed forward and it is hoped will be ready for occupation early in February."

"Hon. M. E. Bernier, Minister of Inland Revenue, says he is satisfied the metric system is infinitely superior to our complicated system of weights and measures. He is doing all in his power to educate the public to the advantages of the system."

"The Fairbanks Company have appointed J. E. Botterell manager of their Western branch at Vancouver. Mr. Botterell has been connected with the firm for the past four years, first as travelling representative in the Maritimes and latterly as sales manager at the Montreal house."

"Montreal Metal and Hardware Mfrs. and Merchants' Assn., at its annual meeting this week was attended by the following: J. W. Pyke, G. A. Kohl, J. Davidson, A. A. Brown, Wm. Starke, F. O. Lewis, T. L. Paton, T. H. Newman, F. Bacon, W. S. Leslie, F. Hopkins, H. J. Fuller, W. S. Gardner and Wm. McMaster. The officers elected were: President, J. C. McCormick; vice-president, G. Caverhill; treasurer, G. A. Kohl.

"J. Livingstone, ex-M.P. Baden, and E. Fielding, Toronto, had an interview with the Minister of Customs on Dec. 3 on the subject of the duty upon flaxseed oil and linseed oil, the importations of which are increasing rapidly to the serious detriment of the Canadian industry. Last year from Britain there was imported 650,943 gallons and from the United States, 41,946 gallons. It has long been claimed that the preference should not be given to linseed oil ground in Britain from Argentine flaxseed."

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

ALTHOUGH several price developments in the hardware markets are more or less anticipated during the opening weeks of the New Year, the number of changes at the present time is remarkably small. This is attributed to the influence of the holiday atmosphere, but at the same time is in direct contrast to the numerous price revisions which were in evidence at this time last year. A much firmer undertone is apparent at this season, however, certain basic elements contributing towards slightly higher levels on manufactured lines.

Oilcloth bindings, both brass and zinc, have been reduced this week, while a somewhat unexpected sagging is recorded in the turpentine markets, this being mainly ascribed to heavier receipts combined with current trade inactivity. On the other hand, linseed oil shows a tendency to rise, slightly higher levels appearing in some quarters. Asbestos products continue to reflect strength and have now attained more uniformity in quotations.

While the steel market presents an appearance of quietness, there is assurance of fairly large consumption of steel during the coming year. Whether mills will find it difficult or easy to supply these requirements depends chiefly upon the physical conditions of their operations. Steel prices hold up well, and do not seem to be under particular pressure. There is increased ground for suspicion that part of the call for steel shipments at this time is due to fear on the part of buyers that there will be another coal strike next April. Reports from primary centres show that opinion on this subject is divided. However, it is recognized that such a possibility may exist.

During recent months price changes on highly finished or ornamental lines of hardware have usually been on the downward grade, although of slight extent in some cases. On the other hand, developments affecting goods close to the raw materials reflect the current tendency in an upward direction, either by remaining steady or reaching advancing levels. A firm price trend is, therefore, generally expected to materialize during the coming year on heavy commodities.

Holiday business on the average attained satisfactory proportions. Merchants record a good sale for pocket cutlery, scissors, carvers, nickel-plated and brass goods, as well as other numerous winter products. Collections are described as in good shape.

Montreal, Que.

MONTREAL, December 28.—Price developments on the local hardware markets are fewer this week, the present period between holidays finding the trade making preparations for the opening of the new year after a splendid business session at Christmas time. Oilcloth binding, both brass and zinc, is reduced in price, while on most other commodities a steady to firm market tone is recorded. Cotton wastes continue with a strong undertone with higher prices still looked for in some quarters after the turn of the year. Brass and copper goods are improved in tone, and wrought pipe is reported as being in a fairly strong market position. A steady outlook is presented in other lines of iron and steel, sheets and bar products said to have a firm undertone. Rope and cordage markets are now quiet with raw materials on a higher price basis than formerly. Cotton rope shows a strong attitude due to the steady to firm conditions in raw cotton circles.

ELECTRICAL GOODS WERE ACTIVE SELLERS

Montreal.

Local jobbing houses report that trade for the holiday season was particularly active this season in electrical goods. Demand for the various lines commenced in good time and was well maintained up until the close of last week. One local distributor stated that it was reasonable to assume that dealer stocks were at the present time at a low ebb, and a fair trade might be expected to continue, although the gift season is now over. Prices generally have continued steady with a fairly firm undertone in the market.

ROPE MARKETS IN LITTLE FIRMER POSITION

Montreal.

Rope and cordage manufacturers state that owing to low stocks demand has been fair, although it is now quieter. Bookings in many quarters have been taken care of, but a resumption of this trade towards the latter end of next month should bring about a more active movement than has been experienced up to the present. In the meantime a quiet condition is anticipated. Raw materials, such as manila, hemp and sisal are firmer in price than they were when revision was made in rope quotations a few weeks ago, and for this reason there is a firm undertone in the market. Competition however has been keen, this factor being an important one at time of lowering prices last month.

There is a strengthening tendency in cotton rope and cordage, and the tendency here is upward at the present time. In some quarters a revision in the opening weeks of the new year would not come as a surprise.

FIRM TENDENCY REMAINS IN RANGE BOILERS

Montreal.

Manufacturers and distributors of range boilers describe business as quieter, although fair for the time of year. Stocks in dealers' hands have been low, and remain so, thus demand while for small quantities has continued well up to the holiday season. There is a firm tone in the market owing to the strong tendency in raw materials and other replacement costs, and following are list prices and discounts:

RANGE BOILERS

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 40 per cent. Extra heavy, 30 per cent.

REDUCED PRICES ON OILCLOTH BINDING

Montreal.

A substantial reduction is made in oilcloth binding and following are prices now quoted:

OILCLOTH BINDING—

Per dozen sets 44B—$1.65; 64B—$2.2;5 84B—$2.50; 44Z—$0.90; 64Z $1.15; 84Z—$1.30.

FIRM UNDERTONE REMAINS IN COTTON WASTES

Montreal.

With current trade in cotton wastes continuing in seasonal proportions, a firm undertone remains in the market due to the improved tone in raw cotton circles. As outlined in a previous report a further revision upwards in prices would not be surprising after the first of the year. Prevailing quotations are:

COTTON WASTES—	Per lb.
Cream polishing	0 19
White, XXX extra	0 17
White, XX grand	0 16
White, XLCR	0 15
X Empire	0 13½

Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

HOLIDAY SEASON REFLECTED IN SCRAP MARKETS

Montreal.

Winter dullness, reflecting the holiday season, is evident in the local markets for waste materials, trade being generally described as very quiet. Accompanying this is a little weaker tone in some lines, especially yellow and red metals. Brass and copper showed a slight improvement when there was a better buying movement noted in recent weeks, but interest has now subsided to quite an extent. Cast iron is also in a listless state, while steel scrap is reported as the steadiest material on the list. No changes in prices have been made, and the following are average dealers' buying quotations:

SCRAP—	
Automobile Tires	0 40
Rubber Shoes	0 02¾
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 04½

Malleable scrap (ton)	9 00 to 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 00 9 50
No. 2 busheling	3 00
Boiler plate	8 00 to 9 00
No. 1 machinery cast	20 00 22 00

QUIETER MARKET FOR MALLEABLE AND CAST FITTINGS

Montreal.

With the annual inventory period now practically at hand, there has been a noticeable slackening in demand for pipe fittings during the past week, and a quieter market is now anticipated for the opening weeks of the new year. Although there is no definite indication of a change in prices, it is stated in some quarters that slightly easier quotations may appear on some lines next month. Present discounts are as follows:

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, small	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Dart Unions, blk., ¼ to 2 in.	331-3%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, black and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ; in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., running thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—

Price list effective June 1st, 1922. Discount 70 per cent.

IMPROVED TONE IN BRASS AND COPPER PRODUCTS

Montreal.

With copper on primary metal markets displaying a firmer tone there is a strengthening attitude in such finished products as sheets, rods and tubing. Demand for these lines is also said to be fair for this time of year, and if anything a little better than in previous weeks. Quotations are unchanged and are described as steady at the following levels:

BRASS—	Base
Sheets, base	0 24
Rods, ½ to 2 inches round	0 22
Tubing, Seamless, base	0 30
COPPER—	
Rods, ½ to 2 inch	0 29
Soft sheets, plain, 16 oz. and heavier, lb	0 30
Plain tinned, 16 oz. and heavier, lb.	0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are for full sheets or bars. Cuts 5c. per lb. higher.

Discount 32½ 10 per cent.

SEASONAL TRADE IN LEAD AND ZINC PRODUCTS

Montreal.

Quotations on lead and zinc products remain unchanged, with primary metals, which enter into their production, reported as steady to firm at higher levels recently reached. The movement of the finished products is seasonal, only a moderate amount of activity uually being in evidence at this time of year. Following are unchanged price levels:

Lead pipe, per 100 lbs., up to 2"	14 00
Do., 2" to 8"	15 00
Do., 8" and over	16 00
Lead waste, per 100 lbs.	15 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½

Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs., sq. ft. lb.	0 10

Cut sheets ¼c. lb. extra, and cut sheets to size ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 22½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 36
Zinc sheets, casks	0 11
Do., broken lots	0 11½

WROUGHT PIPE REPORTED QUIETER BUT FIRM

Montreal.

Although the movement of wrought iron and steel piping has recently slackened somewhat, this is only considered seasonal, and satisfaction with business during the past season is expressed. Producers again state that present prices are firm with a strong tendency in raw materials, deliveries on some of which are still slow. Quotations remain at list No. 57.

STEADY OUTLOOK IN SHEET MARKETS

Montreal.

Interest in the local sheet markets is still attached to prospects for the opening months of next year, and it is said that the New Year should open with quite satisfactory conditions in sheet circles. Manufacturers are in many instances behind in deliveries, which, in spite of the present quieter season, should greatly assist towards maintaining a steady market position. Another factor is the apparently steady basis on which sheets are placed for the first quarter, which has resulted in considerable business being placed for later delivery. Taken altogether importers and distributors anticipate a satisfactory market for the first half of next year at least. Average local quotations are unchanged as follows:

BLACK SHEETS—	
10 gauge, base	4 25
12 gauge	4 35
14 gauge	4 45
16 gauge	4 55
18—20 gauge	4 80

Galvanized 60s	7 75

MORE SATISFACTORY CONDITIONS IN IRON AND STEEL

Montreal.

A steady to firm attitude is again presented in the market for bar iron and

steel products. Current business is only fair, and orders are for the most part small and of a sorting character, reflecting the usual condition at the present holiday and inventory period. As outlined in last week's report, however, there is more interest showing for future, and forward deliveries are being made at to-day's prices. As in other iron and steel commodities, it is expected that bar products will show an improved market tone, with a steady to firm situation assisting in this direction. Local average quotations are as follows:

IRON AND STEEL—

Common bar iron, 100 lbs.		3 15
Refined iron		4 65
Irish finish machinery steel		3 20
Mild steel		3 15
Single reeled machinery steel		5 25
Band steel	3 50	3 65
Spring steel	4 75	8 50
Sleighshoe steel		3 15
Tire steel		3 35
Harrow tooth steel		3 30
Toe caulk steel		4 05
Mining tool steel, per lb.		0 20½
Black Diamond tool and cast steel, per lb.		0 20½

NOTE.—Refined iron is approximately $1.50 per cwt. over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

NO CHANGES IN VALVE AND BIBB QUOTATIONS

Montreal.

Current quotations on valves and bibbs are unchanged, and while the market is described as steady in most quarters, there is still a feeling among some that minor revisions on certain lines will be made early in the new year. Recent minor fluctuations in raw materials have apparently not materially affected the market for finished products. Prevailing discounts are:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	45%
Bath cocks, compression	41%
Jenkins iron body, gate	25%
Bath cocks, quick opening	41%
Basin cocks, quick opening	46%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks, standard	50%
Radiator valves, standard	58%
Do., removable discs	58%
Globe, angle and check valves, standard.	25%
Gate or straightway	25%
Emco Globe valves	33%
Emco check valves	33%
Jenkins gate or straightway	16%
Jenkins iron body, globe and angle	15%
Jenkins Globe, angle, check and swing check	10%
Jenkins iron body, gate	25%

Toronto, Ont.

TORONTO, December 28.—Price developments on the current hardware markets are decidedly moderate in point of numbers. The holiday atmosphere is evident in many quarters and business is on a more or less reactionary basis from the brisk activity recorded in recent weeks. The lack of numerous market revisions is also in direct contrast to conditions which prevailed at this time last year when a lengthy budget of price changes was apparent. As foreshadowed in previous issues, an advance has materialized on asbestos products, the revision in discounts bringing the anticipated higher levels into effect.

PRICES ADVANCED ON ASBESTOS PRODUCTS

Toronto.

As foreshadowed in a former issue of Hardware and Metal, a revision has now been made in quotations on asbestos products. Discounts on air cell pipe covering have been reduced ten points, thus bringing higher price levels into effect on these products. Asbestos sheathing is likewise advanced, the new price being around eight cents per pound. Magnesia pipe covering also undergoes a similar revision, while boiler covering appears with an upward tendency. This revision is attributed to the firmer trend in primary markets, a condition previously pointed out. There is a shortage of asbestos fibre at production centres, and manufacturers state that under the present trend of the market, another advance might be expected should the upward movement continue in basic elements. Following are revised quotations:

ASBESTOS PRODUCTS—

Pipe Covering—
Air cell, 4 ply .....50 per cent. off list.
Air cell, 3 ply .....55 per cent. off list
Air cell, 2 ply .....57½% off standard list.
Boiler Covering .....$1.50 to $2.00
Asbestos Sheathing .....$8.00 per 100 lbs.
Magnesia pipe covering .....less 35%

FIRM UNDERTONE IN MANILA MARKETS

Toronto.

A firmer tone is now evident in primary manila markets, as good manila fibre has advanced several cents per lb. during the last few weeks. This has been reflected to a minor extent in the undertone of the rope market. Although the production of fibre has been extensive during the past year, it is pointed out that this has been absorbed fairly rapidly, owing to the increased general demand from manufacturers. That there is an underlying tendency to advance quotations on manila in the near future, is the current opinion expressed by rope manufacturers. Business is described as fairly satisfactory, spring bookings for cordage coming along in nice volume. Compared with former records, it is said that buying in general reflects more confidence in the business outlook and an average improvement in basic conditions.

COTTON WASTES CONTINUE AT REVISED LEVELS

Toronto.

Quotations on cotton wastes are still holding at the recently revised levels, and while the opinion has been expressed in certain quarters that a further upward movement might develop early in the New Year, up to the present no change of this kind has materialized. It is generally recognized, however, that prices are on a firm basis, and should raw cotton continue to climb and this factor be reflected in cotton wastes, the opinion is expressed that additional slight increases would not be surprising. The following levels govern the local market at present:

COTTON WASTES—

Cream, polishing	$ 0.19
White, XXX	0.19
XX	0.17
X	0.16
XC	0.14½
XXX. extra	0.17

Above lines subject to trade discount for quantity.

BOILER TUBE BUSINESS IN NORMAL STATE

Toronto.

There is a remarkable amount of business in boiler tubes at the present time, according to the opinion expressed this week by distributors. Trade is more or less in a moderate condition at this period, but one factor of some importance is that competition is not so keen as was formerly the case, and this is described as an indication that distributors have new supplies of higher-priced stocks on hand. No changes have developed from the following levels, which are representative of current transactions:

BOILER TUBES—

	Seamless	Lapweld
¾ inch	19 00	....
1 inch	20 00	....
1¼ inch	22 00	....
1½ inch	24 00	....
1¾ inch	24 00	23 00
2 inch	22 00	19 00
2¼ inch	24 00	21 50
2½ inch	27 00	23 50
3 inch	34 00	28 50
3¼ inch	36 00	33 00
3½ inch	38 00	32 00
4 inch	50 00	42 00

STRONGER UNDERTONE IN SHEET MARKETS

Toronto.

While trading in sheets and plates is passing through the usual moderate stage for this time of the year, yet the undertone is reflecting continued strength. Producers are stated to be well filled with orders and deliveries are still in the same situation, mills having their output signed up well ahead.

Steel makers are confident that the present scale of operations will be maintained throughout the first quarter of the New Year. Order books are fairly well filled and prices of finished products remain firm. Even pig iron prices, which have been receding ever since the coal shortage began to be relieved, have turned upwards, a circumstance which suggests that the bottom of this market has

been reached. One factor in hardening the pig iron market is a stiffening in coke prices, which in turn is due to a quickened demand for soft coal with the advent of cold weather.

NO ACCUMULATION OF WROUGHT PIPE STOCKS

Toronto.

While the volume of business in wrought piping during the winter months is somewhat restricted on domestic markets, and is considerably reduced during the holiday and inventory periods from the brisk activity recorded a couple of months ago, yet owing to a continued shortage in the supply of certain raw materials it is pointed out that mills are not able to accumulate any degree of stocks. This factor has also contributed towards the maintenance of firm price levels on pipe, while it is stated that for these reasons the probabilities are that deliveries will be slow during the early part of 1923. As pointed out in previous reports, more activity has been recorded in smaller sizes of black and galvanized pipe due to the building boom of the dwelling house variety experienced in the past season. On the other hand, the movement of larger sizes, three inches and up, has been retarded because of the lack of industrial building under construction. While quotations on wrought piping were advanced several times during the past year, each increase was of minor extent and the aggregate advance did not represent the proportion of higher costs in production field.

List No. 57 continues to govern the local market.

WROUGHT PIPE

Price List No. 57. November, 1922.

Standard Buttweld Pipe S/C

Size	Steel Blk.	Gen. Wrot. Galv.	Iron Blk.	Iron Galv.

DISCOUNTS UNCHANGED ON CAST IRON FITTINGS

Toronto.

No change has yet developed in quotations on cast iron fittings, although the feeling still prevails in certain quarters that some easier levels will become effective on these products in the New Year. Discounts on other pipe fittings continue unchanged, with moderate trade being recorded at this period, due to inventory and other seasonal elements. Following are current quotations:

PIPE FITTINGS—

Cast iron fittings	27%
Plugs, case iron	27%
Do., solid	27%
Do., countersunk	27%
Bushings, mail	30%
Bushings, cast	30%

Discount, Classes, A B and C, less 70 per cent.

REVISION MAY DEVELOP IN CEMENT PRICES

Toronto.

That some minor revision may develop on cement quotations early in the New Year is the current opinion found in production centres. Prices on cement have remained on a steady basis for some time. There is very little moving at present, but business is described as normal and satisfactory for this season. Another brisk period of building activity is anticipated for 1923, with some indication that large construction work will be on a heavier scale than was the case in the past season. Prevailing quotations follow:

CEMENT—Carload Lots—

Per barrel	3 63
Less Carload Lots—	
Per barrel, f.o.b. yard	4 35
Per barrel, delivered	4 55

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

FIRM UNDERTONE TO RANGE BOILERS

Toronto.

While trade in range boilers is seasonably quiet at this period, yet the undertone of the market continues quite firm. Current discounts remain unchanged, and it is stated by manufacturers and distributors that little change is anticipated for the opening weeks of the New Year at least. Prices remain unchanged at the following levels:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 60
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 40 per cent; Extra heavy, 30 per cent.

STEADY TO FIRM TONE IN LEAD AND ZINC GOODS

Toronto.

Business in lead and zinc goods is described as keeping up in fair volume for this season, with prices on a steady to firm basis. Primary metals continue to hold the recent improvement, and this strength is reflected in the finished products to a certain extent, as previously referred to. The inventory period now leaves the field clearer regarding prospects for the new year's business and an optimistic tone is generally evident. No change has developed from the following local price levels:—

LEAD AND ZINC GOODS—

Lead pipe, list per lb.		0 14
Lead Waste, pipe, list, per lb.		0 15
Do., over 8 in., list per lb.		0 16

Do., commercial, lb.		0 23½
Zinc sheets, per lb.	0 11	0 12

NO CHANGES ANTICIPATED IN TROUGH AND PIPE

Toronto.

While trade in eavestrough and conductor piping and kindred lines is naturally of a very light nature at this time of the year, yet conditions are described as fairly good. More interest is evident in the development of raw ma-

terials which may have a bearing on the future trend of price levels on these finished goods. At the present time, however, it is stated that no changes are anticipated, and the following quotations remain unchanged:—

TROUGH (Eave)—

O. G. Square Bead—

	Per 100 ft.		Per. 100 ft.
8 inch	$15 90	15 inch	$28 80

5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

SATISFACTORY VOLUME OF TRADE IN RADIATORS

Toronto.

The recent recovery in pig iron prices serves to strengthen the market for radiators and boilers, while maintaining the steady to firm undertone formerly recorded. Although current activity is moderate in extent, the prevailing price levels are unchanged, it being pointed out that no developments have occurred in basic elements. Referring to the volume of business recorded this season, one manufacturer stated that heating systems had generally experienced a brisk demand over a period of several months and satisfaction was expressed with the movement up to this time. How records compared with former seasons was something not yet available, although the general opinion was that the movement was considerably heavier because of the impetus afforded through the enlarged building activities. No changes are made in the following quotations:—

RADIATORS—

Revised radiator list prices are for 1, 2, 3, 4 and 5column radiators per square foot.

38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in. $1.40; 16 in. $1.50; 14 in. $1.55; 13 in. $1.60.

Discount on 2, 3, and 5-column standard sizes, 55 per cent. for water and 56 per cent. for steam.

Discount on 1-column standard size, and 2, 3, and 4-column hospital sizes 47 per cent. for water and 48 per cent. for steam.

Discounts on 1-column hospital size, water, 33 per cent.; steam, 34 per cent.

Wall radiators—5 ft., $1.15; 6 ft. $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05. Discount 52 per cent.

BOILERS—

Water:

Round, 60 per cent off list. Square, 20 per cent. off list

Steam:

Round, 25 per cent. off list; square, 15 per cent. off list.

FAIR TRADE VOLUME IN BRASS AND COPPER

Toronto.

The basic metals entering into the production of brass and copper goods such as rods, tubing and sheets, are apparently attempting to climb up again. While this movement has been of a minor extent up to the present, it is described as the forerunner to general improvement in these products. Current business is also very good, that is for this time of the year. Quotations on these lines remain unchanged, as follows:

BRASS—

Sheets base, per lb.	0 23
Tubing, base, per lb.	0 30
Rods, base, per lb.	0 22

COPPER—

Rods, base, per lb.	0 30
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 33

STEEL MARKETS WITHSTANDING SEASONAL DULLNESS

Toronto.

The steel market is apparently withstanding the seasonal lethargy of late December and the winter depression somewhat better than in former seasons. Current price levels remain unchanged locally, and the opinion is now expressed that existing quotations will not experience any marked revision during the ensuing weeks. That the industry is awaiting the development of another building program, is evidently numbered among the underlying anticipations for renewed activity in 1923, the opinion being expressed that the whole system of

"How the 'Morden Experiment' put New Aspect on Business for the Retailer and Others"

This is the title of an article written specially for Hardware and Metal by C. H. S. Bamford, Sales Manager J. H. Ashdown Hardware Co., Ltd., Winnipeg, showing how the Sales Managers' Association of Canada conducted an experiment in Morden, Manitoba, which has shown how certain fundamental practices underlying business conditions can be applied or altered to improve conditions for retailers and others. Meeting mail order competition, the cut price bogey and other such problems, this article gives a wealth of splendid data to the trade.

Hardware Prices Declined 5.26 per Cent. During Past Year. What of the Outlook for 1923?

By the use of charts a great deal of information has been concentrated into brief form indicating the trend of average hardware prices during 1922 and comparison with pre-war prices. There are also given a number of comments of outstanding manufacturers and wholesalers concerning the probable price trend in the first quarter of 1923. This article will help you with your buying.

Turning Over a $10,000 Stock of Automobile Accessories Three Times in One Year.

Some unique selling methods are applied by Geo. Stirrett Hardware, Toronto, to the sale of auto accessories, which have developed for it a $30,000 annual business in competition with garages.

These and many other splendid features are provided for the January 6 issue of Hardware and Metal. It is the first of the New Year issues, which will be brighter and more helpful than ever before.

steel prices will likely depend to a large extent upon the extension of such construction work, both in Canada and the United States. This element alone, is described as supplying sufficient momentum to the steel trade to carry it through the coming year with every prospect of solidity and strength. Coupled with these factors, it is pointed out that pig iron has recovered and is now experiencing an improved demand, while there is some ground for suspicion that the current demand for steel in primary centres is due to fear on the part of buyers that another coal strike may develop next April.

IRON AND STEEL—

Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90

Cast tool steel, medium		18 00

RAW MATERIAL TREND AFFECTS CORRUGATED

Toronto.

Chief interest in the corrugated sheet market at this time of the year centres around the trend of raw materials. In this respect it is pointed out that for a variety of reasons the supply of basic elements—from a production viewpoint—has continued somewhat difficult to obtain. This condition is reflected to an extent in the undertone of the market as affecting the finished product, and although little activity is evident at this season, yet existing price levels remain steady. Manufacturers point out that on the basis of raw material costs, existing price levels are well down to replacement values and firmness in quotations is expected to prevail during the initial quarter of the New Year.

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50

No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

QUIETNESS REIGNS IN SCRAP MARKETS

Toronto.

The month of December was an exceedingly quiet one in the scrap material markets and particularly in scrap iron. Transactions are not showing any volume, and recent reports from southern primary centres also indicate that matters appear to be at a temporary standstill. However, it is noted that large operators are optimistic as to the outlook for the New Year. Steel mills have steadily increased the ratio of production, while it is pointed out that most of them have orders on their books which will enable continued operation at the existing capacity for some months. While it might be expected that the fall and rise of pig iron prices would be reflected in the scrap market to some extent, yet the consideration is made that the movement in pig iron was largely the result of specific conditions which have not affected scrap very materially. Following are the dealers' average buying prices for fairly large quantities:

SCRAP MATERIALS—

Scrap Iron

Heavy melting steel	10 00
Scrap pipe	7 00
Steel turnings	10 00
Malleable scrap	10 00
Rails, scrap	11 00
Net tons—	
No. 1 cast	18 00
Stove plate	14 50
Car Wheels, (std.)	14 00

No. 1 composition	9 00
Red brass turnings	7 00
Light brass	4 50
Heavy yellow brass	5 25
Heavy lead	4 50
Tea lead	3 00
Scrap zinc	3 50

Scrap Rubber

Boots and shoes	2 25	2 75
High rubber boots	1 50	1 75
Auto tires	0 25	0 50
Solid tires	0 60	1 00

QUIET WEEK IN NON-FERROUS METAL GROUP

Toronto

The holiday atmosphere, combined with inventory and similar element, have contributed to a quieter week in ingot metals. Prices have generally remained steady, both on domestic and primary centres, while the undertone has continued firm. Lead and spelter are in a quiet state, but a firm condition is recorded. Tin and copper continue strong, while seasonal dullness is evident in the other non-ferrous metals.

COPPER.—Buying of copper has been less active on both domestic and outside markets as the business has generally taken on a holiday character. The recent improvement in prices at southern primary centres has been maintained, and while the present undertone is not considered quite so strong, prices have not suffered, and very little change is evident.

TIN.—Prices on this metal continue firm and the undertone remains one of strength. There is reported little current demand except for spring deliveries, but primary market quotations are slightly higher again. Domestic levels are unchanged.

LEAD.—The lead market remains firm, but conditions are described as quiet. This is partially attributed to the usual December slackening in consumption of this metal. There is also the inventory and holiday reaction to be taken care of. Bookings for the coming month are described as good, leaving little excess supplies on hand. There is a quiet condition, however, in outside markets.

SPELTER.—This market is also quiet but a steady tone prevails. That has been caused by the slight upward turn in London, which is taken to herald renewed interest in this direction. There is a gradually increasing disposition towards 1923 bookings on the part of domestic consumers. Consumption of zinc has been fairly heavy and it is believed that inventories will generally be on the light side.

ANTIMONY.—This market is dull and lifeless at present, the quietness previously recorded having been accentuated by holiday reaction. Prices continue at former levels, both on domestic and primary centres.

ALUMINUM. — There have been no new features in the aluminum market, but a note of optimism is prevalent for the future, it being felt that the demand during 1923 will be good, and prices may therefore continue on a steady gain.

INGOT METALS—

Copper	17 25
Tin	41 00
Lead	7 50
Spelter	9 50
Antimony	8 50
Aluminum	22 00

London, Ont.

LONDON, December 28.—Hardware price changes this week are in a minor vein, both as regards quantity and extent. Linseed oil and turpentine are both revised. The lack of numerous price developments is in direct contrast to conditions existing in the markets at this time last year. There is the customary reaction to business this week, after the holiday rush, while inventory also contributes a quieter tone.

WHITE LEAD IN OIL PRICES REMAIN FIRM

London, Ont.

The demand for white lead in oil is on a quieter basis at present, and no development has been recorded in regard to prices.

WHITE LEAD IN OIL—

	Tons	Less Tons
	Per 100 lbs.	
Pure	13 55	13 90
Elephant	14 05	14 40

ELECTRICAL PRODUCTS AMONG HOLIDAY GOODS

London, Ont.

Electrical products generally are numbered among the seasonal lines that enjoyed a brisk volume of holiday trade. Active sales are recorded for toasters, irons, grills, percolators, heaters, hair curlers, flashlights and batteries.

SUBSTANTIAL PRICE DECLINE IN TURPENTINE

London, Ont.

Turpentine price levels took a sudden drop this week, a recession of fifteen cents per gallon being recorded. This change brings current quotations to the $2 level, and is chiefly the result of the dulness in trade at this time, combined

with heavier receipts at southern primary centres. New prices follow:

TURPENTINE—

	Imp. Gal.
1 barrel lots	2 00
2 to 4 barrel lots	1 99
5 gallon lots	2 15

GOOD SALE CONTINUES FOR ASH SIFTERS

London, Ont.

The current sale of ash sifters continues good, and in seasonable proportions. Prices remain unchanged.

ASH SIFTERS—

Common Wood Sides	Doz.	2 75
Banner, No. 2	Each	2 65
Banner, No. 3	Each	1 95

WEATHER BRINGS CALL FOR SHOES AND CALKS

London, Ont.

Snow and ice, which has been prevalent through recent weeks, has served to create a good demand for horse shoes and calks. The weather is seasonal and this activity continues. Quotations on the Neverslip shoes are list less 10 per cent., and on calks list less 15 per cent.

WEATHER STRIP AMONG BRISK SELLING LINES

London, Ont.

Weather strip continues to be numbered among brisk-selling seasonal lines. Prices are, however, on a steady level at present. Following are existing prices:

WEATHERSTRIP—

Frost King—$5.00 doz.; Wood and Felt, 50-5 per cent. off list. Bronze, 1⅛" $1.05 per carton; Bronze 1¼"—$1.12 per carton; Bronze, 1½"—$1.15 per carton.

LINSEED OIL PRICES ADVANCE FIVE CENTS

London, Ont.

An advance of five cents per gallon features the linseed oil market this week. This development is primarily based upon the position of flaxseed, as there is very little oil moving at present. The revised levels are as follows:

LINSEED OIL—

	Raw Imperial Gal.	Boiled Imperial Gal.
1 to 2 barrels	$ 1 15	$ 1 18
3 to 4 barrels	1 14	1 17
6 to 9 barrels	1 12	1 15

Less barrels, 15 cents per gallon.

TEN PER CENT. INCREASE ON WRENCHES

London, Ont.

Quotations on knife-handled machinist wrenches have been advanced approximately ten per cent. Following are new net prices:

KNIFE-HANDLED WRENCHES—	Per Doz.
6 inch	9 10
8 inch	11 00
10 inch	13 50
12 inch	17 10
15 inch	23 15
18 inch	29 25
21 inch	35 35

WINDOW GLASS SALES OF MINOR NATURE

London, Ont.

The current movement of window glass continues to be of an average nature, although orders are now limited to small quantities. There has been no revision in quotations, the price trend remaining firm at unchanged levels included in the current market quotation pages.

Winnipeg, Man.

WINNIPEG, December 28.—Wholesalers and retailers report that the demand for holiday lines has been very satisfactory. Collections are showing a slight improvement. Stocks at the present time are light and the trade is looking forward to a steady business during the winter months. Both declines and advances are noticed this week. Spades and shovels have moved upward, also Jones' grain scoops. Japanned repair links, range boiler stands and air compressors show a slight reduction. Turpentine and linseed oil remain steady at unchanged prices.

PRICES MOVE UPWARD ON JONES GRAIN SCOOPS

Winnipeg.

There has been a slight advance in quotations on Jones' grain scoops. Sizes 4 are quoted at $17.85 per doz. Size 6, $19.65. Size 8, $20.45. Size 10, $21.15.

PRICES DECLINE ON RANGE BOILER STANDS

Winnipeg.

Range boiler stands of the regular type have shown a slight decline.

RANGE BOILER STANDS—

Regular—	
Size 12 in. each	2 43
Size 13 in. each	2 56
Size 14 in. each	2 64
Size 16 in. each	2 84
Size 18 in. each	3 24
Size 20 in. each	3 74
Size 22 in. each	4 05
Size 24 in. each	4 45

AIR COMPRESSORS SHOW SLIGHT REDUCTION

Winnipeg.

Air compressors have been reduced in price and following quotations are now in effect.

AIR COMPRESSORS—

Size 2	39 70
Size 3	50 10
Size 4	52 90
Size 5	113 40
With T. and L. Pulleys—	
Size 2	43 45
Size 3	53 85
Size 4	56 70

TURPENTINE PRICES REMAIN STEADY

Winnipeg.

The local price of turpentine holds steady at $2.45 in barrel lots.

WEATHER STRIP CONTINUES IN GOOD DEMAND

Winnipeg.

Weatherstrip continues to be an active seller. Prices are on a steady level without any change.

REPAIR LINKS NOW QUOTED AT LOWER LEVELS

Winnipeg.

Japanned repair links to rivet have shown a slight decline and quotations are as follows:

REPAIR LINKS—

Japanned to rivet—	
Size ¼ in. per doz.	0 55
Sizes 5/16 in. per doz.	0 60
Sizes, ⅜ in per doz.	0 70
Sizes 7/16 in. per doz.	1 10
Sizes ½ in. per doz.	1 40
Sizes 9/16 in. per doz.	2 10
Sizes ⅝ in. per doz.	2 75

LINSEED OIL MARKET UNCHANGED IN PRICE

Winnipeg.

Linseed oil prices remain unchanged at $1.20 per gallon in barrel lots for raw and $1.23 for boiled.

REVISED DISCOUNT ON SPADES AND SHOVELS

Winnipeg.

Spade and shovels have shown a slight advance in price, due principally to the higher cost of raw materials. Following are the latest quotations:

SHOVELS—

D. Handle Rd. Pt.—	
Olds, Size 2 per doz.	14 00
Jones, Size 3 Black per doz.	15 45
Jones, Size 2, Polished, per doz.	16 45

Hamilton, Ont.

Annual Inventory Now Claims Premier Attention in Hardware Industry

HAMILTON, December 28.—Market developments during the holiday period are on the conservative side. Hardware price changes, however, are generally expected to become more numerous again with the arrival of

the new year. Considerable interest is manifest in the trade concerning the trend of hardware quotations, and while some reductions are more or less anticipated on certain lines, yet the firm undertone apparent in raw material centres, is also reflected in the strengthened attitude of numerous finished products. In recent years a lengthy budget of price revisions has appeared during the first few weeks following the holiday period, and while the opinion is expressed that 1923 will be no exception in this respect, yet market developments may not be on such a broad scale as in former seasons, owing to the trend of basic elements on the one hand, with the seasonal requirements of the industry on the other. Market reports during the opening weeks of the new year should contain both interesting and valuable information.

A popular movement is recorded in ice skates, glass ovenware, hockey supplies and accessories, hockey sticks, horse shoes and calks, hand sleighs, silverware, cut glass, razors, pocket cutlery, brass ware, cross cut saws and other seasonal merchandise. Jobbers are now taking stock and most of the hardware salesmen are off the road at present. Spring bookings are reported as more general in the last two or three weeks. It is pointed out that the nature of buying throughout the year has resulted in retailers' stocks generally being at a comparatively low point.

Current operations at steel mills reflect various conditions as to orders. Such operations are being watched for the indications that they may furnish as to business conditions for next year. Movements just now as to production are not particularly significant, however, on account of the annual inventory period. Normally buyers like to have reduced shipments at this time to lighten their inventory, even though they may need much more material later on. There is said to be an increased ground for suspicion that part of the demand for steel shipments at this time is due to fear on the part of buyers that there will be another coal strike next April. Reports from primary centres show that opinion on this subject is divided. However, it is recognized that there is such a possibility, hence there is a contingency to be provided for.

A temporary lull is now evident in paint and varnish circles, which is principally attributed to the inventory period, and also the holiday season. It is stated that general prospects point toward another good session of activity for these products in the Spring of 1923, and manufacturers and distributors report making preparations accordingly. Forward Spring shipments are reaching a good total, and this aggregate is said to be satisfactory.

St. John, N. B.

Slight Increase in Maritime Holiday Business Over Records of Former Seasons

ST. JOHN, N. B., December 28.—A very heavy fall of snow just a few days before Christmas had the effect of giving the sale of sleds and framers a considerable boost. During the last few days the delivery teams of the local hardware stores have been loaded down with these goods. The demand for tubular skates lasted right up to the holiday, and in many cases the required sizes were sold completely out. One of the wholesale houses reports a very attractive business in all lines of hardware, with many rush orders on hand for immediate delivery. There was the usual last-minute rush of express orders to fill up Christmas stocks in instances where the hardware merchant had not bought heavily enough, and in lines on which there had been a heavy run. One hardware merchant claims to have done a record business in fireside furnishings. He stated that never before had they experienced such a demand. He attributed this gratifying condition to the fact that he had made a special display of a good line he had received especially for the holiday season. The goods included brass fenders, fire-side sets brass coal scuttles, spark guards and andirons. The sale of household electrical goods has been very good, much greater than last year, special interest being shown in toasters, percolators and electric irons. The toy business has been large in volume, but owing to the fact that many merchants throughout the city put in a stock as a side-line for the season, the business has been somewhat cut up, with the result that a good deal of stock will be carried over. Grocers, dry goods merchants, music stores, stationers as well as the hardware stores in many cases this year sold toys.

After interviewing many of the hardware merchants of this city, in order to compare business with last year, consensus of reports showed that sales amounted to practically the same as last year, with a slight increase in some cases. Christmas business last year was considered to have been very satisfactory. Taking into consideration that the prices of practically all seasonable goods, especially those suitable for Christmas gifts, are lower than they were last year, an equal amount of money taken in represents a considerable increase in the quantity of goods sold. This week all travelers were in, and were kept busy looking after the customers of the wholesale houses, who make a practice of spending a few days in St. John at Christmas time. New prices have been put into effect on galvanized and black sheet iron, showing a decline. Quotations are as follows:—

Galvanized. Less than one ton, in bundles of about 150 lbs., 28 gauge $7.25; 26 gauge $9.85; 24 and 22 gauge $6.70; 20, 18 and 16 gauge $6.55 per 100 lbs. Less than bundles, 7½ cents per pound.

Black, less than one ton, in bundles, 28 gauge $4.70; 26 gauge $4.55; 22 and 24 gauge $4.50 ;10 to 18 gauge $4.40. Less than bundles, 5½ cents per pound. All net cash thirty days. In lots of one to three tons less five per cent.

Sheet lead shows an advance, present prices being:

SHEET LEAD—		Full Rolls
In rolls 8 ft wide:		
2 lbs.	13 00	0 14
2½ lbs	13 00	0 14
3 lbs.	12 50	0 13½
3½	12 15	0 13½
4 lbs.	12 00	0 13

In rolls 4 ft. wide, the price is 85c per 100 lbs. over the price of rolls 8 ft. wide.

In rolls 7 inch wide:		
2 lbs.	0 14	0 14
3 lbs.	0 13½	0 13½

Summerside, P. E. I.—Reports from Summerside, Prince Edward Island, state that one of the big specialties in hardware is fox netting, and that the last year has been one of the best in the history of the business. The demand for fox wire has been greater than on any former occasion. In fact the demand has been so great that many of the mills have had trouble in filling the orders. Fishing nets, webs and supplies for the trade had a big season, especially with the lobster fishers. It is reported that the prospects for next spring in the fishing industry are exceedingly bright, and dealers in supplies are placing large orders in anticipation of the increased demand. The building trade enjoyed a good season last summer, extending into the fall, and the dealers in lumber found a good market. Practically all the rough lumber used in Prince Edward Island is brought in from New Brunswick by schooner freight. Shingles are selling at $2.50 to $5.00 per thousand, and rough lumber at $25.00 to $30.00 per thousand. The paint trade has been very satisfactory, and it is claimed that the volume of business greatly exceeded that of the last few years. Many contracts which were held over during the high price season during and immediately following the war have been completed, and painters and paint dealers have had a very good year indeed.

Calgary, Alta.

Interest in Alberta Hardware Trade Centers Around Preparations for Next Season

CALGARY, December 28.—The general report is that current trade returns are well ahead of what conditions warranted anticipating, and retailers will close the year with a satisfactory sense of value received for

services rendered. High priced, ornamental and decorative lines have not moved well, but the interest shown in the many lines of practical gift hardware has run the volume up to good figures. Jobbers have handled a nice lot of business to go out by mail and express, especially for cutlery and flat ware lines, which seem to be in good demand. All sorts of winter sporting goods have shown up well in the month's turnover. Skate stocks are badly broken, and skating boots, sleds, and skis figured prominently among youthful gifts. After three weeks of cold weather, mostly below zero, it has turned very mild.

Jobbers are stock-taking and report the usual slackness on general lines due at this season. Good repeat business is coming in on neverslip calks, sleigh bells, horse blankets, but the main interest among the jobbing trade seems to centre around preparations for next season's business. Stocks are lower than a year ago and buyers have placed larger orders with the manufacturers than at this time last year, and have done so with a good deal more confidence. Credit men report outstandings in better shape. Not only is the amount well reduced, but more confidence is felt in that portion which is overdue. The balance sheets for the year will probably include a liberal provision for the unforeseen, and with this will go the feeling that the difficulties of the past two years are put definitely behind, and confidence that the coming year will be classed among the better periods.

Very few price changes are on record. Bookings are fairly well in on the heavier lines at prices to be mutually agreed upon. Changes on the highly finished, more expensive lines are mostly downward, while on goods closer to the raw materials, the market is firm to advancing. The manufacturers' advance on shovels, spades, and scoops, has been put into effect by Alberta jobbers during the week, and current quotations are from 75 cents to $1 per dozen higher than formerly, and are in effect at Calgary, Edmonton, and Lethbridge. Jones and Bull Dog shovels and spades advance from 14.95 to 15.85. Olds and Fox shovels and spades from 13.00 to 13.75. Corporation shovels No. 3, from 15.35 to 16.25. New prices on scoops are as follows: Jones and Moose scoops No. 5—19.95; No. 6—20.40; No. 8—21.20; No. 10—22.00. Black Cat and Crescent scoops No. 2—17.50; No. 4—18.20; No. 5—18.60; No. 6—19.00; No. 8—19.75; No. 10—20.60 per dozen. For full polished all 1.00 per dozen.

Boilers and radiators have again been established at firm figures. For some months an unevenness has been noted locally and this condition seems to have settled to the following levels which are in effect at Calgary, Edmonton and Lethbridge. Round hot water boilers, all sizes, 52 off. Square hot water boilers 15 in. 3 off. Square hot water boilers 19 to 36 in., 8% off, and 48 in., net list. Round steam boilers with Alberta Government trimmings, all sizes, net. Square steam boilers with Alberta Government trimmings, 15 in., 3% off, 19 to 48 in., plus 4% list. Hot water radiation 38 in.—58.00; 32 in.—62.70; 30 in.—65.55; 26 in.—68.40; 22 in.—74.10 per 100 feet. Steam radiation 38 in.—56.00; 32 in.—61.60; 30 in.—64.40; 26 in.—67.20; 22 in.—72.80 per 100 feet. Wall radiation 7 and 9 foot loop, 63.00 per 100 feet.

Linseed oil has advanced five cents per gallon and is now quoted at 1.26 for raw and 1.29 for boiled, at Calgary, Edmonton and Lethbridge, with 10 cents added for less than barrels. The Mossberg line of wrenches and automobile tools have been adjusted for coming season and a new price list No. 24 issued, off which local jobbers are quoting a discount of five per cent.

The trade expects to see firm prices issued on heavy commodities such as barb wire, nails, staples, galvanized wire, plain twist wire, bale ties, etc., to cover early shipments in 1923. The new prices will probably be known during the coming week, and present indication seems to point to higher levels for the first quarter of the New Year.

Pittsburgh, U. S. A.

Willingness of Steel Buyers to Receive Shipments at Same Rate Shows Steadier Market

PITTSBURGH, December 28.—The prominent feature of the manner in which the steel trade is closing the year is the way in which production and shipments keep up. Usually there is a slowing down for December, partly because some manufacturing consumers slow down in their consumption and partly because buyers, whether distributors or manufacturing consumers, like to have the January 1 inventory as light as possible. A year ago for instance, December saw a sharp dip in steel production, the November rate being regained late in January; this year there is no more than a holiday dip, and little even of that. Some mills, it is reported, intended to close for this holiday week, but found delivery requirement such that they concluded to run, stopping only for the holiday. There are a few closings of departments for the week, to allow other departments to catch up with them.

The monthly report of ingot production will probably show production for the month little if any less than the rate of October and November, which was approximately 40,000,000 tons of ingots a year, the highest rate since late in 1920.

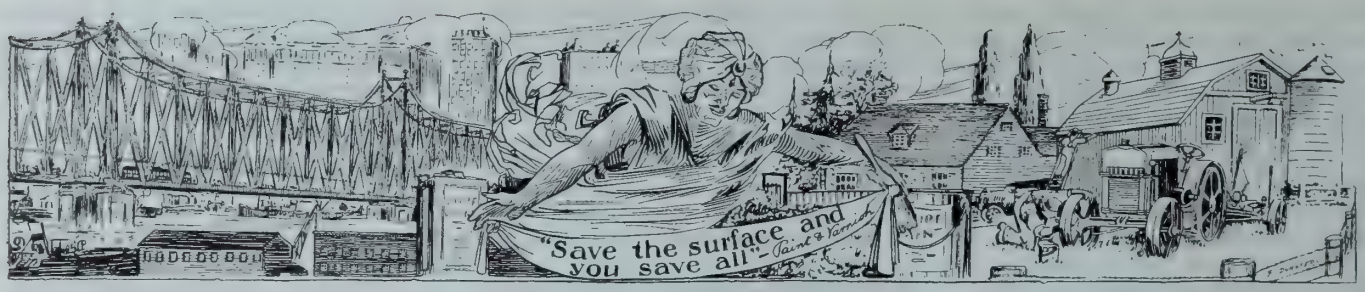
Market Seems Steadier

Concurrent with the willingness of steel buyers to receive shipments at the same rates as formerly there is a holding up of prices of bars, shapes and plates, at the 2.00c. level, better than was expected in most quarters. Possibly the market in these lines is even steadier than a month ago. Yet in some quarters it had been considered almost a foregone conclusion that these lines would be down by this time, as they had advanced proportionately more, since the low point of early in the year, than other finished steel products.

Pipe is probably the strongest item on the list, mills being far in arrears in making shipments, although they are gaining a trifle, while new business continues to come in freely. The Riverside plant, in the Wheeling district, which the National Tube Company (Steel Corporation) has put in operation after a long idleness, will be making practically full shipments by about the middle of January, and this will help materially, as the plant specializes on merchant pipe, which has been in the strongest demand of the various tubular goods.

It is reported that the American Steel & Wire Company has 15 weeks of business ahead in nails, which would mean that it can accept little business in nails for first quarter. It seems to be oversold on fence. Independents are fairly well booked, and the nail and fence markets are very strong.

Advance Bookings Are Fair



Sheet business is coming in quite well for the season of the year. There is a very fair volume of early delivery business, which is placed without difficulty as some of the independents have not much business ahead. Others, particularly those making special finish sheets, are very well booked ahead. The leading interest is now filled for first quarter. It is now booking business for second quarter, although its formal book opening on November 23 was really for first quarter only. The market is at 2.50c for blue annealed, 3.55c for black, 4.35c for galvanized, and 4.70c, 4.85c or 5.00c for automobile sheets, according to time of delivery and other conditions.

Tin plate production in the past year has been about 1,400,000 gross tons, the record, made in 1917, being a trifle over 1,500,000 tons. Regular domestic consumption was probably the highest, however, as there were light exports and light demand for tin plate making containers for exported oil. The market is firm at $4.75 for 100-pound cokes.

Foundry Iron Prices Up

The demand from the east for Connellsville coke for domestic use has continued and has sent the price up farther, as high as $9.00 being paid on a lot of 25 carloads for eastern distribution, while a fortnight ago the market was

(Continued on page 48)

Paint Cuts the Rate of Depreciation

Buildings and Implements Depreciate an Average Rate of 15% to 20% a Year if Not Properly Protected With Paint—Greet the Paint Customer With a Smile in the New Year—Show the Best Quality Goods First—Pushing Seasonable Specialties

IN LAST WEEK'S issue of Hardware and Metal a review was given briefly of some important selling points as applied to paint and varnish. This is for the use of those merchants who plan on introducing some of them during the new year. These ideas will form the basis of an aggressive selling policy for the new year and can be employed to good advantage.

Emphasis can be laid on the saving effected from the adequate use of paint. The farmer will be interested in paint if you can tell him forcibly that where reasonable care is not given and where repairs are delayed and repainting and revarnishing omitted, implements depreciate at an average rate of 15% to 20% a year and their real life is more than cut in half. Good care cuts the rate of depreciation on farm implements to less than 10% a year according to authoritative records. Some ads might be run by the merchant along the line of protecting the millions of dollars' worth of farm property, including buildings, implements and machinery and showing how paint prevents rot in wood and rust in metals. Barns, silos, fences and houses all deteriorate rapidly if not painted.

Salesmen's Conferences.

The holding of salesmen's conferences periodically to discuss selling arguments as applied to paint and varnish and other hardware lines are an important factor in connection with paint trade. Attending one such conference recently Hardware and Metal heard an interesting discussion concerning the relation of salesmen to customer, and emphasizing the necessity of always meeting the paint customer with a smile. It was also decided best to show the customer the highest quality goods first. While this might seem to be the natural thing to do it had been found on investigation that certain salesmen either through a lack of knowledge or appreciation of the best quality paint, or through sheer laziness, were consistently handing out cans of the cheaper grade paint where customers had merely asked for paint or varnish and not talked price. One store follows the policy of keeping two grades of paint, pushing the higher quality and keeping the other in case of necessity but not applying any aggressive selling to it.

There are various ideas employed in displaying paint. In one case which recently came to attention, a hardwareman keeps the paint cans in cupboards and upon the panels of these cupboards are tacked color cards and details of quantities, etc., for the information of the salesman. In addition to the color cards there are shown samples of wood finished with various stains, enamels, etc. This merchant finds that showing samples of work done, and then talking paint or varnish backed up with the color cards, is most effective. This plan keeps the paint stock in the best of condition and the labels are usually kept clean. The panels are also used for displaying paint brushes. Every brush is given a number indicating where its kind is to be found, thus saving unnecessary delay and picking over of the stock.

One hardwareman selects the various seasonable lines of paints and varnishes and concentrates his effort upon them. For instance, he uses a card on his delivery trucks which gives a brief but effective message regarding the lines seasonable in that month. At this time of year various specialties such, for instance, as refinishing floors and furniture, stove pipes, etc., are being dealt with in an interesting manner. Very often such cards announce a Saturday special sale.

Future Needs of Paint Customer

Following up prospects is very important in getting the most out of mid-winter paint trade. One hardwareman makes a point of finding out what the future needs of the paint customer are likely to be. He employs a man whose entire time is devoted to such work. He goes from job to job looking after the requirements of customers. He believes that the best time to establish close acquaintance with the paint customer is when that customer is buying paint. He tries by his service to so impress the customer with the fact that his store can give best satisfaction in meeting paint needs, that the customer will in future contemplate going no other place for his or her requirements.

In connection with following up prospects another hardwareman follows the plan of keeping a prospect card file on which salesman's number, date, name of prospect, address, what interested in, information from and remarks columns are printed. A space at the bottom is for details of promotion effort, detailing letters sent, information secured, etc. A second and third letter are sent if necessary. A ten day campaign is carried on by mail developing the principal points of the save the surface theory. If this effort does not bring results one of the store's best salesmen is sent around to help land the order. The name must be that of a real prospect to be put on the cards, and when once there no effort is spared to develop him into an enthusiastic customer. The testimonial idea is used very widely and remarks made by neighbors concerning the satisfactory use of the merchant's paint are widely quoted.

Salesmen's Knowledge of Paint

Too much emphasis cannot be laid on the subject of the salesmen's knowledge of the application of paint and varnish and the difficulties met with. Starting the new year paint salesmen might profit by making a further study of this subject. A knowledge of the various kinds of lumber treated is very useful. Different kinds of lumber require different treatment in the thinning of undercoats and in the time required for proper drying and they certainly react very differently according to the number of coats of paint applied.

(Continued on page 44)

SERVICE

CONFIDENCE

FAIR DEALING

EXCELLENCE

"All work of taste must bear a price in proportion to the skill, time, expense and risk attending their invention and manufacture. Those things called dear are, when justly estimated, the cheapest. They are attended with much less profit to the artist than those which everybody calls cheap. A disposition for cheapness and not for excellence of workmanship is the most certain cause of decay and destruction of business."—(Ruskin)

Lowe Brothers, Limited.
PAINTMAKERS — VARNISHMAKERS
TORONTO — CANADA

PAINT CUTS THE RATE

(Continued from page 42)

A knowledge of painting brick, stone and concrete surfaces would also be very helpful.

Neither the retail paint salesman nor the manufacturer's salesman may reasonably be expected to be a chemist and to know all about paint making. If he were he probably would not amount to much as a salesman because no one man can be equally proficient in both departments and to know too much about both might unfit him for either, but there is no reason why any retail paint salesman should not learn something concerning the physical characteristics of the pigments, gums and vehicles which are used in the manufacture of paints and varnishes. Even a small knowledge of the physical characteristics of lead, zinc, inerts, oils and the volatile thinners would be of almost incalculable assistance in his business. To these things may easily be added some knowledge of the gums and the foreign oils which are used in the manufacture of varnishes.

You have all heard the little saying which runs something like this—There's something of good in the worst of us and something of bad in the best of us —so it doesn't behoove any of us to talk about the rest of us. To make the application permit me to say that there is no raw material which is used in the manufacture of paints and varnishes which is perfect in itself. All raw materials which we use have their good points and their weak points. While no real good retail paint salesman would think of attempting to make unnecessary use of his very extensive fund of information, it certainly would be most desirable to be able to draw upon it when needed.

KEEPING THE WINDOWS CLEAR

(Continued from page 28)

is hung on a Pullman car spring sash balance, thus permitting it to be raised or lowered at will. At night, when the temperature ranges somewhat lower, the mirror back is raised, thus admitting warmed air to the bottles of the window and entirely preventing frost during the night. The store is heated with a hot-water heater. With this heat the radiating surfaces do not become so hot as with stove or steam heat and there is no doubt that hot-water heat is a strong factor in preventing frost on the window. The store is lighted with electricity, and this, because of the absence of an open flame, is without doubt another factor in preventing frost.

"'The proof of the pudding is in the eating,' and here's the proof of the store with the frost-proof windows: The writer's windows were entirely free from frost during the past winter, while the windows of the other stores in town were covered with frost for months at a time."

Quite a formidable list of glycerine and soap mixtures are employed for the purpose of preventing the condensation of moisture on the screens and windows of motor cars. During the war one of the Research Committees of the United States investigated the subject anew with the object of finding out the best "anti-dimming" preparation for gas-respirator eye-pieces. The official formula is as follows:

Sulphonated castor oil (85%)	100 parts
Sodium hydroxide	15 parts
Water-glass syrup	5 parts
Paraffin oil (heavy)	5 parts

The following two formulae are improvements on the above:

(1) Sodium salt of 65% sulphonated rape oil containing 35% water — 100 parts
Sodium hydroxide — 20 parts
Water-glass syrup — 5 parts
Glycerin — 3 parts
"Marine" oil — 3 parts

Dried to form a solid stick when compressed.

(2) Potassium salt of 62% sulphonated cotton oil containing 38% water — 100 parts
Sodium hydroxide — 15 parts
Water-glass syrup — 3 parts
Glycerin — 3 parts
"Marine" oil — 3 parts

Dried to form a solid stick when compressed.

The "marine" oil referred to is heavy paraffin oil. The surface of the glass is first polished until clean and dry, then a little of the composition applied, rubbed in with the hand, and polished off with a soft rag until the surface is clear.

Mid-Winter Demonstration Forerunner to Spring Paint and Varnish Trade

Montreal Retailer Takes Advantage of Christmas Shopping Throngs to Demonstrate Varnish Stains

REALIZING that the week previous to Christmas offered a splendid opportunity to get in touch with a large number of buying public, Goodwin's Limited, Montreal, planned a demonstration of varnish stain from Monday, December 18, to Saturday, December 23. During this week a multitude of womenfolk always entered the store, and it was to them that the appeal was made. Varnish stain is a line which particularly appeals to the housewife, thus it was selected from the other products on the paint shelves. In relating the success of this demonstration, the manager of the department told Hardware and Metal that, although Christmas week is always a very busy one in practically all departments, the paint department naturally did not come up to the records made in other sections and it was felt that some "life" could be instilled here if an attraction was offered.

Full Demonstration

The plans called for a section of the paint department to be set aside with a counter along the front and one side. Inside the enclosure two large panels were displayed showing just what the amateur painter could accomplish. At the top of each panel was the bare wood and below this was a painted strip showing the undercoating or ground color. Next was the graining compound, or surfacer, outlining the different grains that could be made with the use of a rubber graining comb. The rest of the large board was the finished surface, accomplished by one or two coats of varnish. These panels were assisted by two salesmen who demonstrated how the boards were coated, using smaller ones to do so. On the counters were the goods required for the job, and the interested customers in front were shown just what they would have to buy to do work such as was on display. The background of the display was shelves laden with all sized tins of stain.

The greatest attraction was what was offered on these special days. A quarter-pint tin of varnish stain and a miniature chair was sold for fifteen cents. Some of these small chairs were placed on the counters, some varnished, others plain wood. Apart from being an article on which customers could experiment, these chairs were a splendid toy for the children, thus they proved very popular just at this season. People would pay fifteen cents for the chair alone but at the same time they would get the stain, and it was safe to say that this would be used at some time or other.

Forerunner to Spring Trade

In discussing the actual amount of stain sold, the manager stated that this was not the one and only motive of the demonstration. It was not reasonable to expect that great quantities of varnish would be sold and used in mid-winter. From the experience they had had last year they found that the benefit was really derived in later months. The small can would be used and when more was required in the spring people would come back for more of the same kind. Although fair sale returns were realized even during this week of winter weather, the motive was to help pave the way for spring trade by getting in touch with the throngs when the opportunity presented itself.

Gordon Wall, who for many years was engaged in the hardware trade in Toronto, London and Windsor, Ont., has purchased a hardware business at Pasadena, California, and will reside there in future.

1883 1923

Forty Years of Successful Paint Manufacturing

Founded on Industry Intelligence and Integrity

To Our Friends

In extending you our heartiest wishes for a Happy and Prosperous New Year, we do so with a deep appreciation not only of your good will to us, as evidenced by the business you have given us, and the many courtesies we have enjoyed from you, but of those circumstances that have enabled us in the forty years of our business life to attain the measure of prosperity and success that we now enjoy. We attribute our achievement solely to our firm belief in and practice of those basic principles that underly every kind of successful human endeavor, industry, intelligence and integrity," and believe that the realization and permanency of any kind of success is measured by the extent to which these principles are adhered. Our monogram represents industry and intelligence, properly proportioned, based on integrity, and we shall endeavor in the future, as in the past, in all our relations, to live up to that ideal.

It is our sincere hope that the prosperity that is to be yours this New Year, may find its roots in this kind of soil, and that your happiness may come from the knowledge of a life lived largely and well.

Yours truly,

BENJAMIN MOORE & CO., LIMITED.

Frederick Moore

Vice-President.

Weekly Paint Markets

Montreal

MONTREAL, December 28.—An easier tone in the turpentine market, with local prices showing a recession of five cents per gallon, offers the feature of the paint markets. This present softer tone follows a period during the past week or so when a firmer tendency was displayed. With the buying movement much slower at this time, this present tendency is not surprising, but there is a general feeling that prices will firm up after the first of the year. Receipts in the South from now until the time of the new crop will be light, and low stocks will hardly allow any great recession. On the other hand it is only reasonable to expect that this condition will force prices in an upward direction. Linseed oil shows little if any change this week with a quiet tone both in oil and seed markets. White lead in oil remains in a firm market position with raw materials on a firmer price basis than was anticipated for this time of year. Certain producers are still of the opinion that higher prices may develop early in the New Year, although it is realized that a steadier market is necessary than at present prevails. Window glass, putty, and rosin are unchanged, all products reflecting the usual seasonal dullness. There is a temporary lull in activities throughout paint and varnish circles, but prospects point to a resumption of brisk activities for the requirements of spring next year.

EASIER UNDERTONE ALSO NOTED IN ROSIN

Montreal.

The holiday period is reflected in rosin, local importers and distributors reporting a very quiet market at the present time. As in turpentine, this product is also displaying an easier tone, but this is considered only a temporary condition and after the first of the year firmer prices are looked for. It is pointed out that present prices are very reasonable, and with a more active buying the required factor for a stronger market would be supplied. The following are local average prices:

RESIN— Per 100 lbs.		
"G" Medium Grade	3 75	4 00
Water white	4 50	5 00

NO FURTHER CHANGE IN LINSEED OIL PRICES

Montreal.

The linseed oil market is described as steady, but quiet. Quotations are unchanged, and the flax-seed market has shown little if any change during the past week. Interest is now attached to the future position of this product, and some are still of the opinion that a slightly lower level will be reached in the opening month of the new year notwithstanding strengthening reports from outside seed markets owing to the outcome of the crops. On domestic markets chances of continued light receipts is not overlooked, and this on the other hand, may hold the oil market in a firm position during the following weeks at least. Unchanged local prices are the following:

LINSEED OIL—	Raw	Boiled
1 to 2 bbl. lots, per	1 10	1 12
5 to 9 bbl. lots, per gal.	1 05	1 07

Less quantities, add ten cents per gallon.

WHITE LEAD STILL DISPLAYS FIRM TONE

Montreal.

Although there are still rumors of unsettlement in the white lead in oil market, the undertone is again described as very firm with piglead and linseed oil on a higher price basis than was anticipated for this time of year. Certain producers are quite firm in their ideas regarding the future trend of this product, stating that higher prices may be reached early in the New Year, especially if a steadier situation from a sales point of view is reached. Bookings for next season are in many instances already taken care of, and prospects are very satisfactory, indications pointing to a big season next year for this product. Local quotations remain as $12.25 in five-ton lots, $13.00 in one-ton lots, $13.35 in less quantities.

FIVE CENT DECLINE IN PRICE OF TURPENTINE

Montreal.

After a stronger tone in turpentine during the past week or so, this product is again displaying a weaker tendency, and prices have receded five cents per gallon, bringing the present quotation to $2.05 per gallon in one barrel lots. This price is quoted by the majority of distributors, while others are maintaining former higher levels, but easier prices are expected in these quarters also, unless a sharp reaction is noted in the market at an early date. From reports received from the South the present softening is chiefly caused by dullness during the holiday period. Naturally this will improve after the turn of the year and for this reason importers locally are of the opinion that a much firmer tone will develop before the active spring months. The past season's crop is fairly well marketed and receipts will be light until the new crop, thus it is considered that stocks will not allow any great decline. Local quotations at the revision are as follows:

TURPENTINE—	
1 barrel lots	2 05
2 to 4 barrel lots, per gal.	2 03
Broken lots	2 15

Toronto

TORONTO, December 28.—Linseed oil, turpentine and rosin supply the premier developments in the current paint markets. These developments also provide both advances and declines. Linseed oil prices have climbed up five cents per gallon chiefly owing to the current position of flax seed markets and the forward spring booking for oil. It is pointed out in local circles that crushers advanced their quotations last week, but distributors did not follow suit at that time owing to the fact that very little is moving at present. Turpentine and rosin supply the reductions this week, a sagging condition being noted in southern primary centres as a result of the general inactivity, combined with heavier receipts. This jump in the volume of receipts at southern primary markets, coupled with the usual quietness in December trade, is considered responsible for the price recession. It is also pointed out that the weather has been favorable to the gathering of the gum and the marketing of the product. Turpentine offerings during the early months of the coming year are expected to be on the conservative side, however, as it is felt that little now remains in the woods. Requirements will depend upon available stocks until the new season's crop becomes evident. Much the same condition is apparent in rosin. The window glass season is now practically over, while shellac continues on a firmer trend, thus reflecting primary developments and the moderate receipts anticipated throughout the balance of the winter. White lead in oil remains firm, but no price changes are recorded.

Brush manufacturers state that they are looking forward to a good year in 1923. In this market, the chief interest centres around the rising cost of certain raw materials, principally bristles. It is noted that these constitute the largest item of raw materials in point of value. Bristles were lowest in

TORONTO PAINT MARKETS

(Continued from page 46)

price during May and June, while the cost thereof has been steadily advancing since then. At present they are higher than was the case one year ago, the average increase being around five to seven per cent. Brush producers point out that other items in manufacturing costs are also on the increase, namely horse hair, although the comparative extent is not so great. The market is described as fair to good. Prices remain on a firm foundation, the only revision having taken place last summer, and with production costs relatively on the increase since that date, existing price levels reflect this element of strength.

EASIER TONE DEVELOPS IN ROSIN MARKET

Toronto.

Rosin shares in the current depression of the turpentine markets, and quotations are also easier. Rosin price levels on the local market are generally around fifty cents per cwt., lower than former figures, this revision reflecting prevailing conditions in primary centres. It is pointed out that the pressure of heavy receipts at southern points, and the resultant appreciation of the fact that supplies are liberal, are factors contributing to this situation. Current trade is described as relatively fair for this period of the year. Reports from the south indicate that there is little of special interest in the immediate situation, therefore, with no marked alteration in general conditions until after the New Year. Local rosin prices per 100 lbs. are, W. W. $5.25 and G. $4.00.

ADVANCED PRICES APPEAR ON LINSEED OIL

Toronto.

An advance of five cents per gallon in linseed oil prices also attracts attention this week. This development brings the figures up to $1.15 for raw and $1.18 for boiled in barrel lots. There are, however, slightly lower levels still obtainable in certain quarters owing to the fact that there is little moving at the present time. Quite a lot of oil is being booked for spring, however, and while trade at this period of the year is usually quiet, it is pointed out that the strength in flax seed markets has helped to maintain quotations on oil. The revised local prices follow:—

LINSEED OIL—	Imp. Gal. Raw	Boiled
1 to 2 barrels	1 15	1 18
3 to 5 barrels	1 14	1 17
6 to 9 barrels	1 12	1 15

Less Barrels, Add 15c gallon

TURPENTINE PRICES SAG UNDER QUIETNESS

Toronto.

A marked reduction in turpentine prices features the current paint markets. The new level is $2.00 per gallon in barrel lots, this price representing a ten cent decline from the average quotation recorded last week. In some cases, however, the new price means a reduction of fifteen cents, as the nominal level quoted one week ago was $2.15, although no business was transacted at that figure. The present softer tone in turpentine is generally attributed to the slowness in buying activity, there being the usual lack of consumption at this time of the year. There is a more or less general feeling that quotations will firm up again during the New Year, as reports from production centres indicate that receipts during the initial months will be light until the arrival of the new season's crop. Meanwhile stocks cannot be described as heavy, either locally or at southern distributing points. The revised levels follow:—

TURPENTINE—	Imp. Gal.
1 bbl. lots	$ 2 00
2 to 4 bbl lots	1 99
5 gal. lots	2 15

Less barrels, add 15 cents per gallon.

Turpentine steel drums galvanized 5c. per gallon less than barrel price. Drums charged $10 each. returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, Montreal, but freight may be equalized from any of these points.

VERY LITTLE WINDOW GLASS NOW MOVING

Toronto.

The window glass season is now practically over, and distributors state that there is very little moving at present. Trade, however, is just about according to expectations in this direction. Present price levels are considered quite firm, the current quotations on both imported and domestic window glass remaining at discounts and list found in the regular market price section.

SIGNS OF FIRMER TENDENCY IN SHELLAC

Toronto.

Shellac is still showing signs of a firmer trend, with current prices considered on a sound basis. There has been no relative change in prevailing quotations, but local conditions reflect the strengthened appearance of primary markets. The factors contributing in this direction were outlined last week, and chiefly consist in lighter receipts for the balance of the winter. Shellac gum is somewhat harder to obtain. Local prices are unchanged at the following levels:—

SHELLAC—	White	Orange
Five gallon jugs	4 25	3 75
One gallon jugs	4 85	4 45

MORE ENTHUSIASM IS BEHIND PAINT SALES

Toronto.

Manufacturers point out that conditions in the paint industry during the past year have been very satisfactory from the standpoint of raw material supply conditions, manufacturing elements, and the enthusiasm which has been evident behind the selling of paints and varnishes, from the manufacturer to the retailer. This has in turn awakened a new interest in the value of paint. Regarding the advent of 1923, it is stated that prospects of another big paint year are generally very optimistic. Quotations have become more stationary, although certain raw materials have fluctuated somewhat and are now costing more than was the case one year ago. An undertone of firmness is therefore apparent, and the opinion is expressed that although prices may not advance, there is no possibility of reductions, owing to these contributing elements.

BRISTLE PRICES CONTINUE ON FIRM BASIS

Toronto.

Spring bookings for brushes, both painters' and household, are stated to be heavier than one year ago, and the general prospects for business during 1923 are therefore very good. This is partially accounted for by the brighter outlook for trade in general, improved conditions in agricultural sections of the country and also by the fact that stocks on dealers' shelves, on the average, were in a very low state at the conclusion of last season's trade. Prices on brushes continue on a firm level, owing chiefly to the fact that bristles are hard to secure, the output thereof having been somewhat curtailed. This has in turn caused a firmer tendency in prices. Horsehair, another product used extensively in the manufacture of certain classes of brushes, is also scarce and prices are advancing. Manufacturers point out that this will likely affect the quotations of brushes in which this material is used. With current indications that an increased demand for bristles will materialize, it is anticipated that brush price levels will therefore remain firm for the initial months of the new year.

PITTSBURGH MARKETS

(Continued from page 46)

easy at $6.50 for good grades of furnace coke. The eastern demand has cleaned up all coke, including some that was of doubtful value for metallurgical purposes. This outside demand has put the blast furnaces in awkward position, as they expected cheaper, not dearer, coke, when they sold foundry pig iron at $25 valley, for first quarter.

WHAT THE RETAIL HARDWARE SALESMAN SHOULD SELL

(Continued from page 29)

And we will take a malleable range which retails at $100, the cost being $67.50.

The gross profit is, therefore, $32.50.

The salesman's share is $10.83.

During the period when he is selling stoves he must, therefore, average three stoves a week in order to make a salary of $32.50.

According to the chart he would have earned $30.33.

They Always Call Again

ENAMELEDWARE

The **CLEAN** *Ware*

Most Readily Saleable of all Kitchen Ware

Davidson Enameledware brings easily made, profitable sales to satisfied customers for every dealer who handles it. Its popularity, earned by durability; stain-proof, sanitary cleanliness and extreme heat retaining capacity, increases every year.

Housewives know the Davidson Label and the genuine quality and service it stands for and the merchant who sells enameledware bearing it, shares in their confidence.

The Thos. Davidson Mfg. Co. Limited

Established 1860

Head Office and Factory: Montreal

DAVIDSON'S GOODS MADE IN CANADA BEAR THE SEAL OF DURABILITY

PARKINSON

"Monitor" Furnace

Mr. Hardware Dealer, there are several tinsmiths and plumbers in your town who are prospects for this Parkinson Monitor Furnace, also electricians, gas and water companies. It is used for heating soldering irons, bending iron pipe, melting lead, tempering tools, and has many other uses. It uses coal oil and is economical and efficient. Get one of these furnaces into your stock, put it on your counter, tell your customer it is British made throughout, by Parkinson, and the rest is easy, it will sell itself. Write our nearest agent or your jobber for prices and description.

The Standard Meter Co. Limited
TORONTO, CANADA

AGENTS:
Manitoba and West: Frederic Sara & Co., Calgary, Alta.
Ontario and East: A. G. & A. L. Brown Company, 207 St. James Street, Montreal, Que.

The **Apex**

ELECTRIC SUCTION CLEANER

Gets All the Dirt *Everywhere*

Tell your customers that the exclusive inclined Apex nozzle will clean the dirt out of stair corners, will get under radiators and low furniture, will sweep close to table legs, will go square up to baseboards and so get all the dirt, everywhere.

Our literature and sales plans are bright, attractive and business builders. Write for them. They are free.

McDonald & Willson, Limited

MEAKINS BRUSHES

Use a Meakins Brush

To Save the Surface

To apply the protecting film of paint or varnish or Kalsomine you need a good brush — a Meakins Brush.

Unless this film is continuous and of unvarying density—if there are gaps and holes left on the surface as there must invariably be with the use of a poor brush —decay will set in and the remainder of the work rendered useless.

Be sure then to sell Meakins' good brushes whenever there is a painting job to be done. With their use smooth, even results are obtained with a minimum of effort.

Meakins Brushes help save the surface

TINKER TOM'S TALKS.

No. 391

We Thank You!

The orders which came to us in the year just closing helped to make the second largest year in our business from a tonnage standpoint.

The continued preference of the trade for

"PREMIER" GALVANIZED STEEL SHEETS

AND

TONCAN METAL GALVANIZED SHEETS

is indicated by the entire absence of complaints from our jobbers.

YOU'LL THANK US!

in the New Year if you take our "tip" to contract now for your Galvanized Sheet needs for the early part of 1923.

We have everything all set—the best sheets—flat, smooth and soft—beautifully coated with pure Canadian Spelter, and a 50% increase in our facilities for production.

It's going to be a big year—in fact we're out to make it our biggest with your help.

Tear this page out and if I'm wrong write me about April next.

TINKER TOM.

DOMINION SHEET METAL CORP. LTD
MADE IN PREMIER CANADA
HAMILTON, CANADA.

If interested, tear out this page and place with letters to be answered

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Your Winter Sales

Can be Increased by Featuring

Buckeye Incubators and Brooders

These lines are not only profitable but are business builders making real friends of your customers.

Buckeye Incubators

Hatch more and better chicks.

Buckeye Brooders

Will raise three chicks where one grew before, and raise them better.

Both Incubators and brooders simple and easy to operate. A post card will bring you catalog and prices.

The J. H. Ashdown Hardware Co., Limited

SASKATOON WINNIPEG CALGARY EDMONTON

Abbey & Imbrie

"Fishing Tackle that's Fit for Fishing"

January!

January is the month in which the foresighted dealer gets into action on his fishing tackle stock. He orders in January to make sure that his line will be O.K. when the consumer demand begins and that he will not miss sales through unreadiness. An early period of warm weather does not take him by surprise and send his customers to the rival down the street.

He knows that if he tells the manufacturer early what he is going to want the manufacturer is sure to deliver on time, and that if he sends in his order when there is a last-minute jam, he may have to wait and lose business.

Give us your order now and mark it for delivery on some date in the Spring.

Printer has promised 1923 catalog by January 15. Drop us a card now and we will send you one of the first copies off the press.

PNEUMATIC WATER SUPPLY SYSTEM

Gives country residents all the advantages of a city water system without the excessive cost

The wide-awake dealer will make big profits out of this system among customers who now have difficulty with their water supply. It is so simple to operate and costs practically nothing for upkeep.

The outfit consists of an air-tight steel tank which can be placed in the basement, and a "Myers" famous guaranteed pump (hand or power), suitable for pumping air or water, together with pipes and fittings. Any plumber or gas fitter can easily install it. Every outfit guaranteed to do the work for which it is designed. For small or large dwellings.

Write us for Water System Catalogue and prices. Now is the time to interest your customers.

Important Announcement To Western Sheet Metal Trade

METAL SHINGLE & SIDING CO., LTD., and WESTERN STEEL PRODUCTS, LTD., two of Canada's largest Sheet Metal industries, arrange basis of association covering the manufacturing and marketing of the products of their Factories.

An arrangement has just been completed of great interest to the Sheet Metal trade of the west between the Metal Shingle & Siding Co., Limited, of Preston and Montreal, and subsidiaries of this Company having offices and factories at Winnipeg, Calgary and Saskatoon, and the Western Steel Products, Limited, of Winnipeg, having branch offices and factories at Calgary, Edmonton and Regina.

The offices of the Metal Shingle & Siding Co., Limited, in Manitoba, Saskatchewan and Alberta, at the three points above mentioned will be closed on January 1st, 1923, and the Western Steel Products, Limited, will take complete charge over the territory of the four provinces of the manufacture and sale of the products of the factories of both Companies.

In addition to selling the products of the combined factories in the west, the Western Steel Products, Limited, will act as exclusive selling agents for the Metal Shingle & Siding Co., Limited, of Preston and Montreal for products which are not made in the Western factories —such as Metal Lath, Rolling Steel Shutters, Steel Sash, O.K. Thimbles, Swartwout Ventilators, etc.

Under the new arrangement factories and sales offices will be operated at Winnipeg, Saskatoon, Regina, Calgary, Edmonton and Vancouver, and from these centres the products of the factories, both east and west, will be distributed throughout the adjoining territory.

Under this arrangement, economies in purchasing, in selling and in manufacturing will be possible, and, as well, the requirements of the Western Provinces will be more closely looked after.

The Western Steel Products, Limited, will be in a position to take care of practically every requirement of the Western Sheet Metal trade, and will be in a position to give careful and efficient service to its customers.

That Big Farm Job—

"We feel that **there is an exceptionally good field for business in the rural districts** where the Farmer is wakening to the fact that he can have at a fairly moderate cost the conveniences of the city resident; and **with a little concentrated work** on the part of the manufacturer, the jobber and the Sanitary Engineer **this business should be more extensive** . . .We personally feel that general business in 1923 will exceed that of 1922."—Empire Brass Mfg. Co., Ltd., London, Ont.

Are you game for that concentrated work? Are you after Mr. Farmer's business? He's had good crops and he's realizing how plumbing and heating equipment can help him to make more money and have a better farm. But it's like all other worth while things, this business—**you have to go after it.**
Facts and figures and selling arguments are in Sanitary Engineer every issue. The plumbers of Canada must make a definite drive for this business. Read the practical information and the selling helps twice a month in Sanitary Engineer and see how many farmers you can "sign up" during 1923!

"We have found some improvement in business during the past few months and we think that the prospects for the coming year are better than they have been for some time during the past. **There must certainly be a considerable volume of building business** during 1923 which has a direct bearing on the line of business in which we are interested."—Amherst Foundry Co., Ltd., Amherst, N.S.

Doesn't this look as though you should start the new year off the right way? "Volume of building" means lots of plumbing and heating and steamfitting. Be sure you're prepared to go after it with the best ideas, the best prices and the most convincing selling arguments. Every issue of Sanitary Engineer will give you technical information, lowest market prices and quotations, and selling arguments. It will give you the right start for bigger business in the New Year.

"Any person undertaking to do plumbing and drainage work without the necessary training and qualifications is like a person performing a serious operation without the necessary surgical knowledge."

"Every employer should be discouraged from allowing handy men, etc., to do plumbing work. These men install sinks, basins, etc., using all manner of material as waste pipes. They undoubtedly get rid of the waste water but they take no precaution against the syphoning of traps, thus admitting sewer air into the building . . .In several cases fixture steam traps were found discharging from soil pipes. This is bad practice because expansion and contraction caused the lead in joints to get out of place in a very short time."

This is an extract from an article by a plumbing inspector who closely examined sanitary conditions in industries. He tells of the many opportunities he sees for plumbers to go after employers and sell more equipment. His speech is chock full of definite cases and remedies for them. If you're looking for arguments to put up to the big employer to get more business from him, just read this article. You'll find it in the January 1 issue of Sanitary Engineer. Send for it **now.**

And More Important than Ever—"Markets"

Do you follow the market price fluctuations of your staple supplies? Do you take advantage of a favorable market to buy in? Do you know what the saving is between haphazard buying and buying at the right time?
SANITARY ENGINEER Price Quotation Section will inform you twice monthly of market conditions and will place before you quotations on all your supplies.

DEXTER

LOCKS Tubular LATCHES

No Mortising — No Gouging — Just Bore Four Holes

LATCH SET 1293.

The Dexter Latch is rapidly filling a long-felt want for clothes closets or communicating doors in apartments, office buildings, hotels and private houses, in fact any door that is not required to be locked. For installation just bore two holes.

This set can be supplied in either solid brass or steel in all standard finishes. All sets have simplex knobs.

Kindly send for catalogue showing entire line of Dexter Locks and Latches.

Experts and beginners insist on the ski with the blue trade-mark. It is the most widely advertised, most popular ski in the world. Cash in on Northland's popularity. Benefit by its wide spread publicity—order a complete stock to-day and be ready for this winter's demand.

New catalog on request.

NORTHLAND SKI MFG. CO., 23 Merriam Park, St. Paul, Minn.

World's Largest Ski Manufacturers.

THE PROGRESSIVE MANUFACTURING CO.

Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others That's why you should sell them. Order through your jobber to-day.

If interested tear out this page and place with letters to be answered.

"What Will The Financial Post do for Me?"

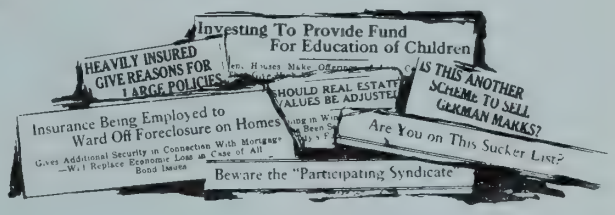
THE FINANCIAL POST will bring to you each week a wealth of news that you cannot get elsewhere: news of investments, business developments, financial matters. It will bring you the studied views of Canada's leading economic thinkers, men who tell you how national and political problems can be solved, how the turn of the affairs affects you personally.

It will bring you, too, a personalized investment service; it will tell you how to invest your savings to bring the greatest return; and how to avoid loss from poor investments. It will answer every question you may care to ask the editor regarding individual companies, about investment firms, about insurance, stocks, bonds, real estate and similar subjects that may vex you.

The Most Profitable Security of All

It is not a bond nor a stock nor a mortgage but it is the security afforded by sound and timely information on investments. This you can get from THE FINANCIAL POST, Canada's leading investment weekly. A very small investment here will yield you extraordinary returns. One bad investment may cost you a large part of one year's profits. Good investment, on the other hand, will bring you peace of mind and surety of financial success.

Turning Knowledge Into Profits



Such is the basis of all business effort. The more thoroughly you know your business the more quickly will you forge ahead financially. So with investing your savings. The road to financial independence is made easier by a knowledge of investment fundamentals and current conditions.

For sixteen years THE FINANCIAL POST has been the dependable investment guide of thousands of Canadian business men. Let it guide you along the perilous road of investing.

The PLUS Feature of the Post's Service

Every subscriber has the privilege of submitting his own investment problems to the editor. You may ask as many questions as you like and they will be freely and thoroughly answered. This service alone is worth more than the subscription price.

What You Get Each Week

News of stocks, securities and companies.
Review of business conditions.
Crop reports.
Reports on real estate and building throughout Canada.
Discussions on bond investing.
Insurance for buyer and seller.
Taxation problems.
Statistical information of value to every investor.
Weekly quotations on all securities.
Articles on immigration and other national problems.
Etc., etc., etc.

Use the coupon to subscribe for The Financial Post. It will bring you weekly messages of real help. 9,000 other Canadian investors are subscribers.

Pembroke **Ontario**

EASTERN REPRESENTATIVES:
Messrs. Bacon & Co., Ltd., 131 St. Paul St. West, Montreal.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FOR SALE

ADDRESSING MACHINE FOR SALE

We have a complete Belknap Addressing Equipment for sale. This equipment is still in use in our Subscription Department and is in excellent working order. We have placed an attractive price on this outfit, and would advise manufacturers or merchants having a mailing list to let us tell you how it will save you money. We will give a guarantee as to the proper working condition of this equipment. The MacLean Publishing Co., Ltd., 143 University Ave., Toronto, Ontario.

MISCELLANEOUS

NICKEL PLATING — ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St Montreal. Telephone Main 8144.

FUEL OIL STORAGE TANK
10,000 Gallons Capacity.

This is a new tank. We have not yet taken delivery of it, and offer it at a very attractive price. The tank will be sold within the coming week, so phone or wire if interested. Apply MR. VOGAN, The MacLean Publishing Co., Ltd., 143 University Ave., Toronto, Adelaide, 5740.

The Audit Bureau of Circulations has helped build a reputation for

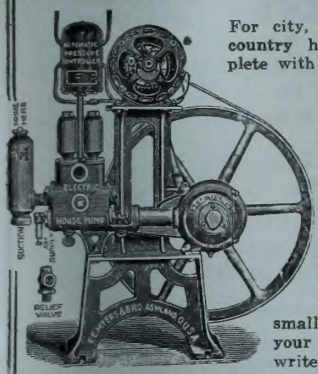
Hardware and Metal.

It is reported that a few years ago half the money expended on advertising was wasted.

Six years ago space was bought by guesswork. Now it is bought with a definite knowledge of circulation—how many copies are printed, how they are distributed, how many paid for and how many given away.

The advertiser who does not protect himself by asking to see the A.B.C. reports of the publications he uses is reactionary and invites a return to the wasteful methods of former years.

Be on the safe side. HARDWARE AND METAL is a member of the A.B.C. Its advertisers are fully protected.



TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

MYERS Electric House Pumps

For city, suburban or country homes. Complete with tank or separate. Operation by any current. Automatically controlled. Self-oiling. Capacity 180 gallons per hour. Strong, compact, easy to install; occupies small space. Ask your jobber or write us.

STOVE PIPE ENAMEL
SHOE HEEL ENAMEL

H+W

Twenty-Two Beautiful Tints for Your Customers to Choose from

DECOTINT solves the old, old riddle of how to secure permanently beautiful interior walls and ceilings at little cost.

Decotint—so inexpensive, so artistic, so sanitary—in a range of twenty-two beautiful tints from among which it will be so easy for your customers to select the color combination they most desire.

Decotint is put up in handy-sized packages and is ready for use with the mere addition of cold water. It is very easy to apply and is extremely durable, retaining its original brightness and beauty indefinitely. Unlike cheap kalsomine paint it will not chalk or rub off on the clothing.

Order a supply now and let your customers know you handle this and the other Deco-Tint Blue Labeled products listed here.
